The report declared that China grass was really a substitute for cotton; that it had far more affinity for dyes; that when mixed with cotton it gave greater strength and durability to the tissues than those which pure cotton possessed; that in spinning, weaving, dyeing and printing, the same machinery and the same modes of proceeding were applicable in both cases; that when used alone it produced goods of a new type, partaking somewhat of the qualities both of cotton and linen; and, lastly,

Digitized by Google

that the shrinking and loss of weight from the operations of bleaching and dyeing were no more, and in some cases less, than in the case of goods produced from the best Louisiana cotton. As regards price, it was stated that the cost of the China grass when prepared for spinning was less than sevenpence a pound. This report was drawn up and published in December last. Since that period the Rouen Chamber of Commerce and a number of persons interested in cotton manufacture have made further experiments, with results, as recorded, of the most encouraging description. Specimens of drills of various kinds, and dyed of various colours, have been produced, in which China grass and cotton were mixed in the proportion of 55 per cent. of the former to 45 per cent. of the latter, and have been declared to excel ordinary drills in every respect, especially as regards the lustre of the surface. The new reports state that China grass works almost without waste and costs less than three shillings per kilogramme of the tissue, while pure cotton costs nearly five shillings per kilogramme; and a mixture of the two fibres, like those just named, to less than four shillings per kilogramme, or about twenty-two pence the English pound. The spinner and weaver who have produced the specimen, alluded to express themselves prepared to take any quantity of the material and yarn to the extent of a ton a day; and the former declares that he is prepared to devote himself entirely to the working of China grass, which, he says, can be employed by itself, or in the proportion of 60 to 75 per cent. with great economy. If these reports be not all painted *couleur de rose*, it appears that the want of a sufficient quantity of the raw material is the only thing which hinders the immediate development of the China grass trade. A company, consisting principally of leading men in the cotton manufacture has been formed with the view of establishing works for the preparation of the fibre at Rouen, and also of taking measures for securing an import of the material from the East, and for the encouragement of its growth in France and Algeria. It is said to flourish well in the latter country, and to exhibit no difficulty whatever in acclimatising itself in the former. It appears that when the Emperor was at Algiers his attention was specially called to some that was growing in the Jardin d'Acclimatation, and that he exhibited great interest in the subject, and this fact has doubtless given a spur to the manufacturers and others who have taken the matter in hand. The people of Rouen are wise in increasing the number of the baskets in which they carry their eggs; they have suffered deeply by their too absolute dependence on cotton, and if China grass is to be had at a remunerative price in any part of the world, it will be a great boon to them as well as to others. The importation of a few hundred bales will soon settle the question of price with regard to the foreign fibre, which alone can be of immediate interest; for the produce of France, Algeria, or elsewhere nearer home, however great or cheap it may possibly become hereafter, cannot be calculated upon for an immediate supply of any extent.

TEA.

(*Travers' Circular, July* 15.)

The general election has seriously impeded business, especially in the large manufacturing towns, in some of which disturbances of a serious character have occurred. The London season is virtually finished, and the town is already beginning to empty, but notwithstanding these satisfactory reasons for the continuance of a delay to trade that began with the first intimation of a lower duty, the united purchases made by the retail trade of wholesale houses during this month appear to have been more considerable than have lately been imagined, and the deliveries during the month of June were likewise large. Indeed, according to present appearances, the reduction of duty seems to have fulfilled every rational expectation which was formed with regard to it. The official figures are not yet published, but the estimated deliveries for June show an excess over the corresponding month of last year of 7,000,000 lbs., and the surplus stock is, in consequence, very much reduced; it is not now materially larger than it was at this time last year. Consumption at home apparently increases, not in an exceptional or spasmodic manner, but under conditions of social prosperity, and with low retail prices such as are likely to render the increase progressive; while an extraneous encouragement is afforded by the prospects of the export trade, which are more hopeful than they have been for some time. But perhaps a careful examination of facts will exhibit matters in a somewhat different light, and leave less cause for congratulation upon the immediate consequences of a measure which must ultimately exercise a most beneficial influence. Deliveries last month were decidedly exceptional, and may be said to have been both retrospectively and prospectively out of the ordinary course of the trade. On the one hand, the clearances during April were small, and in May merely nominal—thus leaving some arrears to be made up; while, on the other hand, uncertainty as to what the demands of the public might actually be, and a desire to figure advantageously in the Customs' returns, caused clearances to be made far in excess of immediate wants, the effect being to restrict deliveries for several months to come. The estimated London duty-paid deliveries for the six months ending 30th June, 1865, are scarcely more than 2,000,000 lbs. larger than for the same period of 1864, and though the amount sent coastwise, under bond, is for the same period nearly 4,000,000 lbs. in excess, it does not of necessity follow that all this has as yet passed into consumption, nor is it improbable that by the end of September the relative excess in delivery may be considerably smaller. The importance of the fact that the stock has now been reduced nearly to the level of this time last year will be greatly diminished when it is remembered that 1864 was, as regards tea, a year of excessive import, that the stock at the end of June was larger by several million pounds than it had been at the same period of any previous year, and that there is still nine months' stock in the country after every allowance has been made for increased consumption.

(*Travers' Circular, July* 22.)

The elections are now nearly over, but the excitement attending them has not been favourable to business, and it is probable that some weeks may yet elapse before this has entirely subsided; at present there seems to be little likelihood of any immediate change for the better. Greater and more prolonged excitement appears to have been caused in the provinces than in London, as might be expected, attention in small communities being more readily diverted by any unusual occurrence that breaks the common routine of every-day life and concentrates notice fort the time on public affairs. The same influences affect, though in a lesser degree, the great centres of commerce; but in these the machinery of business is so perfect, and its subdivision so minute, that the results of any disturbing cause are not so apparent as in smaller communities, where the entire control of trade is vested in few hands. It would seem that the elections have affected this market more than that for any other article of produce; indeed, the trade in tea appears to be particularly sensitive to the influence of passing events, and the article itself seems to be still regarded more as a luxury than as a necessary of life. It is not easy to estimate the effect which any general out-door excitement, accompanied as it usually is by the free use of other stimulants, has upon the consumption of tea, but it must be considerable enough to diminish for the time the sales made by grocers, and, as a consequence, the necessity for their laying in fresh supplies. The experience of late years has shown that purchases of tea have as a rule been made in advance, either with a view to secure some real or fancied advantage of market value, or from an idea that some particular description, at one time on offer, might not be again obtainable, and great encouragement to buy forward is held out by the long credit of three months allowed on tea, while sugar and all the other articles principally dealt in by grocers are sold on shorter terms; thus the former was, and is still, amongst many of the older members of the trade, bought long before it is actually required, while the latter is purchased from hand to mouth. Although the further shortening of the credit allowed by refiners on sugar may eventually alter this practice, the change has not been long enough in operation to bring about any material reduction in the stocks of tea held by grocers, as compared with their usual stocks of a year or two since; still this may be to a degree accounted for by the cheapness of money for three months after the reduction of credit on sugar, and the ease with which extension of time, on the old terms of two months, could be obtained. Thus the influence of the shortening of credit was to a great extent counteracted by an easy money market and the temptingly low price of tea. But the grocers' stocks are, in spite of the recent large deliveries, still heavy enough to make them indifferent to their further augmentation, at least till after the elections are over. On the whole, although the elections may have injured for the time the business of the regular trader, it must not be forgotten that by finding temporary employment and remuneration for many persons who have no regular income, large sums of money are circulated, and the power to purchase necessaries and luxuries is in consequence increased, so that there is a fair prospect of the loss being made up by subsequent larger sales.

Meanwhile demand is still deferred, and it seems likely that its increase will be spread over a longer period, and be much more gradual than was at first anticipated. Even those who were most sanguine as to the effect of the reduction must, by this time, be aware that its results are to be traced rather in a steady augmentation of deliveries and a greater equality of value than in excited markets and speculative prices. The simultaneous rush which was predicted might have occurred had trade stocks been low, and had prices continued moderate, but as the very reverse of this was the case, there was no necessity and little temptation to purchase; everybody in consequence held off, and time was afforded for the excitement to cool down. It is not probable that demand during the next two months will be very large, as the practice of autumn travelling, which has of late years become so general, will cause great numbers of the middle and upper classes to be absent from England during August and September, and these are, in proportion to their numbers, by far the largest consumers of Tea. Harvest operations will also be going on, and are more likely to add to the revenue through the medium of the Excise than through that of the Customs, more beer than tea being consumed during a hot day's harvesting. As regards supply, the news brought by the last mail from China is on the whole of a satisfactory character, and seems to prove that no scarcity need be apprehended. It is true that the rebels are still in force in some of the tea districts, but their vicinity appears to exercise wonderfully little influence, and to increase rather than to diminish the prospects of an abundant supply. It is stated that the people, being cut off by the presence of the rebels from other means of employment, are obliged to engage, in unusual numbers, in the tea trade, while the market having opened early, money has been quickly circulated, and production is not retarded by want of funds. The opening price having also been higher than it was last year, manufacturers will be further encouraged to push forward large quantities from the later crops, and as numerous sailing vessels and one steamer are reported to be waiting for cargoes, it seems probable that the shipments of the present season will not be below the average, and that they will reach this country about the usual time, instead of being several weeks later, as was at one time anticipated; in confirmation of this, later intelligence was received by telegraph some weeks ago, stating that the first two vessels of the season had been despatched from Foochow at the usual time. As regards quality, the news brought by the mail is not so satisfactory. So far as it was possible to judge from the first samples of the new crop received at Foochow, all the worst faults of last season's shipments appeared to have been repeated, if not exaggerated. This is no doubt owing to hasty preparation, partly caused, it may be, by the proximity of the rebels, and partly by a desire to reach the market early, and so to obtain a higher price; it is to be hoped that subsequent arrivals will exhibit more careful manufacture, as fine tea is much wanted here, and will well repay the value of any extra expense incurred in preparation. This fact must be so patent to importers that it is scarcely necessary to enlarge upon it, as it is well known that the heavy losses which resulted from the shipments made last season may be attributed rather to general inferiority in quality than to superabundant supply. The importance of India as a competitor for the supply of this market seems as yet to be scarcely recognised in China, and even to be totally ignored; but those who ship from the latter country may rest assured that unless the quality of their imports improves, and comes up to the standard of three years ago, they will be left behind in the race, as fine tea will, under the new rate of duty, be more in demand here than ever. Production is extending so rapidly in India, under the

Digitized by Google

influence of European skill and energy, that the exceptional prices at present paid for its teas cannot long be maintained, and ere many years have passed the two competitors will meet on equal terms in this market, where, with the strict justice that is inevitably awarded in all large markets in valuations and sales, the preference will of course be given to the tea which combines the requisites of fine flavour and great strength.

THE LATE MR. RICHARD THORNTON.

The will of this gentleman, so well known at Lloyd's, the Jerusalem Coffee-house, and almost every commercial establishment in the city, and who died a few weeks ago, leaving the enormous wealth of £3,700,000, was proved at Doctors'-commons on Friday the 21st instant. It contains the following bequests:—£1,000,000 to Mr. Thomas Thornton, who likewise is to inherit the deceased's estates; £1,000,000 to Mr. Richard Thornton West; £500,000 to be divided among other relations and friends; a handsome provision for Mr. Neal and other of the deceased's clerks; £100,000 to be divided among all the charities, hospitals, asylums, and benevolent institutions in London. To the Leathersellers' Company, of which he was father, £5,000; to Christ's Hospital, £5,000; to Christ's Hospital for Hetherington, £10,000, and the Charity for the Blind, £2,000; St. Thomas's Hospital, £2,000; Guy's Hospital, £2,000; Bethlehem Hospital, £2,000; St. Luke's Hospital, £2,000; Magdalen Hospital, £2,000; Orthopædic Hospital, £2,000; London Hospital, £2,000; St. Mark's Hospital, £2,000; Incurables' Hospital, £2,000; Dreadnought Hospital, 2,000; Victoria Park Hospital, £2,000. Asylums, institutions, and societies:—City of London Truss Society, £2,000; National Lifeboat Institution, £2,000; Merchant Seamen's Orphan Asylum, £2,000; London Orphan Asylum, £2,000; Infant Orphan Asylum, £2,000; British Orphan Asylum, £2,000; Female Orphan Asylum, £2,000; Deaf and Dumb Asylum, £2,000; Indigent Blind Asylum, £2,000; Asylum for Idiots, £2,000; Asylum for Fatherless Children, £2,000; Ladies' Charity School, £2,000; St. Ann's School, £2,000; National Benevolent Institution, £2,000. Other bequests:—To the minister and churchwardens of Merton, for the erection of schools and apprenticing the poor children educated there, £10,000; to the ministers and churchwardens of the churches in the villages of Burton and Thornton, for the maintenance of schools erected there by the late Mr. M. Thornton, £10,000; for the relief of the poor at Merton, £1,000; for the relief of the poor at Burton, £5,000; to his nurse, £1,000; his coachman, £500; his gardener, £500; his under-gardener, £200. The will also contains bequests to other parties and acquaintances. It is represented that the probate duty of the will cost £42,000, and the legacy duty will amount to upwards of £100,000.

Mr. Thornton's career as a merchant in the City was most extraordinary. He was the son of a north country gentleman, and was born in 1776 at Burton, a village in Lonsdale, Westmoreland. The tourist to that sequestered region will find a handsome monument of Mr. R. Thornton's attachment to his birthplace in the Charity School, which he built at a cost of £40,000, and endowed, for the lodging, boarding, and teaching of poor children in the parishes of Burton and Thornton. He was educated at Christ's Hospital, and on leaving school he entered into business at Southwark; but very few of the oldest City men can remember Mr. Thornton's first start in his commercial career. The circumstances of that time were very different to our conditions in later days. It was during our great war with the French Empire, when England was excluded from the markets of Europe, and when the continental trade was of immensely great importance to us, that Mr. Thornton, who was then carrying on business in partnership with his brother as a general merchant and ship-broker, threw himself, with fearless resolution, to break through the prohibition of English trade with the continent. Napoleon had made the most desperate efforts to destroy the whole of our foreign commerce. To enforce his decrees an entire division of the French army, under the command of General Rappe, was stationed at Dantzic, and every port in Northern Germany was jealously guarded. On one occasion Richard Thornton was on board a vessel of his own, entering the Baltic, when she was encountered by a Danish gunboat, and the story goes that the Englishman, carrying a gun or two of his own, as was not unusual with merchantmen in those days, refused the summons to surrender, and showed fight, victoriously beating off the Dane after a vigorous cannonade. In that year, 1810, he got a commission from the Admiralty to purchase as much hemp as could be procured from Russia for the rigging of our fleet. This errand was, of course, attended with some personal danger, since all the English had fled from or had been expelled from Riga and St. Petersburg. But Richard Thornton was not likely to be deterred by such risks. He landed at Memel, and succeeded in obtaining and conveying to England many thousands of tons of hemp for the use of our Government, in spite of difficulties which would have baffled any ordinary man. A splendid recompense awaited him two years afterwards. An express communication reached him from his brother, who was in that country at the time of the French invasion in 1812. He was apprised of the fact of Napoleon's retreat from Moscow three days before it was known either to our Ministers or to any other persons in London, and he profited by it to something over £200,000. The civil war which broke out, with a short interval, in the kingdoms of Portugal and Spain excited Mr. Thornton's sympathy. He saw the utter rottenness of the Miguelite pretensions in Portugal as well as of the Carlist party in Spain, and he judged that by subscribing towards their overthrow he might do a good act and make a good thing of it. Military munitions were laid up in the Azores, to be ready for the use of Don Pedro's adherents, either to replace him or his daughter on the Portuguese throne. It was Mr. Thornton who advanced a great deal of the money for these preparations, and who, when Don Pedro's army took the field, contracted for its equipment, finding everything the soldiers required. That enterprise was successfully concluded in 1834 by the friendly intervention of the English Government. Yet scarcely had our young *protege* got safely seated on the throne of Lisbon than we had to assist another infant Queen against another pretender. Mr. Thornton did not hesitate to take the odds in favour of the Spanish heiress, as before of the Portuguese. He contributed much to the raising of the first loan on her behalf, and what with his claims as a bondholder, heavy debts which they owed him, &c., he was a creditor of the young Peninsular Government of not less than two millions sterling. With this immense stake he never failed among the Peninsular bondholders to avow his own opinion that those Governments would ultimately redeem their credit. Mr. Thornton's personal services to the Portuguese Government were acknowledged by conferring on him the rank of a Knight Commander of the Order of the Tower and the Sword. Mr. Thornton was a member and underwriter at Lloyd's since the year 1798. Scorning the precautions of ordinary underwriters, who are in the habit of dividing their responsibilities with one another, so that the loss of a single vessel and her cargo would fall, perhaps, on twenty or thirty persons, Mr. Thornton has taken a leonine share of the most tempting and lucrative hazards. No other man would be disposed, even for a premium of 70 per cent., to undertake the insurance of £100,000 on one bottom. Mr. Thornton, until his retirement from that scene of action, was beyond comparison the greatest man at Lloyd's, and, though single-handed, his operations rivalled those of the great marine insurance companies which have flourished so largely in these days. Previously to the late war with Russia he would sometimes insure for the Imperial Government such a thing as a steam frigate built in the English dockyards, and once, it is said, having entered into a similar liability towards that of another foreign State, on being asked by a friend how he could insure the fleets of the different European kingdoms, he replied, "Oh, if they lose the men-of-war that I have insured I can pay for them in their own bonds." Besides, being the largest holder of Consols in England, Mr. Thornton was also one of the largest holders of foreign securities. He was noted for the extent and multiplicity of his investments, as well as for his dexterous use of such opportunities as have frequently been presented by the variable moods and opinions of the Stock Exchange. But ordinary trade had not been Mr. Thornton's only resource. He sometimes won largely on the affairs of the turf, and at other times has taken considerable bets on the result of a military campaign or a ministerial crisis. During our war with Russia it is said he laid the sum of £10,000 against £500 with a well-known Greek merchant that the price of Consols, which was, of course, somewhat declining, would never fall below 85 until the conclusion of peace. One dark morning, in the winter which found us in a shocking mess at Sebastopol and Balaclava, the price actually came down to 85⅛, and those who had envied Mr. Thornton's invariable luck were rubbing their hands at the prospect of his defeat. But Consols fell no lower, and Mr. Thornton pocketed the modest stake of his antagonist, having risked such odds against it. Before closing we should refer to his acts of charity and beneficence as a fitting accompaniment of such good fortune. The schools which he has founded in his native village far away in the dales have already been noticed. But there is another pleasing trophy of his liberality—a double row of almshouses, neatly built, and situated in a very pretty, open garden at the edge of Barnet-common, just outside the neighbourly little town. The Leathersellers' Company, which boasted him as the father or senior member, erected one block of these houses in 1838 with money given by him when he filled the office of master in that worshipful guild. A second donation of his, in 1850, enabled them to build a new range of these comfortable lodgings, in which altogether thirteen aged men and women enjoy a stipend each of 10s. weekly, with coals and candles. Every year he used to go to Barnet with the worshipful master and wardens, in the last week in May to shake hands with the poor old pensioners, to compare their length of years with his own, and then to dine in good old English fashion with his colleagues in that ancient corporation. Such was the dignity and recreation of a London merchant of the old school.

VISITS OF AMERICAN VESSELS TO COCHIN-CHINA.

(To the Editor of *The London and China Telegraph.*)

SIR,—In Du Ponceau's work upon the Chinese Language, I find a statement that the two ships with which Captain White went to Cochin-China in 1819 were the first American vessels that had ascended the river Donnai in that kingdom; but the honour—such as it is—belongs to the ship *Arab*, Benjamin Lander, master, owned by John Derby, Samuel G. Derby, and John Prince, which sailed from Boston for Cochin-China the 17th of March, 1803, with 40,000 Spanish dollars, and goods valued at 2,311 dollars, and not succeeding, went to Manila, returning from thence in the summer of 1804. This was the first American ship that visited that country.—Yours respectfully, SKIPPER.

United Service Club, July 18th, 1865.

THE SIGN FOR PER CENT.

(To the Editor of *The London and China Telegraph.*)

SIR,—Having resided for many years in different parts of the Continent, and during that time had commercial and financial dealings with most countries on the face of the globe, I have often been forcibly struck with the unaccountable fact that the English press, without one single exception to my knowledge—even among those specially devoted to different branches of trade—should totally ignore a little conventional sign generally used by merchants in all countries and even in newspapers printed in all languages, even in Russian and Greek. I allude to the common conventional signs of % and ‰, to represent what you print at full length as "*per cent.*" and "*per mille.*" This is the more surprising in a country where if "brevity is the soul of wit," it is equally applicable in commercial correspondence, indeed one of the principal rules of which is to condense what one has to say into as few words as possible.

As in England all merchants connected with foreign countries are familiar with these abbreviations, and no doubt they are also well understood by retailers. I see no reason why they should not be generally introduced by the English press, and I should be glad to see you take the lead, as by these signs you would be not the less understood by your readers, and it would save space in your columns.—I remain, Sir, &c.,

A BRITISH MERCHANT RESIDING ABROAD.

Berlin, July 10, 1865.

* [The signs are used in all mercantile letters and circulars. but sometime are distasteful to printers.—*Ed.*]

OPENING OF THE NEW SEASON TEAS.

(To the Editor of the *London and China Telegraph.*)

SIR,—The news which this mail conveys to England is important, that is, as regards this port. You will have noticed the alarming advices which recent mails from home have repeatedly brought us respecting the serious failures of large houses, and the unsatisfactory state of the *tea trade*, which one would have imagined was sufficient to make *everybody* more careful than usual how they transacted business in future, more especially in tea; but I regret to say such warnings seem to have been entirely forgotten, at least so it appears, as on the 18th inst. the tea market was opened by a foreign firm purchasing 8,000 chests at 32 taels!! I need not say this took all by surprise, because the musters shown of the new crop prove the teas to be inferior to last season's both in make and liquor, and the quantity *then* on the market did not exceed 20,000 chests; therefore all anticipated lower prices by holding back, and allowing stocks to accumulate until the end of the month, which course would have been beneficial to all foreigners interested, and teamen would have been glad to accept 5 to 6 taels below the rate at which the market was opened. By this firm buying so soon prices are actually above opening rates of last year; and, looking to latest home advices, it will be fortunate if these teas pay. The Fiery Cross will be towed to sea by the steamer, Chanticleer, on Wednesday morning, the 24th inst., and the Serica at the same time by the steamer Vulcan, so we shall be anxious to know which reaches home first, as they are both splendid vessels. They receive £4. 10s. per ton, and the first to arrive receives £1 extra. The Yangtsze and Ziba will leave during the week; they load at £3. 10s., and 10s. extra for first ship home.

The following are the ships now here and wanting tea cargoes:—Childers, Black Prince, Young Lochinvar, Flying Spur, Belted Will, City of Aberdeen, and Min. Loading for Shanghai:—Phillip Nelson and Gossamer. Left for Shanghai:—Reindeer, Water Witch, Oliver Cutts, Japanese, and Tycoon.

The present mail also takes the news of the evacuation by the rebels of the City of Changchow (near Amoy). Whether they have been starved out or not is unknown. Just before leaving they set fire to the city.

Foochow, 22nd May, 1865.

* Arrived too late for insertion in our last number.—ED.

Naval and Military.

The staff commanders and masters of the Royal Navy are not disposed to agree with the contents of the memorandum submitted to the House of Lords just previously to the dissolution of Parliament. They must in the course of nature "die out," but they are not disposed to part with life until they have repeated opportunities of protesting against the contemplated regulation by which they are to be doomed to remain in *statu quo* whilst those now junior to them are permitted to rise in their profession, and so become in a few short years their superior officers.

The Turkish frigate Osman Ghazy, Capt. Arib Bey, which arrived in Plymouth Sound from Greenock will receive her armament at Hamoaze. One of her Armstrong guns, sent by the South Devon Railway, weighs 12 tons. The Turkish Ambassador, M. Musurus, is expected at Plymouth to inspect the frigate.

Lieut.-Col. Austen, 2nd division depot brigade Royal Artillery, Woolwich, Lieut.-Col. Rotton, and Capt. Manderson, have been placed under orders at Woolwich, to hold themselves in readiness for services in India, to take their departure probably in September next. Lieut.-Col. Reilly, C.B., B brigade Royal Horse Artillery, at Woolwich, has received orders to enter upon a course of gunnery instruction in command of his troop, at Shoeburyness.

The left wing of the 26th (Cameronians) Regiment embarked for Bombay at Portsmouth, on board the hired sailing transport Cospatrick, Commander Elmslie, R.N.R., in the following strength:—Capts. C. R. B. Calcott, in command; G. E. P. Trent, J. Armstrong, G. S. Hamilton, and T. Lawson; Lieuts. L. Cubitt and W. B. Burton; Ensigns L. Clark, G. H. Wilson, F. S. Alexander, J. Macfarlane, and J. B. Clark; Asst.-Surg. J. Johnston, in medical charge; three officers' wives, 348 non-commissioned officers and men, thirty-four soldiers' wives, and forty-six children. The embarkation was effected at an early hour in the morning, under the superintendence of Captain R. Locke, Embarkation Officer to the Hon. Council of India, and the Assistant Quartermaster-General of the South-West District, and in a manner highly creditable to the discipline of the regiment. Lieutenant-General Sir George Buller, K.C.B., Lieutenant-Governor of Portsmouth garrison and the general officer in command of the South-West Military District, paid a visit to the ship in the forenoon, and, after the men had been told off to their respective messes on board, the Cospatrick was towed out of the harbour in the evening to Spithead and afterwards sailed for Bombay.

Sir Hope Grant has arrived in London from India, and will shortly enter upon his duties as Quartermaster-General. From the gallant General's antecedents we may hope that the movements of troops will be conducted with more consideration for the pocket and comfort of the soldier, as well as for the pocket of the taxpayer, than has been shown in very many instances by his predecessor.

Captain John E. Commerell, who served in the Snake and in the Fury on the China station from 1858 to 1861, has been appointed to the command of the Scorpion, cupola ship.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, July 13.

At last the Second Chamber of the States-General opened the discussions about the Bill abolishing the stamp duty on newspapers, and to levy stamp duties on commercial bills and receipts to cover the 600,000f., which amount would be lost by the treasury when the tax upon knowledge should be abolished. A good many of the members agreed with the first proposal, but they declined to consent to laying a tax upon the trade instead of upon the Press. It was also probable that an amendment contrary to the ideas of the Minister would be voted with a large majority. After a long and animated discussion, Mr. van Nierop proposed such a motion, which was approved of by 50 against 16 votes. After this *votum*, the Minister felt himself obliged to revote the whole Bill. I need not say that a general indignation prevails in the whole Press, and there is not one of our contemporaries dares to defend now the *quasi* Liberal Government. After this defeat, it is very probable that Mr. Betz will resign.

The other Parliamentary business will be very unimportant, and within a week the Chambers will take the recess till a part of the members meet again to be present at the closing of the session.

The Prince of Orange started last Sunday, *via* Calais and Dover, for London. The rumour that a marriage between H.R.H. and Princess Helena of England is the aim of his voyage becomes more and more probable.

The Government of Japan again ordered of one of our iron-manufactories a large quantity of machinery and utensils.

One of the eminent men who improved the cultivation of bark (*quina*) in our East Indian Possessions certainly was Dr. J. D. de Vry, who returned some months since in consequence of his bad health. It is generally regretted that he was obliged, by this reason, to ask his dismissal, which was most honourably granted yesterday.

Some days ago a *brochure* was published, wherein it is stated that some persons of high rank have laid before the Government a very important plan. Messrs. G. Suermondt, H. Hope Loudon, E. A. Haitink, G. H. Uhlenbeck, J. van Swieten, R. W. Besier, A. P. Godon, Hendrik Muller Szoon, and L. Earl van Bylandt, intend to establish a company, with a capital of 50 millions of guilders. They made the proposal to the Government to yield to the company for 99 years the coffee-grounds and plants of West Java, that is, the residencies of Bantam, Krawang; the regencies of Preanger and Cheribon, besides the grounds which are fit for the cultivation of coffee. The company will pay for this concession the net profits which our Government obtained during the years 1851—1860 from these grounds, and which are estimated to amount to 35,000,000f.—so that a capital of 15,000,000f. will remain for disposal by the company. Moreover it is proposed to redeem the obligatory cultivation and *heerediensten*, except those rendered to the *desfas* (services which must be rendered by the natives), of the workmen, at the rate of f.12.50 per year, and per family of three persons on average. The *exploitation* of the cultivation of coffee will be done voluntarily and for a good salary. The native, however, who leaves the company will again be subjected to obligatory cultivation and *heerediensten*. The company believes that with 50 per cent. of the actual workmen the best results will be obtained, similar to those in Ceylon. The Government will be free to levy land-taxes on the rice-grounds of those residencies, which naturally remain the property of the population; likewise the land-taxes may be levied in the regencies of Preanger. The company proposes to improve and augment the cultivation of rice, to provide for the wants of the population. A land-tax of 15f. per *bouw* of coffee-ground will be paid by the company to the Government. This, accumulated with the export duties, will not only assure the State receiving the averaged yearly profits, but it is quite certain that within a short time this profit will be surpassed 2,500,000f., that is by nearly 50 per cent. per year. When the cultivation is improved and augmented the company will sell their rights upon little parts of the coffee grounds to the natives, according to the stipulations of the Government. Negotiations are opened with the Trading Company to sell the coffee which will be produced in Holland, so that the Dutch coffee market will be assured.

If the Government is of opinion that this plan embraces too much, then these gentlemen will be content to make an experiment with the regencies of Preanger.

I need not say that this plan meets with much opposition by the Conservative press, which is much afraid that the Government will lose their rights upon the grounds of Java.

COMMERCIAL.

COFFEE.—Only small quantities were brought into the market, so that the transactions are very unimportant. Only 1,200 bags of Java, ex

Digitized by Google

Ortelius, changed hands. The market closes, however, very firm with unaltered prices.

TEA.—The market is firm but inactive.

SUGAR.—There is a better demand, and a good business is done at ½f. to ½f. 1,074 kr. Java, No. 14, were sold at 32f., and 1,644 kr. do., No. 12½, at 31f. Holders now decline to operate at this quotation.

SPICES.—With more inquiry, but sellers decline to operate without an advance. The quotation now is: Nutmegs, No. 1, 70c. to 72c.; No. 2, 62c. to 63c.; Mace, D., 63c. to 65c.; E., 62c. to 63c.; Cloves, No. 2, 25c. to 25½c.; Cinnamon, No. 3, is paid with 99c. to 100c.

TOBACCO.—In an unaltered condition.

COTTON.—The market was not animated, and only a few parcels E.I. were sold at unaltered prices.

BANCA TIN.—500 slabs were sold at 56f., which is the nominal quotations.

INDIGO.—The market is firm but inactive. Within a few days 1,400 chests private import will be offered on sale.

ARAK.—A fair business was done last week, viz.:—100 casks Sourabaya ex Nordstein, 80 casks and 40½ casks; ditto, Catharina Maria, 77 cases, Batavia ex Bilderdyk.

MONEY.—The demand for money is quiet at 3 to 3½ per cent., and the supply superabundant. Dutch stock firm, 2½ per cents., 63½; 3 per cents., 75⅛; 4 per cents., 97⅛; Handelsmaatschappy, 146¾; Central Railway, 35; shares ditto, 122½; Indian Railway, 90⅞.

CHANGES.—London, 3 mo., f.11.78; 2 mo., f.11.81; short, f.11.87; Paris: 3 mo., f.46.75; 2 mo., f.46.87; short, f.47.15; Antwerp, 3mo., f.46.65; Hambro', 3 mo., f.34.90; 2 mo., f.34.98; short, f.35.10; St. Petersburg, 3 mo., f. 15.2; Vienna, 3 mo., f.105.25.

SHIPPING.—ARRIVALS.—July 8, at Brouwershaven, from Banjoewanjie, India; 7, at Texel, from Passaroean, Jacoba and Christina; 8, from Batavia, China; from Banjoewangie, Tagal.

The Trading Company chartered the following twenty-two ships, to convey produce from Java to Holland:—

For Rotterdam: Professor van der Boon Mesch, Capt. J. van Zanten; Minister Fransen van de Putte, D. Forbes Browning; Maria Elisabeth, W. van der Valk; Gouverneur van Swieten, H. Singer; Bilderdijk, A. Vietor; Johannes Martinus, C. Dalloyaux; Vesta, ———.

For Amsterdam: Zeenimph, Capt. F. Schipper; Jan van Brakel, D. de Roever; Padang Packet, P. Huidekoper; Anna, P. R. Bok; Nederland and Oranje, J. Bouwmeester; Jan Daniel, H. van I. Jsendoorn; Cortgene, W. Wemmerus; Tjilingsie, P. Ouwehand; Bonie, J. W. Moller; Robertus Hendrikus, R. H. Mulder; President van Rijckevorsel, T. Vogelesang.

For Schiedam: Candati, Capt. D. B. Bosscher; Hugo Grotius, J. Immerzeel.

For Dordrecht: Kosmopoliet II., Capt. J. Bouten; Kosmopoliet, Koning.

PASSENGERS INWARD.

From JAVA, per Isaac da Costa, Mr. J. K. Sheltens and family; Mr. M. W. van Gerkam and family; per Jacoba and Christina, Mr. L. A. Dittlop Tjassens; per India, Messrs. P. Wensel and family; J. G. Masee and family.

ROTTERDAM, July 23.

The Queen returned to-day from her trip to England, and started immediately for the Hague. As to the Prince of Orange, he will remain for some time in London, and then proceed to Scotland to enjoy the pleasures of the shooting season. The rumour so widely spread about an intended marriage with the Princess Helena may now be regarded as unfounded. Some of the continental journals, however, persist in believing that our Prince is gone to London upon an interesting errand, and they add that the Queen is very desirous of the match, and of seeing her son "settle" himself. It is perhaps possible—as the *Europe* says—that the Prince decidedly wants "settling down;" but it is not fair of that paper to give currency to such a *canard*. The Second Chamber of the States General ended their session for this year on the 19th inst. The members met 113 times, and undoubtedly much was done in a liberal sense; but there remains still so much to do that the Opposition paper—we have only one—reiterates that our Cabinet did nothing at all, and what it did do had better not have been done.

The last sittings of the Second Chamber were very interesting. The Commercial Treaty with France was approved unanimously, save by one vote, that of Mr. Wintgens. The attitude taken by the Opposition was very strange indeed, when the discussion on the treaty began. Mr. Rochussen, one of the Conservative leaders, made such an attack upon the Cabinet, that the President was obliged to censure him, which was applauded very warmly by the members. It would be useless to indicate all the complaints of the Opposition. One member lamented that no more than 26 kilos. of Java tobacco were imported into France for the use of the *regie;* another told us that the importation of Java coffee there since 1860 had decreased by 10 millions of pounds, and now was reduced to 4 or 5 millions of pounds; a third regretted that the Government had granted the demand made by that of France for a decrease in the wine duties. Every member of the Opposition made a more or less severe attack; and all except one voted for the treaty, which, without any doubt, will be approved also by the First Chamber.

Some time ago two London houses—Irving, Ebsworth, and Holmes, and Kemble, Trower, and Co.—bought of the sugar-refiners, Wythoff and Zoon, at Amsterdam, a considerable quantity of sugar on a warrant *(entre potdok-ceel)*. Four months elapsed from the time the sugar was duly paid for before the refiners stopped payment. One of our old sugar laws gives the Government a preferential claim in such a case, so that the sugar which the London house bought and paid for, but which still lay in the Amsterdam docks in the name of the refiners, became the property of the Government for duties owing by the Messrs. Wythoff and Zoon. The Government, however, acknowledged the injustice of this, and proposed to the Second Chamber to make restitution to the London houses of about half the amount produced by the sale of the sugar at auction. This proposal was carried unanimously, but I regret that not one of the members made a motion to indemnify the London houses *in toto*, and I am astonished that none of your contemporaries has published anything relative to this important commercial question.

The First Chamber of the States General, which has been again reinforced at the late election by some Liberal members—amongst them Mr. Duymaer van Twist, formerly Governor-General of the East Indies—will meet again on the 31st.

In my last I mentioned some particulars about the Company for the cultivation of coffee in West Java. The *Arnhemsche Courant* has since stated that the Minister for the Colonial Department had rejected the plan, but I can assure you that, notwithstanding there are very many difficulties, the Minister did not reject the proposal at all. On the contrary, many Indian specialities have been consulted with regard to it, and also with regard to the law relative to Indian cultures in general.

Our eminent archivist, Dr. C. Bakhuizen van den Brink, died suddenly at the Hague a few days ago.

The King will return from his trip to Lucerne on the 15th of August.

COMMERCIAL.

COFFEE.—The market is in an unaltered condition, and very firm. About 6,000 b. Java were sold at 45½ to 45¾, besides 1,600 b. Padang ex Padang Packet, at prices that did not transpire. A cargo of 2,600 b. Santos, per Henri, came into the market, but until lately very little of this lot was sold. The 786 b. and 298 casks Native Ceylon offered in auction were partly sold at 42½ to 43¾ c.

SUGAR.—The general attention was fixed upon the auction of the Trading Company, consisting of 70,650 kr. The whole quantity was sold, notwithstanding only 20,000 kr. were taken for export, at 29f. to 35f.; being for the low numbers 1f., and for the higher numbers ½f., under the May prices. The market closes very firm, and without sellers. The private importers decline to operate without an advance.

TEA.—Market unaltered; prices are firm, but there is no stock.

RICE.—Without transactions of any importance.

SPICES.—Very dull, in consequence of the communication that the Trading Company will offer at auction, on the 25th of August, the following important quantities:—2,910 casks Nutmegs, 740 casks Mace, 1,720 casks Cloves, 1,612 fard. Cinnamon, 1,619 c. black Pepper, and 200 chests Soya. Notwithstanding, it was positively asserted that the company should not offer any spices before August, 1866. The market became dull, and much was offered in the second hand at lower prices. Only Cinamon is paid in full, and there is much demand for No. 3 at 100 per cent.

TOBACCO.—The trade being occupied inspecting the parcels which will be offered in auction on the 2nd of August, and which consist of 2,698 p. Java Blitar, 406 p. Java BB, 1,793 p. Java Nauta Blitar, 483 p. Java LBP, 227 p. Java SS, 119 p. Java S, and 344 p. GB; the transactions are of no importance; the prices remain unaltered.

COTTON.—After a fair business was done for export the market closed heavy.

HIDES.—There is much demand at higher prices by want of stock. 1,121 p, Buffalo ex Nederland and Oranje, and 537 p. do. ex Isaac da Costa were sold. Within a few days some thousand p. Java Ox and Buffalo are to be offered by inscription.

INDIGO.—There is much demand for speculation, but holders decline to operate without an advance. About 110 chests ex Quartet were sold at prices that did not transpire, but which are thought to be 25 c. higher.

SAPAN WOOD.—100 pieces ex Jacoba Christina were sold at firm prices.

BANCA TIN.—With much demand, and a fair business. About 5,000 slabs were sold at 55½f., holders then declined to operate without an advance of ¼f., which price was paid for 500 slabs; the trade now demands 56f. About 2,500 slabs Billiton tin were sold at 55f.

DRUGS.—The market is very dull.

RATTANS.—The Trading Company offered at auction 89,500 bundles; for Bandjermassing f.12.10 to f.16.80 was paid; for Padang, 12f. to 14f.; for Koetie, f.13.80 to 14f. All was sold. There was also much inquiry in the private trade; 150 piculs ex Quartet, 200 piculs ex Burgemeester van Middelburg, 150 piculs per Reflect, 60 piculs ex Jacoba Christina, and 292 piculs ex Padang Packet were sold.

ARACK.—There is a good demand at former prices; 30 casks ex Oceanus, and 120 casks Batavia ex Elizabeth were sold.

MONEY.—Very easy; in the open market only 2½ per cent. is paid, which has not been the case since 1863. Bank discount—for bills, 3 per cent.; for acceptances, 3½ per cent. Business on the Stock Exchange was absolutely prostrate. There is no demand for stock, either for investment or

Digitized by Google

on speculation, and in the absence of business adverse impressions have acquired more force than would belong to them in ordinary circumstances. Only the Four per Cent. Dutch made an exception, because there was much sold for account of the Government. Dutch Two-and-a-Half per Cents., 63¼; Three per Cents.,. 74⅛; Four per Cents., 98⅜; Trading Company, 144½ (in much demand on foreign account); Indian Railway, 91½; Dutch Rhenish Railway, 111; do. Shares, 338f.; Central Railway, 37; do. Shares, 123; Comp. Expl. State Rail., 91½; Indian Bank, 84; Neth. Bank, 240 (the highest price ever paid); Rotterdam Bank, 94½; Credit Mobilier (Dutch), 62. The Indian Gas Company announces a dividend of 5 per cent. 'Changes: London, 3 mo., f.11.79½; 2 mo., f.11.82½; short, f.11.88½. Paris, 3 mo., f.46.80; 2 mo., f.46.93; short, f.47.15. Antwerp, 3 mo., f.46.77; short, f.47.12. Hambro', 3 mo., f.34.92; 2 mo., f.35.03; short, f.35.30. St. Petersburg, 3 mo., f.152.

SHIPPING.—ARRIVALS.—July 15, at Brouwershaven, from Banjoewangie, May Queen; 18, at Texel, from do., Gebroeders; from Padang, Zaanstroom; from Banjoewangie, Aldeboran; 21, at Brouwershaven, from Padang, Maarten van Rossum; 23, at Brouwershaven, from Banjoewangie, Catharine Maria; 22, at Texel, from do., A. Bang.

READY TO SAIL.—At Brouwershaven, Constantia, for Batavia.

DEPARTURES.—July 15, from Texel, for Sourabaya, Senior; for Samarang, Alblasserwaard; 17, from Brouwershaven, for Batavia, Doelwyk; 21, from Brouwershaven, for Batavia, Bezoekie; from Texel, for Batavia, Tjilingsie, Helena, and Anna; Telanak, for Japan, Bantum; from Veere, for Batavia, Zeepaard.

LOADING AT AMSTERDAM.—For Kanagawa and Decima: Hermine, Gloria, Maria Elizabeth, de Zwaan, China; for Padang: Excelsior, Anna, and Jeannette, Helena; for Batavia: Azia; for Batavia and Samarang: Vertrouwen; for Batavia and Sourabaya: Henrietta Geertruida, Jan van Branel, Quartet; for Samarang: Mathilde, Padang Packet; for Sourabaya: Bellatrix, Presto; for Macassar: Presto; for Singapore and Hong Kong: Henderika.

FREIGHTS.—Quotations at Messrs. Fauchey and de Vletter, shipbrokers, at Rotterdam:—For Batavia, Nederlands, and Oranje, 755 tons, Constantia, 741 tons, Cornelis Bernand Edward, 850 tons; for Batavia and Sourabaya, Hugo Grotius, 673 tons, Boni, 575 tons, Johanna, 713 tons, Ary Scheffer, 754 tons; for Batavia and Samarang, Robertus Hendrikus, 753 tons, Susanna Johanna, 498 tons; for Samarang, Doelwyk, 824 tons, Bilderdyk, 754 tons, Kappyboom, 1,280 tons, Jan Daniel, 635 tons; for Kanagawa, Maria, 380 tons. Freights unaltered.

PASSENGERS INWARD.

From Java, per Zaanstroom, Mr. W. F. Godin and family, Messrs. H. F. Ferhilst and family, L. Fuflo, F. Bartolome, and J. Bakker.

PASSENGERS OUTWARD.

To Java, per Bezoekie, Messrs. J. C. P. Evers and family, J. C. Schultz and family, Mrs. Prehn-Raes and family, Mr. J. van. Deun, Miss J. Bloch.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

JULY 23.

Since my letter of the 6th inst. I have perused the German translation of the Report therein mentioned, published by the Danish Government, on the trade with China, with a view to encourage the Danes to take part in the commerce of that country. Denmark, however, not being a manufacturing State, and there being no outlet in the East for their own home produce, which is almost exclusively confined to cattle, grain, and butter, it is difficult to see what inducement the Danes can find to trade with China. Their mercantile navy has been so crippled by the loss of Schleswig and Holstein, in consequence of the events of last year, that the merchant vessels belonging to the kingdom proper are reduced to very small dimensions in point of numbers, and even these find profitable employment in conveying the produce of the country to England and other European States, so that there is but little margin for enterprising shipowners to incur the risks and uncertainties of opening up a new business by their forced participation in the carrying trade to the Far East. And yet it is to this object that the "Report" is evidently driving at; for it gives at full length copies of charter parties for rice cargoes, and recommends captains to furnish themselves with letters of credit at the rice shipping ports to enable them to purchase a cargo of grain for ship's account, should no suitable charter be obtainable, which will be sure to meet with a ready sale, and pay a remunerative freight. The Report gives a deal of statistical detail of the trade of Shanghai and the other open ports, as well as much about Hong Hong, its port and harbour regulations, and those concerning the coolie passenger traffic; and even hints at the advantages of associations for joint operations on an extensive scale, as a means peculiarly beneficial under present circumstances; and it was no doubt in reference to this semi-official recommendation that I not long ago had to report to you that a provisional committee had been formed at Copenhagen under the presidency of Vice-Admiral Steen Bille, for the purpose of concocting means to execute the idea, and from a sort of Danish-Chinese Shipowning Company. As a further inducement to Danish shipowners to profit by the advantages opened to them by the conclusion of the treaty with China, the "Report" speaks rather grandiloquently of the number of Danish vessels that visited Chinese ports in the year 1863, but the *prestige* is considerably weakened, if not altogether lost, by glancing at the list, tonnage and nationality of the vessels at pp. 73-75, for out of the total of 81 vessels of 9,628 lasts (one Danish last equal to 2¼ English tons), it appears that 44 vessels of 5,119 lasts—or more than half—were owned in ports of the Duchy of Schleswig, which now no longer wear the Dannebrog flag; 25 vessels of 3,003 lasts belonged to Holstein, which vessels also now sail either the Schleswig-Holstein flag or that of Prussia, and only twelve vessels of 1,506 lasts were owned at ports belonging to what little is left of Denmark Proper. To ensure the anticipated success, it would appear to be absolutely necessary to organise an adequate system of paid consuls to take care of the interests of their countrymen and speedily redress their grievances, without which no great increase in their navigation of Chinese ports can be expected, for the Danish shipowners are quite as long-headed and keen as those of any other nation. In the present state of affairs there are, it is true, honorary Danish consulates at some of the opened Chinese ports, but in the absence of Danish merchants established there, they are held by foreigners—chiefly partners in English mercantile firms; for as the "Report" confesses with singular *naivete*, "that besides one single Danish house at Hong Kong there are in all the ports of China but three Danish partners in three different foreign houses, none of which are in direct mercantile communication with Denmark." It is, perhaps, with a view to effect an improvement in this respect that I perceive in the Copenhagen *Official Gazette* the recent appointment—it is dated July 14—of Mr. G. J. Helland to be Consul at Hong Kong for H.M. the King of Denmark.

Further particulars fully confirm the melancholy loss of the Hamburg vessel the *Alster*, while at anchor in Apia harbour, as mentioned in my last. She was loading there for this port, and had 120 tons of cocoanut oil on board when she went down, all hands being lost except one seaman saved.

The Russian Consul at Hakodadi has sent home to his Government some specimen boxes of Japanese silkworm eggs as a trial, and asks permission to make purchases on a large scale for distribution among the silk growers in the South of Russia, where he thinks they would be pre-eminently successful from the similarity of the soil and climate.

COMMERCIAL.

COFFEE.—Since the departure of last mail the market is in a state of much inactivity, not so much from want of purchasers as absence of the finer descriptions, which are most in demand. Prices are well supported. Sales, 24,000 bags.

SUGAR.—Raw in a more lively condition, and prices generally 8 sch. bco. higher. Among the sales were 10,000 bags of clayed Manila, and 2,000 bags of East India, both for arrival, as well as 1,000 bags White Batavia and 5,700 bags clayed Manila, ex warehouse. Refined looking up; sales, 15,000 loaves.

RICE.—Market rather quiet, but prices well supported, and in some cases higher. A cargo of 6,000 bags Bengal, ex *Metis*, from Calcutta, lately to hand, was sold by private contract.

SPICES.—Cassia Lignea firm. Ginger dearer and still rising. In Pepper no alteration.

TEA.—Calm, purchases being only made for consumption. Among the sales by importers were 1,000 packages Imperial and Gunpowder ex Welf.

DRUGS.—Refined Camphor has been sold at a cheaper figure. Starannis is again higher, and there is none to be had now under 19 sch. bco. Of Galangal root 100 bales ex Fidelio have been sold at full prices.

SPELTER.—There is a lull in the demand, and to effect sales concessions must be made; but as the stocks here are small, and but few parcels *en route*, holders are not anxious to sell. The only sales reported are:—

2,000 centners,	loco	..	14 mks.	14 sch.	to	15 mks.	
2,500 „	different periods	..	14 „	15 „		15 „	
1,000 „	August and Sept.	..				14 „	14 sch.
1,000 „	Sept. and Oct.	..				14 „	14 „

Silesian is quoted 15 marks sellers.

SHIPPING.—ARRIVED.—Colima, from Akyab.

SAILED.—Malvina Vidal to Shanghai; Carl Ritter, to Hong Kong.

COURT OF BANKRUPTCY, JULY 25.—RE SIR JOSEPH ABRAHAM DOUGLAS, KNT.—The bankrupt was described upon his own petition, as of No. 2, Apsley Cottages, Peckham, Staff Commander in Her Majesty's Navy. The liabilities were only £194, and the only probable assets consist of half-pay and a pension received by the bankrupt from the Government for services in China and elsewhere. Mr. Aldridge appeared for the official assignee. Mr. Denny appeared for the bankrupt, and contended that as the opposing creditors had detained Sir Joseph in custody for a considerable period, it was not reasonable that they should apply to the Court to set aside any portion of the bankrupt's small income of £130 a year. Mr. Registrar Winslow said that he felt bound, as the law stood, to make an order for payment out of the bankrupt's income. He should make a similar order to that made in the case of Jackson by the late Lord Chancellor. He thought that the bankrupt ought to set aside £20 a year for five years. This order would be made subject to the approval of the Lords of the Admiralty. Order accordingly.

LONDON, MONDAY, JULY 31, 1865

THE REMNANT OF TAIPINGS NEAR AMOY.

ACCOUNTS from Amoy convey the satisfactory intelligence that the remainder of the Taiping rebels, who had made a formidable stand at Chang-chow under the leadership of a chief styling himself the TSZE WANG, have evacuated that city, and no longer threaten the safety of the treaty port. The news of this movement reached us in due course by the last mail, but the details were not then published, and we anticipate further advices by private information. It will be in the recollection of our readers that after the fall of Nanking, a large body of the insurgents who had escaped from that city joined a number of others from the small posts they evacuated, and marched southwards to Chang-chow, a large district city, situated on a river within twenty miles of Amoy. That city they captured on the 14th October, 1864, obtaining admission through the gates in disguise, which they closed and commenced an indiscriminate slaughter on the unoffending inhabitants, spreading, as usual, rapine and bloodshed around, taking the young women as cooks and mistresses, and the able-bodied men to make slaves of them, while the sick, old, or infirm, they slaughtered without mercy. The leader of this horde, to his credit be it said, endeavoured to restrain his men but without avail. After he found the insatiate vengeance and lust of this remnant of the Taipings subdued, he endeavoured to restore something like quietness in the city, and partially succeeded. He also made overtures to the British Consul and other foreign authorities at Amoy to open up trade with Chang-chow, which, of course were rejected. At the same time, a strict neutrality was maintained, leaving the Imperialists to fight their own battles, and reserving the naval force in harbour for the protection of foreign residents. As the trade of Amoy was materially affected by this last stronghold of the rebels, the Foreign Maritime Customs established a blockade lorcha on the river, to prevent the importation of munitions of war, or foreign adventurers joining their ranks. These precautions were but inefficiently carried out, as many Europeans and Americans succeeded in reaching the head-quarters of the TSZE WANG, who gladly accepted their services. Among these were some renegades from the disciplined Chinese force disbanded after the fall of Soochow, led by a Prussian named ROHDE, who intended to form a similar corps among the rebels. And, what was of greater importance, the notorious BURGEVINE was on his way to join them, when he was captured.

Meanwhile the supine Imperialists were roused to the necessity of sending a strong force for the reduction of Chang-chow, under the command of General KWO-SUN-LIN; also Colonel KIRKHAM, an efficient officer during GORDON'S command of the Quin-san force. The former kept the enemy in check for some months, but failed to effect any material operation in weakening his position, excepting in cutting off his supplies. Whether these were becoming scarce, or from their own suicidal system of devastation, the place was impoverished, does not appear, but after holding the city for seven months they evacuated it on the 15th May. This they had been doing for a week previously, unknown to the Imperialists, who discovered the fact, while making an attack on the stockades erected by the rebels outside the walls. These were captured with but little resistance, the few defenders having set them on fire and fled into the city, which was also evacuated at midnight, the blazing houses lighting them on their march. On leaving they separated into three columns, and were followed by the Chinese General and his army, when the rebel forces surrounded and cut them off, but with what result is not yet known. Next day our informant visited Chang-chow, and states:—"On entering the "city the morning after evacuation I found it burning and in "one mass of ruins. What the rebels had not demolished they "set on fire, so that the destruction of the entire city is "complete. There has been very few killed or captured, but "inside the walls the stagnant pools are full of dead bodies. "The whole of the Europeans have left with the rebels, who "have gone further south in the direction of Tong-san, a city "on the coast, which they intend to capture if they can. On "their route they have taken some small towns. In the house "occupied by the Europeans an order-book was found containing the names of many men late of the Quinsan force, who "were appointed to posts in the rebel army by their leader "ROHDE."

On the day previous to the evacuation of Chang-chow Colonel KIRKHAM was at Amoy, with a portion of his contingent, aiding the authorities in enforcing the blockade against foreign rowdies and unscrupulous traders with the rebels. There he received information that BURGEVINE, who had been deported from Shanghai, was in a schooner just arrived from Formosa. After communicating with the Commissioner of Customs at this port, he went on board with two officers, but found that he had gone ashore. However, he saw an American negro, whom he knew was to pilot the schooner up the river. At first he denied it, but after a little confessed, and stated that they intended sailing up that night, and if KIRKHAM kept a good look out from the blockade vessel he would see them. This was done, and BURGEVINE with another foreigner were captured about midnight, and handed over to the custody of the Customs authorities, as they had established the blockade. These again delivered them over to the Chinese General, who kept them prisoners in his camp for three days, and then sent them to the Taotai of Amoy. Here the American Consul demanded BURGEVINE to be given up, as he was a citizen of the United States, but the mandarins would not comply, and conveyed him overland to Foochow. At this the Consul and American residents made a threatening demonstration; the former stating that he would order up a ship of war to the port and demand satisfaction. Such is the purport of our news connected with this remnant of the Taipings in arms; and as they contemplate forming a junction with the disaffected Triad rebels in the province of Kwang-tung, it is probable that the south of China may again be desolated by these scourges of the empire and of humanity.

POSTAGE—FRANCE, CHINA, JAPAN, &c.

THE Imperial Government has just published an elaborate table of the rates of postage to be paid on letters, newspapers, and other matters passing between certain places in the East, and between the East and Europe. The charge for letters between Shanghai and Yokohama is fixed, if prepaid, at 50c the quarter ounce (7½ grammes); if sent unpaid, 70c. Between France and Algeria, or the French *bureaux* in Turkey, or Egypt and Yokohama, 70c. if prepaid, and 90c. if unpaid. Between the French postal agencies in America and Yokohama, f.1.60 per quarter ounce, whether prepaid or not. Letters insufficiently paid will be charged, as at present, as unpaid letters, allowance being made for the stamps. Registered letters, 50c. in addition, but must be fully prepaid. Newspapers, periodicals, books, music, engravings, and printed matter of all kinds, between Shanghai and Yokohama, 10c. per 40 grammes. From France, Algeria, Turkey and Egypt, to Yokohama—or from Yokohama to Turkey and Egypt, 13c. From Yokohama to France and Algeria, 16c. per 40 grammes. Samples may be sent either by French or English mail boats between France, Algeria, and Yokohama, for 13c. the 40 grammes, with the usual restrictions as to value and mode of address. Letters passing between Yokohama and the French colonies and establishments in India and China, Bourbon, Madagascar, and Mayotte, 60c. per quarter ounce; between Yokohama and other French possessions in communication with Japan, f.1.60; between Yokohama and the British possessions in Asia and Mauritius, 60c.; between Yokohama and Malta,

Digitized by Google

Greece, Italy, Switzerland, Germany, Austria, Belgrade, Holland, and Great Britain, f.1.20 ; between Denmark, Sweden, Russia, Moldavia and Wallachia, the United States, Brazils, the West India Islands in general, Newfoundland, and Canada, f.1.60. In the preceding cases, prepayment is optional ; in the following, it is obligatory :—Between Yokohama and the Seychelles Islands, 60c. ; between Yokohama, Spain, Portugal, Gibraltar, and Servia (with the exception of Belgrade), f.1.20 ; between Yokohama and other ports beyond sea, 60c. per quarter ounce. Letters may be registered to or from all or nearly all of the first set of places just mentioned by paying double postage. Printed matter may be sent between Yokohama and the French and English possessions in India and China, Mauritius, Bourbon, Mayotte and Madagascar, Seychelles, the ports of Greece, and the other States of Europe, with the exception of Great Britain and Malta, for 15c. per 40 grammes ; between Yokohama and other French Colonies and possessions, and other ports beyond sea, 25c. ; between Yokohama, Great Britain and Malta, 20c. The French Post-office is very particular about the making-up of registered letters ; there must be two seals at least, and these must be from the same stamp and must secure all the folds of the envelope, and no article in gold or silver, or anything liable to customs duty can be enclosed ; on the other hand, in the case of a registered letter being lost, the French Post-office pays a fine of fifty francs. In consequence, however, of the arrangements of our own Post-office, registered letters passing between Yokohama and Great Britain, or any British Colony or Possession, are not protected by the penalty. Surely this question of indemnity for registered letters when lost deserves reconsideration in St. Martin's Le Grand.

REDUCTION OF DUTY ON RUSSIAN CARAVAN TEAS.

THE reduction of the Russian customs duty on seaborne teas led us at the time to anticipate an abatement of rates on caravan teas, whether brought to Kiachta or over the Orenburg frontier by way of Tashkend and Troitsk. This fresh adjustment, by which low qualities of those teas are admitted at 35 copecks or 1s. 6d. per lb., and superior descriptions at 50 copecks or half a rouble per lb., is not likely to lessen the progressive rate of our exportation of fine and medium to the Baltic, the Black Sea, or to Prussia for transportation to the neighbouring Russian provinces. Its main effect will be to equalise more completely the terms on which the Russian consumer will choose as between caravan and seaborne importations ; for although the duties on the former are lower, the difference would seem not unreasonable, having regard to the more expensive transport by the land route. The caravan tea trade, so far, has been regulated less by Russian requirements for Asiatic produce than Asiatic requirements for Russian goods, or such goods as Russia chose to furnish ; but for the enormous profits on those goods, the overland tea trade would have been manifestly a losing one. Such being the conditions, the quantity of tea thus imported, or which enters into the exchanges, is not to be affected very materially by the announced reduction. The Bokharians and traders of Kokan, encouraged by the grant of long credits to purchase goods in the Russian markets, and maintaining constant communication with Chuguchak, Kuldjei and Kashgar, carry thither Russian cloths, and return laden with bags of green and black tea as the cheapest currency with which to discharge their obligations. A reduced duty, in the absence of the competition now created by seaborne importations, would be in their favour, but not otherwise, as it excludes them from proportionately enhancing the value of the article. So with the Siberian and Chinese traders at Kiachta, though in their case the exchange is more direct than in Central Asia. The caravan tea to which the lower duty applies cannot be placed in the Russian markets at less than 4s. 6d. per lb.—a price at which we could readily compete even with our medium teas were a differential duty established in their favour, that is to say, at the same figure which Russia is prepared to levy on seaborne teas imported directly from the country of production. We thus offer a superior article to the average caravan teas at the same price, and so forward a purpose Russia has in view, the improvement through competition of the quality and preparation of her Asiatic overland supplies. Thus alone, too, can the demand among the mass of her population be immediately and rapidly stimulated. The premium she offers on direct importations will not, under existing conditions, be responded to.

GENERAL PRUYN, the U.S. Minister in Japan, who lately returned from that country, has visited Paris, previous to his return to Washington. During his stay there he stated that the Tycoon was most favourably disposed towards the foreign Powers.

A PARIS PAPER announces that the Court of Peking has issued a decree authorising the construction of a railway from Shanghai to the capital of China. This decree is said to be signed by the Empress. It is also announced that the King of Siam has resolved on the reorganisation of his fleet, and has sent an order to France for the construction of a corvette, and of four armed vessels of lighter draught. This is not at all probable, seeing that the cost would be more than the Siamese could meet.

IT is stated in the Paris paper *La Finance* that the British Government intend to send a political agent to the Korea. We cannot at present state if there is any truth in this statement, but the opening for such a mission was noticed in our issue of the 27th Feb.

SIR RUTHERFORD with Lady ALCOCK and Miss ALCOCK proceed by the mail of 10th Sept. MR. FITZROY, formerly Secretary to Lord Elgin's Embassy, and since Commissioner of the Chinese Customs, returns to Shanghai by the mail of the 10th Sept. MR. JOHN DENT returns by the mail of 10th or 26th August.

Literature.

Literature will be nobly represented in the next Parliament. For many sessions London has not been able to boast of such representatives as it has just returned. The name of Mr. Mill is in itself sufficient to reflect literary dignity on the whole body of members. Mr. Torrens is well known in literary circles as a vigorous political writer in the *Daily News*, *Examiner*, and other weekly and quarterly journals ; he is also the author of two solid volumes on the "Industrial History of Free Nations," and of another valuable work on the "Use and Study of History." Mr. Hughes, the well-known author of "Tom Brown's School Days," is not merely an amusing writer, but a political economist of a high stamp. Mr. Goschen, who is again returned for the City, is a young man who, besides having taken high honours at Oxford, is the author of a remarkable book on the "Theory of Foreign Exchanges." Mr. Lawrence Oliphant, who represents the Stirling Burghs, is well known as the author of a valuable account of Lord Elgin's Mission to China and Japan. In addition to these, Mr. Layard is again returned for Southwark, and among the other boroughs we find a considerable sprinkling of literary names, many of which (like those for instance of Sir E. Bulwer Lytton, Mr. Gladstone, and Mr. Disraeli) are already familiar in the reports of debates. On the whole, however, the new Parliament will be decidedly more literary than any of its predecessors.

The Edinburgh Review for July contains an interesting article headed "China and Japan" which embodies a review on the lately-published works of Messrs. Michie and Lay, and Sir Macdonald Stephenson. The writer, deploring the disintegrated condition of the Chinese Empire, advocates the construction of railways and telegraphs, and the organisation of a small but effective standing army disciplined and armed on the European system, as the only means of arresting the progress of that gradual decay which seems to threaten total dismemberment as the ultimate destiny of the Empire. "Nothing," he says, "would so certainly or rapidly tend to its restoration to more than pristine wealth and population, at the same time that it would multiply the power of the Peking Government to destroy its enemies, and the enemies of all peace and civil Government, as a well-combined system of railroads and telegraph lines." With reference to Japan, great credit is awarded to Sir Rutherford Alcock for the bold and vigorous policy initiated by him, to which is attributed the satisfactory footing on which our relations with that country have recently been placed.

We have received the second part of the first volume of the *Journal of the Royal Asiatic Society*. It contains several interesting papers, but none specially bearing on China or the remote East. The *Journal of the North China Branch* of the Society, for December, 1864, has also reached us, and is full

Digitized by Google

of interesting matters. Notes on the City of Yedo, narratives of overland journeys from Canton to Hankow, and from St. Petersburg to Peking, and a paper on the Medicines and Medical Practice of the Chinese, form the most important portion of its contents.

THE WIMBLEDON MEETING.—On Saturday, the 15th inst., the China Challenge Vase was shot for. The conditions of the match having been left to the determination of the Council, great curiosity was naturally felt as to the ultimate destination of so valuable a piece of plate. The decision arrived at was that it should be placed in the hands of the Lord-Lieutenant of the winning county from year to year, and that £100 should be annually divided among the more successful of the competing squads, consisting of ten men drawn from every county desirous of entering. Several designs for the vase have been submitted, and the selection is under consideration by a committee. Thirty-two counties competed for it, the following being the four highest scores:—

County.	200 yards.	500 yards.	Total.
Somerset (win vase and £50) ..	134 ..	129 ..	263
Lanarkshire (win £25)	125 ..	130 ..	258
Suffolk (win £15)	126 ..	128 ..	254
Warwick (win £10)	133 ..	116 ..	249

No decision had then been arrived at as to which of the various designs which had been sent in for this cup should be adopted; but at the distribution of prizes on the 22nd inst., Lord Elcho stated that the smaller cup (value £100) which had been sent home to the London Scottish, at the same time that this larger contribution was forwarded to the National Rifle Association, had proved to be of such novel design, and so much superior in workmanship to what could be procured at home for the same money, that the committee had determined to have the more valuable cup likewise prepared in the Celestial Empire.

Monetary and Commercial.

The biddings for 25,00,000 rupees (£250,000) in bills on India, took place at the Bank of England. The proportions allotted were—To Calcutta 17,76,000 rupees, to Bombay 5,50,000 rupees, and to Madras 2,24,000 rupees. The minimum price was, as before, 1s. 10¼d. on Calcutta and Madras, and 1s. 10⅜d. on Bombay. Tenders on Calcutta and Madras at 1s. 11⅛d. will receive about 54 per cent., and on Bombay at 2s. in full.

In consequence of a cab accident to Mr. Antrobus, the meeting of the creditors of Messrs. Lindsay and Co., China, has not yet been convened.

A company is in formation for carrying on the business of wholesale tea-dealers, on much the same principle as Peek's and Travers's.

Telegrams announcing the opening of the new Teas at Hankow have been received, and much dissatisfaction is expressed at the prices paid, which are estimated at 2s. 5d. laid down in London.

At the meeting of the London Joint-Stock Bank, the available total was stated to be £123,125, and a dividend and bonus equivalent to 18 per cent. per annum were declared, leaving £25,925 to be carried forward. The paid-up capital is £1,080,000, and the reserve £309,615.

The report of the Consolidated Bank shows an available total of £61,812, including a previous balance of £1,827, and recommends a dividend and bonus for the half-year at the rate of 15 per cent. per annum, and the appropriation of £10,000 to reserve, which will thus be raised to £70,065, leaving £6,812 to be carried forward.

The report of the Alliance Bank states the available balance to be £27,653, and recommends for the half-year a dividend at the rate of 5 per cent. per annum, and the application of £1,000 towards preliminary expenses, leaving £4,485 to be carried forward. The directors state that the position of the bank has materially improved since the last half-yearly meeting, but that, "with respect to the account specially referred to in their last report, they do not feel themselves in a position to determine the amount which will be required from the reserve fund to meet the loss that may arise thereon, as some time must elapse before the value of the securities and estates affecting it can be ascertained."

The first general meeting of Reuter's Telegram Company (Limited) was held on the 24th inst. The report, which was unanimously adopted, states that the directors have to congratulate the shareholders upon the satisfactory results which have attended the business of the company during the short period that has elapsed since its formation. The company bought the business of Mr. Reuter at a price based upon the estimated revenue for the past three years, with its prospective increase, and the shareholders are informed by Messrs. Quilter, Ball, and Co.'s report, that the actual net profits during that period exceeded considerably the average amount on which their contract was based. It is anticipated by the directors that the dividend may hereafter be increased, and a sufficient surplus appropriated to a reserve fund. The profit for the six months ending the 30th June last, amounts to £6,645. 10s. 11d., out of which a dividend at the rate of 8 per cent. was declared, payable on the 31st inst. After payment of all charges and writing off £200 from the preliminary expenses, there will remain a balance of £2,442. 5s. 2d. to be carried forward to the next account. A vote of thanks to the chairman, Mr. John Dent, terminated the proceedings.

The following in reference to the *Peep o'Day*, which left London for Shanghai on the 21st Sept., has appeared in the daily papers. The ship *Peep o'Day* outward bound to Shanghai, and on which some sixty to eighty guineas prem. of insurance had been paid on account of lengthened voyage, was posted at Lloyd's as a missing ship—*i.e.*, considered as lost. The announcement being considered by the underwriters premature, they protested, and the notice was taken down, but the next day, through the intercession, it is reported, of either the broker or the owner of the ship, she was again posted, notwithstanding a general belief that the ship was not even out of time, and a great injustice to the wives and families of those serving on board, as their allowances were stopped from that moment. This was confirmed on the arrival of the mail, the ship having been spoken by the *Gloucestershire*, in lat. 22 S., long. 110 E., and 179 days out. The cause of her long voyage was attributed to the foulness of her bottom. She is an iron ship, and would not steer; besides, some of her crew were laid up with scurvy. She was supplied with provisions and then proceeded for the Straits of Lombock.

The amount of bullion by the P. and O. Company's steamer *Massilia*, from Southampton on the 20th inst., was:—In gold, to Alexandria, £16,000; to Madras £649. In silver, to Calcutta, £45,700; to Hong Kong, £12,750; to Shanghai, £19,150; to Sydney, £200. Total,—In gold, £16,649; in silver, £77,800.

ARTICLES OF IMPORT.

TEA.—The official returns of clearances for the six months ending 30th June, are now published. The total amounts to 64,152,246 lbs. against 60,216,121 lbs. last year. The increase in home consumption is 4,882,735 lbs., but there is a falling off in exports of 946,610 lbs. In low broken-leaf and dusty kinds of Congou prices have ruled rather lower, especially at public sale without reserve; those with leaf up to 11d. per lb. have been inquired for. Fair to good common have been neglected, but prices remain nominally the same. Common to fair flavory kinds have sold at a further decline of ½d. to 1d. per lb. at public auction; privately there is no demand. A few finest Kaisow have fetched 2s. 6d. Common to fair black-leaf kinds have sold ½d. per lb. lower; the medium kinds have given way 1d. per lb. for the few sales which have been made, while

Digitized by Google

fine to finest are quoted somewhat nominal in the absence of inquiry. In Tayshans and new-make Canton kinds there is no new feature to notice. Oolongs continue difficult of sale. Good to fine Souchongs have been in moderate demand at about previous rates. Flowery Pekoes are only saleable at very low prices. In Scented Teas there is not much doing, medium kinds have become scarce; but even for these the inquiry is only partial, prices showing but little change. Common to fair uncoloured Japans are difficult to sell; the finer kinds are wanted, and for the few of these offering, higher prices have been paid, Indian Teas have given way materially, a large portion of the late marked advance has been lost, common to good kinds selling 2d. per lb., and finer kinds 2d. to 4d. per lb. lower. In Green Teas there has been a considerable amount of business done, several invoices from recent arrivals having been placed on the market. Japan kinds have not sold so readily, the qualities offering being undesirable. Common to fair Country kinds have sold at a decline of 1d. to 2d. per lb., but the finer kinds, especially of Moyune, have been fairly supported, there being still a moderate demand for export. Common to fair Canton Gunpowders have sold lower at public auction. Young Hysons are still without inquiry. On the 18th instant 12,240 packages China Tea were offered, and 9,033 packages were sold, all being printed without reserve. Further sales of Indian Tea begin to-day.

SILK.—Quotations are nominally Tsatlee No. 1 at 32s., Mibash No. 1 at 33s., holders being firm.

COTTON.—The market opened for business the week ending Friday, the 21st, with an improved demand, which gradually increased with advancing prices until the 18th, when it met with a check, and the business afterwards was moderate. Prices, which during the early part of the week had risen ¾d. to 1¼d. per lb., again receded about ½d., China and Japan being about ½d. per lb. dearer than on the 14th. We note sales in London during the week of 230 bales of China at 5½d. to 11¼d., low to fair; and 470 bales Japan at 12d. to 12½d. for fair. The market assumed a stronger tone on Saturday, the 22nd. A large business resulted, which would have been more but for the firmness of holders; and prices were quoted ¼d. to ½d. per lb. higher. On Monday, the 24th, the advices from America still further strengthened the market, and a good business was done at Saturday's rates; 50 bales of China went at 12½d., fully fair. Closing quotations: China, middling fair, 11½d.; fair, 12d.; good fair, 12½d.; Japan, middling fair, 11¾d.; fair, 12¼d.; good fair, 13¼d. The stock in London on the 20th July of China and Japan was 4,759 bales, against 29,198 at the same period of last year; the total stock in London being 63,196 bales, against 70,447 last year. Of cotton afloat to Europe on the 21st July there was 22,822 bales of China, against 73,085 last year; and 826 bales Japan against 9,126 last year. The total stock at Liverpool on the 21st inst. was 333,600 bales, against 184,900 same time last year. The Liverpool market has exhibited the same phases as those noted above.

SUGAR.—The market closed firmly on Friday, the 21st, at the full rates of the 14th. On the 21st 3,000 bags Clayed Manila were sold privately at 30s. The business this week has been of moderate extent, and prices are very firm.

COFFEE.—The tone of the market has been quiet since our last, and rather easier rates have in most instances been acceded to. Public sales of Plantation Ceylon have passed off with only a moderate competition at prices rather in favour of the buyer, fine ordinary to low middling 78s. to 82s. 6d., middling to good middling coloury, 83s. 6d. to 89s. Of native, only about half offered was sold at a decline of 6d. to 1s. per cwt., good ordinary 67s. 6d. to 68s., fine ordinary 69s. to 70s., small 66s. to 66s. 6d. At auction 547 bags fine ordinary Java went at 73s. to 75s.; 1,181 bags Singapore were taken at 73s. to 73s. 6d. for fair Bonthyne.

RICE.—We are still unable to report any increase of demand for this article, but a firm tone prevails, and in the scanty amount of business done on the spot, white Bengal has commanded stiff rates—viz., about 2,000 bags middling to good quality, at 13s. 9d. to 14s. 9d., besides which 9,000 bags middling Nakrenzie have been sold at 9s. 6d. cash, and 3,000 bags Bassein at 9s. 1½d. A floating cargo of Nakrenzie, 550 tons, has been sold for the Continent, at 10s. 6d. On the 21st, at public sale, 4,124 bags White Bengal, of the new crop, were bought in, but about two-thirds have since been placed; good bold white, 15s. 6d. to 15s. 9d.

CAMPHOR.—We have again been without business in this drug on the spot. 60 cases China at auction retired 500 tubs Japan are reported for arrival at £5. 7s. 6d. per cwt., and further quantities offering upon the same terms.

CASSIA LIGNEA.—Rather better: of 591 cases at auction, about half sold at 81s. to 84s. per cwt. for first pile, good but slightly mouldy. Moderate business privately. Buds: Nothing of any consequence doing.

COCOA NUT OIL.—This market has been very firm, with moderate business for export in both Cochin and Ceylon, up to the quotations of £45 for the former, and £43 for the latter. Only 76 casks Sydney at auction.

DRUGS.—Cubebs firm; 86 bags at auction mostly sold at 83s. to 85s. per cwt. for good. Dragon's Blood and Galangal Root: Nothing doing in either. Rhubarb: Recent importations, 119 cases offered at auction, and all sold; flat, of fair quality, at 5s. 5d. to 5s. 7d. per lb., and round 5s. 2d. to 5s. 4d. 31 cases (various small parcels) retired.

GUMS.—Benjamin: Quiet; 3 cases Siam, and 31 cases Sumatra at auction all retired. Damar: Very firm; 194 cases sold at auction at 50s. to 50s. 6d. per cwt. for good picked, and 45s. to 46s. good in sorts. Gamboge: Nothing doing.

GUTTA PERCHA.—Continues very quiet, without change in value; little business done privately, and not any at action.

HEMP (MANILA)—Has brought rather more money; sales to a limited extent reported privately at £30 to £31. 10s. per ton for common to good roping. No auctions held.

HIDES.—The quantity of East India Hides at public sale on the 20th was moderate, and the proportion of good quality larger than for some time past. For these there was a good demand, principally for home use, at ¼d. to ½d. per lb. above late prices, and in a few cases an advance of 1d. per lb. was obtained for the best descriptions. The export demand was limited, and middling and inferior hides in consequence barely realised former prices. 1,596 Singapore cow hides offered and sold, light 4d. to 5½d. per lb., heavy 4d. per lb.; 2,552 Singapore buffalo hides offered 1,993 sold at 5d. to 5½d.; 2,688 Java buffalo hides offered 1,458 sold, heavy 4¾d. to 5½d. per lb.

HORNS.—8½ tons Siam Buffalo sold at auction at 43s. 6d. to 44s. per cwt. for 3 lbs. average.

INDIA RUBBER.—Remains firm, but without trade of consequence. 185 packages Assam at auction, sold at 8d. to 10d. for middling to fair.

JAPAN WAX.—Very little doing: some inquiry for fine.

OILS—Anniseed: Quiet, moderate business done at the lower quotation of 7s. 6d. per lb. Cassia: Very flat; 13 cases at auction retired at 8s. per lb., at which price there were no buyers.

PEPPER.—Black: Singapore the turn lower: Penang steady: 3,934 bags Singapore at auction, mostly sold at 3½d. to 3¾d. per lb.; and 570 bags Penang sold at 3d. White: Very dull; 1,216 bags Singapore offered at auction, and very few sold at 5¼d. to 5⅝d. per lb. for middling.

SPICES.—Cinnamon (Ceylon): We quote 1st sort, 1s. 4d. to 2s. 4d. per lb.; 2nd, 1s. 3d. to 2s. 2d.; 3rd, 1s. 3d. to 1s. 9d.; and 4th and Jungle 10d. to 1s. 4d. The Quarterly Sales will be held on Monday, the 31st inst. Cloves: Very quiet for all sorts; 15 cases Penang, and 160 bags Zanzibar at auction, all retired. Mace: Firm; only 6 cases Penang at auction, sold at 1s. 3d. to 1s. 4d. per lb. for good reddish. Nutmegs: Steady; and 61 cases Penang at auction sold at 10d. to 1s. 4d. per lb., for inferior small to middling medium.

SAGO.—A parcel of old import, 915 bags, at auction, retired at 17s. per cwt. Flour: Steady; 2,409 boxes at auction mostly sold at 19s. 6d. to 20s. 6d. per cwt. for good to fine small, and 18s. 6d. to 23s. middling to fine large.

SHELLAC.—Fine Orange of approved marks alone maintains its value, all other kinds are depressed and cheaper. 957 chests at auction, about one-third sold, Orange at 80s. to 97s.; Liver, 62s. 6d.; and Native, 73s. to 74. Our reduced quotations accepted privately.

TERRA JAPONICA.—Cutch, Pegue: Is better: 691 bags and 25 tons loose at auction mostly sold at 19s. to 21s. per cwt., for ordinary to middling mixed and drossy. Privately good quality has been sold at 25s. 9d. to 26s., and very superior 26s. 6d. Gambier: Remains very flat, with limited private business upon former terms: 815 bales at auction, all retired.

TIN.—Straits have fallen £2 per ton, sales to some considerable extent having been made at £90 to £91 cash; Banca has sold at £94; and at these rates the metal is now firm, with free buyers of the former.

MISCELLANEOUS.—Galls: Market for all descriptions remains quiet, prices generally drooping; of 100 pockets Bombay blue, at auction, 20 pockets only found buyers at £9 per cwt. Arrivals of Japan. Sales advertised of China. Musk: Recent arrivals, 128 tins Tonquin offered at auction, and nearly all sold, with excellent competition, at 28s. to 30s. 6d. per oz. for good selected, 18s. 6d. to 21s. 6d. middling rough, and 11s. to 11s. 6d. inferior pickings; 6 tins grain retired. Rattans: Firm, but nothing doing. Ebony Wood: Remains very flat; 11½ tons Ceylon sold at about £5. 17s. 6d. to £6. 6s. per ton. Sapanwood: Firm; 22 tons Siam at auction sold at £12. 2s. 6d. to £12. 15s. per ton; and 6 tons Ceylon at £9. 10s. Moderate business privately. Mother-o'-Pearl Shells: Firm, but nothing doing. Soy: Continues very quiet, and no business. Star Anniseeds: Very scarce, and much wanted. Sticklac (Siam): Quite neglected; no auctions. Sales advertised. Tortoiseshell: Nothing doing. Turmeric: No China offering; nothing doing in Java. Vermilion: Scarce, and business limited in consequence.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 15s. to £8; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10. 5s.; sheets, single, £10. 10s. to £11; Staffordshire bars, £8. 15s. so £9; rails, £7 to £7. 5s.

STEEL.—Swedish keg, £15.

COPPER.—Sheet and Sheathing, £91 per ton; yellow metal, 7½d. to 8d. per lb.

TIN.—94s. for block; 95s. for bar. Tin plates, best charcoal, I.C. 28s. 6d. to 29s. 6d.

LEAD, &c.—English pig, £19 to £19. 5s.; W.B., £21; shot patent, £22. 10s.; sheet, £20; spelter, £22. 5s. to £22. 10s.; zinc, English sheet, £27. 10s. to £28; quicksilver, £8.

The following is from the circular of Messrs. French and Smith:—We have scarcely any alteration in the quotations for metal to report since the date of our last circular. The market remains inactive.

FREIGHTS AND CHARTERS.

The demand for coal ships to China has somewhat fallen off since our last impression, and rates are lower, other freights remain without alterations.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 35s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £40 and £2. 2s. For Shanghai: £52 and £2. 12s. 6d. For Manila: 34s. to 35s. For Batavia: 24s. to 26s. For Singapore: £32 and £1. 8s. For Galle: £29 to £30 and £1. 6s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

MISCELLANEOUS.

Off ASCENSION.—June 24, from Sourabaya, Antelope.

At ST. HELENA.—May 27, from Padang, Marten v. Rossen, Gerrebrands, and sailed 29 for Rotterdam; 28, Zaamstroom, Schaap, and sailed 29 for Amsterdam; from Penang and Simon's Bay, Alice, Hernod, and sailed 29 for London; 30, from Batavia, Johanna Elisabeth, Duinker, and sailed 31 for Amsterdam; 31, from Banjoewangie, Rudolf, Miensma, and sailed 1st June for Rotterdam; 6, from Batavia, Java Packet, Hellingman, and sailed 7 for Amsterdam; 7, from Macao, Camoens, Santos, and sailed 8 for Havana; 8, from Manila, Reina de los Angelos, Vildosola, and sailed 10 for Cadiz; 9, from Shanghai, Her Majesty, Seymour, and sailed for Liverpool; 10, from Banjoewangie, Eva Johanna, Hordyk, and sailed for Middelburg; 16, from Padang, Argo, Ankringa, and sailed for Rotterdam; 18, from Banjoewangie, Medea, from Batavia, Drenth—both sailed 19 for Rotterdam, Maria Anna, v. Monnom, and sailed 20 for Rotterdam; from Manila, Margarita, Mas, and sailed 19 for Alicante; from Penang, Dunmore, Robertson, and sailed 20 for London; 19, from Foo-chow-Foo, Maiden Queen, Smith, and sailed for London; from Pasaroeang, Emilie, Lundstrom, and sailed 21 for Stockholm; from Sourabaya, Regina Maria, Ouwehand, and sailed 20 for Middelburg; from Canton, Philippine, Sanderson, and sailed for London; from Pasaroeang, Emma, Broberg, and sailed 21 for Falmouth; from Batavia, Ouderkerk, a.d. Amstel, Dingemans; from Manila, Angela, Onate, and sailed 20 for Santander; from Shanghai, Agamemnon, George, and sailed 20 for Liverpool; from Canton, Arima, Kerr, and sailed 20 for Demerara; from Sourabaya, Antelope, Tornstrom, and sailed 19 for Falmouth; from Batavia, Johannes Anthonius, v.d. Straaten, and sailed 21 for Rotterdam; 20, from Manila, Indian, Lagus, and sailed for London; from Penang, Devonvale, Brown, and sailed for London; from Java, Theodora Machtilda, v.d. Wyck; from Ceylon, Winlow, Howard; from Singapore, Carl Julius, Bockhoff, and sailed 22 for Falmouth; from Manila, Dos Hermanos, Tuton; from Ceylon, Planet, Jenkins; from Manila, Maria Delora Espana (?), Castello; 21, from Java, Hollandia, Wap; 22, from Tjilatjap, Schelde, Hoffman, for Amsterdam.

At TABLE BAY.—June 9, from Singapore, Alexandria, Small, and sailed 12 for London.

At SIMON'S BAY.—June 3, from Hong Kong, Sovereign of India, Scott; 8, from Marseilles, Duplex (s.), Meligan, and sailed 11 for Singapore; 9, from Batavia, Adolf Hertog von Nassau, Uhtenbeck, for Holland.

At MAURITIUS.—June 8, from Singapore, Frederica, Blyth; 15, Corea (s), Russell, sailed for Singapore.

At REUNION.—June 16, from Manila, for Nantes, St. Vincent de Paul, Langostine.

CASUALTIES.

The Passe Partout, from Sunderland, for Japan, put into Rio Janeiro prior to June 23, short of water.

The Johanna Maria, Wilhelmie, from Banjoewangie, to Rotterdam, put into Mauritius June 9 for repairs, having on the 16th April, in lat. 22 S., lon. 73 E., experienced a severe hurricane, which lasted several hours, and on May 9 sprung a leak. On the 13th and 14th, the leak increasing, she threw over part of her cargo, and on the 18th, in lat. 37 S., lon. 27 E., met with hard gale and sprung her mainmast.

During the gale at the Cape of Good Hope on May 17, the Fernande, from Bordeaux for Singapore, with a general cargo, was stranded. Part of her cargo was saved and would be sold. She had put into the Cape for repairs.

The Beatrice, Martin, of and for London, from Shanghai, put into St. Helena May 28, leaky; she discharged the whole of her cargo and prepared to be hove down. It was found upon examination that all her false keel was gone, her main keel injured, and part of her cargo damaged by sea water.

The Ida Willemina, Rotgans, of and for Rotterdam, from Batavia, put into St. Helena June 2, leaky in her topsides; having discharged 1,000 bags of coffee, she was repaired, and on the 13th June sailed for her destination.

The Carioca, from Bombay for Liverpool, arrived at St. Helena June 19, and in getting under weigh on the afternoon of the 21st she dropped down on the Hollandia, Wap, of and for Rotterdam, from Java, which vessel sustained trifling damage.

The Zaanstroom, Schaap, from Banjoewangie, arrived at Texel July 18, leaky, and with other damage.

SOLE AGENTS FOR THE INVERNETTIE GRANITE COMPANY.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated her Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

TOZER'S BOOTS AND SHOES,

For Ladies, Gentlemen, and Children, are FIRST CLASS in QUALITY and STYLE, and most ECONOMICAL IN PRICE.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty, and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S OINTMENT and PILLS.—EXPERIENCE BEFORE AUTHORITY.—For nearly the third of a century have these remedies stood in the foremost rank for overcoming ulcers, sores, swellings, rashes, and all descriptions of skin diseases. At first the faculty denounced these medicaments, but the experience of sufferers soon overthrew all interested opposition. Those whom Holloway's medicines had cured told other invalids the benefit they had derived from their use; those in their turn tried them, found equally satisfactory results, and thus are these admirable curatives used and prized throughout the habitable globe. The Ointment has always been applied with the most marked success in erysipelas, varicose veins, swelled ankles, and numberless other infirmities by which thousands around us are sorely oppressed.

REPORT of the Directors to the Second Ordinary General Meeting of Members, held at the London Tavern, Bishopsgate-street, on Friday, the 28th July, 1865.

The directors beg to submit to the shareholders the report of the proceedings since the last general meeting, held on the 27th January, as also the accounts up to the 30th ultimo, duly audited.

In the circular issued by the directors on the 12th May mention was made of their inability, from the want of unanimity in favour of the measure on the part of the shareholders, to carry out the suggestion as to the reduction of the nominal amount of each share. The directors have further to report that none of the proposals for amalgamation which they have had under consideration have as yet come to a successful issue.

With reference to the accompanying accounts the directors have to mention that as against the item of £191,570. 9s. 8d. under the head of "Advances on Securities," the corporation holds collateral security to the nominal value of £333,585.

It will be noticed that it has been deemed advisable to write off a further amount of £1,000 from the preliminary expenses, and this reduces the amount at the credit of profit and loss on the 30th ultimo to £11,372.

Unless otherwise desired by the shareholders, the directors do not intend declaring an ad interim dividend for the past half-year.

As mentioned in the circular above alluded to, the directors have been enabled to place the securities of the Corporation on a more satisfactory footing, but from want of capital the business done elsewhere than in India has been necessarily restricted.

The transactions in Calcutta have been of a satisfactory nature, but the latest letters from our agents in Bombay bring advice of their having been obliged to carry over some of the loans they had entered into.

Looking to the quoted price of the shares, and the natural anxiety expressed by many shareholders on that account, the Directors regret that the suggestion made by them in their circular dated 12th May last, that the shareholders should satisfy themselves respecting the actual worth of the shares by reference to the official records, should have been acted upon by very few of their number.

Since, however, shareholders residing at a distance may have been prevented from availing themselves of the opportunity thus afforded to them, the Directors would now state that if the shareholders should think it expedient to appoint a committee from their own body to inquire into the affairs of the Corporation in every particular, such a course would, probably, be satisfactory to all concerned.

BALANCE-SHEET.—JUNE 30, 1865.

PROFIT AND LOSS ACCOUNT.—JUNE 30, 1865.

DR.		
To current expenses, including salaries, advertising, stationery, rent, directors' fees, and incidental charges at Head Office, as also Calcutta agency	£2,331 5 7	
To amount paid Mr. H. A. Parry on his retirement from the office of Manager	1,000 0 0	
To depreciation in the value of investments	1,050 0 0	
To amount written off preliminary expenses	1,000 0 0	
To balance carried to profit and loss (new account	11,372 0 0	
	£16,753 5 7	
CR.		
By balance from last account	£12,971 3 3	
By gross profits for the past half-year	3,782 2 4	
	£16,753 5 7	

We have examined and audited the above accounts, and find them to be in accordance with the books of the company, and duly substantiated by vouchers. Several of the transactions from which the profits are derived are still pending, and it is impossible to say what some of the securities, held in connection therewith, may realise. We are, therefore, of opinion that the balance of profits shown by the accounts should be carefully dealt with.

JOHNSTONE, COOPER, WINTLE, and EVANS.
3, Coleman-street-building, July 25, 1865.

The Secretary having read the advertisement convening the meeting,

It was resolved unanimously:—

"That the report and accounts now read be received and adopted.

"That the remuneration of the auditors for their services in the past half-year be £25.

"That the best thanks of the meeting be given to the chairman, directors, and secretary for their zeal and attention to the affairs of the corporation."

(Signed) JOHN BROWN, Chairman.
(Extracted from the Minutes.)
J. FRED. PRIGGEN, Secretary.

List of Passengers.

PASSENGERS INWARD.

By yesterday's mail per P. and O. Company's steamer Pera, arrived at Marseilles August 5.—From Shanghai: Mr. Pickwood, and one 2nd-class passenger. From Hong Kong: Messrs. Edwards and Shaw. From Singapore: One 2nd-class passenger.

Per Poonah, to Southampton, expected to arrive August 10.—From Shanghai: Mr. Prior, and two 2nd-class passengers. From Hong Kong: Mr. Wallis, Dr. Clay, Mr. May, Capt. Collett, and four 2nd-class passengers. From Singapore: Mrs. Bushell, and one 2nd-class passenger. From Penang: Rev. Mr. Burns, Mrs. Burns, and three children, Master Rodyk, and one 2nd-class passenger.

Per Baroda, arrived at Suez July 28.—From Singapore: Messrs. Berwick and Cobb. From Shanghai: Mr. Innis. From Hong Kong: Mr. Vickers. To Malta.—From Hong Kong: Mr. Owen. To Southampton.—From Yokohama: Mr. and Miss Hansard. From Hong Kong: Master H. Noble, Mr. Heywood, Mr. Durbron, and four 2nd-class passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer, from Southampton, Aug. 4.—To Shanghai: Mr. Landale. To Hong Kong: Mr. W. Macfarlane, Mr. J. D. Rivera, Mrs. Thomas and infant and one second-class passenger. To Singapore: One second-class passenger. To Penang: Mrs. and Miss McLeod. To Ceylon: Mr. G. Studdart, Mr. G. Jackson, Staff Assistant-Surgeon Farquharson, Mr. Kennedy and two second-class passengers. To Calcutta: Messrs. B. Coen, W. Melhuish, J. T. O. Flynne, H. H. Tubb, F.W. Wiesse, J. Campbell, J. Paterson, J. W. Alexander, and J. A. Willmore, Dr. and Mrs. White, Assistant-Surgeon Murray, Surgeon-Major Turnbull, Mrs. Turnbull, Captain and Mrs. Browne and infant, Mrs. Adamson, and nine second-class passengers. To Madras: Mr. and Mrs. Pirrie, Miss Simpson, Mr. R. M. Branson, Surgeons O'Leary and Noott, Mr. H. Neill, Captains W. Thompson and T. O'Neill, Mr. Aikman and two second-class passengers. To Aden: Assistant Surgeon D. Grosse. To Alexandria: Three second-class passengers. To Malta: Rev. C. Clark, Captain Maycock, Mr. C. J. Lowell, Capt. Lyon, Lieut. Palmer. To Gibraltar: Lieut-Colonel C. J. Arbuthnot, Mr. Costello, Lieut.-Colonel Hawes, and five second-class passengers.

From Marseilles, Aug. 12.—To Hong Kong: Mr. J. S. Fyfe. To Singapore: Messrs. Watson, J. Brussel, and J. Stewart. To Calcutta: Lieut.-Colonel Wroughton and European male servant, Lieut. and Mrs. Adams, Mr. and Mrs. Ironsides, Captain Mallock, To Ceylon: Mr. Grinlinton. From Suez.—To Hong Kong: Mr. W. Hulse. To Singapore: Mr. Leveson.

Per P. and O. steamer Mongolia, from Southampton, Aug. 20.—To Shanghai: Mr. H. P. M'Clatchie, Mr. M. O'Brien. To Hong Kong: Mrs. Tomlin, Mrs. Emilius Hughes, Mr. Rennie, Mr. and Mrs. Manning. To Ceylon: Mr. F. M. Evans, Mr. E. W. H. Holdsworth, Mr. John Wodehouse, Miss Williams. From Marseilles, Aug. 28.—To Singapore: Mr. and Mrs. M'Lean. To Ceylon: Mr. D. B. Lindsay.

Per P. and O. steamer, from Southampton, Sept. 4.—To Hong Kong: Mr. W. Foster. Mr. W. Gaskell. To Shanghai: Mr. and Mrs. G. H. Fitzroy, Mrs. Black and child, Mr. Bloor, Mrs. G. Stanford and infant. To Singapore: Mr. H. Alabaster. From Marseilles, Sept. 12.—To Hong Kong: Rev. J S. and Mrs. Burdon, Mr. and Mrs. Coxon. To Shanghai: Mr. and Mrs. Townsend, Mr. R. J. Forrest, Mr. Herbert and friend. To Ceylon: Mr. J. F. Capelle, Mrs. Ballantyne. To Galle: Mr. W. Hudson. From Suez.—To Shanghai: Sir Rutherford and Lady Alcock and Miss Alcock.

THE MAILS.

The mail due in London on the 27th ultimo, did not reach here until the 7th instant, and was followed by the French Mail on the morning of the 8th. The next P. and O. Mail is expected to be delivered here on the 16th instant, having been telegraphed from Suez on the 6th.

A private telegram direct from Point de Galle, received in London on the 7th, gives the latest dates from China:—Hong Kong, July 12; Shanghai, July 4; Foo-chow-Foo, July 3. Export of tea for the fortnight, 5,000,000 lbs.; fair demand. Rate of freight at Whampoa, 50s. Exchange in Hong Kong, steady at 4s. 5½d.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Our intelligence is down to the 28th of May. The London mail of the 27th of March arrived out on the 22nd of May.

The Tycoon is arming himself, with the intention of attacking Prince Nagato in his own dominions. Several Japanese officers, and amongst them some men of rank, visited Yokohama about the middle of May, and bought large quantities of arms. Most of them were men belonging to the Tycoon's Government, and some were executing orders of Prince Owari, and other Daimios attached to the Tycoon's cause; but all were unanimous in stating that open war was to be declared against the rebellious Prince of Nagato. It was added, but in a more mysterious and less certain way, that the powerful Daimio Satsuma had promised his alliance to his friend and neighbour Choshiu, and that the young Tycoon, in presence of the imminent danger threatening his supremacy, was to place himself at the head of his army, and to prove to the whole empire that he is a worthy son of Gongen-sama, well able to maintain by force the sacred rights attached to the throne which his great ancestor had won by conquest for his family. The latest information is that at Comaba, a village near Yedo, the Tycoon had reviewed 100,000 of the troops that had received orders to march immediately to the dominions of Choshiu.

The *Japan Herald* puts up hearty wishes for the Tycoon's success in the coming struggle, asserting that "the probable consequences of his defeat, would be a long interregnum, a time of trouble and disorder, where club-law would rule Japan, and during which most of the great Daimois would claim to be recognized as independent sovereigns. Foreigners would, in this case, be obliged to enter into relations with Daimios of very questionable legal, and more or less restricted real power; and as it would be impossible to conclude special treaties with all of them, our merchants would live in constant apprehension of such events as led to the late Inland Sea Expedition. A treaty with Satsuma would be worth nothing in Shanghai; the Prince of Choshiu would consider himself in no way bound by any agreements made by the Prince of Owari, and if real security were to be given to our trade, it could only be by appointing Ministers for every principality, and Consuls at every open port; in short, the difficulties arising from the necessity of dealing with so many masters would be almost insurmountable."

Regret is expressed that at this critical juncture the Royal Marines should have received orders to hold themselves in readiness for embarkation on board the *Conqueror*, Captain

Digitized by Google

Luard expecting orders by next mail to receive them on board at once and proceed home. The orders understood to have been received by Admiral King were, "to send the Marines home if he could spare them." It was hoped the British Chargé d'Affaires would consider the matter well before they left. However, two companies of the 11th Regiment were expected to arrive shortly after the departure of the Marines.

Mr. Flowers, Acting British Consul, had circulated the following communication from the Governor of Kanagawa, recommending parties to abstain from visiting the places named during the period mentioned :—

To Marcus Flowers Esq., H.M.'s Acting Consul.

The great feast at Nikkodzan is finished. The Mikado's Envoys will be passing along the Tokaido to-day and three following days. They will put up at Yenosima and Kamakura. In compliance with former communications made to you upon the subject, I beg that you will kindly request your countrymen to avoid frequenting these places as much as possible during two or three days. Our Government is anxious to show these Envoys every attention.—With respect, &c.,

Sharishi Simoo-no-Kami.

24th, 4th Month (18th May, 1865.)

The election of Members of the Municipal Council had resulted as follows :—

English : Messrs. Macpherson, Barber, Wilgoss, Macdonald, Kemptner, Kingdon, Miller, Cornes, Hope, Joseph, Elias—11.

American : Dr. Hepburn, Messrs. Schoyer, Schultze, Gay, Benson—5.

French : Messrs. Le Jeune, Piquet, Deveze, Clipet—4.

Prussian : Messrs. Grauert, Schnepel—2.

Swiss : Mr. Morf—1.

Dutch : Messrs. Bruyn, Hegt—2. Total, 25.

Messrs. Macpherson and Hope *have* declined serving, consequently Messrs. Rickerby and Davies *are* elected in their stead.

Robberies are still rife. The house of Mr. E. Loureiro had been entered, and a revolver and gold sleeve-rings stolen ; and on the very same evening Mr. Walsh's office at the English Consulate was relieved of a dispatch-box and postage stamps to the value of $1,000. One circumstance is narrated in connection with these thefts which is very creditable to the Japanese character :—Among the robberies that have lately taken place, one was that of Mr. J. S. Benson, of a quantity of jewellery, &c. A considerable portion of the effects stolen have been recovered through the honesty of a Japanese. His child was literally playing in the gutter, by the Custom-house, when something glittering caught its attention in a small Japanese drain. The child ran to its father, who perceived at once that it was the property of foreigners, and communicated with Mr. Banks, the U.S. Marshal. With a vigilance thoroughly characteristic, Mr. Banks set about investigating the affair, and there is some hope of recovering the whole of the property, and capturing the thief into the bargain. In this case the culprit is proved to be a Japanese.

The Japanese authorities themselves do not appear to be keen "detectives." After they had dismissed a servant charged with plundering, the gentlemen who were his accusers, the very same evening, under a promise of forgiveness, elicited a confession from the culprit, who said that he and another had taken the whole of the missing things and pawned them. This was proved to be true by a messenger who was sent to the various places mentioned by him, bringing back several of the things lost.

On the 24th May, being the Queen's birthday, Yokohama appeared in gala costume. The whole of the vessels in the harbour, were fully dressed ; and on shore it seemed that all who possessed flags displayed them. The house of the French Minister in particular was arrayed with festoons of Japanese paper lanterns ready for the illumination of the evening, but which being of many colours had a gay appearance even by day, and over the principal entrance to the house were the words in large and bold characters "Vivat Victoria Regina." At noon all the men-of-war of all nations and the Japanese forts poured forth a royal salute, which was re-echoed from the seven guns on the heights where the troops in garrison were reviewed by Colonel Browne. In the evening a grand ball was given by H.B.M.'s Charge d'Affaires. The French Minister's house, the French barracks on the opposite side of the creek, and the houses of one or two English residents were brilliantly illuminated.

On Monday next (May 29), says the *Japan Herald*, the 5th day of the fifth month of the Japanese year, a great Japanese holiday will be kept. It is one of five that occur in the year, and which are accordingly called Tanugo or Goseku. The days on which the holidays fall are the first of the first month, the third of the third, the fifth of the fifth, and the seventh. There may be observed, in preparation for this great holiday, flags in form of huge fish, flying over many of the houses in Japanese towns. These fish are supposed to represent the salmon, whose nature is to ascend rivers, leaping over cataracts and falls that would oppose its passage upwards, until it approaches the head of the stream. The emblem is only suspended over houses in which male children have been recently born ; and denotes the desire of the parents that, as the fish constantly makes it way towards the river's source, surmounting the obstacles in its course, so the child may overcome the difficulties of life, and attain the highest promotion in its particular sphere. The corresponding holiday on the third day of the third month is likewise appropriated by those whose ladies have blessed them with daughters. There is then suspended a small Ningyo—or image of the Mikado—and it is supposed to express the hope of the family that the child may never cease in its prosperity on earth until it reach the sublimity enjoyed by the greatest earthly living object of Japanese veneration. On the fifth day of the fifth month the change is made, throughout all this portion of Japan, from cold to warm weather clothing—so exactly is everything regulated among this interesting and remarkable people.

It appears there are more delays in the filling in of the Swamp. The Japanese authorities have lately caused one of the larger bays in the Homogo valley to be laid out for the purposes of rifle practice. The hill as it rises at the end of this bay has been cut and faced, and when the targets are placed will form excellent rifle butts, whilst a broad space has been defined by a deep ditch on each side, for a distance of nearly one thousand yards. It is to be used indiscriminately by Europeans and Japanese, and a portion of the ground when drained and properly grassed is to be made into a racecourse. This is the only part of the scheme objected to. The possession of this makeshift racecourse will give the Japanese Government grounds for postponing the preparation of that we are entitled to by treaty. It was generally understood a fortnight back, says the *Herald*, that the contract had been taken by a Japanese contractor for the immediate filling in of the Swamp—but if our information be correct, this was a fallacy. No such contract has been actually taken, or had not a few days ago—although the Government had called for tenders.

The appeal case of Henry Cook, appellant, *V.* Samuel Powell, respondent, has been decided before Mr. Winchester, the Acting Consul-General. This was an appeal against the decision of the Kanagawa Consular court, in an action in which the plaintiff respondent sued the apellant defendant on an alleged breach of contract to form a Co-partnery, and judgment was given in favour of plaintiff and respondent for five hundred dollars. The judge in appeal stated that he had gone over the pleadings and evidence with great care, and gave judgment as follows :—It is in this case the opinion of the Judge of Appeal, the plaintiff in the original case and the espondent in this appeal has failed to establish the existence of any definite or binding engagement between himself and the defendant and appellant, on which the claim for damages can be supported. The decision of the Consular Court is, therefore not sustained, the award for damages revoked, and judgment directed to be reversed and entered up for the defendant and appellant Cook with costs. Plaintiff and respondent Rowell to pay costs of original suit and this appeal.

Messrs. Alt and Co., of Nagasaki, advertise that they have opened a branch of their firm at this port.

The following is from the market report of the *Japan Herald* :—

Imports.—Since our last report a decided improvement has taken place for manufactured goods, owing to the more favourable exchange of native coin for Mexican dollars. The transactions during the fortnight have not been very large, but our dealers have entered the market more freely, and grey and white shirtings and other cotton fabrics suitable for the present season have found buyers at satisfactory prices. During the last few days the demand has been less brisk and lower prices have been accepted than in the beginning of the fortnight. Camlets have also improved, and the sales made show a slight advance in prices. Metals in general continue dull, and sugar and medicines also show no improvement.

Silk.—The demand for this staple fell off sensibly after the departure of the Peking, but revived since the receipt of the 27th March mail, and prices which were at one time very flat, with a decided downward tendency, are again firmer, more especially for the finer sorts, the growing scarcity of which is every day more conspicuous. The total settlements of the fortnight amount to about 950 bales, making a total for the season of 15,450 bales, against 15,220 at the same time last year. The unsold stock on the market may be estimated at about 660 piculs, composed mostly of the medium and coarse sorts. The weather is favourable for the new crop, which, from all accounts we can gather, is getting on well. The earliest

Digitized by Google

bales of the new produce may be expected to arrive on the market in about three weeks.

Teas.—A few small parcels of new teas have been already brought down, but more to try the market than anything else; the whole of them not amounting to more than 50 piculs—consequently they cannot be taken as a criterion of the quality of the new crop generally. Prices, with the exception of medium to good medium descriptions, which we must quote $1 lower, are without alteration. Settlements amount to about 1,200 piculs, leaving a stock of about 3,000 piculs.

Exchange on London, Bank, 6 m/s. st. 4/5¾d. to 4/6d.; Private, 4/6½d. to 4/6¾d.; Documents, 4/7d.

NAGASAKI.

The British barque *Satsuma* was lost on the morning of the 3rd May to the southward and eastward of Cape Namo, about twelve miles from the entrance to Nagasaki. The weather was so thick and the wind so high at the time that it was impossible to conjecture the position of the vessel. A court of inquiry into the circumstances of the wreck sat at the British Consulate on the 5th, but was adjourned to Thursday the 8th of June. No blame is attached to the captain by the owner or the general public. About one half the cargo was saved, and the wreck was sold by auction on the 6th, for the sum of $1,350. She was the property of Mr. T. B. Glover, but had been sold for $23,000 to the Prince of Satsuma, to whom she was to have been delivered immediately after her arrival at Nagasaki.

On the 6th May the American brig *Star* hauled down the American flag and hoisted the Japanese. She was sold by Messrs Glover and Co. to Prince Kaga for the sum of $12,500, cash. The *Star* had been chartered by Chinese to load for Chefoo and Tientsin for $2,000, and she was already nearly full at the time of sale. The Russian brig *Atlantic* was, however, chartered for the same amount, and she was, when our correspondent wrote, engaged in transferring the *Star's* cargo.

The Prince of Ake Zukee paid a visit to the settlement on the 1st June. It seems that he was very anxious to see the saw-mill, and Messrs. Glover's bungalow, where he enjoyed a heavy chow-chow. This was the first time that a Japanese Prince had ever visited a foreigner's house. The Queen's birthday was enthusiastically celebrated. A large picnic was given, and at night several of the bungalows on the hill were handsomely illuminated, Messrs. Glover and Co.'s fireworks being the theme of universal admiration.

HAKODADI.

A fire occurred early on the morning of the 13th April. It arose in the best part of the town, and was not checked for some hours. Five hundred houses and godowns were consumed. Most of the Japanese so-called "fireproof" store-houses stood. Only one foreigner suffered, by having his hotel burned down. The exact cause is not precisely known. Some of the foreign residents aided materially with their fire-engines in arresting the flames.

Under date of the 6th May, we learn the departure of the Russian steamer *Sakhalin* for the Manchourian ports, the *Petrel* for Shanghai on the 4th May, and four whale-ships. The Russian corvette *Bogatyr*, six whalers, and the barque *Ousuri* were announced to leave on the 7th for Nagasaki. On the night of the 3rd a seaman belonging to one of the whale-ships in harbour was killed by some Japanese in a street row. The Consuls had taken up the affair seriously, but the Japanese officials observed a quiet and haughty demeanour, against which all the threats of the Consular body were hurled without effect. The murderer or murderers, as they are called, had consequently not been detected. During the stay of the whaling fleet drunken sailors crowd the streets daily, and the wonder is that no serious accident occurred before. The weather had been somewhat changeable, but on the whole seasonable.

The ship *Lottie Maria*, from Hong Kong, bound to San Francisco, with rice and Chinese passengers, put in on the 18th April, and left on the 28th. She was twice ashore, and not without some difficulty got off.

CHINA.

PEKING.

The chief items of news brought by the present mail have been anticipated by telegraph. San-ko-lin-sin has been killed in an engagement with the Nien-fei rebels, and Tseng Kuo-fan has received the Imperial command to assume his place. Li Hung-chang, Futai of Kiangsu, will in turn occupy the post vacated by Tseng Kuo-fan, while Li Hung-chang will for the present be succeeded by Liu Fantai, who three years ago was Hsien of Shanghai. Burgevine has been captured near Amoy, and sent prisoner to Foochow, where he is detained by the Viceroy. Prince Kung does not appear to have yet quite recovered from his late disgrace.

The news from the capital is of the most alarming character. The Nien-fei rebels had advanced to within ten miles of the city of Pao-ting-fu, and therefore not more than one hundred miles from the capital. The danger was considered so imminent that the Keangsu authorities had received instructions to send up the disciplined contingents, and as many ordinary troops as could be spared. The S.S. *Fusiyama*, *Viola*, *Glengyle*, and *Fenella*, and two sailing vessels, had been chartered for this purpose, and were to leave in a few days with seven thousand men. The rebels are led by Miao Tien-ching, a son of the renowned Miao Pei-ling. The Governor-General of the province has gone against them, also Chunghow, the chief civil mandarin of Tientsin, and with him the European drilled battalion. Meanwhile the French and English are about to evacuate the Taku Forts, a movement which augments the fears of the Chinese here in no small degree. Much blame has been attached to the high officials commanding in Shantung for their negligence in not securing the body of the Sêng Wang (San-ko-lin-sin). It fell into the hands of the enemy, who are said to have cut it into fragments.

The Empress Regent, at the instance of Prince Kung, is said to have directed the execution of a map of China, the basis of which shall be the topographical labours undertaken between the years 1708 and 1720, in the reign of the Emperor Hang-Ti, by Father Regis, a French Jesuit, of which the record is preserved in the library of the Imperial College of Letters.

TIEN-TSIN.

The only interesting item of news from this port concerns the Spring Race Meeting, which, after a postponement from the 11th to the 15th of May, came off very satisfactorily.

SHANGHAI.

Our latest advices from this port are to the 10th June. The English mail of 17th April had been received.

Li Futai had been raised to the rank of Hsu-yi-peh, two degrees higher than that he has hitherto held.

The Consular Court had been occupied in investigating a case arising out of the death of the chief officer of the *Ocean Gem*, caused by the administration of a narcotic poison in mistake for tincture of rhubarb. While at Nagasaki, some of the bottles in the ship's medicine-chest had been refilled with drugs purchased at the shop of a Japanese druggist, and one of the bottles labelled tincture of rhubarb, turned out to contain laudanum, a dose of which was administered to the chief-officer, causing his death. Captain Selby, of the *Ocean Gem*, having stated, on his arrival at Shanghai, that the medicine which produced this fatal result was supplied to him by Dr. Bauduin, of Nagasaki, that gentleman sent instructions to his representative at Shanghai, Mr. Kroes, to take legal proceedings againgst Captain Selby for making a statement so detrimental to his character as a medical man. The *Ocean Gem* had, however, already sailed from Shanghai before an action could be commenced. The evidence adduced so clearly proved that medicine had been procured not from Dr. Bauduin, but from a native shop, that Sir Harry Parkes stated it was amply sufficient to exonerate Dr. Bauduin, and gave it as his opinion that it would not be worth while following Captain Selby with the view of bringing him to justice.

Two Japanese officials had arrived in Shanghai, and left for Europe by the *Mirage*, for the purpose of becoming citizens in some country other than their own. They are said to have become distrustful of the despotic sway exercised by the Prince of Nagato, in whose service they formerly were, and, accordingly, take this means of enjoying more freedom than they have hitherto possessed.

A fire took place at Pootung on the 29th May, destroying the cocoon-drying establishment of Messrs. Jardine, Matheson, and Co., at that place. Another fire broke out in the Ma-loo, on the 1st June, and consumed several streets of native houses, but without loss of life.

An attempt was being made to place a beacon on the Centaur shoal, and thus enable river steamers to run at night with perfect safety between Wusung and Langshan whenever there is light sufficient to make the beacon visible.

The news just received in Shanghai of Sir Harry Parkes's removal to Yedo had given rise to some perplexity as to the appointment of an officer to succeed him as commandant of the Volunteer force.

The *N. C. Daily* gives the following brief *resumé* of the state of trade:—

Digitized by Google

There is very little business to report in either exports or imports since the departure of the last mail. Silk forms the only exception, as in this article considerable transactions are reported, owing to the favourable news received from home.

Teas.—Black: Not a single settlement has taken place, buyers being unwilling to pay the equivalent of Hankow prices. Several parcels have been put on the market, chiefly medium Oopacks, but no finest chops have been offered. Green: Only one small chop of Fychow has been settled, and that at rather lower prices. Stock, 8,000 packages, comprising chiefly commonand undesirable sorts.

Silk.—A large business has been done in new silk, some 3,500 bales having been purchased at an advance of Tls. 25 per picul on last quoted rates. Supplies are coming in freely, and the stock may be estimated at about 4,000 bales.

Cotton.—Little or nothing has been done, the supply being nearly over. Prices remain unchanged.

Imports.—A fair business is reported in manufactured goods, and the market closes firmer at Tls. 3.8.0 to Tls. 3.8.5 for 6¼ grey shirtings.

Freights to London have declined to £3 for clippers, with an increasing demand for tonnage. No cotton is offered, and on account of the non-arrival of the green teas we can give no Freight quotations for "Shanghai to New York." Freights to Chefoo and Tient-sin have also slightly declined.

Exchange has advanced, and closing rates are—Bank bills, 6s. 4¼d.; credits, 6s. 5d. to 6s. 5¼d. During the past week Mexican dollars advanced to 759, but closed to-day at 752. They are now taken in the interior to the extent of 40 per cent. in payment for silk, and as Carolus dollars become scarcer every day this proportion will necessarily rise. Money remains abundant with both Chinese and foreign banks.

HANKOW.

We have no advices as to domestic events. About fifty-five chops of tea have been taken at previous rates for the lower grades, but all good and fine leaf has advanced Tls 2 per picul on opening quotations. The news of the reduction in duty had just arrived as our advices were written, so we may fairly expect a further general rise. The quality of the crop continues to be complained of.

Arrivals to June 10th....	128 chops.
Settled	103 "
Stock....	25 chops.

The *Eliza Shaw* and *Silver Eagle* have left for London.

KIU-KIANG.

The green tea season has closed, and no business has been done as the new Ning-chows have not arrived.

FOOCHOW.

Burgevine, whose seizure by the Chinese authorities at Amoy is noticed above, had arrived safely at this port, where he remained in charge of the mandarins. The American Consul demanded that he be given up, but was put off on the plea that no action could be taken in the matter until advices were received from the Futai of the province.

The following, dated 6th June, is from our corrrespondent:—Since my last advice, the following ships have sailed for London with new teas:—

May 24th	"Fiery Cross"	with	950,400
„	"Serica"	„	1,021,800
May 26th	"Yangtsze"	„	959,930
„	"Ziba"	„	649,600
May 30th	"Flying Spur"	„	884,600
„	"Childers"	„	1,388,000
			5,854,300
Same time last year ..			3,945,000 lbs.

To this year's export should be added the cargoes of the *Black Prince* and *Belted Will*, which vessels left for London this morning, but they have not yet been circulated.

The *Childers* left the anchorage on the 30th ult. (in tow of the China and Japan Steam Navigation Companies steamer *Vulcan*), and when about two miles outside of Sharp Peak, she struck on the north sand bank and has become a total wreck. Her loss has been severely felt by insurance companies here, who had taken something like $800,000 on her cargo, which comprised some of the finest teas that that ever left the Foochow market; not over 2,000 packages have been saved. At the time the ship struck a pilot was on board, and in a few days an inquiry will be held at the British Consulate as to the cause of the unfortunate mishap; the wreck was to have been sold yesterday by auction, the result of which has not transpired. Capt. Enright, who commanded the *Childers*, will probably go home overland. He is well known here and much respected.

Vessels now loading for London are the *Min*, *Young Lochinvar* (both nearly full), *City of Aberdeen*, *Lauderdale*, *Taeping*, *J. M. Joshua*, and *Japanese*, for Liverpool via Whampoa, *Chalgrove*, *Melbourne*, *Edgar Ross*.

Ever since the news reached this port of the Home reduction of the tea duty our tea market has been very animated, and sales for the past fortnight consist of 66,000 chs. Congou, at 18 to 41 taels short price, showing a slight advance on previous rates for medium kinds. Scented Teas, some 8,000 to 9,000 boxes have found buyers at 29 to 43 taels.

The wreck of the *Childers* has been sold for $400; her tea is selling at 50 cents per chest.

NINGPO.

On the night of the 27th of May a Ningpo boat, owned by a Chinaman, was blown up by a 25 lb. keg of powder. There were sixteen men in the boat at the time of the explosion; eight were killed, five very much burnt, and not expected to live, and three supposed to have been drowned. The boat's stern and top of house were blown off the boat, and a large piece of her hull was blown on to the roof of a house opposite. She sank immediately after the explosion in deep water. A diver has been employed to save the cargo, &c., and her guns have been got up. She had 80 tons of cargo in her at the time, for Shanghai, and how the explosion took place is unknown. It is rather doubtful whether it was a 25lb. keg or not, as there were more kegs of powder in the boat. Two of the men who were burnt have since died.

AMOY.

Advices from this port confirm the evacuation of Changchow by the rebels. After the capture of Burgevine and subsequent abandonment of that city, they successively evacuated the five other cities held by them in the vicinity, and were concentrating their forces in the Black Tea districts, there to reorganize them with the view of joining the Nien-fei rebels as soon as they were able to do so in strong force. It is expected that they will make their appearance in the field again during the coming winter, and unless the Imperialist forces succeed in preventing the two main bodies from amalgamating they will be dangerously strong. The inhabitants of the tract of country they now occupy are said to be entirely favourable to the rebellion, and this fact will add greatly to their strength They are at present, however, very inefficiently armed, and so long as the Imperialist keep possession of the sea-board it will be a difficult matter for them to procure supplies of foreign arms and ammunition.

HONG KONG.

From Hong Kong we have but few items of intelligence to record. One of the most noticeable is the bad account given of the health of the troops. The *Tamar* having arrived much sooner than was expected with the second Battalion of the 11th Regiment, the quarters, which were being prepared here for its reception, were not ready. A portion of the Battalion was quartered at Kowloon, and the rest wherever cover could be obtained. Those quartered at Kowloon suffered so much from sickness, that it became necessary to remove them. The naval authorities arranged to accommodate this portion—say one hundred and fifty men—on board the *Princess Charlotte*; but for this timely concession, a serious mortality might have resulted.

The Baron de Meritens was in Hong Kong collecting arms and ammunition for a force collected by him, said to consist of discharged French soldiers from Saigon, and probably intended to form the nucleus of a Franco-Chinese contingent.

The following is from our own correspondent:—

Hong Kong, May 12, 1865.

Your correspondent, who has recently returned after a short absence, finds very little of interest to communicate by the outgoing mail. Trade remains in a state of coma, though the tea season is fairly opened up the coast—but, with the exception of Foochow, we hear of very few transactions, and the course of some of the buyers at the latter place, in yielding to the excitement of competition and giving prices which seem scarcely justified by any hypothesis as to a recovery of the home-markets, has been severely criticised, both privately and in the press. The greater part of the trading community prefer, however, to wait a little longer before resuming large transactions of any kind, and, although it is hoped that we have seen the last of any great failures or suspensions in our local houses of business, yet the apprehension of embarrassments arising from external connections is too great to permit, if nothing further prevented, a speedy return to business, A recent circular of Messrs. F. Huth and Co., animadverting upon the causes of the late disasters in the China trade, has naturally provoked much discussion here, and is very loudly condemned, by the class of young speculators who have profited by the mania for "consignments at any price" of the last few years, and the fatal facility of discounts.

Digitized by Google

It is thought by many that the establishment of the local Bank (the Hong Kong and Shanghai Banking Corporation)will have a good effect in keeping down the number of branches from every conceivable banking company with which China has been latterly flooded, and will tend, as its operations become enlarged, to give a healthier tone to this department of business.

The Rice trade has been unusually brisk, owing to short crops in the interior of China, and an unprecedented number of arrivals has been recently reported here. An effort has been made by the Foreign Consuls at Canton, with some prospect of success, to induce the native authorities to grant certain facilities in the way of remission of tonnage-dues on rice-ships, which would materially favour the transport of rice to Canton direct in foreign bottoms, whereas, at present, it is for the most part transshipped at Hong Kong into native junks. Poor Canton! its glory has, I fear, departed. Between Hong Kong and Hankow, how little is left of its once mighty trade! Scarcely half-a-hundred foreigners can now be mustered as the "Canton community," and these are chiefly agents of the Hong Kong houses which have carried off the wealth and glory of the finest city in China.

I learn that the rebels, if they may be so denominated, who have been roving on the borders of the Kwangtung and Fukien Provinces for the last six months, have lately decamped westwards (since the rout of the main body near Amoy), on the approach of a strong additional force of "braves" recently despatched from Canton; and that their leader, the Kan Wang, the last remaining member of the Coolie-King coterie at Nanking, has made overtures for surrender. *Per contra*, we have the news that Sang-ko-lin-sin (who, anti-barbarian as he certainly was, has been for the last twelve years the most faithful and untiring bulwark of the existing dynasty), has fallen in an engagement against the Northern insurgent bands, and that great portions of the provinces of Shan-tung and Ho-nan are in the hands of the latter. The news of the revolt of a large body of "braves," near Hankow, is also confirmed. Thus, as the Chinese saying has it, "Before one billow is at rest, another billow rears its crest;" and universal corruption bears its fruit in unending disorder. A memorial has lately been addressed to the Emperor by the high authorities of Canton, in which the existing causes of military inefficiency throughout the empire are boldly exposed, and no less a remedy is suggested than the gradual abolition of the whole "army," as at present constituted (the effeteness of which undoubtedly provoked and favoured the late rebellion), and the substitution in its place of the system of "braves," or movable troops, such as have achieved whatever successes the Imperialists have had to boast of over the insurgents. The Chinese "army," in fact, though capable of devouring half the revenues of the empire, may be said to exist only in name. Originally created in peaceful times, its proper functions are merely those of an armed constabulary, split up into local garrisons of a few hundred or a few thousand men in each of the thousand cities of the empire. When rebellion is in the earliest stages of incipient brigandage, this organisation is occasionally useful in a thief-taking capacity, but the moment resistance becomes serious, the tailors and shoemakers, who have been called from their peaceful benches to don the military jacket, are a mere laughing-stock to friend and foe. This, however, has not prevented the resources of the Government from being crippled during the last fifteen years by the enormous drain caused by the pay of these worthless "troops," to whom, though their pay is everywhere largely in arrear, a pittance must nevertheless be doled out to prevent their desertion. At this moment some £300,000 sterling are owing to the "regular troops" of Kwangtung alone; and unless the wonted timidity of the Chinese Government, wherever the dreaded word CHANGE is pronounced, proves too strong in this instance, an immense relief may be obtained by adopting the exceptionally wise suggestions now laid before it. One other step only is required, viz., to drill and discipline the "braves," whom it is proposed to substitute for the regular troops. The commencement of such a system has, indeed, been made at Shanghai; but timorously, and on a very limited scale. Let us hope that, one day, we may see a Government at Peking (it matters little under what name) strong enough to maintain order. We shall always be strong enough to maintain our rights.

The following report of the China Railways Company (Limited) we take from the *Daily Press*:—

A meeting of the local committee of the China Railways Company (Limited) took place on Saturday last, the 17th instant, in the rooms of the Hong Kong General Chamber of Commerce, at which the following gentlemen were present:—

Mr. A. Booth (Bourjau Hubener & Co.), Mr. S. G. Bird, Mr. J. H. Cheverton (Johnson & Co.), Mr. R. Deacon (J. Burd & Co.), Mr. W. Delano, Jr. (Russell & Co.), Mr. H. B. Gibb (Gibb, Livingston & Co.), Mr. A. Heard (Augustine Heard & Co.), Mr. Kresser (Hong Kong and Shanghai Banking Company), Revd. W. Lobscheid, Mr. G. F. Maclean (Lyall, Still & Co.), Mr. H. D. Margesson (Margesson & Co.), Dr. J. I. Murray, Mr. Neilson (Oliphant & Co.), Mr. W. Nissen (Siemssen & Co.), Mr. F. Parry (Birley & Co.), Mr. P. Ryrie (Turner & Co.), Mr. A. Sassoon (D. Sassoon, Sons and Co.), Mr. A. Turing (Dent & Co.), The Hon. J. Whittall (Jardine, Matheson & Co.), Mr. R. S. Walker (Robt. S. Walker & Co.).

Mr. W. Delano, jr., having been voted into the chair, explained the objects of the meeting. He recalled to the recollection of those present that in February of last year Sir Macdonald Stephenson paid a visit to China with the object of ascertaining the views of the residents here, in Canton and Shanghai, as to the desirability of introducing railways into China. The result was communicated on his return to London in a "Report upon the feasibility and most effectual means of introducing railway communication into China." Copies of this report, together with that of a map, were freely circulated at the various ports, and since then a few gentlemen in England connected with China had formed themselves into an association called "the China Railways Company (Limited)," for the purpose of promoting the object of Sir Macdonald Stephenson's visit.

The Chairman then called upon the Honorary Secretary, Mr. R. S. Walker, to read a letter addressed to him by the Secretary of the Board in London, which would more fully explain the object of the present meeting.

The letter stated that at a preliminary meeting of the board of directors it had been resolved to proceed at once to take steps for carrying out the important object for which the company had been formed. That the board had decided at once to apply for the formal sanction of the Governor of the Province of Kwang Tung for the construction of a line of railway between Canton and Fatshan, with which it is proposed to commence; and that, with the view of obtaining this sanction and generally to promote the interests of the undertaking, the directors had decided to form a local committee, consisting of gentlemen desirous of forwarding the object of the company for the purpose of co-operating with the London board. To this committee the recipient of the letter was requested to act as honorary secretary. The directors suggested the transmission of a communication in Chinese, bearing the signature of the committee, and addressed to the Governor of Kwang Tung province, asking for his Excellency's formal sanction for the construction of an experimental line of railway between Canton and Fatshan, such letter to be transmitted in the mode most likely to ensure a speedy and favourable reply.

The meeting was addressed by the Hon. Mr. Whittall, the Rev. W. Lobscheid, Mr. Margesson, and Mr. Turing, and the discussion ended in the following resolution being proposed by the Hon. Mr. Whittall, seconded by Mr. Nissen, and carried unanimously, viz.:—

"That a sub-committee be appointed to ascertain unofficially the views of the Governor-General of Canton as to the objects of the company. That the committee so appointed shall invite the Consuls of all nations to accompany them at the interview, and that a public meeting be convened to receive the report of the committee, and to consult upon what further steps it may be desirable to take."

The committee named comprised the following gentlemen, viz:—Messrs. W. Delano, jr., H. B. Gibb, G. Gifford, A. Heard, Rev. W. Lobscheid, Dr. Murray, Messrs. H. D. Margesson, G. Moul, W. Neilson, W. Nissen, F. Parry, P. Ryrie, A. Sassoon, the Hon. Mr. J. Whittall, and Mr. R. S. Walker.

Thanks having been voted to the chairman, the meeting separated.

COCHIN CHINA.

SAIGON.

The steamer *La Fusée*, which had been cruising on the coast of Binthuan, has returned to Saigon, having captured five of the junks supposed to have been engaged in the late piracy committed on the *Ruby*. The gunboats *Mitraille* and *Entrecasteaux* have both been sent to cruise along the same coast,

Digitized by Google

It is said that the populations of the villages along the coast are thankful for the protection now afforded them, and that the native Governor of Binthuan has begged of the French authorities to maintain a guard off the coast.

SIAM.

BANGKOK.

We hear, says the *Siam Times* of the 8th June, that the French Consul has been using his best endeavours to secure the suppression of the two newspapers published in Bangkok. [Both these newspapers are published in the English language.] It seems to us that he must be beside himself to suppose that he can bring sufficient pressure to bear in any quarter to accomplish such an object. The publishers of these papers are not under either French or Siamese control. If the editors or proprietors violate any law or treaty affecting French interests, he has his remedy in the United State Consular Court. We respectfully submit, whether if reports are true concerning the course he has taken, it does not fully confirm our remarks of last week, on "French Policy in Siam."

The grounds of this reported demand appear to be the general tone of the political comments made by the papers in question, the *Siam Times* and the *Bangkok Recorder*, on the French progress in Cochin China, and more particularly the publishing of the recent treaty obtained by the French from the Government of Siam. We subjoin the concluding portion of the article "French Policy in Siam," which seems to have brought M. Aubaret's wrath to a climax:—

Happily we have the record of the crowning act of the French to separate Cambodia from Siam. This record is the treaty negotiated by the French Consul with the Prime Minister and signed on the 14th of April last. By some good providence this treaty came into the hands of the conductors of the press, was translated, and published. The publication of this Treaty, and of the Agreement with the Spirit Farmer for the sale of French liquors, seems to have given great offence to the French Consul. So great seems to have been his chagrin or anger, that we hear he has had the folly to call on the Siamese Government to suppress the the papers which published them. What Monsieur Aubaret's ideas are of the power of the Siamese Government over newspapers published by foreigners in the kingdom we do not know, but we apprehend he must be ill-informed, blinded with pride and vanity, or puffed up with great ideas of his own power and importance, to suppose that the publication of the Treaty and Agreement can be used as a pretext for suppressing newspapers. But why this vexation, anger, and annoyance on the part of the French Consul at the publication of the treaty and agreement? We are informed that it is because those documents had not been ratified and their publicity was ill-timed. This may be a plausible reason, but is it the true one? We doubt it. We apprehend that just and upright treaty-makers would not be particularly offended at the publication of an honourable treaty or agreement, but would rather rejoice, knowing that it would bring honour to themselves and glory to their country.

We are not surprised at the sensitiveness and probable chagrin of the French Consul at the publication of these documents, for they reflect no honour on him nor his sovereign; and besides, the treaty he negotiated with Cochin China some time ago, in which he doubtless supposed at the time he had done wonderful things for himself and country, was repudiated, or rather the Emperor and his Government refused to ratify it. It may be the fear of being snubbed again, in case these documents become known in Europe, before the Emperor has time to examine them, and from a sense of shame feel constrained to reject both of them, which troubles him. It is not an uncommon thing for men who can stoop so low as to negotiate treaties which honourable senators and councillors cannot ratify, to be thrown overboard. Count Castlenau in pursuing the course he did was removed, and if Monsieur Aubaret wishes to follow the steps of his predecessor, for which, from appearances we apprehend he has a strong desire, and is trying to exceed him altogether, he, too, may find his services transferred to some other place. But, as we have already said, if the Emperor desires an agent who will watch and seek for opportunities to create jealousies, awaken suspicions and fears, taking every possible advantage to create difficulties, with the ultimate view of absorbing the country, then the present Consul would seem to be just the man; while, on the other hand, if Napoleon III. desires to cultivate peace and friendship, promote the interests of commerce and civilisation, he is most unfortunate in his present Consul, and the sooner the Emperor's Government removes him the better.

STRAITS OF MALACCA.

SINGAPORE.

Dates are to the 1st July. The London mail of the 10th May arrived out on the 12th June, and that of the 17th May early on the morning of the 18th June.

The intelligence received from England concerning the probable future of the Settlement was considered satisfactory, in so far that it created an expectation of the completion of the transfer within a few months. Our Home readers are aware, however, that the matter stands over till the next session of Parliament.

The French mail steamer *Echo*, which left Singapore about noon on the 13th June, struck on a rock off Romania Point during the afternoon, and partially filled. A boat was sent in during the night, and the steamer *Rainbow* promptly chartered to proceed to the wreck. The American steamer *Woosung* and the pilot schooner *Syren* were both at the wreck, the *Woosung* taking her treasure out, and the *Syren* bringing an officer and boat's crew to Singapore. The Dutch steamer *Java*, with provisions and three tongkangs were despatched, on the 15th, to the scene of the wreck. The more valuable of the ship's stores, fittings, machinery, &c., would be saved.

A serious *amok* had been committed by a Javanese seaman on board the Dutch brig *Salida*, lying in the harbour. He first struck the Serang several blows about the head and face with a belaying pin, who has since died. He then struck the cook and knocked out four or five of his teeth, and on his wife going to his assistance the man stabbed her in the side, from which the bowels protruded. Another woman and several of the crew got stabbed also. The chief officer of the Hanoverian brig *Schwinge* was also on board, and on making his escape fell overboard; by climbing up a rope, however, he got on board again, when he received a cut on the temple which knocked him overboard once more; he got on board a second time, but was insensible. The rest of the men made their exit up the rigging and some overboard. On Inspector Hayward going up the gangway, his getting on board was prevented by the man standing on the top and flourishing some kind of weapon. Nothing daunted, he got up the side of the vessel by pulling himself up with the chains, and succeeded in reaching the top, when he made several cuts at his adversary with his sword but could not reach him; he then pinned him on the forecastle and felled him with a Penang lawyer. After securing the man he sent the women with the rest that were wounded to the hospital. The Javanese has been committed for wilful murder.

The Singapore journals publish a letter from Mr. Cameron, on the subject of his paper on the islands of Kalatoa and Puloweh in the Java Sea, which was communicated to the Royal Geographical Society. The *Free Press* remarks—The question raised by Mr. Cameron's assertion that he found 5,000 people on the latter island, existing without fresh water, is one of the greatest interest, and we trust the scientific gentlemen amongst us may deem it of sufficient importance to favour us with their opinions on the subject. We can to some extent confirm the statement, for we are informed by a gentleman who was accidentally left on an island in the Java or Branda Sea for several months, that he subsisted on little else than the milk of the cocoanut and the juice of the cocoa-palm for the whole period; his only food besides being the roots of bushes, fish, crabs, and slugs; water could be obtained by digging, but it was not drinkable. There were a number of people on the island who lived in the same way. They were a miserable set and were dwindling away, and would inevitably die out if their number was not occasionally recruited by the inhabitants of the neighbouring islands. He was informed that the population had been far more extensive in former years and were decreasing annually. The island was covered with millions of cocoanut trees. Although the natives were able to exist and propogate their species, it is quite certain their mode of living was quite unsuited to the European constitution, for there is not the slightest doubt that the gentleman we refer to must have perished if he had not been rescued by a passing ship. He was at death's door when taken off, and we fear, poor fellow, that although three years have passed since the event, his health has not yet recovered its wonted vigour, and it is more than possible that it never will. We, of course, write under correction; but are certainly under the impression at this moment that there was not fresh water on the island.

A charge of robbery at the Masonic Lodge against George England, a deserter from H.M.S. *Princess Royal*, had been investigated at the police court by K. B. S. Robertson, Esq., police magistrate. Amongst the property stolen was a silver dagger, belonging to the Worshipful Master, who prosecuted in the case. The prisoner denied stealing this instrument, but admitted having taken the gold and silver ornaments produced, the property of the Lodge, and which were valued at some two or three hundred dollars. His Worship awarded the prisoner two months' rigorous imprisonment in the House of Correction for theft of the dagger, and on the expiration of the said term the prisoner is to be again brought up on the charge of larceny of the jewels.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

Brett—On the 17th May, at Chefoo, Mrs. G. A. Brett, of a daughter.

Collins—On the 20th June, at Hong Kong, the wife of Henry C[illegible]s, of a son.

Halley—On the 31st July, at 7, Harley-street, Cavendish-square, W., the wife of Alexander Halley, M.D., F.G.S., of a daughter.

MARRIAGES.

Goodman—Rodyk.—On the 13rd June, at Malacca, Christ Church, by the Rev. W. Hackett, Chaplain, Wm. H. Goodman, Commander of H.M.S. gunboat Mohr, to Margaret Grace, youngest daughter of W. Rodyk, Esq., Senior Clerk, Supreme Court, Malacca.

Lawrence—McGrath.—On the 30th May, at the Holy Trinity Church, Shanghai, and the Roman Catholic Cathedral, W. Lawrence, Esq., C.M.S., to Joanna, second daughter of J. McGrath, 67th Regt.

DEATHS.

Bulley—On the 10th June, at Shanghai, Mr. William Bulley, farrier.

Costerton—On the 25th July, at Blackinberghe, West Flanders, aged four years and four months, William N. R. J. Costerton, only son of the late John Costerton, Esq., of Hong Kong, China.

Maclellan—On the 13th June, in Praya East, Hong Kong, the wife of W. Maclellan, Godown Keeper to Messrs. R. S. Walker and Co., aged 32 years.

McClements—At the General Hospital, Hong Kong, John McClements, Private 2nd Bat. 11th Regt., aged 28 years.

Middleton—At sea, on the voyage from Hong Kong to Calcutta, John Middleton, for many years merchant of the latter place, aged 58.

Murray—On the 18th June, on board the ship Chaa Sze, John Murray, Seaman, aged 22 years, of cholera.

Whaites—On the 13th June, in West Point, Ada, daughter of E. P. Whaites, Hong Kong, aged 9 months and 6 days.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cent: and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVALS.

At Yokohama.—From London: Seringapatam. From Liverpool: Jane.

At Shanghai.—From London: May 24, Fy-Chow. From Liverpool; 31, Neville. From Swansea: 28, Golden Spur. From Newcastle: June 1, Lord Collingwood. From Philadelphia: 2, H. Harbeck.

At Hong Kong.—From London: May 29, Caractacus; 30, White Adder; 31, Valdivia; June 4, Banian. From Liverpool: 2, Monsoon; 5, Canton. From Rockhampton: 9, Prospero. From Sunderland: May 23, Fi-wan. From Cardiff: June 2, Whinfell.

At Manila.—From Glasgow: May 22, Nodales.

At Singapore.—From London: June 9, Ferozepore. From Liverpool: 15, Caroline Chisholm. From Swansea: 10, Kenilworth.

DEPARTURES.

From Yokohama.—None.

From Shanghai.—For London, May 22, Mirage. For New York, 26, Heversham; June 1, Acapulco.

From Foochow.—For London, May 24, Fiery Cross, Serica; 26, Yangtsze, Ziba; 30, Childers, Flying Spur.

From Hong Kong and Canton.—For Havre, May 28, Immaculie Conception.

From Macao.—For London, May 24, Burdwane.

From Manila.—For New York, May 28, Milton. For Boston, 23, Conquest.

From Singapore.—For London, June 11, Fortitude, Zepkyros. For Bordeaux, 10, Prophete. For New York, 9, Triton; 16, Energie.

LOADING.

At Yokohama.—For London: Eleanor.

At Hankow.—For London: Silver Eagle, Challenger, Eliza Shaw, Isles of the South.

At Shanghai.—For London: William Melhuish, Highflyer, Fire Queen, Ethiopian, Norwood, Guinevere, Eliza Nicholson, Art Union, Gossamer, Ellen Rodger. For Liverpool: Woosung.

At Foochow.—For London: None.

At Hong Kong and Canton.—For London: Scawfell, Heroes of Alma, Salvia, Northfleet, Valdiva.

At Manila.—For London: Zelandia. For New York: Sumatra.

At Singapore.—For London: Unicorn, Hippolytee, Bencleuch. For Liverpool: Skiddaro, Ophir, Christopher Newton, Ocean Belle. For Glasgow: Scotland. For New York: Arracan.

FREIGHTS AND CHARTERS.

Yokohama.—To London, cotton and tea, £3 per ton; silk, £4. 10s. of 50 feet.

Hankow.—To Shanghai, per steamer, 3 tls. per ton; to London, per sailing vessel, £5. 15s.

Shanghai.—Rates for Europe continue without improvement, and for the coast little is offering, while the unemployed tonnage is heavy. No charters have taken place for England, but several vessels have been laid on the berth for new teas to London. For New York the only transaction is the Caprera, at £2. 15s. per ton of 40 feet.

Foo-Chow.—To London, £3. 10s. per ton.

Hong Kong and Canton.—In Home Charters no change has taken place. The Scawfell and Valdivia have been added to the vessels on the berth for London, and are loading at former rates. There is no vessel loading for Liverpool at present. The Ruby has been chartered to load at Java for Europe, and the Thorkild to load at Whampoa for New York, at £2. 15s. per ton.

Manila.—The Zealander has been fixed for London at £1. 10s. per ton, for 800 tons, Clayed Sugar, £3 for Coffee and measurement goods. Tonnage is in limited supply, and with any activity in produce business, some improvement might be expected in rates of freight. Singapore: To London, dead weight, £1. 5s.; measurement, £1. 15s.

COMMERCIAL POSTSCRIPT.

Arrivals not Included in the Tables.—Aug. 7, at London, from China (?), Jane; at Deal, from China, Maiden Queen; at Falmouth, from Bassein, Zoe; July 25, at New York, from Manila, Young America; 22, at Boston, from Penang, Rocket; Aug. 3, at Dungeness Roads, from Batavia, Eva Johanna; 4, off Swanage, from Banjoewangie, Medea; 7, at Falmouth, from Akyab, Carl; July 20, at Boston, from Manila, Wild Rover; Aug. 8, at Deal, from Colombo, Shepherd; from Manila, Cesarea.

Departures.—Aug. 4, from Cardiff for Shanghai, Louise Kohn.

Casualties.—The Malabar, Chambon, from Colombo for Belle Isle, which put into Mauritius May 15, leaky, has been condemned and sold.

Laid on.—At London: For Colombo and Cochin, Blanch. At Liverpool: For Hong Kong and Canton, Ariel. For Manila, Alavesa.

LONDON, TUESDAY, AUGUST 8, 1865.

THE SILKWORM EPIDEMIC.

As far as the European crop is concerned, the silk season of 1865 will prove the most disastrous since the commencement of the disease; not even the partial success which has attended the late enormous importations of eggs, or "seed," as it is technically termed, from the East, and more especially from Japan, having sufficed to prevent prices rising to twenty-five or thirty per cent higher than were current at this time last year. The hope once entertained that new breeds, raised from the seed so imported would continue to be exempt from the ravages of the epidemic, has proved entirely fallacious, inasmuch as, although they yield a good crop the first year, they cannot be propagated afterwards; and this recently discovered fact tends to establish the correctness of a theory broached some years ago, but generally contradicted by the French silk-growers, namely, that the disease originated in a deterioration in the quality of the food upon which the worms subsisted, and was not of a contagious nature. The subject is an interesting one, both as regards its effect on a large portion of the population of France and Italy, and its relation to a most important branch of our trade with China and Japan.

Our Paris correspondent informs us the Acclimatisation Society of France has given public notice that it cannot undertake to continue the importation of Japanese seed. Having shown the mode of doing so, and proved the superior quality of seed obtained from that country, it henceforth very properly leaves the matter to commercial hands. It also reveals a fact deserving of notice, namely, that a number of boxes used by the Society, and bearing its initials, have been refilled by some unprincipled persons with ordinary European eggs, and are now being offered for sale as fresh importations of the Society. The effect of this will be to discourage more than ever those producers into whose hands the spurious seed finds its way. Some hope is however inspired by the announcement just made of the nomination of a special commission by the French Government, consisting of the Minister of Commerce, several officials, some scientific men, and a few eminent silk producers, for the purpose of inquiring more fully into the nature of the disease and ascertaining as far as possible the best means of arresting its progress. Whether any remedy will be found, short of an entire change in the system of cultivating the mulberry tree, we very much doubt.

We believe it was Mr. JOHN SILVERLOCK, of London, who first suggested that the disease was not inherent in the worm itself, but arose from improper or insufficient nourishment. This was in 1861; and the idea was not then favourably received by the French producers, who grounded their arguments on the apparently contagious nature of the disease, and the fact of its having appeared successively in places so widely separated from each other. More recent observations, however, have shown that Mr. SILVERLOCK's theory is the correct one. M. GUERIN MENEVILLE, in his report of an inquiry prosecuted in various parts of France, states that most practical men now concur in the belief that the sole cause of mischief is the blight which affects the mulberry trees, and which is evidently the result of a system of forced cultivation adopted by growers, with the view of producing an abundant crop of leaves. The desired result has been easily attained as regards quantity, but, as might have been expected, the superabundant growth of foliage thus produced is far inferior in quality to that of the mulberry tree in its natural state; the leaves, instead of being thick, firm, and juicy, are of a poor, watery nature, and very deficient in those nutritive properties on which the worms entirely depend for their proper development. Experiments which have come within the range of Mr. SILVERLOCK's own experience, made on worms raised from eggs imported into Italy from Shanghai, leave no doubt whatever as to this being the origin of the disease. The worms, which when first hatched from the imported eggs are perfectly healthy, are described as being ravenous, and eating a far larger quantity than usual—and even the increased bulk so consumed appears barely sufficient to support them during the first stages of their existence up to the period of spinning and reproduction, and gives them no strength to complete these natural processes. When the time for spinning arrives, the insect disgorges the mass of undigested food contained in its stomach, and dies, in fact, of a species of cholera. The conclusion deduced by Mr. SILVERLOCK from these observations is, that if any efforts which may be made to arrest the progress of the disease are to prove effectual, attention must first be directed to the trees themselves. A portion of them must be allowed, for at least one season, to mature their fruit, and shed their leaves naturally—this will strengthen and ripen the wood, and give increased vigour to the tree. And the worms should be reared in as close proximity as possible to the plantations, in order that they may receive their food in a fresh state. The firm, fibrous leaves of the wild mulberry tree will of course remain fresh much longer than the weak, watery foliage produced by the tree when stimulated by an unnatural mode of culture. These considerations may, at a superficial glance, be taken as applying only to the continental crop, but in reality they equally affect the growth of silk in China and Japan. In the former country the disease has already appeared; and if the increased demand for China and Japan silk, resulting from the failure of the European crop, should induce the growers in either of those countries to carry to an extreme the system of forced cultivation, the most serious results may be apprehended. For the present the deficiency in the home crop will doubtless be compensated for by additional imports from the East—perhaps more than sufficiently so. M. ARLES-DUFOUR, in a recent circular, recommends French producers to be on their guard, firstly, on account of the anticipated large importations from China and Japan; and secondly, on account of a probable decrease in consumption consequent on extreme rates. We would impress the necessity of similar caution on the part of shippers in those countries.

RUSSIAN RAILWAYS AND TELEGRAPHS.

A CORRESPONDENT writing from St. Petersburg the other day, gives us a long list of the public works that are being carried out, or are in contemplation at the present moment in the Russian Empire. Railways and telegraphs are matters that concern all the world, and some of those which are included in the list referred to have a very special interest for the commercial world. A railway is being constructed to unite Odessa with the Lemberg line, and another to connect Tchernovitz with the Danube at Galatz. The EMPEROR has issued his ukase for the formation, at the cost of the State, of a line between Krementchoug and Balta, and which form part of the great line from Odessa to Kharkoff. The line between Dunabourg and Vitebsk is being proceeded with, and the company is bound to have that portion of the road between Dunabourg and Polotzk ready for work by November in the coming year, and the whole before the year 1867. A railroad from Posen to Warsaw has been contemplated for some time, and it is said that the necessary capital has now been subscribed.

The great telegraphic line which has been conceded to the Western Union Telegraph Company of the United States by the Russian Government, as regards its territories, and the aim of which is to unite not only Europe and America, but eventually the whole world in one system, is to pass by Nicolaief, Behring's Straits, the Russian Possessions on the American Continent, British Columbia, and San Francisco, where it will join the lines of the United States. The capital of the company is said to be ten millions of dollars, which is nearly all subscribed for. The concession is for thirty-three years, and

Digitized by Google

the company is bound to have the line in work within five years or forfeit all its privileges. A stipulation is made that the majority of the persons employed by the company on Russian ground shall be natives of the country.

The prolongation of the telegraphic lines from Kiachta to Peking is still talked of, but nothing more definite is asserted than that one of the directors of the Russian telegraphs is at Peking and in communication with the Chinese Government on the subject. There is no doubt that the accomplishment of this object will be attended with some difficulties, but if the Russian Government is bent upon its realisation, and exhibits as much energy as its shows at present in completing its own railway and telegraphic system, and connecting the latter with that of America, they will be surmounted.

THE CHINA CHALLENGE CUP.

In the account contained in our last issue of the close of the Wimbledon meeting we recorded an announcement made by Lord Elcho, when distributing the prizes on the 22nd July, to the effect that the committee had finally decided on ordering this important piece of plate to be designed and made in China. We have since ascertained that this is not the case, and that no decision will be made until the arrival of a design which has been sent for from Hong Kong, to be compared with those submitted by Messrs. Hancock, Elkington, Dent, and others. When this has been received, we believe the choice of design will be left to the ten competitors who won the cup this year for the county of Somerset.

COTTON PROBABILITIES.

(From the Cotton Supply Reporter.)

American cotton probabilities continue to afford a fertile subject of speculation, and there is still much uncertainty and suspense as regards our future supplies. The estimates furnished by successive statisticians only serve to indicate the perplexity in which they are involved, and the difficulty experienced in ascertaining the stock of cotton existing in the Southern States. Until this can be determined, the fluctuations which are so embarrassing must still be encountered, and conflicting opinions will, from time to time, be sure to gain credence, and to exert a corresponding influence. Rumours which, according to the wishes of the parties with whom they originate, either exaggerate or under-estimate the actual quantity, are to be expected; but unless they rest upon some intelligible and recognised foundation, it will be wise to receive them with caution. We contribute our quota to the solution of the question by giving insertion in our pages to a report furnished to the Foreign Office by Her Majesty's Consul at Savannah, to which our readers will attach that degree of importance that it may appear to them to deserve. It seems to be generally admitted, that neither from the accumulations during the war, nor from the present year's crop, can any overwhelming supplies be anticipated, and that there is nothing to discourage, in the slightest degree, the continued exertions of all other countries which have of late years made the cultivation of cotton an object of special attention. The return of the States, which have so long been a prey to the ravages of war, to the labours of peaceful industry, and the renewal of their efforts to furnish again those supplies of cotton which were formerly so abundant and welcome, will, we hope, be the commencement of a new career of progress and prosperity, but there need be no alarm on this account in any quarter. A mighty revolution has been effected, and such superiority over other countries in the production of cotton as slavery could afford is now at an end. There is reason for satisfaction and congratulation that henceforth our mills will be supplied only with free-grown cotton, and that none will be able to connect the whirl of our machinery with the wail of the oppressed. Such advantages as the Southern States may possess in the peculiarities of their climate and soil will still belong to them; but in other respects the various cotton-growing countries of the world are, by the extinction of slavery, placed more nearly than before on an equality with them. The position which has been gained in the cotton market during the exclusion of America is one that should not be lightly surrendered; and we can see no reason why India, Egypt, Turkey, Brazil, or any other country that is prepared to make the necessary exertions, should succumb to the formidable rival which has now to be encountered. Competition will make improvement compulsory, but it need not paralyse effort and enterprise. It will not do to continue to send forward the inferior article, which, in the absence of anything else, was readily taken. A better quality must now be produced. The same means and care must be used which gradually gave to American cotton its acknowledged superiority, and we are confident that wherever such are employed there may be a permanent trade established. None of the countries which have been so enriched by the growth of cotton during the past four years ought to be deterred from making strenuous efforts to retain the advantages which they have gained. Difficulties have to some extent been overcome, and perseverance only is required to ensure success. We rejoice to know that the Turkish Government are taking wise measures in anticipation of the next sowing season, and are determined to procure American seed, and to promote its use to a much greater extent than ever. The occasional ravages of locusts and the prevalence of adverse seasons may awaken solicitude and require special exertions, but no one can doubt that ultimately satisfactory results will be realised. An extended growth of cotton in Egypt may be momentarily checked by a threatened scarcity of food, but larger importations of grain and additional facilities of transport will lead to increased cultivation. Neither Turkey nor Egypt, we may be sure, will consent to part with so lucrative a trade, and the means of securing possession of it are within their reach. Let such be diligently used and they will become efficient and permanent sources of cotton supply. The defective agriculture of India has been forcibly pointed out by Sir William Denison, the Governor of Madras, who dwells specially upon the inefficiency of the Indian plough, which merely *scratches* the ground and does not turn up the lower soil to the surface. The area of land under cultivation in the Madras Presidency is represented to be about 17,000,000 of acres, which an improved system of agriculture would render much more productive. The use of windmills as a means of irrigation is also recommended. In the Bengal Presidency steam cultivating apparatus is now employed in the growth of cotton as well as of indigo, and we participate in the opinion recently expressed by Mr. Bazley, that without incurring any risk of rice or corn famine in India by devoting more land to cotton, the area now so appropriated might, by better cultivation, be made to produce five or six millions of bales instead of one million. If at length, under the pressure of the necessity which has now arisen for growing an improved quality of cotton in India, the requisite efforts be made, it may yet be possible, by an efficient system of native husbandry, to procure abundant and satisfactory supplies from that country. Our past disappointments, however, prevent the indulgence of so confident a hope with respect to India as we can entertain in other cases. Whatever check to cotton production may have been occasioned in any instance by the abrupt termination of the American war, and the expectations then awakened, there is now no cause for discouragement, but on the contrary every reason for renewed and persevering exertions, which we feel assured will meet with an ample reward.

COTTON CROP IN GEORGIA, UNITED STATES.

(Extract of a despatch from Consul T. Smith, forwarded by the Foreign Office, dated Savannah, June 28th, 1865.)

Touching the very vital point of cotton, the great staple article of the commerce of Georgia, I would observe that up to a very recent date the Federal authorities exacted a duty of 25 per cent. upon all cotton which was brought in on private account, as your lordship will perceive by the enclosed notice—Dated May 23rd, 1865, not sent herewith—issued by the United States purchasing agent here. This grievous tax has, however, been withdrawn, and in its place has been substituted an internal revenue duty of two cents per lb.; at least such is the tenor attributed to the Executive proclamation of June 13th inst., a copy of which I much regret to state I have been unable to procure. In the present abnormal state of affairs it is not possible, I believe, to obtain a very correct account of the quantity of cotton on hand, and available by-and-by for market; but I have ascertained that parties well acquainted with this State, and who have recently travelled throughout its length and breadth, estimate the number of bales which remain in private hands, scattered about in parcels varying from eight or ten to four or five hundred, at somewhere about 300,000, and the entire stock in the country at large at from a million and a quarter to a million and a half of bales, each bale averaging about 480lb. The cotton in Georgia will not be available for shipment to a foreign market for some months to come, seeing that the difficulties of transport between this city and the country districts have only been very partially overcome; the small lots of cotton which do arrive are brought down the river by means of a few small river steamers, and unfortunately within the last two months four of these craft have been lost.

The bulk of the cotton will remain undisturbed until the completion of the renovation now in progress on the lines of railway, a matter which will occupy from three to six months, and before the expiration of which time, as it seems to me, there will be little chance for British vessels to procure return cargoes from this port.

PRINCE SATSUMA.

(From the *Japan Herald.*)

We have from time to time given sketches of the history of some of the powerful daimios of Japan. Mito and Choshiu have both thus been dealt with amongst others, but there is yet another great Prince, whose name is "familiar as household words," of whom we propose presenting our readers with a slight sketch.

The history of Prince Satsuma is not by any means so interesting as either Mito or Choshiu, because the house has never had much feud or quarrelling with other Daimios. Our sketch, therefore, assumes the form rather of a genealogical descent than of an interesting historical recital.

About 700 years ago the house of Satsuma was founded by one of the sons of Yorito-mo (the founder of Sho-goon-Key) whose name was Shimazoo Bengonokami Todah-hisa, though on first becoming a Daimio he was a very small prince, and it was not until the fifteenth descendant became head of the house that it assumed any importance among the other great families in the land. This prince Shimazoo Shirino Daiboo became very wealthy and had large territorial possessions, holding the three provinces of Satsuma, Huga, and O-o-sumi. The son of this prince shortly after coming into possession of his ancestral rights fitted out an expedition to conquer the Loo-choo island and its group. The expedition was quite successful, and resulted in the subjugation of the islands, so that from that time to the present they have been owned by the Prince of Satsuma.

On the government of Tyco-sama being made aware of the fact of Satsuma's successful raids upon the Loochoos and elsewhere, an embassy was sent to the latter relative to certain negotiations. Satsuma refused to treat with Tyco's party, which so exasperated Tyco, that he declared war and succeeded in capturing the two provinces of Huga and O-o-sumi.—Satsuma, fearing lest he should be deprived of all his possessions submitted himself to the will of the great Tyco-sama, who beholding him thus humbled, ordered that he should descend from his Daimioship, and that he and his son should become as priests, shaving their heads, &c. This having been done, Tyco magnanimously placed the grandson at the head of the house and gave back to him the two captured provinces. This prince appears to have been eminent, for his

Digitized by Google

promotions under Tyco and his successor were numerous. He was known successively by many names, the last and greatest being Jinsan mi Chu-no-goon Jyehisa. For eight generations there does not appear to have been a single incident worth according in the history of the house. And even the ninth descendant from the last named—Jinsanmi Chujo Satsumano Kami was only remarkable for his numerous children and the alliances formed accordingly with many of the greatest princes throughout the Empire.—The present Prince of Satsuma is a descendant of Jinsanmi—in the 5th generation, but not in the elder branch of the family. On the contrary, the late prince having no son, adopted the son of his younger brother—who is the prince so well known by reputation to foreigners. The late prince had an only daughter, to whom he was tenderly attached. She became the wife of the late Tycoon. At the death of her husband, she cut her hair short and locked herself up in the castle at Yeddo. She is reputed to be still young and very accomplished—being fond of literature, a splendid horsewoman, and an able fencer with the spear, &c. Her name is Tensho-en.

The registered revenue of the Prince of Satsuma is 770,800 Kokus,—and his territories are the Loo-choo Islands and the three provinces before-named.

THE FLUCTUATION OF BANKING PROFITS IN LONDON.

(FROM THE ECONOMIST.)

One of the most important and best results of the development of the system of joint-stock management will be a more accurate knowledge than we now have of the profitableness of different trades, and the general profit of all trade. The accounts of a single trader or of a private partnership are shrouded in mystery; there is no good reason for telling them, and there are several good reasons for not telling them. But the accounts of a company in which a considerable number of shareholders are much interested must show to those shareholders the most material facts relating to the business. We are yet, however, far from such a desirable state of things. The only considerable trade which has been long enough under joint-stock management to tell us much is the trade of banking, and even as to this the published accounts of most banks are still very imperfect. Most banks persist in concealing the amount of their acceptances, and while it is uncertain whether the "liabilities" vaguely classed together are composed of paper issued by the bank, or money left with the bank, no sure deduction as to the nature of their business can be made. With such a fault in the data, no conclusion can hope to be correct. The London and Westminster Bank has set the example of dividing its deposits from its acceptances, but many banks of the greatest importance have as yet not followed its example. In the end the public will prefer a bank in which the accounts are such as they ought to be to a bank whose accounts are such as they ought not to be.

But though the nature of the business carried on by these banks is not told us, its profits are told us. We do not know, so well as we should, how the money is made, but we are very fairly and fully told what money is made; and it is very curious to trace in this patent record the varying profitableness of monetary operations. The following are the profits earned by the long established joint-stock banks of London during the last half-year, and we purposely confine our attention to those comparatively old banks of acknowledged credit, to avoid the unpleasant questions which embarrass the consideration of certain of the new banks, and the still greater odium of saying that one new bank is of established credit and that another is not so.

PROFITS EARNED IN THE HALF-YEAR ENDING JUNE 30, 1865.

London and Westminster Bank	£151,598
Union Bank	144,879
London Joint-Stock Bank	127,597
City Bank	34,108
Bank of London	39,219
	£497,401

Whereas in the previous half-year the corresponding amounts were—

London and Westminster Bank	£170,995
Union Bank	180,195
London Joint-Stock Bank	156,150
City Bank	26,116
Bank of London	54,301
	£587,757

And this is the more remarkable, because the London and Westminster Bank, whose accounts are full and conclusive, show an increase of £1,000,000 in the deposits, and likewise a large diminution in the expenses. In the case of this bank at least the net profit has diminished, though the means of making it have augmented, and though the cost of making it has declined. In the case of this bank, too, the cause of the diminution is not to be looked for, as might have been at first fancied, in the bad debt account, for it was expressly stated at the meeting that the bad debts of the past half-year have not much exceeded the average of many years past. The figures given above would seem to indicate that the City Bank was an exception to the otherwise general diminution of profits during the present half-year. But such does not appear to be the case. That bank deducted at Christmas £30,000 from its profits to meet "possible claims," and so large a sum having been deducted from the profits of the Christmas half-year, no unusual deduction has been necessary from the profits of the June half-year.

The true reason of this great diminution of the profits is the reduction in the value of money. A large London joint-stock bank has a considerable sum of money for which it pays nothing, and also a very great sum on which, when money can be lent at 8 or 9 per cent, it only pays 5 per cent. Up to 1859 the joint-stock banks used to allow for money at interest 1 per cent. below the Bank of England rate, however high that rate might be. But they found that such a rate was wholly unsuitable to a keen crisis. At such a time unusual sums of money must be kept at hand at a low profit, or at no profit, and it is, therefore, impossible to give extravagant rates for money which may be rapidly withdrawn. For money that is deposited for considerable periods of time the joint-stock banks, as well as the bill-brokers, gave in the autumn of 1864 considerable rates, but for money left only on the ordinary terms they did not give more than 5 per cent. Consequently they had an unusual opportunity of making profit; they could lend a large sum, for which they paid nothing or a low rate, at very high rates. And if they kept clear of bad debts they made great profits. But in the last half-year, when the rate of interest was very low, they had no such opportunity. They could not charge what they had charged last autumn, and though they paid less for much of their money, the compensation was not sufficient.

It is instructive to compare these accounts with those of this time last year, and it will probably surprise some of our readers to find that in some banks at least the profits were very much higher in June, 1864, than either in December, 1864, or June, 1865, and that the aggregate of all of them was somewhat greater. The figures are—

PROFITS EARNED IN HALF-YEAR ENDING JUNE 30, 1864.

London and Westminster Bank	£234,032
Union Bank	154,371
Joint-Stock Bank	124,477
City Bank	48,588
Bank of London	58,291
	£619,759

The reason of these high profits was that the half-year ending June 30 was even more favourable to banking than the half-year which succeeded. In the spring there was a high rate of discount, and in the autumn a still higher rate; but there was a disadvantage in the autumn which there was not in the spring. There was not a panic, but there was fear of a panic. A great many people, not without experience, expected that October and November, 1864, would have been more severe than they were, though they brought suffering enough. If the Bank of England had acted as it did in 1857, unquestionably 1864 would have been worse than 1857. With this apprehension in their minds it was not possible for bankers to use their resources as freely and boldly in the autumn as they used them in the spring; and though in many cases their deposits were more and the current rates of discount higher, yet the net result was not so good. If a banker is afraid to lend his money, it is of no use to him to have much of it, or that the nominal rates for it are high.

It is to be observed that the causes which make banking profits so fluctuating in London do not apply with the same force to many parts of the country, especially to the quieter parts. The rate of interest does not change in those districts with the same rapidity upon any securities. And the securities on which a banker lends in such places are not those which would be very acceptable in the London market at all. The London and Westminster must discount at some approximation to the Bank *minimum* the mass of the bills which come before them; but in many districts of the country no banker ever thinks of charging common bills less than 5 per cent. The tradesman for whom he discounts is not known in the London market, and the bills he brings would be taxed there a good deal more than the Bank *minimum*. A low rate of money in London, therefore, is not attended by equal cheapness in the country; and a high rate of money is not attended by equal dearness in the country. The country banker cannot, or thinks he cannot, run his rates up to the London *minimum* for first-rate bills, still less to the charge which would be made in London for the sort of paper which fills a country banker's bill-case. Both ways country banking is a trade of steadier profits; so much cannot be made of money when it is at the highest value, and more can be made of it at its lowest value.

CHINA GRASS.

(To the Editor of the *London and China Telegraph.*)

Sir,—The public are greatly indebted to you for calling attention to the capabilities of China grass as a material for manufacture, not only for paper but cotton, imparting both strength and durability to that fabric. That it can be mixed with cotton to advantage to the extent of from 40 to 60 per cent. is a fact that at once determines its value as an article of commerce, and strengthens the probability that we shall find in it an effective compensation for restricted supplies of cotton. China, to my own knowledge, can furnish a large and continuous supply, and by hydraulic power it may be as readily compressed as cotton, without injury to the fibre. I am sorry to see French manufacturers, or, if you will, French capitalists taking so obviously the lead in its utilisation, for though they are only in the experimental stage, their forwardness as contrasted with our own dilatoriness is only another of many illustrations of the indisposition of our manufacturers to countenance or to commit themselves to anything like change. All know, however, the importance of obtaining the start as to time in introducing into a foreign market a new or superior article that proves acceptable. The fault of our cheap cottons has hitherto been their want of durability, and now, by working up China grass, not only may that quality be obtained, but, as you have shown, more permanent and more brilliant dyes. Evidently, large fortunes are to be acquired by those who shall first prove successful in this enterprise, and it is to be hoped that instead of waiting for French experimental results, arrangements will at once be made for turning China grass to full account in our cotton and linen manufactures.—Yours, &c.,

AN EXPORTER.

COURT OF BANKRUPTCY.

IN RE EDIS.

(Before Mr. Deputy-Commissioner Winslow.)

The bankrupt described himself in his petition as formerly of 3, Newman's-court, Cornhill, and late of 155, Fenchurch-street, merchant and colonial agent. He attributes his failure to losses in trade and pressure by creditors. The preliminary statement discloses debts and liabilities to the extent of about £6,200, with assets said to be of considerable value. The bankrupt had consigned goods to Shanghai, Hong Kong, and elsewhere. He now applied to be released from custody, where he was detained at the suit of several creditors.

Digitized by Google

Mr. Reed and Mr. Hilleary opposed the application on behalf of creditors; Mr. Gray supported.

It was stated that this was the bankrupt's fifth appearance in this court, and that he had also been twice insolvent. No assignee had yet been chosen, and it was asked that the application should stand over until after the choice.

His Honour thought that no substantial benefit would accrue to the estate by the release being ordered, and adjourned the application until after the meeting for choice of assignees.

BELLIGERENT RIGHTS.

The following is the latest dispatch on the subject of the cessation of belligerent rights, addressed by the Foreign-office to the American Government:—

EARL RUSSELL TO SIR F. BRUCE.

Foreign-office, July 6, 1865.

Sir,—I have received and laid before the Queen your dispatch of the 19th June, with a copy of Mr. Seward's note on the subject of the cessation of belligerent rights.

Her Majesty's Government are sorry to find that the reservations and explanations which accompanied the orders of the 2nd June are deemed unacceptable by the Government of the United States.

Her Majesty's Government did not expect, indeed, that the United States, after the course they have hitherto taken, would now acknowledge that the original concession of belligerent rights was either necessary or just, or sanctioned by the law of nations.

Her Majesty's Government, however, having, in common with all the maritime Powers of Europe, acknowledged the belligerent rights of blockade on the part of the United States, and having recognised the existence of a belligerent against whom that right was exercised in conformity, as they are convinced, with the law of nations and the practice of centuries, could not be expected on their part to shrink from the consequences of the course they had deliberately adopted. Her Majesty's Government, therefore, considered that a due regard for national faith and honour required that any Confederate vessel of war called upon to depart from Her Majesty's ports, harbours, or waters should have the benefit of the twenty-four hours' rule. But you will observe to Mr. Seward that this rule is then to be enforced for the last time.

Consequently no Confederate vessel of war, taking advantage of this rule, could ever again have the benefit of it.

Her Majesty's Government have, in a like spirit, allowed that vessels lying in Her Majesty's harbours or waters, or which, during the space of a month, shall come into these harbours or waters, shall be permitted to disarm and assume a peaceful character. Otherwise vessels at sea, ignorant of the termination of the war, might be driven without coals or sails to perish on the neighbouring rocks, or to founder at sea. Such inhospitality would not become the character of the nation for good faith and honour, or for humanity.

But you will observe that Her Majesty's Government have instructed their authorities in distant ports distinctly to apprise the commander of any such Confederate vessel that he is to expect no further protection from Her Majesty's Government, except such as he may be entitled to in the ordinary course of the administration of the law in time of peace. The 24 hours' rule would not be applicable to such case.

The Government of the United States will, therefore, be entitled to maintain that such vessels are forfeited, and ought to be delivered to the United States upon reasonable application in such cases made. Only such application must be made good in a British court of law if the vessel is found in British waters.

In the case of a vessel captured at sea by a naval force of the United States, under whatever flag, the claim ought to be made good in a court of law of the United States.

Her Majesty's Government will further illustrate their views on this head by the enclosures to this dispatch.

Part of these enclosures consist of dispatches to and from Paris. Her Majesty's Government can never admit that, in the presence of a great war which interrupted and destroyed a friendly and useful commerce extending along 3,000 miles of the American coast—a war reducing great numbers of industrious families of both nations to poverty, and afflicting a whole continent—the Governments of England and France should not, as far as possible, act in concert, in pursuance, not of any formal engagement, but of a mutual understanding.

Her Majesty's Government, however, are gratified to find that the United States no longer claim the belligerent right to search British vessels, and that the normal relations of the two countries are practically returned to the condition in which they stood before the civil war.

Her Majesty's Government trust that these explanations, founded upon views which Her Majesty's Government have maintained in a spirit of just neutrality, will prove to be favourable to the establishment of a lasting and intimate friendship between the two nations.—I am, &c.,

(Signed) RUSSELL.

Naval and Military.

With the embarkation of the 78th Highlanders for Gibraltar we complete the despatch of our reliefs for 1865 (says the *Army and Navy Gazette*). The 26th and 49th have gone to Bombay, and the 41st to Calcutta, and the two other battalions for India; the 2nd battalion, 24th, at the Mauritius, and the 96th at the Cape, have had their respective reliefs, the 2nd battalion, 22nd, and the 1st battalion, 9th, sent on to these stations before this. When the 63rd, now daily expected from Canada in the Himalaya, and the 81st and 89th, from India, have arrived, we shall have accomplished the last moves between home and foreign service of 1865. Except as an aid to the Indian reliefs, it is not likely that the regiments now at home will be called upon for the colonies during the next three years. No battalion out of India or New Zealand is entitled to come home before 1868, and the New Zealand regiments, when they do return, will not be replaced on that station. In the very probable event of some of the battalions now in the colonies being sent on to India next year, those at the top of the list at home would, in the ordinary course, replace them at their present stations. But, on the other hand, it is not improbable that some reduction of our North American garrisons may take place, in which case the battalions now quartered in that part of the world would be sent to the colonies from which regiments are likely to be removed to India. Of the North American battalions, the 1st battalion 25th will probably be brought home next year, inasmuch as it was sent out after less than one-half the usual period of home service. The 2nd battalion 7th Fusiliers, and the 4th battalion Rifle Brigade, should come home in 1868, but the other corps have fully five years to serve before completing the usual period of colonial duty.

ROYAL ENGINEERS.—The following moves have just taken place, viz.:—Colonel Burgman, arrived home from the Mauritius on leave. Lieutenant-Colonels: Freeling, placed on the seconded list; and C. Sims, on survey, died at Ceylon on the 13th of June. Major C. E. Cumberland, at Portsmouth, ordered to the West Indies. Captains: M. S. Whitmore, ordered home from the Cape of Good Hope, and E. L. Bland, from leave, to Portsmouth. Second Captains: Garnier, on passage to the Cape of Good Hope, and C. W. Wilson, from Jerusalem to Southampton. Lieutenants: W. Keith, promoted to second captain, vice Drake; H. C. Seddon, ordered from leave to Guernsey; A. Hamilton, from leave to Portsmouth; C. Warren, from Gibraltar, on leave; Beaumont, from leave, to Portsmouth; E. Stephens, from Gibraltar, on sick leave; Tolley, at Aldershot, ordered to China; J. R. M. M'Cullagh, at Belfast; C. H. Cole, on leave; Whitmore, at Devonport; W. C. Ross, at Derby; and F. S. Shepherd, at Portsmouth, ordered to Bengal; and Reynolds, from Dover, ordered to Bombay. Gentlemen Cadets: E. C. Hart, E. Caudwell, Fanshawe, M. C. Brackenbury, H. T. Haynes, R. H. Jelf, R. G. Woodthorpe, and F. P. Washington appointed lieutenants, with temporary rank, and on leave.

The following ships are now on their way to England, as orders have been sent out to the different stations to the effect that as soon as the necessary arrangements can be made by the various Commanders-in-Chief they should be sent home, viz.:—The Wanderer and Procris from the Mediterranean; the Liffey, Styx, and Peterel from North America and West Indies; the Satellite from the south-east coast of America; the Tribune and Cameleon from the Pacific, and the Conqueror and Euryalus from the China stations.

The Sovereign of India, which left Hong Kong on the 12th April, arrived at Spithead on the 1st August. This ship brought home Mr. Clement Hertzee, master, from the Grasshopper, on promotion; Assist.-Surg. Birch, Euryalus; Messrs. Derrick, M'Intyre, Roberts, and Deane, engineers, from ships in China, and 149 sailors and marines (invalids). The latter were removed by Government steamer to the Victory, flagship, in Portsmouth harbour, the severe cases being sent to the Royal Hospital, Haslar. Two military and six naval deaths occurred on the voyage.

On the 27th July, at Sheerness, the Admiralty yacht Enchantress ran into the steamer Oread. Two passengers were much hurt, and it is feared some may have been knocked overboard.

Lieutenant Prince Alfred having attained his majority on the 5th inst., the Royal Standard was hoisted on the King's Bastion flagstaff of Portsmouth town fortifications, and on the main-royal masthead of Her Majesty's ship Victory, all the other ships of war in commission at the port hoisting the naval ensign at their respective mastheads in honour of the occasion. At 1.30 P.M. a Royal salute was fired from the guns of Her Majesty's ship Victory in Portsmouth harbour, from Her Majesty's ships Octavia, Constance, and Liverpool at Spithead, and from the garrison battery of the King's Bastion.

VISIT OF JAPANESE TO BEDFORD.—On the 29th ult., the large party of Japanese, sent over by Prince Satsuma to gain a knowledge of the agriculture and manufactures of Great Britain, paid a visit to the Britannia Ironworks at Bedford. They were accompanied by Professor Williamson, of the London University, by the Professor of Natural Philosophy at the Glasgow University, and other eminent scientific men, who have the direction of their investigations. The Japanese, whose remarkable *physique* caused considerable interest, the Mongolian type being very striking, took great interest in the machinery and various processes in operation at these important works, and seemed astonishingly quick in comprehending the various details. They appeared very unwilling to leave the works, but steam having been got up in one of the new steam ploughing engines, about fifteen of the Japanese crowded on to it wherever they could get a footing, and it was highly amusing to see with what delight they travelled in all directions over the extensive quadrangle of the works. After spending about three hours here they took luncheon with the Mayor of Bedford (Mr. James Howard), and proceeded to witness the steam ploughing on Messrs. Howard's farms at Clapham, where their amazement seemed to culminate, the operations being so much more simple than they had anticipated. A reaping machine which was at work was quickly handled and cleverly managed by them. Subsequently they visited Biddenham for the purpose of viewing Mr. Charles Howard's celebrated shorthorns and sheep, and after dining with the Mayor they left for London by the last train, expressing their unbounded delight with the day's visit to Bedford and their admiration of our English hospitality.

JAVA COTTON.—At the July meeting of the Executive Committee of the Cotton Supply Association, a letter was received from Bandong, Java, enclosing a sample of cotton called *Kapas Bandow* or *Kapas Tahon*, and stating that the trees bear for seven or nine years, but the difficulty in raising the money to carry on the cultivation is a great hindrance to its extension. If the Dutch Government were to appropriate lands, and afford other facilities, it is believed that this branch of agriculture would be successfully prosecuted.

THE AMERICAN FLEET IN THE FAR EAST.—American papers say that the Federal fleet in East India waters is to be re-inforced until it equals the strength of the English and French fleets in that part of the globe. Several large ships of war have been put in commission, and will soon sail.

TEA.

(*Travers' Circular*, Aug. 5.)

About 22,000 packages of China and Japan tea were offered at public sale this week. A much larger proportion of Green teas of all kinds were offered than has been submitted to public competition for some time past: for these descriptions lower prices were accepted; the qualities were more suited for export than for dealers' requirements. With few exceptions, little was sold that was printed "with reserve." Common to fair red-leaf Congou sold at rather easier rates; the lower kinds of fairish black-leaf shared in the fall. A few parcels of Japans in fancy packages sold at very full prices. The market price of common Congou is from 11d. to 11½d. per lb.; broken-leaf cannot be bought under 7¾d. per lb. Three public sales of Indian teas have been advertised for next week, but we believe that Messrs. Laytons' sale of about 300 packages will be the only one proceeded with at present, the others being adjourned.

It is now so well ascertained that increased consumption of articles on which the Customs' duties have been reduced almost immediately follows the reduction, that Mr. Gladstone has been able, in his last Budgets, to make remissions of duty which, to less experienced financiers than himself, appeared to sacrifice more of the public revenue than was desirable. His confidence, however, that increased consumption would rapidly make up present losses of revenue has as yet never been deceived, but seldom do the hopes of an extended use of an article bid fair to be so rapidly realised as in the case of tea. The Board of Trade returns to the end of May showed a falling off in home consumption for the first five months of the year of 7,469,386 lbs. That this great apparent decrease was entirely caused by the time granted to grocers for working out of their old stocks was shown by the extraordinarily large deliveries during the month of June, which were 12,300,000 lbs more than in the corresponding month of 1864. The duty-paid deliveries for the six months were 4,872,374 lbs. greater than in 1864, and 7,344,203 lbs. more than in 1863. It is not to be expected that deliveries can be maintained at the same rate, as grocers at the beginning of June held little duty paid stock, and cleared not so much to meet an actual demand from the public as to fill their warehouses with their usual reserve. The deliveries, however, during July continued to be very heavy, and if we may judge by the London returns, an increase of nearly 3,000,000 lbs. will be shown in the United Kingdom deliveries for the seven months. If they continue to be so heavy, a total consumption of 95,000,000 lbs. for the year may be pretty confidently reckoned on, and some are sanguine enough to predict a total of 100,000,000 lbs. In the year 1850 the duty was 2s. 1d. per lb., and the consumption of tea 51,172,302 lbs.! The last fifteen years have thus seen an extraordinary change in the tea trade, owing in some slight degree to the growth of wealth and population, but in an infinitely greater degree to the successive reductions in duty. Tea is still far too heavily taxed. The English duty alone amounts to 75 per cent. on the value in bond of broken-leaf Congou, and to 50 per cent. on sound common Congou; on 1s. 8d., the average bond price, the duty is still a charge of 30 per cent. In addition to the English duty, it must be remembered that the Chinese Government levies an export duty, and that the local officials in China frequently exact toll when the tea is on its way to the coast. We may thus, as these hindrances to the use of tea are removed, look forward with confidence to a time when even the present consumption will appear small.

The exports of tea were not so heavy by 736,555 lbs. in the six months as in the corresponding part of 1864, but 3,826,618 more than in 1863. The stock at the end of June was still in excess of that of 1864, and much above that of 1863. It seems probable, by all accounts, that the next season's supplies will be extremely heavy, so that there is no probability of the stocks being reduced to a low ebb by the increased deliveries. The course of prices must necessarily be dependent on the quantity and quality of the new season's supplies, but at present there seems to be no chance of any great change in market values. Had the duty not been lowered, and a great stimulus been thus given to consumption, prices would have probably fallen to a considerable extent; but increased consumption will now probably save importers from further losses, although there appears to be no probability of any improvement.

The reports we have given for some weeks past of the general dulness of business would seem at first sight to be contradicted by the heavy deliveries during July, but the deliveries for a given period afford no indication of the amount of business, or actual buying and selling, that is going on in the tea market. Little tea may be disposed of in Mincing-lane and by wholesale houses, while the deliveries at the same time may be unusually heavy. On the other hand, the London sales may be very large, while the deliveries are small. The seeming contradiction is explained by the fact that the wholesale houses and the grocers buy tea in greater quantities than are required for actual wants. This practice has gone to such lengths on the part of the trade, from the imagined difficulty of obtaining a continued supply of suitable qualities, that it was discovered, when a delay in the reduction of the duty was asked for, that a great part of the grocers held two months' duty-paid stocks of tea in addition probably to far greater bonded stocks. This practice on the part of grocers is happily giving way rapidly, for as supplies increase, it is found that it is a work of no great difficulty to match samples, while the undesirability of locking up capital is becoming daily more apparent. The wholesale dealers have also been holding smaller stocks, and particularly of common and medium Congous, of which there has been a far more regular supply than was formerly the case. As the trade increases, a great change must take place in the manner of conducting it, and purchases will be made more and more from hand to mouth. This must be an unmixed benefit to all concerned, as the markets will become steadier, and at the same time the enormous loss on dead stocks of tea will be saved.

THE BOARD OF TRADE RETURNS.

The Board of Trade returns for the month and six months ending 30th June again exhibit results that at first sight present an unfavourable aspect; but one of the chief causes of the apparent falling off in the value of the exports is to be found in the lower prices now prevailing. For example, the exports of cotton manufactures in June, 1864 and 1865, were respectively 151,786,765 yards, and 167,553,664 yards, while the values are stated at £3,828,319 and £3,353,309. In cotton yarn there has been an increase in quantity from 6,930,157 yards to 10,024,418 yards, or nearly 50 per cent.; and in price, from £822,118 to £909,184, little more than 10 per cent. The total declared value of exports for the month last past was £13,227,062, against £13,978,526 in 1864, and £11,271,527 in 1863, which is a decline of £751,464 as regards the former period, but an increase of £1,955,535 over the latter. The total declared value for the six months of the present year is £74,128,638, against £78,047,586 in 1864, and £62,014,197 in 1863, which shows a falling off of £3,918,948, as compared with 1864, but an increase of £12,114,441 as contrasted with 1863. Our trade with the Far East, as far as distinctively to be gathered from these returns, shows quantities and amounts as follows:—

Exports to China and Hong Kong.

For the Month ended 30th June.

	1863.	1864.	1865.
Cotton yarn	333,682	147,600	71,300 lbs.
Cotton manufactures	4,826,623	6,889,484	10,974,598 yds.
Worsted stuffs	643,736	1,373,069	1,623,633 „
Woollen and worsted cloths	138,296	88,742	133,977 „
Lead	1,554	169	1 ton

Value for the Six Months ended 30th June.

Cotton yarn	£70,893	£114,032	£82,217
Cotton manufactures	505,904	1,022,244	1,245,853
Worsted stuffs	277,159	417,225	622,739
Woollen and worsted cloths	167,510	140,674	141,174
Lead	183,837	81,354	20,419

The Cotton Manufactures exported to other ports and countries of the Far East were, in quantity for the month, and in value for the six months, as below:—

Quantity for the Month ended 30th June.

	1863.	1864.	1865.
Ceylon	1,248,353	1,507,833	1,165,923 yds.
Singapore	2,217,405	2,210,763	6,755,397 „
Java	1,208,499	2,220,449	4,863,609 „
Philippine Islands	1,911,654	1,721,933	1,846,732 „

Value for the Six Months ended 30th June.

Ceylon	£137,458	£236,718	£141,566
Singapore	224,961	479,502	556,159
Java	128,942	389,179	343,442
Philippine Islands	123,046	332,091	375,829

Of Cotton Yarn, the quantity forwarded to Singapore was for the month 197,000 lbs., and for the six months, 853,390 lbs., against 31,000 lbs., and 512,308lbs. in 1864, and 103,600 lbs., and 628,976 lbs. in the same periods of 1863. The value of the export for the six months of the three years was—£68,033 in 1863; £61,803 in 1864; and £79,667 in the present year. The Cotton Yarn exported to Ceylon was 26,250 lbs. in the month, and 98,192 lbs. for the six months ending 30th June; the value for the six months being £8,390.

Imports.

Raw Cotton exhibits a marked decline in the quantity imported from British India and China; and indeed the total import from all quarters is less for the six months than it was last year. The figures are thus given—

Quantity for the month ended 30th June.

	1863.	1864.	1865.
British India	243,274	360,898	209,951 cwts.
China	41,856	111,205	4,390 „
All parts	457,739	790,304	471,831 „

Quantity for the Six Months ended 30th June.

British India	1,205,798	1,608,773	1,135,842 cwts.
China	110,469	411,369	210,885 „
All parts	2,134,230	3,546,968	3,108,853 „

Value for the Five Months ended 31st May.

British India	£7,295,743	£11,621,924	£4,688,073
China	491,130	2,610,082	936,099
All parts	13,923,441	29,340,681	17,182,887

Of Unrefined Sugar, the quantity imported from Java and the Philippine Islands during the month of June was 35,506 cwt., of the 3rd quality, and 48,024 cwt. of the 4th. The quantity for the six months, and value for the five months, is returned as follows:—

Quantity for the Six Months ended 30th June.

	1863.	1864.	1865.
Of all qualities (cwts.)	497,638	74,706	422,837

Value for the Five Months ended 31st May.

Of all qualities	£432,390	£91,763	£334,808

Of Hemp the import from the Philippine Islands during the month of June was 14,346 cwt. the general result being returned thus:—

FREIGHTS AND CHARTERS.

During the early part of last week there was a good demand for ships for China, and rates accordingly advanced; since then, however, ships have been freely offered, and rates are now easier. Our advices, homewards, report no change in homeward charters.

Current Rates of Freight for Vessels on the Berth :—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 35s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows :—For Hong Kong: £43 and £2. For Shanghai: £53 and £2. 12s. 6d. For Manila: £1. 17s. 6d. For Batavia: 24s. to 26s. For Singapore: £30 and £1. 10s. For Galle: £30 and £1. 7s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty having invited tenders for the conveyance of 746 hhds. porter, 48 tons naval stores, including a few combustibles from the River Thames to Hong Kong, have accepted the Crest of the Wave for that purpose.

CASUALTIES.

The Malay, Hutchinson, which arrived at New York on July 17 from Manilla, was struck by heavy seas during the gale of the 17th and 18th of May off the Cape of Good Hope, carrying away the head and staving the main stem, causing the ship to leak.

The Avon, from London for Ceylon, was spoken with on the 24th of June, in lat. 6 N. 25 W., with loss of main topgallant mast, and her topmast head sprung.

MISCELLANEOUS.

At St. Helena.—June 17, from Colombo for London, Raleigh; 23, from Colombo, Regia, Davis, and sailed, 24, for London; from Batavia, Dordrecht, Loos, and sailed for Rotterdam; 24, from Colombo, Harkaway, Irvin, and sailed for London; from Singapore, British Crown, Smith, and sailed for London; 25, from Sourabaya, Henriette Elisabeth Suzanne, Meyboom; from Banjoewangie, Marinus Willem, Buyser.

At Mauritius.—June 17, from Singapore, Surcouf, Crassen; 25, from Penang, Joseph Bushby, Davies; 28, Ilion, Blomberg; 30, from Singapore, Kensington, King; July 3, from Macao, Annette (ss.), Jones, and left, 4, for London.

SHIP LAUNCHES.

Messrs. Robert Steele and Co. have recently launched from their East-end yard at Greenock a composite clipper ship, of about 850 tons, named the Sir Lancelot, for John M'Cunn, Esq., for the China trade. The ship was named by Miss Catherine Neill. Her dimensions are as follows:—Keel and forerake, 195 feet; breadth, 33 feet 9 inches; depth of hold, 21 feet.

On the 31st July there was launched from the building-yard of Randolphe, Elder, and Co., on the Clyde, a 1,000 ton composite screw-steamer, for the Netherlands India Steam Navigation Company. This is the third of a series in course of construction for the same company.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishment at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz.: a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

69, COLEMAN-STREET, CITY, AND 21, DUKE-STREET, EDINBURGH.

UNIVERSAL LIFE ASSURANCE SOCIETY, 1, King William Street, London, E.C.

Established 1831.

At the THIRTY-FIRST ANNUAL GENERAL MEETING, a Reduction of 50 per cent., or one-half, upon the Premiums for the current year was declared upon all Participating Policies six years in force, as shown in the following examples:—

Age in Policy.	Sums Assured on Lives in England.	Original Premium.	Reduced Premium for Next Year.
20	£1,000	£19 6 8	£9 13 4
30	1,000	24 8 4	12 4 2
40	1,000	31 10 0	15 15 0

Age in Policy.	Assured on Lives in India.	Original Premium.	Reduced Premium Next Year.	Further Reduced Premium, if in Europe.
20	£1,000	£42 0 0	£21 0 0	£9 18 4½
30	1,000	48 0 0	24 0 0	12 4 2
40	1,000	59 0 0	29 10 0	15 15 0

The above will show the great advantages attaching to Policies effected with this Society, the Annual Reductions of Premium having been nearly 50 per cent. per annum at Twenty-six Divisions of Profit. Large Reversionary Bonuses were also added to Policies, the Holders of which preferred increasing the Sums assured to decreasing their Premiums.

Premiums and Conditions highly favourable to Assurers proceeding to India. The Society has Branch Offices at Calcutta, Madras, and Bombay, where Policies may be taken out on Lives residing in any part of India.

FREDK. HENDRIKS, Actuary and Secretary.

Messrs. Grindlay and Co., 55, Parliament-street, S.W., have been appointed Agents to the Society for the West End of London.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

TOZER'S BOOTS AND SHOES,

For Ladies, Gentlemen, and Children, are FIRST CLASS in QUALITY and STYLE, and most ECONOMICAL IN PRICE.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists, Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty, and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S OINTMENT and PILLS.—DANGEROUS DISEASES.—How many life-long maladies spring from neglecting trifling symptoms; the pimple readily curable in the nursery becomes through carelessness the irremediable torment of after life. With a knowledge of the curative powers of Holloway's Ointment and Pills those who fail to use them for extirpating the first seeds of hereditary ailments will have to bear the punishment resulting from their folly. Holloway's remedies will remove eruptions of the skin, scorbutic diseases, and scrofula, and heal every description of ulcer, sore, wound, or abrasion. By the employment of Holloway's excellent, speedy, and safe medicament much pain and immense expense will be saved, and a great benefit conferred on the present and succeeding generation.

To Singapore: Mr. H. Alabaster. From Marseilles, Sept. 12.—To Hong Kong: Rev. J. S. and Mrs. Burdon, Mr. and Mrs. Coxon. To Shanghai: Mr. and Mrs. Townend, Mr. R. J. Forrest, Mr. Herbert and friend. To Ceylon: Mr. J. F. Capelle, Mrs. Ballantyne. To Galle: Mr. W. Hudson. From Suez.—To Shanghai: Sir Rutherford and Lady Alcock and Miss Alcock.

THE INCOMING MAILS.

The next inward mail, bringing dates from Shanghai to the 5th, and Hong Kong to the 12th ultimo, is due in London on the 26th, but has not yet been telegraphed from Suez.

Telegrams received to-day bring dates down to 16th July from Shanghai, and 22nd July from Canton. At Shanghai both tea and silk are reported as active, and advancing. Export of silk to date, 14,625 bales; Exchange, 6s. 4d. At Canton, 4s. 5¼d. to 4s. 5½d.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates from this port are to the 14th June. The London mail of the 10th April arrived out on the 3rd June.

The Tycoon passed through Kanagawa on the 10th June. It had been notified by circular and by advertisement on that morning that application having been made to Yedo, permission had been granted for foreigners to witness the procession, and a spot appointed for that purpose. From 9 o'clock A.M., therefore, until 2 P.M., there was a continuous stream of foreigners from Yokohama to their appointed rendezvous. A great number had determined to make a regular pic-nic of it, and a better locality could hardly have been selected. It was on a small knoll under the shadow of fine umbrageous trees, and separated from the Tokaido by about half-a-stone's throw, at a spot where for a hundred and fifty yards there was a cessation of buildings, and consequently an uninterrupted view. The army of the Tycoon marches very differently to European armies. Armed retainers of Daimios walk along apparently without object, sometimes in twos and threes, and even sometimes singly, and appear to be only strollers along the road. The baggage is carried by coolies in the ordinary manner that private gentlemen have their personal baggage conveyed; but except that the stream was a little more continuous, it hardly indicated anything very much out of the common. At last, however, a clearing of the road, by order of the Vice-Governor of Kanagawa himself, who arrived on horseback, put everyone on the *qui vive*. The Vice-Governor then dismounting, remained there until all had passed. At ten minutes past two a distant beating of drums was heard, and shortly forth came the vanguard. Two drummers in front—the chief officer of the Infantry body-guard on horseback, following; then several small field howitzers, drawn by single led ponies. Then came a regiment of about 600 men, four deep, armed with Enfield rifles and bayonets. Their dress was a hybrid between Japanese and European. The trousers were of the latter cut, only loosely tied round the ankle, the rest of their costume being Japanese. They were in heavy marching order, with knapsacks, and each had drinking utensils, &c. They marched with the utmost regularity, and showed at least good drilling to that extent. They were followed by another regiment, preceded by about twenty drums. Their dress and arms were purely Japanese, and the variety of colour of their tunics made a very pleasing sight. The more immediate body-guard followed. First a large lacquered box containing the arms of the Tycoon. This box, as it passed, was kow-towed to by many of the officials. Then a cavalcade of about twenty horsemen, all high officials, amongst whom was the Tycoon. He was pointed out as a young man riding in the centre of the cavalcade, his surcoat buff colour, embroided with gold, with a large crest on the back. The one circumstance that led to the belief that it was actually he, was the fact that the Vice-Governor kow-towed to him, bending his forehead to the very ground. This, to us, seemed confirmatory of the assertion of the Japanese Custom-house interpreters, who pointed him out at first. The procession, after the passage of the Tycoon, gradually became more straggling and less interesting, and all came to an end by about ten minutes to three.

Digitized by Google

The *Japan Herald* states that a new embassy is to be dispatched to Europe, not so much for political purposes, as for the purchase of European arms, engines, and many other things of which the Tycoon's Government feels, at this time, a more particular want. Our contemporary expresses the hope that this measure will not trespass upon the dominions of the commercial world, and continues:—"If we have dwelt at length on this subject, it is because it seems that certain commercial transactions have been and are to be made, in quarters to which such transactions do not belong. We have a right to take both the facts and the rumours into consideration, for we know that, whereas one Foreign Minister thought himself authorised to order ships for the Japanese Government, and has by this diminished the profits his countrymen ought to have made, another functionary has not hesitated to buy, in his official capacity, and therefore, under particularly favourable circumstances, Japanese produce, and to send it to a market in Europe, where the merchandise thus cheaply imported created considerable disturbance. He did this openly and frankly, and we are perfectly aware that he thought to do well for his Government and countrymen, but he was mistaken. Similar transactions, under whatever circumstances, would always have similar inconveniences, and, in order to avoid them, it would be well if everyone would keep to the position in which he has been placed: let merchants do their legitimate mercantile business, and let Ministers look after and protect the interests of their Government and of their compatriots."

Mr. Flowers, Acting British Consul, has circulated, for the information of the British community resident at Yokohama, the accompanying copy of notification, issued by the Governor of Kanagawa, upon the subject of business transactions in native and foreign coin:—

"There is nothing to prevent paying, or receiving payment, for articles of merchandise in either foreign or native coin. It has come to our ears, however, that of late some have refused to accept Ichibus, and that Dollars also are supposed by them not to be current. There is not the slightest foundation for these ideas. It is therefore notified that payments for articles of merchandise may be freely made and received in either foreign or native coin. "Custom House.

"5th Month (June 1865).

"To Yokohama Machi, and Ota Machi.

"Translated by Ernest Satow."

The Municipal Committee is rapidly organising a system of local government, and have chosen Mr. R. Schoyer for their chairman. Mr. Rickerby has volunteered to fill the office of Honorary Secretary. Police, Sanitary, and Finance Committees have also been appointed; and a Committee "to inform the Consuls of the organisation of the Council, as well as that the Finance Committee has power to receive funds from their hands, and moreover to ascertain the amount of funds at the disposal of the Municipal board." This Committee had obtained from the Consuls a written document defining the powers delegated to the Municipality. The filling in of the Swamp was to commence in a few days. The contract had been declared by the Governor of Kanagawa to be taken, and a promise had been given that there should be no further delay.

The committee appointed at the general meeting of the United Yokohama Club had presented their report, unanimously advising the members to "purchase the lot No. 76 in the main street at a price not exceeding $42,000. They further recommend that the requisite funds be raised by loan and debentures—not by shares. That a debenture list be immediately opened, and, after raising as much as possible in that manner, the remainder (not half it is anticipated) can be raised by loan at 12 per cent. They propose the following scheme for debentures:—That they should be of the value of $100 each, transferable—payable in five years, or redeemable before that time at the option of the Finance Committee. That they should bear interest at 9 per cent., and receive besides a bonus of one-eighth of the surplus annual profits of the club; five-eighths thereof being reserved for a sinking fund, and two-eighths for improvements and repairs to the house."

An impudent robbery was effected on the evening of the 29th May at the Hotel des Colonies, during dinner time, when all in the house were more or less engaged. The windows of the lower floor are built pretty high from the ground, but the fence at the side of the house is so constructed, and in such a position, as to make a good ladder for any one with a turn for burglary, being within about eighteen inches of the wall of the house, and exactly even with the windows. Using the fence, then, as a ladder, the thief entered the room, immediately adjoining the *salle á manger*, and taking a portmanteau, made his escape with it. On discovery of the robbery, at a later hour, a search was made outside for any trace of the robber, when one of the gentlemen living in the house found the portmanteau lying in the gutter opposite, its locks broken, and everything that was valuable extracted. It is said that the loss amounts to nearly eight hundred dollars. The Japanese night-guard were appealed to, and made a close and strict examination, but, of course, without receiving any clue, they could do nothing. The garden of the Rev. Mr. Bailey had been plundered of a quantity of scarlet geranium plants—not so insignificant a spoil as might be supposed, as it seems the Japanese gardeners have none such.

The half-yearly inspection of the 20th Foot by Major-General Guy, commanding the forces in China and Japan, commenced on the 6th of June. On the 8th, there was a final inspection of the men on parade in heavy marching order. The men formed into a hollow square—the Commander-in-chief and officers of the Staff and of the Regiment in the centre—when the General addressed them, praising the general appearance, condition and discipline of the regiment, and saying that it would be a pleasing duty to report favourably of their condition to his Royal Highness Commanding-in-chief H.B.M.'s forces at home. He took occasion to allude to the too prevalent affection for ardent spirits, and urged them strongly to avoid them as inimical to their interests—both as soldiers and as men. The French man-of-war troop-ship *Sarthe*, Capt. Galey, on entering the bay on the evening of the 4th June, unfortunately grounded on the bank (mud and sand), which is rapidly extending off Treaty Point. Capt. Luard, of H.M.S. *Conqueror*, and senior officer, immediately sent a boat offering assistance, which having been accepted, a launch with stream cable and anchor was sent, in charge of Lieut. Price, Mr. Solfleet (Master) accompanying, to render advice and assistance in getting her off and to navigate her to the anchorage. The result was, a little before two A.M., the ship was safely moored three cables' length from the *Conqueror* in six fathoms. More than a dozen vessels have grounded on this bank in little more than a year.

A melancholy accident occurred on board the *Conqueror*, on the 30th of May, resulting in the death of Thomas Turner, a seaman, who fell from the mizen topsail-yard, and striking against the mizen-rigging and chains broke his neck, arm, and collar-bone. The body was recovered some two hours after the accident.

A cricket-match, Garrison *v.* Civilians, played on the Royal Marine Parade Ground, terminated in favour of the former, the score being 132 against 105.

Messrs. Coare, Lind, and Co. give notice, under date June 1, that they have established themselves at Yokohama as public silk and tea inspectors and general commission agents.—Mr. Charles Rickerby notifies, under date May 29, that he has established himself as bill-broker and general commission agent.—Mr. Samuel Clifton notifies, under date May 26, that Mr. Alexander McKechnie "ceases to sign my name per procuration from this date;" and under May 29, that Mr. A. M. Dick is authorised to do so from that date.

Public notice, dated May 31, is given by the U.S. Consul, that T. J. Rumebe, a naturalised citizen of the United States, has filed his petition in bankruptcy in the Consular jurisdiction.

NAGASAKI.

On the 11th June a two-sworded official took up a position outside the Royal Hotel and commenced making a disturbance by shouting, and jostling the passers-by. A mulatto named William Henry, a British subject, who keeps the bar at the "Royal," went out to see what was going on. As soon as he got into the street the Japanese officer ran towards him, and at the same moment he received a sword-cut on his head which penetrated his skull, and extended for a length of seven inches. Two Chinese who were standing near were next attacked, one being cut down by a wound on the right shoulder, the other by a severe blow across the face. Having done this much, the Yaconin "ran amok" along the street with his sword drawn, cutting at every Chinaman and European he chanced to encounter. Luckily he did not wound any foreigner, but he cut down two of Messrs. Alt and Co.'s Chinese tea-firers, and another Chinese who was employed on board the steamer *Australian*. The injured men were at once taken on board the *Barossa*, where every attention was paid them by Doctors Head and Hollingworth. On the following day they were removed to the Hospital. The Chinaman belonging to the *Australian* is, it is feared, mortally wounded, and Henry is also in a very critical state, but the others are doing well. When the second

Digitized by Google

wounded man was brought on board the *Barossa*, Captain Boys, thinking that a general massacre was contemplated, sent an armed boat to the pier, and landed a picket of marines. The latter after having patrolled the settlement, and communicated with H.B.M.'s Consul, retired to the ship.

There were no less than eleven Japanese steamers in port, and all for repairs. Itzibus were at 260 per $100, and dollars still very scarce.

HAKODADI.

On the 8th of May the British Consul, Captain Vyse, and Mr. Howard, Messrs. Dent and Co.'s agent, were taking their after-dinner walk, when they were recalled by the servants of the latter to his premises, with a statement, that they had been violently entered by four Yaconins supposed to belong to the Prince of Aydsoo, who was one of the guardians of Hakodadi. On returning these gentlemen found the Yaconins engaged in tying-up one of the Japanese servants who had tried to obstruct their entrance. The Consul and Mr. Howard, who had provided themselves with their revolvers, at once proceeded to the rescue of the servant. Three of the Yaconins immediately fled, but the fourth was secured after a severe struggle, during which he drew his sword. Fortunately the Yaconin was the only one who received injury, as in the taking of the sword from him it received such a direction as slightly to wound him. The ruffian was immediately handed over to the Japanese police. This incident, in conjunction with the murder of the sailor, reported in the last *London and China Telegraph*, would not be of so grave a character, were it not for the supineness of the Japanese police. It appears that the Governor no longer resides at Hakodadi, but at the fort of Kamaida: consequently, while he is away, the Vice-Governors prefer their ease to the active discharge of their duties. Another, a very regrettable circumstance, is the report that during a visit of the Japanese officers to Mr. Howard's premises on the following day, the three unarrested Yaconins were allowed to penetrate with the other retainers into the court-yard. At the time the news left Hakodadi the result of the investigation made was not known. We are therefore unable to give any information as to what were the objects of the ruffians in entering Mr. Howard's premises—whether it was an insolent freak, or a quarrel with the servants of the house, or an intention to attack the foreign inmates. A meeting was held of the different Consuls, who addressed a communication to the Russian Consul, Mr. Goscavitch and the Commander of the Russian corvette lying there, requesting them, as connected with the only naval force available, to assist them in necessary measures for general protection. Capt. Vyse wrote at once for British Naval assistance.

The French man-of-war steamer *Dupleix* had since visited Hakodadi from Yokohama, and returned to the latter port, with advices that affairs were perfectly quiet. The Russian men-of-war *Bogatyr* and *Varaig*, the former conveying the Admiral, had left, it was supposed to visit the several ports on the coast of Manchouri. Hopes are expressed that on the arrival of Admiral King measures will be taken to induce him to station a ship of war permanently at Hakodadi. The place, it is said, is rising into importance, and it would be a great misfortune that its commenced developments should be arrested from the want of naval protection.

CHINA.

PEKING.

Native advices from Peking announce the startling intelligence that the Nien-tei have penetrated into the Chi-li province, and now hold a position not more then ten miles distant from the important city of Pao-ting-fu, situated about one hundred miles to the south-west of the capital. They are commanded by Miao Tienching, a son of the famous Miao Peiling. The Government has for some time anticipated this irruption into the neighbourhood of the court. Directions were sent down to the Keangsu authorities to transport all the disciplined troops in the province to the assistance of the northern army, and accordingly four steamers (the *Fenella*, *Gleugyle*, *Viola* and *Fusiyama*) have been chartered to convey the Sungkong and Fung-wang-shan garrisons to Tientsin at $5.50 Mex. per head. Two sailing vessels have likewise been taken up at $2.50 Mex. per head. The number of troops to be transported to the north amounts to seven thousand men of all arms. In view of this critical state of things and of the renown which Li Hung-chang has already gained, a report has obtained credence to the effect that he lately memorialised the Throne, representing that so important a post as Nanking should not now be allowed to lose the presence of Tseng-Kuo-fan, and offering to go in person to assume supreme charge in Shantung. A letter dated 10th June states that the authorities in Peking had in their tribulation applied to Her Majesty's Minister for the services of a British military officer from the Taku forts, and it was believed that the commanding officer of the small detachment stationed there would leave immediately to join the Imperialist forces.

TIENTSIN.

The following is from the North China and Japan Market report:—We have received advices from Tientsin, which inform us that the Commissioner of Customs at that port and an officer in the Purveyor's department of the English army, now on leave, have started for the scene of operations against the Nien-fei. Rumour asserts that Mr. Menzies, the officer alluded to, has been sent to this country as the bearer of a sword of state for Prince Kung, and has also been entrusted with a semi-diplomatic mission, the particulars of which are, however, unknown to the English civil authorities here and in Peking. Our information as to the nature of Mr. Menzie's duties in China are based on his own statements, but for which fact we should be disposed to doubt the probability of an officer in his department being selected for a mission of the kind. The circumstance appears still more extraordinary when it is remembered that a positive denial was given some short time since in the House of Commons to the assertion that English officers were still at liberty to take service under the Imperial Government of China. Of course if Mr. Menzies has obtained any post in the Chinese army now operating against the Nien-fui in the north, he must possess the direct sanction of the Government which despatched him hither for a specific purpose.

SHANTUNG.

From this port we learn some interesting particulars regarding the death of San-ko-lin-sin. He lost his life by a gingal-ball while gallantly leading on his cavalry against a strong body of Nien-fei encamped outside the city of Chi-ning-chow. Wu Tang Peng Yu-ling and Huang Yi-sheng, the high officials attached to the army in Shantung, have been subjected to unlimited abuse by the Peking Government for the neglect they displayed in not securing his dead body. It appears that after the engagement in which he lost his life the field was left in the possession of the Nien-fei, who captured his body, and cut it into minute pieces. At the same time a general named Cheng Kuo-shui, who had formerly held an important post in the Nien-fei army, but who had subsequently changed sides, and been rewarded by the rank of Ti-t'u, in the province of Chekiang, was also killed. The rebels are pushing rapidly onwards, and have now succeeded in capturing the city of Tsao-chou-fu, close to the coast of Shantung. They meet with more frequent reverses than befell the Taipings, but their progress is steady, although slow.

SHANGHAI.

From this port we have advices to the 22nd June. The English mail of the 26th April arrived on the 12th June; and by the *Oriflamme*, on the 18th June, telegraphic advices to May 13th had been received. Sir Harry Parkes was to leave for Yokohama in H.M.S. *Leopard* about the 24th of June, and the arrival of Dr. Winchester to succeed him as shortly expected. A "Society for the Relief of Distressed Foreigners" had been formed among the residents, and was expected to receive ample support, and to prove very useful.

HANKOW.

The news derived from native sources indicates an alarming state of things in the neighbourhood. The men in the Imperial garrison continue discontented, and a few days since five more camps mutinied, so that out of the fourteen camps which General Pao Chao is supposed to have under his command, only two own allegiance to the Government. The remaining twelve have departed on a predatory excursion into the Anhuei province.

HONG KONG.

Dates are to the 29th June. The Marseilles mail of 19th May had arrived, per *Tigre*, on the 27th June, by which vessel telegrams from London, up to the 1st June, were also received. There was no news of importance, either political or social, and trade generally was dull.

SIAM.

BANGKOK.

The question as to the ability of the Siamese Government

Digitized by Google

to suppress publications is still under discussion (states the *Siam Times* of the 29th June). If the treaties are of any force, they have not, for if one branch of business can be suppressed by them, so can every other.

H.B.M. steamer *Princess Royal* arrived at the anchorage off the bar on the 8th June. The Siamese Government had kindly placed two steamers, the *Imperatrice* and *Rapidity*, at the disposal of H.B.M. Consul, which went out the day previous to await her arrival, and to bring up the Admiral and such officers and men as he might designate. Admiral King and several of his officers took the *Imperatrice*, and landed at H.B.M. Consulate early on the afternoon of the 9th. Other officers, with the band and a detachment of marines, took the *Rapidity* and arrived up at the British Consulate about 6 P.M. Both steamers brought up about eighty in all. Early calls were made by the Admiral and Consul, in company with his officers, on the principal Siamese Government officials, which were received and returned in a most cordial and friendly manner. On Tuesday, the 13th, the Admiral, Consul, and officers had a grand audience with his His Majesty the First King at the Royal Palace, followed with a sumptuous dinner. Late in the evening, a part of the officers and men went on board a steamer to return to the *Princess Royal* outside the bar, and to bring up another set to enjoy a change, and accompany the Admiral and Consul to an audience and entertainment with His Majesty the Second King on the 15th inst.

The visit of H.B.M. steamer *Princess Royal* to this port (remarks the *Siam Times*) was one of those events which leaves a very pleasing recollection. The admiral and his officers were nobly entertained, and enjoyed the visit very much. Among the entertainments none, aside from the one given by the King, were so well got up as that of his Excellency the Prime Minister. At this dinner, after the usual loyal and complimentary toasts were drunk, his Excellency, the Admiral, and H.B.M. Consul made speeches. This is a new feature in Siamese entertainments, which we hope will be kept up in future. On completing their stay up to the city, they were again furnished with steamers to take them out on board the *Princess Royal*. A party of merchants and some others made a visit to the steamer on Friday last, and were entertained with target shooting, and many exercises connected with war vessels. The Prime Minister and many of the Siamese nobles also availed themselves of the opportunity to visit the *Princess Royal* while lying off the bar. His Excellency was among the last visitors, and after giving him a grand reception and entertainment, the *Princess Royal* sailed on the 18th June for Hong Kong.

On the 9th June, about half-past four P.M., in crossing the Bar in the steamer *Rapidity* with Admiral King and a great number of officers on board on their way up to Bangkok, a boat having a sail up was suddenly seen to disappear. Captain Bush, the harbour-master, reported it to the Admiral and requested permission to return and rescue the men. The steamer was accordingly turned, and succeeded in rescuing the entire crew of the boat, which consisted of five Siamese, and one Englishman of the name of Russell, in the employ of Captain Major. The boat was found to be the Post-boat returning from the shipping outside to Packnam. The poor fellows were very much exhausted by the waves washing over them. After the men were brought on board the steamer, the Admiral and officers contributed about eighteen dollars, and divided it among the boat's crew for saving Mr. Russell, who could not swim, and must have been drowned had not the Siamese boatmen held on to him in the manner they did. The Admiral highly complimented Captain Bush, the harbour-master, for the gallant manner in which he placed the steamer alongside the drowning men in such a heavy sea.

Mr. Newbrunner, who has been up north into the teak provinces, returned to Bangkok a few days ago. There is no want of timber, but the great difficulty is to get reliable natives to work the forests and raft the logs down on European account. Mr. Newbrunner brings the sad news of the death of Mr. Penfold, who accompanied him to the teak forests. Mr. Penfold, before engaging in his recent forest labours, was in the employ of some of the merchants of Maulmain, where he leaves a wife and five or six children. We hear that Mr. Spencer is about going up to the teak forests to attend to the rafting down of a quantity of timber. If reports are true, there is a very large number of logs waiting the rains to fill the streams, so as to enable their owners to float them down. Teak timber has been so scarce for a year past that it is hoped a large amount will arrive this year.

STRAITS OF MALACCA.

SINGAPORE.

Dates are to the 7th July. The London mail of the 26th May arrived out on the 29th June.

The *Corea*, which has been reported so often in the telegrams from China as "missing," arrived at Singapore on the 2nd July. The delay on her voyage was, no doubt, occasioned by her having been engaged, in Table Bay, to carry the mails and passengers to the Mauritius, that would, in the ordinary course of things, have been conveyed by the Union Company's steamer *Athens*, unfortunately lost there in the hurricane of May last.

The *Free Press* trusts "the complication of affairs in Perak will lead to the Rajah appealing to our Government for assistance; we could scarcely interfere without. There is not the slightest doubt that the natives would hail our arrival with pleasure. For several years a civil war has devastated the kingdom, and since the rule of the present sovereign has been established, his efforts to restore order have been fruitless. Would not this be a favourable opportunity for us to offer to purchase the country? It would be a valuable acquisition to this settlement, and we fancy the Royal family of Perak would be delighted to get rid of it at any price."

The prisoner Sallay, committed for trial for the *amok* on board the *Salida*, has been sent to the Police Hospital to be under the surveillance of Dr. Ferguson for a short time, in order that the doctor may be enabled to make observations with reference to his sanity.

The French steamer *Echo* is still lying in the spot and position in which she struck. She is on the reef amidship, astern upon the sand, and under her bows she has a large draft of water. She belongs to the French Government, and a French ship of war is lying alongside of her awaiting the instructions of the Imperial Minister of Marine as to her final disposal.

The Master Attendant has verified the position of the rock called Congalton's Car.

The swindler who was sentenced to twelve months' imprisonment in the House of Correction, for imposition upon the various Chinese Sampan traders, is now undergoing his sentence. He has been conducting his business in a manner so scientific as to do credit to an accomplished London impostor. He had two or three letters bearing all the impress of official documents stamped &c., &c., &c. In addition to these he had three or four medallions inscribed with his authority in two or three Eastern languages.

A Tringanu prahu lying off Beach Road was visited by two Malays, who made arrangements with the captain for a passage to Tringanu, after which they went ashore, but returned with two companions, and three out of the four remained on board all night. They went ashore the next morning, returning with the fourth companion. This time, however, they brought a fowl with them, which they immediately made into a curry, inviting the crew (amounting in all to eleven persons) to partake of the treat. The crew now recollect, although they did not notice it at the time, that the four visitors confined themselves to rice, and did not touch the curry. About three o'clock on Saturday morning, as the Water Police were going their rounds, they heard a noise on board this prahu, and upon making their way towards it, they found sarongs and handkerchiefs, lying in a small boat astern of the prahu, and in the water. The tindal in charge of the police boat endeavoured to rouse the people he found on board, but they appeared perfectly stupefied, apparently by some drug. The noisy men had by this time escaped. They reported the case immediately to head Inspector Hayward, who, after a little consideration of the matter, concluded that these miscreants had taken up their quarters in a certain locality with which he was acquainted. The Inspector's suspicions were well-founded, and in an empty house in Clyde-terrace, which was locked on the outside, with a padlock, he arrested two of the gentry. Mr. Hayward next proceeded to another house in Johore-street, which was also empty, with the exception of some books, one of which he found, upon examination, to contain the recipe for making the drug—as well as a quantity of wet clothes. On board of a Malacca prahu the officer arrested another man, together with more of the stolen property.

We have been favoured (says the *Singapore Daily Times*) by Captain Thomas with the following account of a daring attack made by Chinese pirates on the *Formby*, and we trust that when Captain Thomas, who we hear is ill, recovers,

Digitized by Google

he will give us further particulars; for when pirates make an attempt to take so large a ship as the *Formby*, it is time our Government should at least be put in possession of all the facts :—

Sir—The ship *Formby*, of Liverpool, on her late passage from Hong Kong, to Singapore was furiously attacked by fourteen piratical junks, heavily armed, and each manned with about fifty men, fifteen miles south of Cape Linhose, coast of Hainan, on 31st May. Some 50 shots were fired at the ship, some cutting through the plating at the water line, fortunately on the weather side. With great difficulty we succeeded in stopping the holes, the ship being iron. Their guns were loaded with all kinds of conceivable missiles, cutting and damaging the sails and rigging badly. Fortunately the breeze springing up we managed by outsailing them to make our escape, without any of the crew or officers being wounded.

Your obedient Servant,
CHARLES THOMAS.
Commander of Ship *Formby*.

Singapore, Juue 26th, 1865.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

COLLINS—On the 20th June, at Hong Kong, the wife of Henry Collins of a son.

POWER—On the 2nd June, at St. Andrew's-terrace, Victoria, Hong Kong, China, e wife of A. B. Le Poer Power, Esq., of a son.

ROESING—On the 26th June, at No. 9, Mosque Terrace, Hong Kong, Mrs. Adolphus Roesing, of a son.

SALABELLE—On June 9th, at Yokohama, the wife of X. Salabelle, Esq., of a daughter.

MARRIAGES.

DA SILVA—OUTEIRO.—On the 18th June, 1865, at the Roman Catholic parish church of St. Laurence, Macao, by the Rev. Vicar Pe Joze F. Lopes da Silva, Joaquim Peres Da Silva, Esq., of Macao, to Maria Delfina, the eldest daughter of the late Joze Maria do Outeiro, Esq., of Oporto.

GORDON—LACON.—On the 10th Aug., at St. Paul's Church, Knightsbridge, by the Rev. Clement Broughton, rector of Norbury, Derbyshire, assisted by the Hon. and Rev. Robert Liddell, Colonel Charles Henry Gordon, C.B. (late 93rd Highlanders), Highland Depot Battalion, Aberdeen to Georgina, eldest daughter of Sir Edmund H. K. Lacon, Bart., M.P., Ormesby House, Norfolk.

NICHOLSON—KEIGHTLEY.—On the 8th Aug., at the Chapel of the Charter House, by the Ven. Archdeacon Hale, assisted by Professor the Rev. John Woolley, D.C.L., ir Charles Nicholson, Bart., D.C.L., and LL.D., of No. 26, Devonshire-place, to Sarah Elizabeth, the eldest daughter of Archibald Keightley, Esq. No cards.

DEATHS

ANTHONY—On the 21st June, Eduard C. Anthony, Ship Chandler, Praya, aged 49 years.

CROCKETT—On the 11th June, on board the P. and O. steamer Emeu, in Bombay Harbour, O. R. Crockett, Esq., of Shanghai, aged 29.

KOONEY—On the 23rd June, at the General Hospital, Hong Kong, Michael Kooney Private 2nd Battalion 11th Regiment

LEWIN—On the 10th Aug., at Tynwald Lodge, Springfield-road, St. John's-wood, Margaret Alexandra, youngest infant twin daughter of D. Duncan and S. Ida Lewin, aged 43 days.

LOCKHART—On the 1st Aug., at The Firs, Innerleithen, Peeblesshire, Margaret Macadam, wife of James Lockhart, Esq., Engineer, late of Shanghai, deeply regretted.

PENFOLD—On the 9th June, at Raheng, on his way from Lumpong, to Bangkok, of dysentery, William Penfold, Esq., of Maulmain.

ROBERTS—On the 11th June, at Pootung, Robert Roberts, aged, 23.

SEDGWICK—On the 24th May, at Foo-Chow-Foo, very suddenly, Thomas Sedgwick, Esq., aged 32.

SHORT—On the 23rd June, on board the ship *Zemindar*, Alfred Arthur, son of Captain Short, aged 1 year and 11 months.

WALLACE—On the 22nd June, at St. Francis Hospital, Spring Gardens, Emma Amelia Wallace daughter of Sergeant Wallace, Commissariat Staff Corps, aged 2 years and 7 months.

WATT—On the 5th June, at Hong Kong, China, aged 25, John, second son of Mr. Robert Watt, of Sidney-road, Victoria-park, formerly of Glasgow.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—From London: June 8, Invincible; 21, Wild Deer. From Liverpool: 8, Pegasus; 9, Fort George; 18, Red Deer; 21, Simoda. From Sunderland: 7, Forerunner. From Cardiff: 9, Egeria; 13, Amoy; 21, Hurricane. From Newcastle: 14, Martin. From Hamburg: 7, Hermann.

At AMOY.—From London: June 17, Merce.

At HONG KONG AND CANTON.—From London: June 27, Gazelle. From Liverpool: 22, Everest. From Sunderland: 15, Queen's Own; 27, Tavistock. From Harwich: 20, Diamond. From Plymouth: 21, Florence Braginton. From New York: 20, Powhattan.

At MANILLA.—From Liverpool: June 11, Peerless.

At SINGAPORE.—From Liverpool: Gyrn Castle, Vigil. From Sunderland: Thusnelda, Bengall. From Shields: Samson.

At PENANG.—None.

DEPARTURES.

From HANKOW.—For London: June 6, Eliza; 9, Silver Eagle.

From SHANGHAI.—For London, June 21, Mr. Melhuish. For New York, 8, Andrews; 9, Hesperia.

From FOOCHOW.—For London, June 3, Black Prince; 3, Better Will; 8, Min; 9, Young Lockinvar. For Liverpool (via Canton): Chalgrove.

From HONG KONG and CANTON.—For London: 14, Salva; 22, Northfleet. For Liverpool: 22, Chalgrove.

From MANILA.—For New York: June 14, Sumatra.

From SINGAPORE.—For London: Hippolyta, Benelcuch. For Liverpool: Christopher Newton.

From PENANG.—For New York: July 6, Tritton.

LOADING.

At YOKOHAMA.—For London: Norfolk, Eleanor.

At HANKOW.—For London: Challenger, Isles of the South.

At SHANGHAI.—For London: Highflyer, Ethopian, Norwood, Guinevere, Eliza Nicholson, Art Union, Gossamer, Ellen Rodger, Golden Spur, Hampton Court, John Lidget. For Liverpool: Woosung.

At FOOCHOW.—For London: Lauderdale, Japanese, Dunmail, Wm. Mitchell, J. M. Joshua, Devena, Coral Nymph, Taiping.

At HONG KONG and CANTON.—For London: Seawfell, Heroes of Alma, Salvia, Northfleet, Valdivia, Chrysolite, Aliendale.

At MANILA.—For London: Zealander.

At SINGAPORE.—For London: Lord Raglan, Hastings. For Liverpool and Glasgow.—Scotland. For Bordeaux.—Java.

At PENANG.—For London: Edinburgh Castle, Shantung, Hanover Peter Rohland. For Boston: Rainbow.

FREIGHTS AND CHARTERS.

YOKOHAMA.—To London: Cotton and tea, £3 per ton; silk, £4. 10s.

HANKOW.—To London: £4. 10s. per ton.

SHANGHAI.—To U. K.: There is no settlement to report. A large number of fine vessels remain on the berth at £3 per ton.

FOO-CHOW.—To London: £2. 10s. to £3.

HONG KONG AND CANTON.—The circular of George Holmes gives the following settlements:—Allendale (439), to London via Whampoa, at £2 per ton. Castarica, 306 tons, Whampoa and Macao to Falmouth, f. o. either United Kingdom or the Continent, at £2. 10s. per ton. Roscote, 586 tons, from Java (two ports), to either United Kingdom or the Continent, at £3 per ton. Boy Bendixen, 366 tons, Macao to Hamburg, at £2 per ton. Benefactor, American bark, 672 tons, on the berth for New York.

MANILA.—There has been no settlements for the U. K. to report, but rates cannot be quoted at over £1. 10s. for sugar, and £2. 10s. to £2, 15s. per ton for hemp, as even at these low rates but a limited quantity of cargo could at present be secured. The "Apollo" (Bremen) has been taken up for New York at £1. 10s. for about 450 tons clayed sugar, and £2. 10s. per ton for hemp, to fill up.

SINGAPORE.—Shipping continues in a very depressed state, and great difficulty experienced in finding employment for vessels at the following reduced rates. To London £1 dead weight, and £1. 10s. light goods.

PENANG.—The vessels on the berth for shore are slowly filling up at £1. 2s. 6d. dead weight; £1. 10s. light freight; £1. 15s. measurement.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—June 20, Peterborough, London to Shanghai; Lammermuir, London to Japan; 21, Raphael, Liverpool to Japan; Hercules, Cardiff to Manila; Sales, Liverpool to Manila; Finzel, Liverpool to Shanghai; 22, Ville de St. So, Bordeaux to Saigow; 23, Camelia, Cardiff to Shanghai; Mena, Shields to Hong Kong; Bankside, Liverpool to Shanghai: Venco Camilla, Glasgow to China; 24, Muyhorm, Glasgow to Batavia; Cleveland, Shields to Yokohama; Herald, Sunderland to Hong Kong; Louisa Braquade, Cardiff to Japan.

From UNITED STATES to CHINA, &c.—17, Samuel Russel, from New York to Hong Kong; 19, Enoch Train, New York to Batavia; 21, Marianna, New York to Hong Kong.

From CHINA, &c., to ENGLAND and CONTINENT.—12, Wm. Dixon, Singapore to Liverpool; 12, Civialo, Singapore to London; Melbourne, Singapore to Hamburg; 18, Molly; ditto, Ida, Singapore to Falmouth; 21, Fiery Cross and Senica, Foo-chow to London.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—The export from Foochow and Hankow proceeds apace, and from all appearance supplies are likely to be large.

CANTON.—During the fortnight the market has continued very quiet, the teamen remaining very firm, and buyers pressing for lower prices, which in the case of Scented Teas have resulted in a fall of say 2 to 3 taels, whilst Country Greens have advanced fully 2 taels. Country Greens: 4,500 half-chests have found buyers for the American market, but now, prices having advanced, the teamen find more difficulty in effecting sales, some 16,000 packages remain in stock, for which holders are firm. Scented Teas—Of both kinds have commanded moderate attention, but very few really fine parcels are to be met with now. Canton Greens have throughout the fortnight been entirely neglected. The following are the settlements of the fortnight:—Tayshan, new make 500 boxes; Scented Orange Pekoe, 8,000 boxes; Scented Caper, 13,000 boxes; Gunpowder, 3,000 boxes; Imperial, 2,000; Country Greens, 4,500½-chts. Say: Gunpowder, 30 to 48 tls.; Imperial, 27 to 45; Young Hyson, 19 to 42; Hyson, 22 to 30; do. Skin, 14 to 17. The stock of Country Green is 16,000 pkgs., of other sorts uncertain.

FOOCHOW.—Settlements of Congou have been on a reduced scale, and the supply of the fine grades, on which the demand has principally run, has almost come to an end. There have been no transactions in Souchong. Some fine parcels have arrived, for which 50 taels are talked about. Even the best chops are deficient in strength. The following are the settlements of the fortnight:—Congou, 14,766 chests, 18,652 half-chests, and 2,876 boxes, at 6 to 8 tls. for dust; 11½ to 17 tls for common to good common; 17 to 24¼ tls. for flavoury to good flavoury; 26 to 34 tls. for second-class Kaisows; 32 to 39 tls. for good to fine; and 40 tls. for finest. Oolongs: 3,200 half-chests at 17¾ to 18 tls. for common Congou; and 21 to 25 tls. for fair to good. Scented Teas: 8,300 boxes at 32 to 37¾ tls. for good to fine; and 42 to 43 tls. for wiry leaf. Stock on 20th June: Congou, 42,100 chests; Souchong, 17,000 chests; Pekoe, 600 chests; Oolong, 14,577 half-chests; Scented, 3,000 boxes.

NINGPO.—The first crops Pingsueys are expected here in about three weeks' time. Several foreign houses have their agents in the interior buying up the leaf, and rates have been steadily advancing. To enter into contracts for delivery in Shanghai, duty paid, of first quality tea the teamen are asking at present S.P. 33 tls. per picul. The quality of the leaf is said to be slightly inferior to that of last year's.

SHANGHAI.—Black: Several musters of new Oopack Congous have been placed on offer since the date of our last, but up to the present the market has not been opened. Holders are willing to sell at the equivalent of Hankow opening rates, but, notwithstanding the advance of four taels at that port, there are no buyers. All the finest chops have been shipped off, but our stock comprises some very good and fine Oopacks, which are getting scarce in Hankow. Two small parcels of flavoury Hohow Kaisow kind have been settled at taels 29¼ and 29¾, but these give no quotation for other kinds. Re-shipments of Hankow settlements have been 7,100 chests, and the unsold stock is estimated at 8,000 chests. Total shipments, (including Hankow settlements). From 1st June to date, 7,600 chests, against 21,400 chests

Digitized by Google

last year. Green Teas: Only a small business has been done in these descriptions, the stock left offering no inducement to purchases, being chiefly composed of common and undesirable qualities. Settlements have been 3,200 half-chests at taels 17½ to 24 for common to good Fychow, and taels 30½ for one chop of good Moyune—prices showing no change on our last quotations. Re-shipments have only been 400 half-chests, and the stock is reduced to 6,100 packages. From the Ping-suey districts we learn that the new crop will be superior to that of last season, but supplies cannot arrive here under a month or six weeks from this date. Total shipments (including Kiukiang settlements) from 1st June to date, 3,600 half-chests; against 1,300 half-chests last year.

Hankow.—After the departure of last mail, buyers appeared less anxious to operate, and a reduction on opening rates was anticipated, which, however, has not been realised. Teamen remain firm in their prices, and a few eager buyers again entered the market paying extreme and extravagant rates. The news brought by the French mail of a reduction in duty, reached us on the 10th instant, which had the immediate effect of establishing a further advance of 3 to 4 taels. The teamen seem determined to support the advantage gained by barely feeding the market, although stocks in the country are known to be large. The quality of the new musters coming to market do not by any means improve. Settlements for the fortnight amount to 123 chops (including 13 contracts) making the total settlements to date 135 chops, and leaving a stock on the market of 15 chops. Quotations are:—Oopack, fine to finest, 30 to 36 taels; do. medium to fine, 24 to 26 taels; Oonams medium, 19 to 24 taels.

Kiukiang.—There are advices from this port to the 16th instant. Black Teas: The Hohow chop mentioned in last report was settled immediately with another to arrive at the extravagant prices of Tls. 25½ and 24½ respectively. One other chop had since come to hand and been shipped to Shanghai on native account. From Ningchow sufficient musters were not yet to hand to allow of a definite opinion of the quality of the crop to be found. Total settlements and shipments to date 1,581 packages against 1,293 packages at same date last year. Green Teas: The picking of the new crop was going on rapidly in the country, and leaf was being bought to lay down finest Moyunes at Tls. 26 to 27 in Kiukiang. First arrivals might be looked for about the end of August.

Yokohama.—During the past fortnight, but a very moderate business has been done in our tea market; the almost unprecedentedly flat state of the home market offering very slight inducement to foreign houses to invest. A few small parcels of new tea have been settled, of exceedingly good common to good medium kinds at $22 to $26. These teas come from inferior districts, close at hand, and show some slight improvement on last season's, both in liquor and in the manipulation of the leaf, though the latter is still very carelessly performed; the teas from more distant and superior districts are expected to arrive in a few days. Settlements amount to about 400 or 500 piculs, comprising about 180 piculs new tea. Stock on the market is about 3,600 piculs old and 200 piculs new tea. Quotations are as follows:—Good Common, $14.50 to 17.00; Medium, $19.00 to 21.00; Good Medium to Fine, $22.00 to 26.50: Finest, $30.00 to 36.00; New Tea $22.00 to 26.00.

Raw Silk.—The exports have been very large since the departure of last mail. The French mail, which left this on the 23rd, took from Shanghai 4,053 bales to Marseilles and Southampton. This opportunity carries about 2,900 bales similarly destined, shipped at Japan and Shanghai for conveyance by the P. and O. Co., and would have been much more had the Shanghai steamer been larger.

Shanghai.—The low rate of exchange ruling at the commencement of the mail, as well as the news of the prospect of peace in America, and less favourable reports of the European silk crop, have induced heavy transactions throughout the fortnight, but fully 2,000 bales of the present estimate of settlements were purchases made at the close of last mail, but too late to be included in last report. Prices advanced fully 25 to 30 tls. per picul, and were maintained until the departure of the French mail, notwithstanding the material rise in the rate of exchange; but the dealers are now more willing sellers, and are prepared to submit to a decline. The new silk is coming forward freely, and the reports of the second crop are so far satisfactory. The Tsatles, Yuenfas, and Hainings of this year may be considered about the same as last season's, but Taysaams are certainly inferior. The following are the latest quotations: Tsatlees, chops No. 1, 495 to 510 tls. per picul; do. No 2, 475 to 490 per picul; Saysaams, chops No. 1, 425 to 435 per picul; do. No. 2, 400 to 415 tls. per picul. Yuenfa, chops No. 1, 420 to 430 tls. per picul; do. No. 2, 400 to 420 tls. per picul.

Yokohama.—Since our last mail issue there has been a moderately active market resulting in settlements for the present steamer of about 700 bales, the principal part of which have been purchased since the Pekin's arrival with the 10th April advices; the news of the continued high prices ruling in London with the revival of demand and increased business may probably have induced the above operations, whilst on the other hand the low rate of exchange on London would make this mode of remitting funds appear favourable. There is a great scarcity of the finer descriptions of silk, most of the arrivals being composed of the medium and inferior sorts. Prices have been steady throughout, but for a few parcels of fine banks high rates have been paid. The unsold stock on the market may be estimated at about 800 bales, and arrivals continue on a fair scale—so much so as to lead to the belief that there is still some quantity of old crop to come forward. Quotations:—Ida, medium, $650 to 570; Mybash and Sinchu, best parcels offering, $680 to 700; medium, $650 to 670; inferior, $610 to 640; Oshio, best parcels, $650 to 660; medium, $600 to 630; Hatchogee, best, $540 to 550; Mashta, best, $580 to 590; Etchesan, best, $590 to 610; Koshu, best parcels, $590 to 610; Sodi, best, $590 to 610.

Drugs.—Canton.—Cassia Lignea: During the fortnight another 1,600 pls. have found buyers at advanced rates; $15.80 to 16 has been paid. The available stock on the market comprises about 2,000 pls., and is held at $16 to 16.25. The quality did not improve with later arrivals. Cassia Buds: The small stock of 40 pls. left on the market shows an interior quality; the new crop is expected in about six or eight weeks, when reasonable rates may be again looked for. Nominal quotations $49. China Galls: Having in view the cheaper sales at Macao, the present stock of 300 pls could probably be bought at $12.50. Vermilion is still quoted $37½ per box at 50 catties—nothing doing.

Camphor.—Hong Kong.—Of the stock on hand, as reported in last issue, 800 piculs have been sold at $20, 200 piculs at $20.50, and 100 piculs at $21 per picul, packed; and the demand not being so very active now, the market value must be considered about $20 per picul. A vessel, just arrived from Tamsui, has some camphor on board, but the exact quantity has as yet not been ascertained.

RAW COTTON.

Hong Kong.—An active demand has continued during the fortnight for local consumption, and large purchases have been made for the Canton market. Supplies from the Northern ports having been light, stocks are much reduced. The settlements of the fortnight amount to 10,000 bales at $23 to 24.50, which display an advance of $1.50 on last quotations. The stock is estimated at about 5,000 bales.

Canton.—The sales of the fortnight amount to 2,000 bags at 15 to 17½ taels for Shanghai, 16 to 18 taels for Ningpo, and 15 to 17 taels for Shantung.

Shanghai.—The stock is small and little if any business has been done for export to the South ports. The quotation for the best is nominal at 13½ to 14 taels.

CHINA IMPORTS.

Cotton Yarn.—This article again shows a very material decline in value as compared with the quotations current under date of 12th instant, and the few trifling sales which have to be noticed have been effected with extreme difficulty. The business of the fortnight is limited to 138 bales, the greater portion of which consist of Nos. 28 to 32, placed at $202 per bale; 18 bales have also been forced off at auction at very low prices. Grey Shirtings: These goods have commanded more attention at the hands of the dealers than the other staple articles of Cotton manufacture imported, and the settlements of the fortnight aggregate 11,500 pieces placed privately, and 6,000 pieces of mildewed and spotted clothes sold by public auction. Quotations $3.65 to 3.80 for 7lb. and $4.60 to 4.70 for 8lb. 4oz. White Shirtings: Have shared in the decline experienced by unbleached goods, and are in hardly any demand. Sales consist of 1,500 pieces, and 300 pieces, sold by auction. 64 to 66 reed. $4.20 to 4.40. T-Cloths: Do not show quite so heavy a fall in value as that experienced in the value of Grey Shirtings, but these goods are extremely difficult to move at present. Settlements are put at 6,380 pieces. Sales from Foochow of Cotton manufactures appear to be confined to 100 pieces of this quality of manufacture taken at $3.37 per piece for 7 lbs. goods. American Drills, Jeans, &c.: There are not any of these goods in the market. White Spotted Shirtings, Dyed, do., Brocades, White and Coloured: There are not any settlements of these goods to report. Damasks: Do not meet with any inquiry. Chintzes: The transactions of the fortnight amount to 500 pieces. Handkerchiefs: Some 2,600 dozen have found buyers at about previous quotations.

Woollens.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: Have been in moderate request in this market at about the same rates as those current under date of last report, and the settlements effected during the fortnight amount to 690 pieces of Spanish Stripes and 65 pieces of Habit Cloths. Stripes, assorted, 80c. to $1 per yard. Long Ells: A large business as compared with previous advices has been transacted in this class of Woollen Goods, and the settlements reported amount to about 1,650 pieces; quotations, $8.80 to 9.20. Camlets: The amount of business transacted in these fabrics has been confined to sales of 380 pieces, and 110 pieces of sea damaged goods have also been moved off by public sale. Quotations, $21 to 24.50. Lastings: Sales are limited to 40 pieces at $17 to 19. Blankets: 651 pairs have found buyers since the date of last report, and from Foochow we hear of sales of 150 pairs of lbs. 9, at $5 per pair. There is not a single transaction reported from Canton in any description of foreign woollen manufactures.

Metals.—Iron, Flat, &c.: The inactivity noticed in the demand for all description of iron under date of last circular has continued throughout the fortnight which has since elapsed, and the sales effected in this colony do not exceed 1,200 piculs of Nail Rod, at $2.80 to 3.25. In Canton about 800 piculs of the same quality of iron have found buyers at $3.90 to 4.15. Lead: 160 piculs sold here, and 540 piculs placed in Foochow constitute the fortnight's transactions, at prices ranging from $5.50 to 5.85. Tin: 1,200 piculs have found buyers at $23. Tin Plates: 1,150 boxes sold, at $5.36 to 6.

NORTH CHINA BRANCH OF THE ROYAL ASIATIC SOCIETY.

The thirteenth regular meeting of the above society was held in the reading-room of the Shanghai Library, on Wednesday, the 7th June.

Present.—Sir Harry S. Parkes, K.C.B., President, in the chair; G. F. Seward, Esq., Vice-President, Revs. C. H. Butcher and F. Mitchell, Doctors Lamprey, Robson, and Johnston, Messrs. Thorne, Oppert, Alabaster, Markham, Gribble, Brown, Kidner, Kingsmill, Noetzli, and others.

The minutes of the last meeting having been read and confirmed, and the candidates on the list for membership duly elected, the following gentlemen were proposed for election at the next meeting:—

As resident members:—

Proposed by Mr. Brown, seconded by Dr. Johnston:—C. Dillon, Esq., A. C. Dulcken, Esq.

Proposed by Rev. C. H. Butcher, seconded by Sir Harry S. Parkes:—Rev. Moritz Kaufmann.

Proposed by Dr. Johnson, seconded by Mr. Kingsmill:—J. Sparrow Knight, Esq.

Digitized by Google

As non-resident members :—

Proposed by Sir Harry S. Parkes, seconded by Mr. J. Mc. L. Brown :—Dr. Falconer, Hankow; Dr. Reid, Hankow; Robt. Watmore, Esq., Hankow; Ambrose Littledale, Esq., Hankow.

The President announced that Wu, ex-Taoutai of Shanghai, had kindly placed at the disposal of the society the lower story of his house in the Ningpo Road, and that the Council hoped that they would be able to arrange to have the next meeting of the society held there. The Council has also engaged the services of a clerk and curator, who would reside on the premises. He hoped that the members of the society would assist in the contemplated work of forming a good museum and library.

A paper by Mr. Noetzli, entitled "Incidents connected with a journey to Cambodia which had for its object a commercial enterprise," was then read.

It struck the writer, then at Singapore, that Kamput, a port of Cambodia doing a considerable trade with Singapore, and where no European merchant had yet settled, offered inducements to start a foreign trade, and in the spring of 1859 he, with a companion, left Singapore in a schooner for that port. On landing they found Kamput a small town of from 5,000 to 6,000 inhabitants, built on a narrow river, the people mostly Chinese and refugees from Cochin China. They were well received by the King, who had come down to Kamput to witness the launch of a vessel built in European style, and who, like his neighbour at Siam, is not only friendly to foreigners but also the first trader in his own country. The adventurers, however, soon found that it was not possible to dispose of their goods at Kamput, the real trade of the place being conducted at Kau-kao, a seaport of Cochin China, about ten miles south. The French at this time being engaged in war with that country, no Europeans were allowed to visit the port which communicates directly with the river Mei-kong. Here the Chinese barter their goods for rice, liquid, indigo, salt, fish, horns and hides, cotton, cardamoms, gamboge, and silk for the Indian market, which are carried in boats thence to Kamput to be exported to China and Singapore. After a dinner with the King, followed by a visit from his Majesty, Mr. Noetzli and his companion travelled in buffalo-carts to Udong, the capital. Of the journey thither and the city itself Mr. Noetzli gave an interesting description; here he was kindly received by the First Prince and remained some time. The time of the arrival of the King from Kamput being, however, doubtful, he left, and visited the French missionary station at Pinhulie, the seat of a bishop, and after a stay of a few days went on to Phenum Beng. Phenum Beng is situated at the spot where the Mei-kong and the outlet of the Ta-li-sap lake, after joining, again divide to enclose the delta of the Mei-kong, forming here a cross. It has thus direct water communications in four directions; one arm coming from the lake Ta-li-sap, connected with the Siamese province and town of Battam-bong; one (the Meikong) flowing from the mountains of Thibet through the South-west province of China and Lao country; the third flowing through the province of Mi-tho, communicating with Saigon; and the fourth leading to Barsac, from which at Chandoc commences the canal spoken of before as connected with Cau-cao. Thus situated Phenum Beng is the most important station in Cambodia and the emporium for foreign and native goods; the population is probably from 20,000 to 40,000, and the river is so wide that the opposite shore belonging to Cochin China is not visible. The inhabitants, ranged according to their respective numbers, are Cochin Chinese, Cambodians, Chinese and Malays; the principal merchants being Chinese. The natives here appear to be as much addicted to opium-smoking as the Chinese. The writer then gave a description of the currency, and exhibited a silver tical lately coined by the King of Cambodia. The coin most in use is the Cochin Chinese cash, but others are current. The locality, in addition to the usual articles of commerce, produces abundance of sugar-cane and fruits and vegetables of excellent quality. From Phenum Beng the writer started for the Ta-li-sap lake, the river passing through dense jungle affording shelter for multitudes of birds and monkeys, but apparently uninhabited by man. The lake is situated between about 12 and 14 degrees north latitude, and has probably a diameter of about a hundred and twenty miles and a circumference of four hundred miles. The shores are low, and covered with thick forest, and during the inundations are flooded; the water is shallow, but is inhabited by countless shoals of fish. A large fishing village marked the entrance of the river flowing into the lake from Battam-bong in Siam, a description of which was given. Here were found two Frenchmen, lately returned from the gold mines; they stated that gold in abundance was to be had at a small distance from Battam-bong, but that hitherto the unhealthiness of the Chinese had prevented the working of the mines, the water in the neighbourhood of which is, moreover, stated to be poisonous. Here a letter received caused Mr. Noetztli's immediate return, and he decided on the overland route to Bangkok as the quickest. After many *disagremens*, and some dangers surmounted, added to the impossibility of procuring proper food, he arrived, in the middle of August at Bangkok.

The President having made a few remarks on Cambodia, its ancient greatness and present poverty, its mineral wealth and fertility, its one port, and one inland town, after a reference to the history of Poland as offering more than one point of resemblance, passed a deserved compliment on Mr. Noetzli, for his energy in endeavouring to open a country so little known, and his courage in alone undertaking the overland journey from Battam-bong to Bangkok.

A vote of thanks to Mr. Noetzli was then passed unanimously.

The President having announced to the meeting his approaching departure from Shanghai,

It was proposed by Dr. Johnston, "That this meeting, while congratulating the President of this society, Sir Harry S. Parkes, on his recent appointment as British Minister in Japan, cannot but look with regret on his approaching departure, which will deprive the society of his services as President which he has discharged so ably and energetically since its resuscitation." He hoped that the President would still continue in Japans to take the same interest in the society which he has always exhibited here, and added that to him the society was mainly indebted for its present satisfactory position.

The motion having been seconded by the Rev. C. H. Butcher, was carried unanimously.

The President then made a few remarks on the present position of the society and its future prospects. It now contains upwards of 150 members; up to this time there had always been a supply of papers for the monthly meetings, some of which were very valuable, and he had every reason to expect that for the present at least, there would be no shortcomings. He had been promised some extremely interesting papers, and he hoped that the work so well begun would under his successor be ably carried out. With thanks to the meeting for their kind appreciation of his services, he thought that to the successive secretaries of the society, Messrs. Jamieson and Brown, much of their present prosperity was due. He then in a few words took leave of the meeting.

The meeting then adjourned.

THE RUSSO-AMERICAN TELEGRAPH.

The Western Union Telegraph Company, who have contracted for laying down a telegraph between the Russian and American shores of the Pacific, are engaged in forming a station on the island of Sitka, preparatory to the commencement of the works. Thence the line will be carried on to San Francisco in a southern, and the River Kwichipachi in a northern direction, and, crossing the sea a little south of Behring's Straits, *via* St. Matthew's Isle, reach the Asiatic shores in the wildernesses adjacent to Cape Olyutorsk. This accomplished, it will be connected by Yamsk and Okhotsk, as the shortest practical route, with the new harbour of Nicholaiefsk, at the mouth of the Amoor. The works must be completed within five years, the Russian Government undertaking to finish its inland lines within the same period, and to continue the Siberian telegraph, which now does not go further than Kiachta, the well-known commercial emporium east of Lake Baikal, as far as Nicholaiefsk, thus effecting a junction between the European and American systems. Of the $10,000,000 capital required for the American, or Western Union Company, part of the works, $3,500,000 have, according to the statements of the Russian press, been already subscribed for in the United States. The Francisco Nicholaiefsk line will be the property of the company for 33 years, at the end of which period a new lease will perhaps be allowed them at the pleasure of the Government. In Russia the servants of the company must be chiefly Russians, and the Government have been accorded the right of occupying the stations, blockhouses, and military defences belonging to the company. The company require the sanction of the Government for disposing of their property or concluding any contracts with other persons, companies, or Governments relative to the use of the line.

Subscription 54s. per annum. including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON, TUESDAY, AUGUST 15, 1865.

TIENTSIN AND THE NEW TREATY PORTS.

Five years have elapsed since the Treaty of Tientsin was ratified, and foreign merchants opened branches of old firms, or established new houses, at the ports open to foreign trade by that treaty: namely, Tientsin, Newchwang, and Chefoo, in the extreme north of China, and Hankow, Kiukiang, and Chinkiang, up the Yangtsze River. Experience has proved that the three first named ports have not realised the commercial expectations entertained of their resources for import and export trade with British and other foreign merchants; and it is reported that the principal houses at Hong Kong and the old ports contemplate withdrawing their branches and agencies from them. In the event of such a movement a local contemporary, the *Overland China Mail*, predicts that "those "places will consequently drop quietly out of the roll of the "treaty ports." While there is every probability of the large exporters in tea and silk withdrawing their branches from Tientsin, it does not follow that the importers of merchandise will abandon that port. The former have simply found out that they made a mistake in expecting a proportionate share of trade to what they enjoy at the produce ports; as the foreign commerce at Tientsin is entirely in imports of manufactured goods, in which they do little or nothing, and hence they are not laid out for doing the trade. It is not surprising, therefore, that we learn of some costly establishments being given up, in these days of retrenchment, where there are no prospects of sufficient profit to pay expenses. On the other hand, those branches and new houses who lay themselves out for the import trade in cotton stuffs and other kinds of European merchandise have a large field for their operations. Some idea of this may may be gathered from the fact that the value of the imports in 1862, according to the Customs returns, amounted to £2,350,000; in 1863, £2,230,000, and although there may be a less amount in 1864 than the first item. in the absence of returns. there is reason to conclude that it was greater than that of the latter sum; while, so far, the trade of 1865 is not inferior to the preceding year. This being the case, the prediction of our contemporary in South China savours more of the "wish being father to the thought" than the real state of the trade at Tientsin, and the "mercantile houses of note" withdrawing their agencies from thence.

While experience has thus shown that Tientsin, as a market for manufactured goods, ranks among the highest in China, still the foreign merchant does not reap the full benefit of that trade. It is here where the "shoe pinches," and causes the large houses in the south to draw back from the step taken so far north. The foreign merchant or agent is entirely in the hands of the Chinese brokers at Tientsin, who monopolise all the trade with the Shansee traders, as they did before the port was opened, receiving their supplies from Shanghai in foreign ships, instead of native junks, as formerly. The cost of transhipment through that emporium is consequently as great now, if not greater, than it was before; especially where goods are conveyed in the steamers plying between the two ports. When the Shansee traders came to this market on the opening of the traffic to foreigners, they naturally expected that there would be a considerable reduction in the prices of shirtings and other Manchester goods; and the merchants themselves supposed that such would be the case. Indeed, one or two "new hands" sold at the prices offered by the astute Chinese, and suffered considerable loss thereby to their constituents in the south. On comparing the results, however, with the ruling rates for similar goods before the port was opened, it was found that there was no marginal profit to induce the country traders to deal direct with the importers. Hence the trade has continued in the hands of the native brokers, to the detriment of those firms who have gone to a large expense in opening up the commerce of this port. No doubt that this has been one of the causes which disgusts the old houses with the pettifogging trade of the place. To remedy this commercial drawback there is only one course open. That is, for British merchants to be well supplied with goods direct from England; so as to save the delays and expenses of indirect shipments, and thereby offer them at prices so far below those asked by the brokers as to induce the native traders to deal directly with them, without the intervention of "middlemen." Unless some course of this kind be pursued, there is no hope for the foreigner at Tientsin realising a fair share of the profits of trade at that port, which he was induced to believe would be the case after it was opened. Moreover, in the event of the Chinese becoming legally owners of foreign ships, even the carrying trade may fall into their hands, and it is just possible that the prediction of our contemporary may be realised. Be that as it may, there is sufficient in the large import trade of Tientsin to encourage enterprising manufacturers and merchants to try a direct shipment of cotton stuffs and other merchandise suitable for that market.

In a less degree these remarks apply to the port of Newchwang, or more correctly Ying-tsze, only the returns for the sale of merchandise, instead of gold as at Tientsin, is the bulky produce of bean-cake and other articles of native consumption only. Chefoo or Yentai, likewise, comes under these observations, and with even inferior resources of foreign trade, still there is room for developing that in its consumption of British manufactures. Hitherto the attention of large houses has been too much confined to the sale of opium at these marts, and, as it would appear, without benefit to themselves. Had they employed the same capital in shipping merchandise direct to these outports, in all probability a lucrative trade would have sprung up, especially to Tientsin, and induced them to retain their establishments, which it is said are now being abandoned for want of trade.

THE CEYLON LEAGUE.

It is vastly to the discredit of home colonial statesmanship that it should have given occasion to the creation of a political league in Ceylon, to the combination of all representing its industry, property, and intelligence, for securing the right of effective representation, and of control in the distribution of colonial funds. Ceylon designs to help itself in the most constitutional manner possible to constitutional privileges; and the judicious course which has hitherto characterised the proceedings of the League can have but one result—that of complete success. This combined protest against the domineering policy of the Colonial Office has raised the status of Ceylon. The action taken by Mr. Cardwell on the *fallacia suppositionis* of a surplus has certainly in part been receded from by the appointment of what we may term a mixed commission to report on the amount required, the sum rightly chargeable on the colony, and the administration of the same; but the Order in Council obtained by Mr. Cardwell, directing that the resignation of unofficial members of a Colonial Council does not create vacancies unless accepted by the officer administering the Government, and that the acts of the remaining members, if constituting a quorum, shall be valid, leaves the people of Ceylon as it found them, without the least control over their island revenue. That Order serves its purpose in sanctioning the present normal state of things, but it is not given to the Queen in Council to alter the principles underlying constitutional representation, still less to make laws. An Order in Council has been declared null and void by reason of its illegality before this, and if there is one principle underlying constitutional representation it is the right of a representative to have his resignation accepted; that he shall not be forcibly retained, as it were, in a position he chooses no longer to occupy, and the duties of which he does not even assume to fulfil. We have

Digitized by Google

reason to believe that the subject will be brought before Parliament in the form of an inquiry made to the Ministry as to its intentions, at an early period of the next session. A colonial Executive Council, however constituted, that cannot command public confidence, is worse than useless. Distrust will continue to pursue it in the administration of finances, and the ever watchful jealousy of a powerful League is by no means favourable to deliberations. The result of all will be that at no distant time the Council must be reorganised, allowing of a larger representation of unofficial members. We shall then, and not till then, see a new spirit infused into the administration of Ceylon, now entering under the influence of her own great resources and manifold external agencies, on a new commercial and industrial career.

THE EXTRADITION TREATY WITH CHINA.

The following letter appeared in the *Daily News*:—

Sir,—I hope you will allow me a short space in your columns for the narration of a melancholy tragedy enacted between this and Canton, in which the English authorities have taken no inconsiderable part. Before narrating the facts of the case, I should mention that by the 21st article of the treaty of Tientsin, it is stipulated that "if criminal subjects of China shall take refuge in Hong Kong, or on board British ships there, they shall, upon due requisition by the Chinese authorities, be searched for, and, on proof of their guilt, be delivered up." Acting upon the above clause, the mandarins at Canton, in the month of April, demanded from the government at Hong Kong the rendition of a certain Chinaman residing at the latter place on the plea of his being a pirate. They were backed up in this request by a letter from the British Consul at Canton, and the proof of his guilt was sent down by the mandarins. The Chinaman in question had been residing in the colony since the month of September, 1864, and the following facts appeared in connexion with the inquiry:—That he styled himself and was known among the Chinese as the Mo-Wong, one of the Wongs or leaders of the late rebellion that was dispersed at Nan-king, who, with better fortune than some of his comrades, had escaped and made his way to Hong Kong. He was the possessor of considerable wealth, which he kept at his own house. This, together with his having been a rebel, made him the object of "squeezes" from secret societies here, who extorted a good deal from him under threats of betraying his refuge to the mandarins. Becoming alarmed and disgusted at these frequent appeals to his purse and his fears, he took a legal opinion as to his safety in case his prosecutors carried their threat into execution, and being assured as to his perfect safety on British soil, he snapped his fingers at the extortioners, and entered into partnership with a shopkeeper at Hong Kong. Thus deprived of their anticipated mine of wealth, his former pensioners carried their threat into execution, no doubt to obtain a reward from the mandarins. The mandarin, who was certain of his promotion should he succeed in catching so famous a rebel, who had escaped the clutches of the Futai of the north, forthwith, as I have said before, demanded his rendition as a pirate, and having by some means, not known yet, got the English Consul to back him in the request, he sent down his demand and proof to Hong Kong. The man was seized, tried before the magistrate's court, where all that is above stated fully appeared: the proof of his piracy, which consisted of one witness sent down specially by the mandarins, was produced, and notwithstanding the protest of the counsel retained for the prisoner, who said that no Chinaman's life would be safe in the colony if he were given up on such evidence, the magistrate, under the direction of the law officers of the crown, made out the requisite order for his rendition. On this being communicated to the Mo-Wong he made up his mind if possible to commit suicide by jumping overboard on his passage to Canton, knowing as he did too well the horrid fate that there awaited him. When handed over to the Chinese officials he begged to be released from the handcuffs, but one of our civil officials, not in the police, would not permit this, and he was therefore conveyed to Canton in the manacles of the Hong Kong police. On his arrival there he was taken to prison, the next day brought before the mandarins, where he refused to plead, acknowledging himself a Wong; he was taken back to prison, and the next day was executed in the way reserved for political offenders, viz., he was tied to a cross, his cheeks then sliced off, then the insides of his arms and thighs, and finally disembowelled while yet alive. This put beyond a doubt the real cause of the demand for this man, and the real offence for which he was wanted.

There are two points in this case which surely should be brought before the public at home. First, whether under the clause quoted above there was in this case sufficient ground for giving up the man. Now, all that I have stated above as preceding his rendition was perfectly well known. I am not aware that even any pretence was made of ignorance or of disbelief on the part of the Government officers. Under such circumstances one would imagine that they would proceed with the greater caution when the life of even a Chinaman was at stake, yet we see that on the requisition of a provincial magistrate only, on the witness of one man only provided by the same magistrate, they gave him up on a charge of piracy, for which crime when the Chinese had got the man they had not the ordinary decency to pretend to punish him. Secondly, it is all important to consider whether, if the rendition of this man was unavoidable under the treaty, it be right that such a clause should exist a moment longer. If any local mandarin finds that it is in his power by simply writing to the Hong Kong Government, and producing one witness, to obtain the rendition of any native resident in the colony, then, indeed, is no man's life or property safe here. Consider the venality of Orientals, their cupidity, the well-known paternal "squeeze" of the Chinese magistrate, and the temptation afforded by the wealthy native residents of Hong Kong. Why should such a nation, the most treacherous and cruel in its dealings with both foreigners and its own subjects, be the only one with whom we have such an exceptional extradition treaty? With no other nation is there a question of rendition of political criminals; this clause specifies no crimes, nor does it define whether the criminality is to be judged by Chinese or English law. Of course there can be no doubt as to the intention of the framers, but the abuse it has already led to, or it is liable to lead to, calls for imperative redress. I write hurriedly to catch the outward mail, but I hope, Sir, that the incompleteness of my letter will not hinder you from using the powerful influence of your paper to expose such a state of things. It is the almost universal feeling of the inhabitants of Hong Kong that this man has been sacrificed to mandarin rascality, and by bringing the matter to the notice of the British public, you will oblige and render a service to every true ENGLISHMAN.

Hong Kong, May 30, 1865.

WAR OFFICE, AUGUST 9.—The Queen has been graciously pleased to give orders for the appointment of Daniel Brooke Robertson, Esq., Her Majesty's Consul at Canton, to be an ordinary member of the civil division of the third class, or Companions of the Most Honourable Order of the Bath.

CHINESE INCENSE.—A Chinese proverb, attributed to Confucius (or Kong-Foo-Tse), says, "Incense perfumes bad smells, and candles illumine men's hearts." Acting on that principle, they use both lavishly in public and in private, which would lead the hypercritical to conclude that their hearts require a great deal of lighting up, and that the natural odours of their temples and dwellings are none of the sweetest. Joss-sticks (*wan heang*) and tinsel-paper (*yuen paou*) are the forms under which this incense is usually burned, and the consumption is so enormous that, according to Morrison, there are no less than ten thousand makers in the province of Canton alone. Morning and evening three sticks of incense are to be offered.

There was launched on the 11th August from the yard of Messrs. Thomas Royden and Sons, Baffin-street, a very fine steamer named the *Yamuna*. This vessel has been built for Messrs. Reynolds, Mann and Co., of this port, and is intended for the East India trade. The *Yamuna* has been built for the purpose of carrying large cargoes and attaining a high rate of speed. She has been fitted with engines of 180-horse power, by Messrs. J. Jack and Co., and is in every respect complete. Her dimensions are:—Length, 250 feet; breadth, 32 feet; depth of hold, 20 feet 6 inches.

CONSULAR APPOINTMENTS.—Her Majesty was pleased to approve the appointment of Mr. Isaac J. Allen as Consul at Hong Kong for the United States of America.

Mr. JOHN SCARTH, formerly of Messrs. Turner & Co., China, has completed his studies at College, and has been duly ordained to the Established Church, preaching his first sermon at Milton next Gravesend.

THE CIVIL SERVICE.—Colonial Office.—Messrs. A. Lister, and R. D. Starkey have been appointed cadets at Hong Kong.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, August 7.

The Parliamentary session for this year came to an end on the last of the past month. The First Chamber of the States-General passed some Bills, mostly of local interest. The only exception was, that the Commercial Treaty with France was passed unanimously. All the members have now gone to their country residences, or to the watering places, to enjoy the pleasures of the bathing season, and to repose from the fatigues of business. Some of the members of the Cabinet also have gone abroad. Mr. Thorbecke, who, a false rumour said, was to be replaced on his own request by Mr. Jansens, will go to Dresden, and Mr. Fransen van de Putte makes a trip to Switzerland. The *Dagblad* seems to think that our possessions must speedily perish, now that the Minister has left the duties of the department to the Secretary-General. I need not say that it is very difficult to keep up the fire of opposition in the dead season, so that recourse must be taken to all means.

Mr. Floris Adrian van Hall, Minister of State, and the former head of the departments of justice, finances, and foreign affairs, is so dangerously ill, that it is feared he has but a few days to live.

The coffee-trade has energetically protested against the mode of sale adapted at the auction of the Netherlands Trading Company. The company declines to sell on sample, notwithstanding the managers distribute samples; but the company will not be accountable when the quality does not answer to the samples. The protest of the trade is thoroughly justifiable, and the Chambers of Commerce should try to bring this important question to a settlement.

It is rumoured that the Minister of the Colonial Department intends to establish an institution for the education of Indian functionaries at Utrecht. Such institutions exist already at Delft and Leyden.

Some time ago I told you that Mr. Fransen van de Putte proposed to abolish the so-called culture-percentage. I

Digitized by Google

now hear that at the same time the salaries of all the functionaries in India will be considerably increased, because most of them profited by levying this per centage. Some of the injustice committed against the native population will thus be prevented. The Minister has also taken some measures to improve the education of the Indian population; till now it was necessary that the sons of the "upper ten" should come to Holland to begin and finish their education.

The King will arrive at the Hague within a few days, from his trip to Switzerland. The Prince of Orange returned there yesterday from his visit to England.

COMMERCIAL.

Coffee.—The market is inactive. trade being occupied inspecting the parcels which will be offered by the Trading Company, and which consist of 85,400 b. The market, however, remained firm, and in private hands were sold 2,500 b. Padang, ex Maarten van Rossum, at 45¾; and 2,600 b. do., ex do., at 45¾ to 48½ c. Stock of the Trading Company, 426,000 b. Private stock of East Indian, 45,700 b.; West Indian, 14,000 b.; total, including the bags lying on warrants, 542,200 b.; against 492,800 b. on the 31st of July, 1864.

Sugar (Raw).—The market was very inactive. The 3,850 kr. Java, offered in private auction, were sold at 24f. to 33½f., that is, ¾f. to 1f. under sale prices of July. Since were sold 1,016 kr. old No. 12½, and 1,207 kr. Cheribon (very good), No. 11½ at prices that did not transpire. There are sellers now, but buyers decline to operate at the actual quotation.

Tea.—There has been a little more business doing for consumption. The 1,266 chests fine Congou, ex Freya (which were retired in auction on the 5th April, and which were offered on sale), were partly sold at 83 to 85 c. The rest was bought in. Stock, 8,800 ¼-ch.; against 13,300 ch. on the 31st July 1864.

Rice.—The market is very inactive, but firm, in consequence of the London market, and, it is said that there are extensive orders on hand for common qualities. Stock, 14.700 b. against 69,500 b. in 1864.

Cotton.—The demand throughout the last fortnight has been of a limited character. In the prices, however, although they have tended in some degree in favour of the buyer, little or no decided reduction can be quoted, holders for the most part showing undiminished confidence. The attention is fixed upon the auction of the Trading Company, which will be held on the 11th, and which will consist of 1,000 b. Tinnevelly fair, tax 68 c.; 652 b. Japan good fair, tax 70 c.; 700 b. Comptah good middling, tax 60 c.; 144 b. Neth. E. I. fair, tax 43 c.; 127 b. Sauginned fair, tax 43 c.; 83 b. middling fair, tax 40 c.; 21 b. inferior.

Hides.—A good business doing. The sales include: 2,349 p. E. I. ex Joan; 557 do. ex Isaac da Costa; 267 p. ex Cornelia Hendrika; 286 p. Buffalo ex do.; 1,247 p. do. ex Tagal. By inscription were sold 6,826 p. Java Ox, and 624 p. Buffalo, which met with a good demand; the prices are very firm. In consequence, the Trading Company will offer on the 18th, 5,615 p. Buffalo and 638 p. Ox.

Indigo.—A few transactions done privately. About 200 chests arrived last week, which will be brought into the market within a few days. About 100 chests were sold at firm prices.

Tin.—Our market has been steady. Some transactions have taken place at 55¼f. to 55¾f., but, in many instances, holders refused to sell under sale's price, viz., 56f. At this quotation 1,150 flabs were sold. The deliveries during this month are very satisfactory, the greater part for France and Germany. To America only a small lot has yet been shipped, but as, according to latest accounts, the total stock of Banca Tin there amounted to only 1,800 slabs, we may soon expect a good demand from that quarter. The imports of tin during the first five months of this year amounted to 3,155 tons, against 2,743 in 1864.

Cocoa-Nut Oil.—Firm: 28¾f.

Spices.—Waiting for the auction on the 25th, there are no transactions to report. Prices are mostly unaltered. Stock, July 31, 1863: nutmegs, 2,116 casks; mace, 875 casks; cloves, 600 v.; cinnamon, 1,065 fard.; pepper, 5,181 b. July 31, 1864: nutmegs, 1,470 casks; mace, 740 casks; cloves, 70 vn.; cinnamon, 1,378 fard.; pepper, 3,707 b.; July 31, 1865: nutmegs, 3,075 casks; mace, 780 casks; cloves, 1,720 vn.; cinnamon, 1,862 fard.; pepper, 2 329 b.; of which will be offered in the coming sale—nutmegs, 2,910 casks; mace, 740 casks; cloves, 1,720 vn.; cinnamon, 1,612 fard.; pepper, 1,619 b.

Gum Benzoin.—30 ch., ex Isaac de Costa, were sold at secret prices.

Rattans.—The following lots were sold:—3,770 bundles, ex Aldebaran; 1,016 bundles, ex Wilhelmina Johanna.

Tobacco.—(Report of the Rotterdam Broker, N. C. Gregoor).—The imports consisted in 6,237 b., of which 5,223 b. were offered in private sales. Before the auction the opinion was not favourable. The lot mark *Blitar* was somewhat better in quality than that which was offered in a former auction. Notwithstanding the colour was somewhat white and spotted the prices paid were very high. The other inferior qualities were bought at higher rates than the quotation of the day. The superior lot of the auction H en A (*Blitar*) was sold at a colossal price. The prices paid at the auction were for 793 b. Nauta Blitar, 51½ c. in average; 2,673 b. Blitar, at 58⅛ in average; 483 b. LBP 15⅜ c.; 227 SS 14½ c.; 119 S. 31⅛ c.; 399 b. BB 24½ c.; 26 b. M 58 c., 344 b. G B 62½ c., 259 b. H and A. Blitar 94⅜, all in average. About Manila tobacco nothing is to report. The actual prices are too high for speculation, so that no important transactions took place since the large parcel 2a was sold. The stock cannot be mentioned accurately, but it is supposed to amount to 2.500 b. Of Maryland several parcels were sold, of which much was of very inferior quality. The prices which were paid for this rebus did not transpire. Ordinary Havana tobacco with much transactions, in consequence of the very low prices. The quality, however, is not much better than bad.

Manila Segars.—Of 2a Habanos, 1864, 180,000 were offered in auction; in consequence of the high prices only 30,000 were sold at ,33 to f.34.50.

Arack.—The market is steady, and prices firm. Only 70 casks ex Bilderdyk were sold at 130f.

Money.—The discount is steady, with full support to prices. Nothing under the Bank rate (3 per cent. for bills, and 3½ per cent. for acceptances) and the scarcity of bills still complained of in some quarters. The supply of money is still good. Very little business doing in stocks, either Dutch or foreign. Dutch, 2½ per cents., 62 3-16th; 3 per cents., 72¾; 4 per cents., 96⅝; Credit and Deposit Bank, 100; Trading Company, 148½; Shares Dutch Rhenish Railway, 338; Central Railway, 36; Dutch Railway, 133; Crystal Palace of Amsterdam, 52; East Indian Railway, 91½; Netherlands Bank, 240; Netherlands India Bank, 82. 'Changes on London: 3 mo., f.11.80; 2 mo., f.11.84; short, f.11.92. Paris: 3 mo., f.46 95; 2 mo., f.47.05.; short, f.47.25. Hambro': 3 mo., 35f.; 2 mo., f.35.11: short, f.35.35; Bremen: 3 mo., 172f.; short, f.173 50. St. Petersbnrg: 3 mo., 152f.; short, ——; Italy: 2 mo., f.46.50.

Principal Exports from the Dutch Harbours to the East Indies during the month of July:—Beer, 153.807 litres; mineral water, 27.650 stone bottles; Geneva, 41,694 litres; foreign spirits, 7,519 litres; wine, 64,555 litres; butter, 28,122 lb.; confectionery (cakes, &c.), 16,436 lb.; flour, 16,000 lb.; meat, 60,873 lb.; cheese, 2,118 lb.; vinegar, 10,038 litres; segars, 9,000 ps.; books, 7.470f.; chemicals, 2.200f.; mercery, 25,550f.; cotton (manuf.), 1,590,234 yards; linseed-oil, 1,500 lb.; petroleum, 9,500 lb.; coal-tar, 69,730 lb.; colours, 7,000f.; coals, 1,457,835 lb.; capsules for bottles, 150.000 ps.; zinc, 6,000 lb.; furniture, 17,000f.; copper (leaves), 6.033 lb.; paper, 17,500f.; stearine lights, 2.175 lb.; glasswork, 3.414f.; earthenware, 61,140f.; ironwork, 123,429 lb.; charcoal, 14,800 lb.

Shipping.—Arrivals.—July 23, at Brouwershaven, from Banjoewangie, Catherina Maria; at Texel, from do., L. A. Bang; 24, at Brouwershaven, from Banjoewangie, Cornelia Hendrika; 25. at Brouwershaven from Banjoewangie, Wilhelmina Johanna; at Zierikzee, from Banjoewangie, Luconia; 26, at Brouwershaven, from Banjoewangie, Hendrina; 28, at Texel, from Banjoewangie, Goede Verwachting; 29, at Brouwershaven, from Banjoewangie, d'Elmina; at Texel, from do., Goede Verwachting, Jan van Schaffelaar; 30, at Texel, from Batavia, Johanna Elizabeth; August 5. at Brouwershaven, from Banjoewangie, Medea; from Padang, Argo; at Texel, from Batavia, Anna Digna; from Sourabaya, Bellatrix; from Singapore, Bernard and Agnes; at Texel, from Batavia, Java Packet.

Departures.—July 22, from Texel for Batavia, Tjelingsie, Helena and Anna; Telanak, for Japan, Bantam; from Veere for Batavia, Zeepaard; 24, from Texel for Batavia, Constance; 25, from Brouwershaven for Batavia, Constantia; from Texel for Batavia, Jacob Roggeveen; from Samarang, Gerberdina Wilhelmina; 26, from Texel for Batavia, Azia; 28, from Texel for Batavia, Louise; Aug. 6, from Brouwershaven for Sourabaya; Boni, from Texel for Padang, Helena; for Japan, Herman Maria Elizabeth.

Loading at Rotterdam.—For Batavia, Cornelis Wernard Eduard; for Batavia and Samarang, Robertus Hendrikus, Suzanna Johanna; for Batavia and Sourabaya, Ary Scheffer; for Batavia, d'Elmina, Eva Johanna, Ouderkerk van den Amstel, Jannetje; for Samarang, Wilhelmina Johanna; for Kanagawa and Nagasaki, Maria; for Manila, Loyalaa—At Amsterdam: For Kanagawa and Nagasaki, Gloria; for Kanagaw and Decima, China; for Padang, Excelsior, Anna and Jeannette; for Samarang, Mathilde, Padang Packet; for Sourabaya and Macassar Henderika; for Sourabaya, Presto.

Freights.—Unaltered.

PASSENGERS INWARD.

From Java.—Per Maarten van Rossem, Messrs. J. van Vollenhoven and family, J. C. van Schuylenburch and family, Kuyhenbrouwer and family, Mrs. Pahn, Captain Albrecht and daughter, Mr. L. Gerrebrands; per Johanna Elizabeth, Messrs. Beyerinch and family, Coorenengel and family, Stoltman and family, T. Becker; per Medea, Messrs. Labaaren and family, Varkevisser, Stroo Westermans and family; Stompenausel and family, Kaulbach, Gade and family, Mrs. Deinse and family; Misses Hein, Kappen, and Seelig; per Argo, Messrs. van Ghert and family, Grashuis and Heyman, Mitteldorffes and Spelter.

PASSENGERS OUTWARD.

For Java.—Per Bazoekei, Messrs. J. C. P. Evers and family, J. C. Schultz and family, Mrs. Prehn and family, Mr. J. van Deun and family, Miss J. Block; per Helena and Anna, Messrs. J. Huet and L. de Beer; per Telanak, Mr. W. Wetting; per Constance, Messrs. J. van Hoewyk and J. N. Bak; per Jacob Roggeveen, Messrs. O. H. Musch and family, J. Cuotterius and family, V. L. Reuter and family, J. Brassinga and family, J. Verstaeg, and Pahn.; per Azia, Messrs Steenhuys, Banketbakker, de Boudt, A. R. H. Varkenvisser, and Mrs. van den Burg; per Louise, Messrs. Holz and family, de Haan and family, de Seyffe, and Rant, Mrs. Tylde Grys Sybrandi, Mrs. de Grys-Kraetser, Misses J. Schuymer, J. C. Dammers, J. E. Dammers; per Anna Digna, Mr. J. B. Overvest and family, Messrs. L. Schnerthers, F. C. van Nes, M. H. Vis, and 125 soldiers.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

August 8.

Rather earlier than usual, the Statistical Department of the Board of Trade have just issued their annual tables of the commerce and navigation of this port for 1864. Perfect as they are in all that relates to shipping, to imports, to the fluctuations of the exchanges, and many other interesting statistical subjects, they are still liable, I regret to add, to the objections I mentioned last year on their appearance, viz., that not a word is said, nor a figure given, of perhaps the most important part of the whole trade,—I mean the exports.

As might have been expected from the unsettled state of political affairs in this immediate neighbourhood last year, and

Digitized by Google

the danger of capture from the Danish ships of war, cruising off the mouth of the Elbe, if not actually blockading it, there has been a considerable falling off in the total number of vessels that arrived in 1864 (5,012 against 5,543 in 1863), though the deficiency in the tonnage was comparatively not so large (465,909 lasts in 1864 against 481,216 in 1863), in consequence of the ships that arrived being of a larger class and greater tonnage than in the preceding year, And yet, anomalous as it may appear, there is a not inconsiderable increase in the general amount of imports, both with respect to weight and value ; for whilst they were in 1863 only 41,516,011 centners in weight, they rose in 1864 to 43,858,294, showing an increase of about 2,342,000 centners or 137,000 tons. So also with the value of the imports, which in 1863 were 738,665,510 marks banco, whilst last year they had risen to 773,016,770 m.b., showing an increase of 34,351,260 m.b., or about £2,700,000. In 1863 the increase in the value of the imports over that of the preceding year was nearly 100 millions of marks banco, or £8,000,000 ; so that, though the increase is only one-third of what it was in 1863—which was the most prosperous year ever known here—still it is satisfactory to perceive that notwithstanding all the drawbacks to an active trade from the war of last year, and the uncertainty attending the future state of things, which naturally must exercise a depressing influence on the spirit of commercial enterprise, more especially in connection with the more distant parts of the globe,—it is satisfactory, I repeat, to observe that on the whole there is no real falling off in the imports, but rather an increase of nearly three millions sterling in the value.

From the Far East came 27 vessels (against 37 in 1863), of 5,050 lasts or 15,150 tons (against 20,367 tons in 1863); of which 11 were from China, 2 from the Philippine Islands, 1 from Netherlands India, and the rest from the British East Indies.

On the other hand, in the Departures we find (p. 86) 8 vessels for Australia, 1 to Apia (Navigators' Islands), 22 to China, 1 to Manila, 1 to Macassar, and 5 to British India ; making together 39 vessels, against 84 in 1863.

In my next letter I shall give your readers some particulars of the special trade of this port with the Far East.

The St. Petersburg *Northern Post* contains the following :—"Some curious orders been received in Finland from China, among which twenty casks of Finlandish essence of punch, which have been already forwarded to Hong Kong, as well as a considerable quantity of chemical matches without phosphorus or sulphur. A Finnish captain of the name of Lahuss was the first to introduce these articles to the Chinese, having taken them with him on his last voyage from Hamburg to China, and they appear to have found favour in the eyes of natives."

With regard to the first above-mentioned articles, I may here mention that the "essence of punch," confessedly bought at Hamburg by Capt. Lahuss, is a very common beverage here for local consumption, and is exported also in considerable quantities. It is composed of all the ingredients of punch *minus* the water, which can be added either hot or cold to suit the taste of the consumer, or used without any water at all, in which case it forms a very pleasant *liqueur* or cordial. There are four or five manufacturers of it in this city, where it is made wholesale, and the purchaser can select it made from rum, cognac, or arrac, according to his taste. It is difficult to understand why Finland should receive the order above stated, where none of the ingredients of punch are produced, but rather imported chiefly from this market, and subject on importation there to a high rate of duty. It is true that Hamburg cannot boast either of producing any of the ingredients of punch in the raw state, but enjoys many facilities for purchasing them in a large market like this at the cheapest rate and without any import duty, clarifying and improving them, mixing the compound without any inconvenient and onerous supervision by excise officers, and exporting the ready made article to all parts of the world. Here on the spot this essence of punch is consumed in large quantities,, the retail price being only a mark currency, or 1s. 2d. sterling per quart bottle, and of course much cheaper wholesale. On the label of the bottle the direction for using it says—"Mix one part of the essence with twice as much water ;" so that in fact for one shilling and twopence one can make three quarts of punch.

The annual summer fair of Nijni Novgorod was officially inaugurated on the 27th of July with the usual ceremonies. After the celebration of High Mass in the principal church, the flags were hoisted, cannon fired, and the fair was formally declared opened. Business, however, had not yet commenced, as the influx both of buyers and sellers was still very limited, though expected to increase during the succeeding week.

COMMERCIAL.

Coffee.—This market has been very lively, and higher prices are freely paid. The sales comprised 15,000 bags of different sorts, and 350,000 lbs. of Porto Rico.

Sugar.—There is a steady demand for the raw article at previous quotations. Of Refined, 13,000 loaves found purchasers at full prices.

Rice.—Sales to a moderate extent continue to be made, and the market is firm. A cargo of 6,200 bags of new Necransie, per Carlotta, from Akyab, just to hand, realised full prices.

Spices.—Dull of sale, but without any alteration to notice in values.

Spelter.—The demand has subsided, and there is a momentary lull. Prices are rather lower, but not sufficiently so to attract speculative purchasers, whilst the orders on hand appear to have been executed. Silesian in slabs is quoted 14¾ marks banco, both for delivery and on the spot. At this figure there are sellers.

Shipping.—Arrived.—August 3, Carlotta, from Akyab.

Sailed.—Aug. 1, Lucknow, to Singapore.

Loading.—At Hamburg: Frisch, for Singapore; Carry and Jane, for Hong Kong.

Monetary and Commercial.

Owing to the advance in the China exchanges, the remittances of specie by the steamer *Nyanza*, which left Southampton on the 4th instant, show a considerable increase, the total being £120,338. The particulars are as follows:—Madras, gold, £1,018, and silver, £10,000 ; Penang, silver, £5,000 ; Singapore, silver, £21,500 ; Hong Kong, silver, £23,350 ; and Shanghai, silver, £59,470.

The biddings for Government bills on India took place at the Bank of England on the 9th inst The proportions allotted were—to Calcutta, £163,500 ; to Madras, £2,000 ; and to Bombay, £100,000. The minimum prices were, as before, 1s. 10½d. on Calcutta and Madras, and 1s. 10¾d. on Bombay. Tenders on Calcutta and Madras at 1s. 11⅛d. will receive about 75 per cent., and on Bombay at 1s. 11⅛d. about 70 per cent.

The first half-yearly meeting of the Eastern Assam Company was held on Monday. The directors' report was adopted, and a dividend of 10 per cent. per annum, less income-tax, was declared.

A prospectus has been issued of the London Jute Works, with a capital of £200,000, half to be first subscribed in shares of £10. The object is to spin and weave jute by steam power in London, an alleged advantage of 13 per cent. existing in favour of London against Dundee in the saving of expenses in the carriage of raw material, insurances, &c.

The amount of bills on India for which tenders will be received on the 16th instant at the Bank of England is £250,000, of which not more than £100,000 will be drawn on Bombay. The meeting of the London and County Bank took place on the 3rd, when the directors' report was unanimously adopted. The net profits for the half-year ended 30th June last were stated at £106,821. A dividend and bonus, equal to 15 per cent. for the half-year, were declared, and £13,660 carried forward to new profit and loss account.

Private telegrams have been received bringing dates from Hong Kong to the 12th July, Shanghai 4th, and Foo-chow-foo 3rd. The export of tea for the last month was stated at 14,000,000 lbs. ; Exchange in Hong Kong, 4s. 5½d.

Atlantic Telegraph 8 per cent. preference shares fell to 2 discount on the cessation of signals. When the telegram arrived from Valentia announcing loss of insulation 1,250 miles from land, a recovery to 1½ dis. took place. At Lloyd's the nominal quotation for insurances on the cable was fifty to sixty guineas per cent., but no transactions took place of any importance. Latest quotation for shares is 2 discount.

The report of the European Bank, presented at the meeting on the 7th instant, states the net profit (including a a balance of £2,272 brought forward) at £29,685, and recommends that £16,380 be applied for the payment of an interim dividend, being at the rate of five per cent. per annum, free of income-tax ; that £3,200 be written off premises, purchase, and preliminary expense accounts ; and that the balance, £10,105, be carried to profit and loss new account, to be dealt with at the close of the financial year, when the premium accruing from the transfer of the business of the late London, Birmingham, and South Staffordshire Bank will also be available. It is also mentioned that the directors continue to pursue the policy of seeking a sound business, and look with much satisfaction to the steady progress made during the past six months.

ARTICLES OF IMPORT.

Tea.—The Public Sales commencing on the 1st instant were finished on the 3rd, the quantity offered being 22 565 packages, out of which 17,500 were sold, nearly the whole without reserve. At a small sale of Indian Teas 633 packages were offered, and 555 sold; fine kinds at full prices, but common grades at easier rates. The stock in the United Kingdom on the 31st ultimo was estimated at at 94,300,000 lbs., against 95,500,000 lbs. last year, and the quantity afloat at 14,202,270 lbs., against 13,297,300 lbs. Business has been on a very limited scale, the only considerable transactions having consisted in purchases of Moyune Teas and Uncoloured Japan kinds for shipment to New York and Montreal. The telegrams lately received from China, of the large trade doing at Hankow and Foochow, and the enormous prices paid have caused much surprise and uneasiness, the general impression being that heavy losses must result. For common Congou prices rule about the same as last month, with a very limited demand. Of medium Kaisow there have been a few sales at 1s. 10d., and for Amoy kinds, fair to good, Souchong flavour, 11d. to 11½d. per lb. The newly imported imitation Kaisows, made from Tayshan leaf, are still saleable at full prices. For finest Souchong there is some demand at 2s. 2d. to 2s. 3d. per lb., and a few sales have been made of common to medium Oolong at 1s. 1d. to 1s. 6d., showing a slight decline. In Scented Teas both Orange Pekoe and Caper are still very scarce, and for the former prices have advanced slightly. In Greens, owing probably to the purchases above mentioned for exportation, all classes have maintained their value except Young Hyson. Present quotations are:—Young Hyson, good common to fair, or No. 4, 1s. to 1s. 3d. per lb.; good to medium, or No. 3, 1s. 4d. to 1s. 8d. per lb.; fine, or No. 2, 1s. 10d. to 2s. 2d. per lb.: finest, or No. 1, which is scarce, 2s. 4d. to 2s. 6d. per lb.; Gunpowder, good common to fair, 1s. 5d. to 1s. 8d. per lb.; good to medium, 1s. 10d. to 2s. 4d. per lb.; fine, 2s. 6d. to 2s. 8d. per lb.; finest, 2s. 9d. to 3s. 2d. per lb. There have been considerable sales in Japan uncoloured for shipment to Canada at an average advance of 1½d. per lb. Several chops of coloured have sold well, showing 1d. per lb. advance for the better kinds on previous sales.

Cotton.—The demand was languid in the London market throughout the week ending the 4th, but the firmness of holders prevented any general decline in prices. 120 bales of China went at 10¼d. to 10½d. for middling; and 129 bales Japan, at 12d. to 12½d. for fair to fully fair. On the 5th, 180 bales Japan went at 12¼d. to 12½d. for fair to fully fair. The small business done this present week is without change in prices. The Liverpool report of the week ending the 28th July, states China to have been in fair request, but the market being more freely supplied a slight reduction took place, except in the better qualities, which were scarce and dearer. During the week ending August 4, China and Japan were in moderate demand at about ¼d. to ⅛d. per lb. below former rates. The stock of China and Japan in London on the 3rd August was 5,014 bales, against 30 612 at the same time last year. The total stock in London was 61,389 bales, against 81,085 in 1864. The cotton afloat to Europe on the 4th August was, of China, 9,292 bales, against 65,010 last year; and of Japan, 294 bales, against 7,986 last year. The total stock in Liverpool on the 4th August was 347,000 bales, against 265,980 in 1864.

Sugar.—During the first fortnight of July the market maintained a firm appearance, and notwithstanding an occasional abatement of demand, the transactions effected were at full to rather higher rates. Afterwards, however, the heavy landings and increasing stock at this port, caused buyers to operate with greater caution, and latterly a more general indisposition to purchase has been shown, and the moderate amount of business done has been at easier prices, and though compared with the 10th ultimo, present quotations on the average exhibit little alteration, the market at the close has a dull and drooping tendency. The new act for the amendment of the drawback allowed on refined, as agreed to by the European Convention, took effect on the 1st instant, the probable influence of which on the future course of this branch of our trade is looked forward to with some interest. The limited quantities of Penang in public sale, have on the whole met only a moderate demand, and to support the previous occurency, part has been withdrawn. Clayed Manila has been comparatively neglected, the only retail purchases have been made at the previous quotation of 30s.; Unclayed, however, has been dealt in rather extensively at higher rates; and a recent arrival of 700 baskets Java from Holland, has been taken at full prices. The sales of the month are as under:—210 tons Penang, fine brown to low yellow 30s. to 31s. 6d., low middling to good middling yellow 32s. to 33s. 6d. 300 tons Manila, current quality clayed at 30s. fine yellow grocery 36s, to 39s. 6d. 350 tons Unclayed from 27s. to 28s. to 28s. 6d. 160 tons Java, low yellow to fine strong grey (part 11s. 8d. duty) 33s. 6d. to 38s. 6d., and 20 tons common brown Siam sort, at 25s. 6d. to 26s. 6d.

Coffee.—A plentiful and varied assortment of Colonial has been placed on offer during the postal month, so that although the demand has been sufficient to take off the bulk of the extensive parcels of Ceylon in auction, some depression has occasionally been apparent, and prices have gradually receded fully 1s. per cwt., at which, some increase of dulness has prevailed towards the close. In Mocha, only a limited business has been done on rather easier terms. The following comprises the total sales of the month, viz., of Ceylon, 5,600 casks, 3,500 barrels and bags Plantation, the recent prices being, fine ordinary to low middling, 78s. to 83s., middling to good middling, 83s. 6d. to 87s., fine, 88s. to 90s.; and 900 casks, 9,000 bags Native, common to good ordinary mixed, 65s. to 67s., good to real good ordinary, 67s. 6d. to 68s. 6d., fine ordinary, 69s. to 70s 6d.: 510 packages Mocha, fair to good long berry, 91s. to 94s, good clean garbled, 99s.; Singapore, fair Bonthyne, 72s. 6d. to 73s. 6d., common to good Campar, 60s. to 64s. 6d., fair Siam, 66s. 6d. to 68s., and Bally, 57s. 6d. to 58s.; fine ordinrry Java, 73s. to 75s., mixed Padang, 62s. to 62s. 6d.

Rum.—Penang must be quoted at 1s. 6½d., which is an advance on the former rates.

Rice.—During the postal month, the market has at no time been active, but a fair inquiry has nearly always existed, and though the increased firmness of holders lately has checked freer purchases, the total transactions are 90,000 bags, and prices mostly show an advance of 3d. per cwt. on those of the 10th ult., viz., middling to good old white Bengal 13s. 9d. to 14s. 9d., fair to good bold new 15s. to 16s., a few ordinary and middling cargo 8s. 6d. to 9s. 6d.; also Nakrenzie, low middling to fair 9s. 4½d. to 10s., and inferior Rangoon and Bassein 9s. to 9s. 7½d. Floating cargoes have been more inquired for, and two of Nakrenzie, 1,650 tons, have been sold at 10s. 6d., for the Continent, likewise one of 240 tons Bassein at 10s. 10½d.

Cardamoms.—Firm, with limited business privately; 5 cases Malabar at auction retired; and of 20 bales Ceylon three-fourths sold at 3s. 4d. per lb., for fair, and 2s. 4d. to 2s. 8d. ordinary lean.

Camphor.—Very quiet and drooping: small sales of China at 105s. per cwt.; 91 chests at auction retired. Small sales are again reported of Japan for arrival at £5. 5s. per cwt., and further quantities offering.

Cassia Lignea.—Steady: 996 cases at auction, all retired. Moderate business privately upon fully former terms. Buds: Nothing of any consequence doing.

Cinnamon (Ceylon).—At the recent quarterly sales good qualities were 2d. to 5d. per lb. dearer than at the last quarterlies; common 1d. to 3d.; demand good for all descriptions: and the whole of 1,494 bales found buyers at and after the auctions; 379 bales 1st sort at 1s. 7d. to 2s. 9d. per lb., with superior at 2s. 10d. to 3s.; 710 bales 2nd 1s. 5d. to 2s. 4d.; 318 bales 3rd 1s. 4d. to 1s. 10d.; 87 bales 4th and Jungle, 1s. to 1s. 5d.

Cocoa-Nut Oil.—This market has been very firm, but quiet, with limited business both in Cochin and Ceylon. 258 casks Cochin, and 27 casks Sydney at auction.

Drugs.—Cubebs, Dragon's Blood, and Galangal Root: Nothing doing in either; arrivals of the latter. Rhubarb: A small recent importation, 35 cases, offered at auction, and sold at 1s. 8d. to 3s. 2d. per lb. for low and ordinary, being very full value; various small lots, 26 cases, retired.

Gums.—Benjamin: Steady: of 10 cases Siam at auction only one sold at £21. 5s. per cwt. for 3rd quality; and of 32 cases Sumatra, half sold at £11. 10s. for false packed 2nd quality. Damar: Firm, but quiet; 55 cases at auction retired. Gamboge; No auctions held: limited business done privately upon former terms.

Gutta Percha.—Very quiet, without change in value.

Hemp (Manila).—Firm: 1,300 bales auction sold at £30. 10s. to £31. 15s. per ton, for fair to good current quality, and about the same quantity sold privately at fully equal rates.

Hides.—The quantity of East India Hides offered at sale on the 3rd was not large, and with a fair demand for consumption and a moderate one for export, the greater part found buyers at prices showing little change from those of last sales. 559 Singapore Buffalo Hides offered—477 sold at 4½d. to 5¾d. per lb.; 1,046 Singapore Cow Hides offered and sold—Light 5¾d. per lb.; Heavy, 5¼d. to 5¾d. per lb.; 1,516 Java Buffalo offered, none sold.

Horns (Deer).—Remain firm; 9 tons Calcutta, 6 tons Singapore, and 2 tons Ceylon, sold at auction at 43s. to 56s. 6d. per cwt. for 2¼ to 1¾ lb. average.

India-Rubber.—No auctions; inquiry; little desirable offering.

Japan Wax.—Good and fine qualities firm; lower qualities cheaper. Of 1,114 boxes at auction, one-third sold at 69s. 6d. to 70s. per cwt. for fine saucers; 64s. 6d. discoloured; 51s. to 53s. 6d. ordinary mixed, and 50s. to 51s. discoloured.

Pepper.—Black: Is quiet, and latterly the turn easier. Of 5,057 bags Singapore at auction, one-third sold at 3¼d. to 3⅜d. per lb.; and of 1,717 bags Penang, one-fourth sold at 3d. White: Dull, and nothing of any consequence doing.

Digitized by Google

SPICES.—Cloves: Very quiet; not any business at auction, and very little privately. Mace: Steady: 45 cases Penang and 4 cases Singapore at auction sold at 1s. 8d. to 1s. 10d. per lb. for middling palish, and 8d. to 1s. 5d. for low to good reddish. Nutmegs: Firm, but nothing of consequence doing.

SAGO.—Steady; 500 boxes at auction sold at 18s. 6d. to 20s. 6d. per cwt. for middling to fine small. Flour: Rather cheaper; of 1,397 bags brought to auction, one-third sold at 14s. to 14s. 6d. per cwt. for middling to good.

SHELLAC.—We quote Orange 2s. 6d. to 5s. per cwt. cheaper; Garnet and Liver 5s., and Button 15s. to 20s. Of 1,490 packages at auction, about half sold, Orange at 73s. to 95s., Garnet 75s. to 76s., Liver 58s. 6d. to 76s., Native 67s. 6d. to 68s., Button 41s. to 75s., Block and blocky 40s. to 82s.

TERRA JAPONICA.—Cutch, Pegue; Very quiet; of 1,574 bags and 28 tons loose, at auction, only one-fifth sold at 20s. per cwt. for middling mixed. Gambier: Remains very flat, and is lower; of 1,421 bales at auction only a few damaged sold at low rates: limited business privately at 20s. 6d. to 21s. per cwt for middling to fair..

TIN.—This metal has been quiet, with moderate business in Straits at £90 to £90. 10s. per ton cash; a few tons of Banca have been sold at £94. 10s.

MISCELLANEOUS.—Galls: Of 80 pockets Bombay at auction, half sold at £8. 10s. per cwt., being again 10s. per cwt. cheaper; 390 cases China all retired, since selling privately, slowly, at 62s. 6d. 219 boxes Japan sold at 53s. to 56s. fair to good, being firm. Musk: Nothing of consequence doing in pod; only 3 tins grain sold at auction at 40s. per oz. for middling. Rattans: Steady, and 11,631 bundles Singapore sold at auction at 4s. 1d. to 5s. 11d. per 100. Sapanwood: Very firm, with little offering; 14 tons Manila retired. Mother-o'-Pearl Shells: Firm, but nothing doing. Soy: Continues very quiet, with retail sales only within the quotation of 3s. 6d. to 3s. 9d. per gallon. Star Anniseeds: Continue very scarce, and are much wanted. Sticklac, Siam: Very flat; of 516 boxes at auction, a few sold at 32s. to 32s. 6d. per cwt. for good block. Vermilion: Very scarce, and 3s. realised in retail.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 15s. to £8; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10. 5s.; sheets, single, £10. 10s. to £11; Staffordshire bars, £8. 15s. so £9; rails, £7 to £7. 5s.

STEEL.—Swedish keg, £15.

COPPER.—Sheet and Sheathing, £91 per ton; yellow metal, 7¼d. to 8d. per lb.

TIN.—94s. for block; 95s. for bar. Tin plates, best charcoal, I.C. 28s. 6d. to 30s.

LEAD, &c.—English pig, £19 to £19. 5s.; W.B., £20. 15s; shot patent, £22. 10s.; sheet, £20; spelter, £22. to £22. 10s.; zinc, English sheet, £27. 10s. to £28; quicksilver, £8.

The following is from the circular of Messrs. French and Smith:—We have little improvement to report in the metal market for the past month. Iron: For Staffordshire and Welsh there was a fair demand, but no alteration in price. In Scotch Pig only a small business; the present price is 54s. 9d. cash for g.m.b. Copper continues inactive, particularly in rolled and hammered descriptions. The last sale of copper ore at Swansea was at 15s. 5½d. per unit. Tin: Notwithstanding the reduction declared in price of English, on the 5th ult., the demand continued very limited. In Straits the quotation is now 90s. 6d. for cash—about 2s. per cwt. cheaper than at this period last month. In Banca Tin there was very little business here, and in Holland the quotation continues at 56 guilders (the sale price). Tin Plates: In good demand, the price firm, and higher rates were obtained for some brands. The shipments last month were 75,000 boxes, against 75,000 in July, 1864. Lead: There was more demand for shipment, with only a slight improvement in price. Spelter: Receded about 5s. per ton; the stock in London on the 31st July was 7,503 tons, against 13,121 tons the same period in 1864. Quicksilver: Sales have been reported at £7. 18s. for arrival; the price on the spot continues firm at £8.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

CASUALTIES.

The Malabar, Chambon, from Colombo for Belle Isle, which put into Mauritius May 15, leaky, has been condemned and sold.

HARWICH, AUG. 11.—The Luchow (brig.), Ulrichs, of and from Hamburg for Singapore, with a general cargo, got aground off the Shipwash, and was assisted off without apparent damage.

MISCELLANEOUS.

At Reunion.—June 25, from Sumatra, Mima Vidal, Roura.

The Admiralty have invited tenders for the conveyance of 197 tons of Naval stores from the river Thames to Hong Kong.

NOTICE TO MARINERS.—SHANGHAI, JUNE 5, 1865.—Sir,—Will you kindly insert the position of a shoal seen by me in the ship *Kelso*, on her passage from Sydney for Shanghai. On the morning of April 20, on looking over the side at daybreak observed the water discoloured, but could see the bottom quite plain. Took several casts of the lead, getting bottom from 25 to 13 fathoms, fine coral sand with red specks, small shells, and seaweed, a strong N.E. swell on at the time. Could see no broken water from the deck. At 8 A.M. ship clear of the shoal, heading N.N.W., wind N.E., going from three to four knots. At noon the ship's position, lat. 23, 54 S., lon. 159, 20 E., by observations I place the north end of the shoal in lat. 24, 12 S., lon. 159, 27 E. We sailed over it in a N.N.W. direction for two hours, the bottom was distinctly seen the greater part of the time, with large stones covered with seaweed. As this shoal is not laid down in any of my charts, and being in the fairway track to China and India from the Colonies, and as there may be some shoal patches on it, by giving this publicity for the guidance of navigators, you will greatly oblige, yours repsectfully,—Robert Black, Master of the ship *Kelso*, of North Shields.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

THE UNDERSIGNED LICENSED PILOTS FOR THE PORT OF SHANGHAI, CHINA,

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

TOZER'S BOOTS AND SHOES,

For Ladies, Gentlemen, and Children, are FIRST CLASS in QUALITY and STYLE, and most ECONOMICAL IN PRICE.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists, Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co's Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty, and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S PILLS AND OINTMENT

Lumbago, Derangement of the Kidneys, Rheumatism Tic-Doloreux.—All excruciating pains of the muscles and nerves are relieved with astonishing rapidity by the use of this extraordinary Ointment. The affected parts previously fomented with warm water have only to be rubbed briskly with this soothing unguent to obtain instant cure. Whilst the Ointment cures the local ailment, the Pills remove the constitutional disturbance, and regulate every impaired function of every organ throughout the body. The cure is neither temporary nor superficial, but permanent and complete, and the diseases rarely recur, so perfect has been the purification performed by these searching yet harmless preparations.

List of Passengers.

PASSENGERS INWARD.

By this mail, per P. and O. Company's steamer Nyanza, arrived at Marseilles 26th inst.—From Yokohama: Six Japanese gentlemen and four servants. From Shanghai: Messrs Soul and Carnegie. From Hong Kong: Messrs. Phillips, Schmidt, and Whitlon, Mrs. Harper and European male servant, and one 2nd class passenger. From Singapore: Don Corralis and two 2nd class passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Ceylon, from Southampton, Aug. 20.—To Shanghai: Mr. H. P. M'Clatchie, Mr. M. O'Brien. To Hong Kong: Messrs. J. P. Courtney, L. Lucas, R. Purvis, J. B. Inglis, H. H. Jollye, Kelland, and Winch, Mrs. Tomlin, Mrs. Emilius Hughes, Mr. Rennie, Mr. and Mrs. Manning, and two 2nd-class passengers. To Penang: Miss Hindmarsh. To Singapore: Three 2nd-class passengers. To Ceylon: Mr. F. M. Evans, Mr. John Wodehouse, Mr. J. W. Watson, Mrs. Watson, Mr. Gibson, and three 2nd-class passengers. To Calcutta: Mrs. Livermore, infant, son and daughter, Mrs. and Miss Kinleside, Lieut.-Col. and Mrs. Woodcock, Miss E. Pearson, Messrs. E. Allen and Martin, Capt and Mrs. Roberts and infant, Mr. C. Gordon, Lieut. E. S. Cooke, Mr. Herring, Mrs. Loder, Staff Surgeons A. G. Young and Hughes, Messrs. W. C. Baker and W. H. Smith, junr., Mr. and Mrs. MacMullen, Mr. Rutledge, Surgeon and Mrs. Mulock, and female servant, Staff Assistant-Surgeons Bourke, W. Blake, Riordan, E. P. Haward, F. Dickinson, S. Doak, G. B. West, J. B. Ryan, C. Hutchinson, E. Eustace, J. Peatfield, C. Backhouse, E. Ward, and C. H. Brown, Capt. Everett, Mrs. Mitchell and two infants, fifteen 2nd class passengers, and one child. To Madras: Mr. and Mrs. Peacock, Messrs. F. J. Budd, and J. C. Gillespie, Dr. G. Buie, Messrs. J. B. Kelly, S. Flood, P. Smith, J. Maturin, and five 2nd-class passengers. To Suez: Five 2nd-class passengers. To Alexandria: Messrs. C. T. Nicholson and G. Naggiar, Mr. and Mrs. Naggiar, infant and child, Mr. Robson, and two 2nd-class passengers. To Malta: Assist.-Surgeons Nathan and Ashford, Ensigns Atkins, Downes, Crommelin, and Jamieson, Brevet Major Morris, and servant, and three 2nd-class passengers. To Gibraltar: Capt. Starke, and one 2nd-class passenger.

From Marseilles, Aug. 28.—To Hong Kong: Mr. John Dent, and European male servant. To Singapore: Mr. and Mrs. M'Lean, Mr. M. Alloin. To Calcutta: Mr. and Mrs. C. Grome, Lieut. J. Johnston, Mr. C. C. Anderson, Lieut. Spalding, Mr. R. Bridgett. To Madras: Mr. and Mrs. W. Allardyce, Lieut. R. T. Maitland, Col. Dickson, Capt. Whigham, Miss Read, Lieut. Churchward, Mr. de Souza. To Ceylon: Capt. F. C. Woods. From Suez.—To Calcutta: Mr. Granville.

Per P. and O. steamer Ripon, from Southampton, Sept. 4.—To Hong Kong: Mr. W. Foster, Mr. W. Gaskell, Mrs. Andrews and two infants. To Shanghai: Mr. and Mrs. G. H. Fitzroy, Mrs. Black and child, Mr. Bloor, Mrs. G. Stanford and infant, Miss Fox. To Singapore: Mr. H. Alabaster, Mrs. Alabaster. To Ceylon: Messrs. J. Abbott and Anstruther. From Marseilles, Sept. 12.—To Hong Kong: Rev. J. S. and Mrs. Burdon, Mr. and Mrs. Coxon. To Shanghai: Mr. and Mrs. Townend, Mr. R. J. Forrest. To Singapore: Mr. Vander Leemo and three ladies. To Ceylon: Mr. J. F. Capelle, Mrs. Ballantyne. To Galle: Mr. W. Hudson. From Suez.—To Shanghai: Sir Rutherford and Lady Alcock and Miss Alcock, Messrs. Hancock and Robason.

Per P. and O. steamer, from Marseilles, Sept. 20.—To Shanghai via Bombay: Mr. Tootal.

Per P. and O. steamer, from Southampton, Sept. 20.—To Shanghai: Mr. Henderson, Mrs. John. To Hong Kong: Mrs. Ivor Murray, Mr. Noble, Mr. R. Starkey, Captain Barry. To Ceylon: Mrs. Claughton, Rev. A. and Mrs. Young, Mrs. Ross, Mr. W. Prentice. From Marseilles, Sept. 28.—To Hong Kong: Mr. and Mrs. Brackenbury.

Per P. and O. steamer, from Southampton, Sept. 27.—To Shanghai, via Bombay: Mr. Lloyd Palm. From Marseilles.—To Singapore via Bombay: Mr. J. Meldrum.

Per P. and O. steamer, from Southampton, Oct. 4.—To Hong Kong: Mr. A. Brent, Mr. D. Lapraik. To Shanghai: Mrs. Bayne. To Ceylon: Mr. B. H. Plumptre. From Marseilles, Oct. 12.—To Shanghai: Lady Parkes and friend. To Ceylon: Mr. D. B. Lindsay.

Per P. and O. steamer, from Southampton, Oct. 20—To Shanghai: Miss M. A. Russell. To Hong Kong: Mr. and Mrs. Hermann and infant. To Ceylon: Lady Chichester, Mr. and Mrs. Wright and two children. From Marseilles.—To Shanghai: Mrs. Herbert and three children, Mr. N. G. Howell.

THE INCOMING MAILS.

The next homeward mail received here will be a French one, which left Galle per Messageries Imperiales steamer *Tigre* on the 10th inst., and arrived at Suez on the 27th, having on board 6,080 bales of silk.

TELEGRAPHIC NEWS.

A telegram has been published, dated Shanghai, 12th July, conveying a report that Peking had been taken by the Nien-fei rebels, and also stating that a severe typhoon had occurred in the neighbourhood of Hong Kong. The latter item of news is substantiated by the mails received to-day; but for the former there seems little, if any, foundation, as a telegram of later date (Shanghai, 22nd July) reports all quiet. This latter telegram informs us of the loss of two vessels, the *Lalla Rookh* and *Fuhkien*, probably in the typhoon abone alluded to. It also says that the steamer *Hadrakon* has been burnt; the name is quite unknown to us, and doubtless perverted, as usual in these telegrams. The export of silk to 22nd July is stated to be 20,000 bales; and of tea to 29th July, 26,000 lbs. Exchange at Shanghai, 6s. 4d.; at Canton, 4s. 5¼d.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates are to the 27th June. The London mail of the 26th April had arrived out.

At the date of our preceding advices, of the 14th June, several of the Ministers of the Foreign Powers were at Yedo, taking the opportunity during the intervals of business of dispensing hospitality to a large party of friends. We believe that all have returned to Yokohama, with the exception of the Charge d'Affaires of the United States. For some inscrutable reason the English Minister not only himself avoids giving his countrymen any invitations, when he has occasion to visit the city, but finds himself necessitated to refuse permission to British subjects who are invited by other Ministers. It is one of those petty matters that cause a good deal of irritation, and which none can see any good reason for.

Our harbour is now looking very bare of shipping, reports the *Japan Herald*. At this time last year there were more ships of the nations of England and France alone than there are now foreign sea-going ships of all kinds. It is necessary that a proper force be maintained here, although there are no appearances whatever of any sort of hostility to foreigners at present. The Tycoon's Government most certainly is friendly, and all things seem to point to a better understanding being come to with the Mikado and hitherto hostile Daimios than has ever yet been attainable. We entertain a very strong hope that the present opportunity will be seized by the representatives of Foreign Powers to ask of the Mikado, judiciously but firmly, the ratification of the treaties. This once accorded, the whole country would speedily acquiesce, and very little annoyance from hostile samurais would then be experienced. That signature obtained, all that we most desire in a peace-

Digitized by Google

ful and profitable intercourse with Japan would speedily follow.

The more generally healthy tone of advices by the last mail had a marked effect upon the general feeling in commercial circles, and although the continuous rains have much retarded business operations, there is decidedly a more hopeful appearance than for some time past.

The *Herald* refers again to a matter which was noticed in the last number of the *London and China Telegraph*. Our contemporary says :—"The attention of the mercantile community has been lately fixed upon the trading operations with the Japanese Government by an *employé* in one of the Foreign Legations, whose dealings are reported to be carried on under the shelter of his chief. We do not believe that the Minister himself has anything at all to do with the transactions alluded to. There were indeed some heavy purchases made by him by order of his Government—but this was done openly and frankly. It is not these we point at. He is, however, very much compromised in the minds of our merchants by the doings of his inferior, and highly respected as he is both personally and as a Minister, it is greatly to be desired that he put a stop to proceedings so inimical to the mercantile interests of his countrymen and others."

NAGASAKI.

At the date of the departure of these advices, Satsuma and Chosiu had no less than eighteen steamers in the harbour, preparing for operating in the struggle with the Tycoon. Satsuma had also just purchased two more steamers—the *Australian* (screw) and the old *London* (paddle), so well known long ago as plying between London and Dundee. There has been a good deal of trading by foreigners at the port of Simonoseki. Of course the principal articles have been arms and munitions of war. This is illegal—the port not being opened to us by the Japanese Government, and the British Charge D'Affaires has published a 'notification' to the effect that traders, at this or any unopened port, are without the protection of the British Government, and that H.M.'s ships of war stationed in or passing through the Inland Sea have orders to co-operate with the officers of the Tycoon in stopping such traffic. H.B.M.'s *Barossa*, it was understood, would leave Nagasaki in a few days, nominally to prevent the re-erection of the Simonoseki forts ; in reality, it is here believed, to prevent this illicit trading. There is a rumour that the French war-steamer *Duplcix* will shortly be ordered thither for a like purpose.

H.B.M.'s *Leopold*, with Sir Harry Parkes, K.C.B., on board, *enroute* to Yokohama, arrived on the 27th June.

[Our own private information leads us entirely to distrust the assertion that Satsuma has any intention of allying himself with Choshiu.—Editor *London and China Telegraph*.]

CHINA.

SHANGHAI.

We have dates from this port to the 5th July. The French mail had arrived on the 1st, bringing London letters to the 17th May, and telegraphic news to the 29th May.

A telegraphic wire was being erected by Mr. E. A. Reynolds, between Pootung Point and the Kintoan Beacon ; but the posts when first erected had been cut down by order of a mandarin of inferior rank at the town of Chin-za. Ting (Taoutai, of Shanghai) had, however, punished the offending magistrate, and ordered him to re-erect the telegraph posts at his own expense.

Sir Harry Parkes left for Nagasaki and Yokohama in H.M.S. *Leopard*, on the 25th of June, and a lively feeling of regret was manifested among the residents at his departure. From the Shanghai papers we have extracted particulars of a farewell dinner given by them, and of a special meeting of the North China Branch of the Royal Asiatic Society convened to take leave of him.

On the 3rd July the foundation of a new Masonic Hall was laid with great pomp and ceremony. There was a grand procession formed of the members of several lodges, the consular staff, volunteers, &c.

A very important measure has been passed at a special meeting of land renters, held at H.B.M. Consulate on the 1st July, G. F. Seward, U.S. Consul-general, in the chair. It was resolved that the Municipal Council be authorised to collect a town due upon all imports, exports, and re-exports passing through the Custom-house, of one-tenth per cent. ad valorem.

The Commissioner of Customs has consented to be the medium of collecting this tax, and 100,000 taels per annum it is expected will be realised from it.

FAREWELL DINNER TO SIR HARRY S. PARKES, K.C.B.

On Thursday evening, the 22nd June, Sir Harry Parkes was entertained at dinner by the foreign community of this port, the official, mercantile, and professional elements in the Settlements being very fairly represented by the eighty or ninety gentlemen who united in this tribute of respect and esteem to our late Consul. Amongst those present were M. le Viscomte Brenier de Montmorand, Colonel Yonge, Captain Leckie, the members of the Municipal Council, M. Arte manns Secretary of the French Council ,and the consular body. The eatables were excellent, and were cooked in the club. The wine was fair, and, indeed, the only drawback to the pleasure of the evening was the confusion caused by the presence of an enormously large number of China boys, who, by pressing and squeezing around the carvers effectually hindered the discharge of the important functions entrusted to those officials. However, the general arrangements reflected much credit on the committee, or rather on the enegetic secretary, Mr. Myburgh, upon whose shoulders fell all the labour of the preparations. The chair was occupied by Mr. Keswick, and the vice-chair by Mr. Myburg. After the cloth was removed, or at that period of the evening which generally witnesses the removal of the cloth, the Chairman proposed the health of "The Queen," as that of a lady who by her public and domestic virtues had won the affection of her subjects and the esteem of the world at large. This toast was drunk with the customary honours, the band of the 67th Regiment playing the National Anthem.

The Chairman then rose to propose "The Army, Navy, and Volunteers." He was happy to have it in his power to refer to the good feeling which has always existed between the Shanghai community and the sister services. The advantages we at present enjoy are due to the indefatigable exertions of the Army and Navy, exertions of which we have lately seen the fruits in the brilliant successes gained by Her Majesty's ships at Kagosima and Simonoseki. The Volunteers, too, had smelt powder in Shanghai, and had ever shown themselves willing to do whatever duty presented itself.

Band—"Rule Britannia."

Colonel Yonge, on behalf of the Army, had much pleasure in returning his sincere thanks for the honour done to his branch of the service. While he cordially congratulated Sir Harry Parkes on his promotion, he could not but recognise the serious loss which the military section of the community—the Volunteers—had sustained by his removal. No doubt if a Volunteer Corps should again be started in Yokohama Sir Harry Parkes would give it the benefit of his experience, and would, as Commandant, devote that same untiring energy to its development, which had marked his connection with the corps at this port.

Captain Leckie, in returning thanks for the Navy, regretted that his inexperience in public speaking made him feel like a lame duck when standing up to express his gratification at the honour which had been done to the Navy. No doubt the greatness of England owes much to the exertions of her naval force, and in the recent engagements in Japan we had a significant proof of what could be done by ships. The Simonoseki affair had proved as successful as any which have been inscribed on the roll of history, and that success was mainly due to Admirals Kuper and Juares. Kagosima, too, at which he had not the honour of being present, was another striking example of England's power on the sea.

Captain Maclean, S.V.C., rose to acknowledge the honour done to the Volunteers. He had some diffidence in speaking, as, in spite of what the Chairman had said, he had never been in action, but he was convinced that so long as the Volunteers had a duty to perform they would never turn their backs on it. He, in the name of the corps which he had the honour to command, wished to express his deep regret at the departure of Sir Harry Parkes.

Captain Markham, S.M.R., thought it unnecessary to add anything to the eulogistic remarks which had fallen from his friend Captain Maclean.

The Chairman then rose and said that the pleasing duty devolved upon him of proposing the toast of the evening. The object they all had in view in meeting was to do honour to Sir Harry Parkes, and to show their esteem and respect for him. The community was about to sustain no ordinary loss. The affability and kind-heartedness with which they

Digitized by Google

had all on different occasions been received had made a deep impression, and it must now be gratifying to their departing guest to learn that he enjoys the especial regard of all present. When he first arrived he was personally a stranger to the majority of the residents, but by fame he was well known. He had in hours of imminent danger vindicated his title to bravery, and had faced death rather than betray the trust reposed in him. He, the speaker, would only say that Sir Harry Parkes had proved himself one of the most talented Consuls in the English service, and there was no doubt that he would carry with him to Japan the hearty good wishes of the Shanghai community. Nor was there any doubt that his career in Japan would be crowned with that success which had attended his efforts in China. We may therefore look forward to the time when he will return to this country to assume the highest position which a British subject can hold in a foreign land. Loud and prolonged cheering.

A note was read from Mr. Seward, expressing his regret at being unable to attend the dinner in person. He wished, however, to record his deep regret at losing the friendship and official assistance which during the entire of Sir Harry Parkes' tenure of office had marked his intercourse with his colleagues.

Sir Harry S. Parkes, who was received with deafening cheers, said that he trusted he would be acquitted of affectation if he said that he found it quite impossible to return adequate thanks for the kindness with which he had been received. He felt that he had been given more credit than he really deserved, but as he believed that whatever has been done once can be done again, he should depart for his new sphere with the hope that the same confidence which he had gained from all classes in Shanghai would in Japan be also extended to him. He was happy to say that from his chief at Peking—from his foreign colleagues—from the Municipal Council, and from all sections of the community he had received constant testimonials of approval. Nor, indeed, while recalling these gratifying facts must he forgot that they were in a great measure the result of the exertions of his indefatigable staff of officers, who had borne with him the burden and heat of the day. Shanghai, as it had been the first scene of his labour in China, appeared also destined to be the closing scene. Twenty-three years ago last Tuesday he had stood on the deck of a man-of-war, which was then ascending the river for the purpose of occupying Shanghai. At that time there was no trace of the settlement, no indication of those stately hongs which now fringe the banks of the river. Again, having served in Shanghai at various intervals, he was in 1859 appointed Consul here. In Japan he should want the same support which he obtained here. He would never forget the friendly feeling shown him on this and previous occasions, and wherever he might happen to be he would pray for the prosperity of this generous and enlightened community.

Sir Harry Parkes then sat down, but after a few moments he rose to say that the chairman had kindly permitted him to propose a toast—"the Consuls and Consuls-General in China." It might appear strange that he should propose the health of a body of which he was a member, but as his Consular functions would cease in a few hours, he had no doubt that that few hours' grace would be accorded to him. To his friends and colleagues he wished to return hearty thanks for the assistance they had uniformly afforded him.

The Viscomte Brenier de Montmorand trusted that his limited acquaintance with the English language would be excused while he in the name of himself and his colleagues thanked Sir Harry Parkes for the cordiality with which his and their health had been proposed. It was true that they all felt a lively satisfaction in finding Sir Harry Parkes promoted to a higher sphere of duty, but that satisfaction was hardly equal to the sorrow with which they parted from him.

Mr. Myburgh rose to propose the health of "the Mercantile Community of Shanghai," who stood out amongst the great masses of native traders as tacit advocates of honour and honesty. It was true that the last few years had not proved very prosperous, but that result should be attributed to the rashness of a few, and not to any falling off in mercantile talent or in the resources of the country. It was his earnest hope not only that better days might come, but that they might come quickly, and in this wish they would no doubt all join He wished to couple the name of Mr. Dunn with this toast.

Mr. Dunn said:—I wish that the duty of replying to Mr. Myburgh's toast had devolved on some one else; indeed I think that one of the conscript fathers of the place, or a member of one of the historic houses of China, should have been called on for a reply. Perhaps, however, I have been selected because I am one of the youngest merchants in this room, and because, as my friends can testify, I have a proper sense of my own unimportance. Mr. Myburgh was so good as to say that he wished the coming times might be more prosperous than the evil days we have had of late. But I say if the past two years have not been prosperous, still they have been successful. For we have with full intent and purpose heaped riches in profusion on the interesting heathen of this country, and we have not done so with selfish motives.

Mr. Lyall begged to propose a toast which might or might not be well received—"The Municipal Council of Shanghai," whom we had learned to look upon as a vast monster, with one paw on our throats and the other fumbling in our pockets. But it must be remembered that the present Council had not been long in existence, and he believed that the only object which its members had in view was to secure the well-being of the community.

Mr. Hogg, having been called on by Mr. Keswick, thanked the gentlemen present for their kindness in drinking the health of such formidable birds of prey as Mr. Lyall had described. The duty of the Council was by no means a sinecure. They had a great deal to do, and no money to do it with. All they wanted was the confidence of the community, and the funds which that confidence would produce.

Mr. Alabaster, in proposing the health of the representatives of the learned professions, wished to impress on the mind of everybody present the vast advantages secured to us by the Church, the Bar, and the Medical profession.

The Rev. C. H. Butcher returned thanks.

The toast of "The Press" was proposed by Mr. King in a speech which, to judge by the applause it produced, must have been a gem of eloquence. We were unfortunately unable to catch a single word.

Mr. Tarrant stated that he, as the senior member of the Press in China, had been deputed by his colleagues to reply on their behalf. The Press in China had taken accurate note of Sir Harry Parkes' progress from the time that, as a youth of fifteen, he landed at Hong Kong, to the present moment when, laden with honours, he was about to depart as the representative of a great Sovereign at a Court where delicate diplomacy is above all things necessary. Mr. Tarrant then sketched Sir Harry Parkes' career, and alluded to his departure for Madras in Sir Henry Pottinger's suite, to his onerous duties in Siam, and to the experience which he had gained while acting as one of the Allied Commissioners at Canton.

"The Ladies" were then proposed by Dr. Coghill, and responded to by Mr. Fearon.

Sir Harry Parkes had much pleasure in supplying what no doubt would be looked on as an omission. He would propose the health of Mr. Keswick, the Chairman of the evening. He was glad to have the opportunity of thus thanking him publicly for the kindness he had received at his hands. Mr. Keswick deserved well at the hands of the community.

Mr. Keswick in reply briefly thanked Sir Harry Parkes for what was to him a perfectly unexpected honour. This was the last toast drunk, and the party broke up about one o'clock.

SHANTUNG.

A report is current to the effect that the Nienfei have captured and sacked the city of Chu-fou-hsien, in the Shantung province. This city is remarkable as having been the birthplace of Confucius, and within its walls stood a temple to the memory of the sage, more magnificent than any other in the empire. It is said that this temple has been razed to the ground by the insurgents, who thus prove their desire to follow in the paths of destruction adopted by the Taipings.

HANKOW.

We have news from here to the 22nd June. A freshet, such as had never been observed before, had occurred on the Yang-tzi-kiang, doing much damage to property. Native craft of all sorts were sunk and broken up, and some hundreds of Chinese drowned. A large dragon boat was capsized in the river, and dashed to pieces against the junks; a raft broke adrift, and came down with great violence, tearing away Dent and Co.'s jetty and smashing the gangway ladder of Lindsay and Co.'s hulk, *Georgiana*.

The various steamers in port had steam up—the *Fusi-Yama* and *Fire Queen* being obliged to anchor in the stream.

SOOCHOW.

Advices from the provincial city inform us that Burgevine

Digitized by Google

has arrived there under escort. The American Consul General has demanded his rendition, but the Chinese refuse it on the ground that "his guilt was overwhelming and must not be punished lightly." The English authorities have earnestly advised the Chinese to comply with Mr. Seward's very just demand, but up to the present no notice has been taken of the recommendation. We understand that Mr. Seward has written a very strong despatch to the local officials warning them that a continuance in the course they have adopted will prove a very satisfactory *casus belli*.

The existence of a band of garotters has been discovered at Soochow, and two of the men composng the body in question have been taken and executed. For a month past the streets have been quite unsafe at night, murders and robberies being of constant occurrence. The swift fate which has fallen on the two desperadoes already captured will, it is to be expected, afford a salutary warning to their companions.

NANKING.

We learn that the Hunan and Hupeh troops stationed at Nanking refused to follow Tseng-Kuofan on his expedition into the Shantung province. When Li Hung-chang arrived he found the garrison in a state bordering on mutiny, which was not appeased even by his presence, although he is said to possess considerable influence over the hardy warriors of the central provinces. After much ineffectual cajolery he at length issued a notification giving the troops two days wherein to consider their decision, threatening that those who at the end of that period still persisted in their refusal should be deprived of all their property and executed. On the day named, the men still holding out, two of the ringleaders were seized and beheaded, whereupon the remainder signified their willingness to start. Since the capture of Nanking the troops have made themselves excessively comfortable, have seized or built houses and amassed a fair share of money. These attractions they were loth to leave, and hence the obstinacy with which they refused to comply with the orders issued. For five days, during which time the Imperial troops were engaged in crossing the Yangtsze in junks, all private traffic between Chinkiang and the left bank of the river was interdicted. It is said that the soldiers who were disbanded after the capture of Nanking will be again called upon to serve either as garrisons for Nanking and their important cities or in active field operations.

NINGPO.

We hear from Ningpo that, consequent on the Taotai having found a great falling off lately in the amount of war-tax levied on opium sales, his Excellency, by his foreign commissioner, has addressed foreign merchants, and requested that they permit Customs officers to take stock of drug in godowns every now and then, so that there may be a species of extra check on deliveries. This has been complied with, to the intense disgust, we are told, of a good many of the foreign dealers in drug at Ningpo, who think that quite enough is done by them for H.I.M.'s Customs when thirty taels per chest are paid, according to tariff. Writing to us on the subject, one of the annoyed ones says that—over and above this thirty taels from the importers, the local authorities take from the native purchasers another sum amounting to taels 39, so making the actual tax on opium to be over sixteen per cent., and the writer goes on to remark on what he deems small-mindedness in large and other dealers, of receiving from the Taotai a drawback of five taels on every chest sold, a tael and a half of said five being allotted to the comprador—the service given for these five taels per chest being a return to the Customs of all drug sold, name of purchaser, &c. The Taotai seems to doubt whether these returns are truthful in all cases, and asks permission to do that which, in England, people dealing in excisable articles cannot refuse, viz., an inspection, now and then, of stock.

FORMOSA.

H.M.S. *Dove* arrived at Wusung on the 22nd June from the South Cape of Formosa, in which neighbourhood she has been engaged surveying. She had anchored three quarters of a mile off the Cape, where she was to have remained while stations were erected. It was, however, found that the surf broke so heavily that it was necessary to effect a landing a short distance to the North-west. Thence the party walked across a coral beach to the spot fixed upon, having left the boat's crew with the boat at the point where they had landed. Guns were suddenly heard, and Captain Stanley imagined that the natives were firing to intimidate them. On looking towards the ship, they found that the boats were being lowered and the ports raised. A Chinese who was with the party advised them to retreat, as the natives were about to attack. Meanwhile the boat had pushed off, but as it was near low water and the surf had subsided they were enabled to get on board without difficulty, a running fire being kept up all the time. Unfortunately the surveying party were armed with pistols only, and the natives were daring enough to come within thirty yards of the boat, firing gingals and succeeding in smashing three oars, and piercing the boat in twelve places. One man only was wounded. The boat arrived safely at the ship, whence fire was opened and the natives who crowded the beach dispersed. The Chinese informed Captain Stanley that the aborigines at this spot are cannibals, so that had retreat been cut off, the party would have had little chance of escaping with life. To commemorate the event Captain Stanley has named the spot Attack Bay.

HONG KONG.

Our latest date from Hong Kong is the 12th July. The *Carnatic* had arrived on the 6th with the London mails of the 26th May, and by the steamer *Indore* on the 8th, telegraphic news from home had been received to the 15th June. The gunboat *Opossum* (tender to the *Princess Charlotte*) had been despatched to Kulan, in which neighbourhood some daring piracies had been committed; one, it was reported, on an European vessel.

A typhoon occurred in the vicinity of Hong Kong on the 30th June, which did much damage among shipping on the coast. Three steamers left for the north the previous day, and seem to have run into the very vortex of it—the *Oriflamme* (American), and the *Chanticleer* and *Corea* (British). The *Oriflamme* escaped almost by a miracle; the sea having put her fires out, she was only just able to get back into port in a very disabled state. The other two have not since been heard of, and no hope is entertained of their safety, as they were bound for Swatow, which port they should have reached in twenty-four hours. The *Corea* belonged to the P. and O. Company.

The trade of the port had been almost suspended during the fortnight by a strike among the coolies employed in carrying merchandise. The cause of the strike was a very necessary rule for registration which was enforced by the local Government.

The new Order in Council for the government of British subjects in China has been published in this colony. It makes it a misdemeanor for any British subject to serve either belligerent, but, fortunately for the Imperial Government at the present juncture, its provisions do not come into force immediately.

COCHIN-CHINA.

SAIGON.

The report addressed to the French Minister of Marine by the Rear-Admiral, *interim* Governor of Cochin-China, states that the influence of France in that country increases from day to day, the more that the permanency of her occupation is evidently assured. In the province of Mytho, in the course of one week, no less than thirty-two rebellious chiefs gave in their submission. The Annamites of the frontier, too, have by their reports served to extend into the neighbouring provinces confidence in the justice and humanity of the French authorities. Under the conviction of the importance of agriculture to the interests of the colony, the Governor ha formed at Saigon an agricultural and industrial committee which has for its object a periodic exposition of indigenous produce, and of such improved mechanical implements as may be introduced. Modes of transport, too, are to be improved, and it is hoped that at no distant time a number of steamers of light draught may be advantageously employed in navigation. The large industrial works undertaken in the Chinese town of Cholen are being rapidly pushed forward; more especially the new canal and wharfs, and general building improvements, so that before long the town will exhibit quite a transformation.

BORNEO.

SARAWAK.

On Trinity Sunday, the 11th June, an ordination was held here by the Bishop of Labuan and Sarawak, when Mr. C. W. Hawkins, of St. Augustine's College, and Mr. J. Richardson, who has, for the last three years and a-half, been a catechist among the Lalakow Dyaks, &c., and Too Ngyen Khoon, for

Digitized by Google

twelve years catechist among the Kay Chinese, were ordained deacons. The ordination sermon in the morning was preached by his lordship the Bishop of Labuan and Sarawak. On Monday, the 12th, the Second Synod of the Church was convened after morning service, when the sermon was preached by the Rev. W. H. Gomes. There were six presbyters and three deacons present. The Bishop, after special prayer, opened the synod with an address, in which he reviewed the work of the missions, and showed that although in past years its progress had been slow, yet the future was promising and full of hope. The number of natives baptised, forming congregations at the several stations, was, at Sarawak, 179 (chiefly Chinese), at Lundu and Ladumak, 152, at Binting, 138, at Quop, 98, at Mundong, 56, at Undoss, 13. At all the stations considerable numbers of Catechumens were under instruction. The synod sat for four days, and among other things, decided upon the Malay and Dyak words for a number of theological terms which frequently occur in translations into Dyak and Malay. There were also some interesting papers read upon the superstitions and practices of the Monongs among the Sea and Land Dyaks; and also upon the rites of marriage and burial. Some satisfactory discussions ensued upon the best way of dealing with these rites and practices, in a missionary point of view. The clergy were all the guests of the Bishop during their stay at the capital, and after the synod they returned to their respective stations.

STRAITS OF MALACCA.

SINGAPORE.

Dates are to the 21st July. The London mail of the 10th June arrived out on the afternoon of the 15th July. The French steamer *Donnai* arrived on the 18th July with the mail of the 17th June.

The French war steamer *Orne* came into Singapore harbour on the 5th July, having left Aden on the 19th June. The Hamburg steamer *China*, from Grimsby the 1st April, came into the roads on the 20th July.

The weather continues sultry (reports the *Overland Free Press*), and the absence of rain begins to tell on the wells. With the exception of a few slight showers, we have had scarcely any rain for six weeks; and the disagreeableness of the weather has been very much aggravated by a strong hot wind which has been blowing for several days. This wind, called the Java, is more dangerous than is imagined; and to sleep exposed to it is often attended with serious consequences. A gentleman who reached this a short time back by the mail steamer from China in perfect health, slept in the verandah of the Hotel d'Europe on the evening of his arrival; and on awaking the side of his body which had been most exposed to the wind was perfectly paralyzed. He left this quite a cripple.

In days of yore, when an armed steamer of the Bengal Marine was kept on this station, the commander, when not engaged elsewhere, made it a point to take up his quarters off Point Romania for the protection of our native trade. Once or twice a month he used to run his vessel up the coast as far as Kalantan and further, and cruise about looking for pirates. When the steamer lay at anchor her boats were sent out to perform similar duties. Not a native craft was allowed to pass without being overhauled. We have no doubt that such vigilance had a salutary effect on the pirates of the coast, as they would be sure to hear that a man-of-war was on the alert, and likely to pounce upon them at any time. We were led into these remarks by learning that Chinese pirates were committing their depredations as low down as Tringanu, on the Malay coast. H.M. gunboat *Banterer*, and the Straits Government steamer *Pluto* left on the 12th July to look after these pirates. The Deputy-Commissioner of Police accompanied the expedition.

The detachment of the 35th Regt. M.N.I. from Penang, will be conveyed by the steamer *Rainbow* to Labuan, and the relief brought here by the same steamer. This detachment has been waiting for several days, owing to the *Pluto* having been despatched on other duties. The *Free Press* observes with regard to the taking up of the *Rainbow* to carry troops to Labuan, that the cost of transport is a charge against the Imperial, not the local Government. The order from home is that the relief should be effected always, if possible, by one of H.M.'s vessels. There is more than enough of work (local) for the *Pluto*, for many weeks to come—say, the floating light vessel has to be towed to Singapore for repair, and another to take her place on the North Sands—native ports have to be visited, and the Governor proceeds shortly on his annual tour to the little settlements.

Sallay, the Javanese who committed the "amok" on board the Dutch brig *Salida*, has been pronounced by the Resident's assistant-surgeon to be of sound mind. He was removed to Her Majesty's Jail, from the Police Hospital, where he has been under the surveillance of the doctor for some days. When he was brought up at the Criminal Sessions, and the indictments read to him, the Recorder made some remarks regarding the prisoner not having been committed to jail immediately after his commitment, and commented in strong terms on his being taken to a place other than Her Majesty's Jail. Although the arrangement was approved of on public grounds, it was the illegality of so doing that was condemned, as the prisoner had no time given him to prepare his defence. As it was necessary to obtain further proof as to the prisoner's state of mind antecedent to the murder, recourse was had to the Consul for Netherlands India, who promised to communicate with the Resident of Sourabaya on the subject. Taking into consideration all these circumstances, it was thought necessary to postpone the trial until next Sessions, to give ample time to hear from Sourabaya, and to give the prisoner the full benefit of counsel.

The party who committed the robbery in the Masonic Lodge, and who was so leniently dealt with, evidently stole more than what was recovered by the police, as it now turns out that a German named Peter Haps, who is a partner in the Rotterdam Tavern, North Bridge Road, had by him one of the ornaments stolen from the Lodge on the above occasion. The manner he accounts for his being possessed of such property is satisfactory to him, and entirely exonerates him from all blame. George England, who is already convicted of the Lodge robbery, states that he disposed of a similar masonic jewel in a case to a seaman for two dollars; which has not been recovered, as the seaman left shortly after for New York. The precise description and list of the masonic jewellery lost has not been ascertained, and it very much depends as to whether George England will give any information as will lead to the discovery of such property that is still unrecovered.

A European seaman named Hugh Curran, belonging to the British ship *Rowena*, was committed for trial at the next Criminal Sessions, by the Marine Magistrate, on a charge of stabbing and wounding a seaman of the same vessel named James Neblock, on the passage from Melbourne to Singapore. On the 2nd July, after the arrival of the ship in port, the wounded man was sent to the hospital, where he was placed under the treatment of Dr. Ferguson.

A coroner's inquest was held on the 18th July, before F. G. Gottlieb, Esq., Deputy-Coroner, on the body of a European named Richard Peratt. After the medical evidence had been taken the jury returned a verdict to the following effect:—"Died from natural causes, aggravated by a violent purgative administered by John Francis Christian." Before the inquest Dr. Ferguson analysed some pills which were brought away from the house of the above-named, and the ingredients contained in them were not at all satisfactory. It appears that this doctor, a native of Madras, has been in the habit of carrying about with him a wand which contains any number of pills, for all disorders. These were tested and appeared to be highly obnoxious for the European temperament. Dr. John got a very narrow escape of being committed for manslaughter.

On the 17th July, two cases of Wha Whay (a species of lottery) were successfully prosecuted before the sitting Magistrate. In one a fine of fifty rupees was inflicted on the principal offender; and in the second a fine of 200 rupees. The first was carried on in a hut on Thomson's Road; the second in a doctor's shop in town. We understand that gambling in this form is indulged in to a frightful extent. The lottery is usually drawn in Johore, or some out of the way place on this island, and the keeper has numerous agents for the sale of his tickets, who dispose of them in every hole and corner. Domestics are very much addicted to this pastime. It is said that gambling at *poh* has waned before Wha Whay.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

Baldwin—On the 9th June, at Hong Kong, the wife of J. C. Baldwin, Esq., of a daughter.

Eyre—On the 23rd Aug., at Cove, near Glasgow, the wife of William Adamson Eyre, of a son.

Gaisford—On the 20th Aug., at 13, Bruton-street, the Lady Emily Gaisford, of a daughter.

Digitized by Google

SHULDHAM—On the 19th Aug., at Portishead, Somerset, the wife of Major Shuldham, H.M.'s 108th, of a daughter.
STILL—On the 20th Aug., at Hillside House, Avening, Gloucestershire, the wife of E. A. Still, Esq., of a daughter.
WALKER—On the 12th July, at Colombo, Ceylon, the wife of Lieut.-Colonel H. Torrens Walker, the King's Own Borderers, of a son.

MARRIAGES.

FREEMAN—MARROTT.—On the 17th Aug., at St. Mary's Church, Islington, by the Rev. Mr. Stanton, Albert L. Freeman, of Shanghai, China, to Jane Wayland, second daughter of the late William John Marrott, of Upper Holloway.
SCOTT—GORTON.—On the 4th July, at the Union Church, by the Rev. Dr. Legge, Albert Scott, of Worcester, to Mary Ann Gorton, of Lichfield.

DEATHS.

XTER—On the 30th June, of fever, at her residence Benham-road, Susan Harriet Sophia Baxter, aged 39; greatly respected, and sincerely regretted.
BENEST—On the 21st June, at Shanghai, after a short illness, much beloved and esteemed, Philip Le Geyt Benest, Esq., Commander of Messrs. Green's ship Highflyer, aged 33.
BOWKER—On December 27th, on his passage from China, John T. F. Bowker, Esq., late editor of the "Shanghai Recorder," aged 46. The deceased was the only son of the late Captain John Bowker, R.N., of Greenwich Hospital.
CUNINGHAM.—On June 25th, at the General Hospital, Hong Kong, Michael Cuningham, Private 29th Regiment, aged 24 years.
HARPER—At Hong Kong, on the 3rd July, on board the American ship Samuel Russell from New York, Mr. John Fletcher Harper, of Brooklyn, N.Y., U.S.A., passenger, of disease of the liver.
O'BRIEN—On the 27th July, at Suez, on board the P. and O. Company's ship Golconda, after a long illness, Major-General Terence O'Brien, Commanding the Troops in Ceylon, aged 66.
OWEN—On the 19th Aug., at Marseilles, homewards from Hong Kong, Roger Carmichael Robert Owen, Esq., barrister-at-law, Captain in the Shropshire Militia, eldest son of Colonel Owen, late 72nd Highlanders.
PETERSON—At Wanchi, on the 30th June, August Ferdinand Peterson, native of Swed n, late engineer to Messrs. Russell and Co., aged 29 years.
SEVERS—On the 19th Aug., at Redhill, Surrey, Philip Henry, the infant son of Henry H. Severs, Esq., of Hong Kong.
SHULDHAM—On the 19th Aug., at Portishead, Somerset, Katherine Dora, wife of Major Shuldham, H.M.'s 108th, and eldest daughter of the late Rev. Egerton Dukinfield, aged 29.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—The quiescent state of our market has increased, and prices for Scented Teas rule from 2 to 3 tls. lower; fully half the settlements of the fortnight have been for the United States and Buenos Ayres, so that the actual settlements for England have been very small. Country Congous.—Musters of four chops have been shown, and quality appears fully equal to former seasons. We hear the chops will be here in the course of a few days. Country Greens.—Settlements for the fortnight have been 803 half-chests for the American market at advanced rates, as quoted in our last. Canton-made Teas.—Some 2,500 packages have found buyers chiefly for Buenos Ayres, and Scented kinds have been purchased for the same market; this remark also applies to Gunpowder, which is the only kind of Canton Greens that has found buyers. Sales, Prices, and Stocks, we quote as follows:—Tayshan, new make, 500 ½-ch., at 22 to 28 tls.; do. do., 2,000 bxs., at 22 to 28 tls.; Scented Orange Pekoe, 10,000 bxs., 22 to 35 tls.; Scented Caper, 6,800, at 23 to 34 tls.; Gunpowder, 2,000, at 18 to 26 tls.; Country Greens, 800 ½-ch., at 27 to 35 tls.; Gunpowder, 36 to 52 tls.; Imperial, 33 to 49 tls.; Hyson, 25 to 31 tls.; Young Hyson, 22 to 30 tls.; Twankay, 15 to 17 tls.

SHANGHAI.—Black Teas: We have now to report the opening of our market for Congous, which took place on the 22th ult., by the settlement of three chops of medium Oopacks at 28½ taels (at 1s. 8d. per lb.), and one chop of fine quality at 33½ taels (at 1s. 11d. per lb.). These prices are about three taels under present Hankow rates, and lay down the teas at last London quotation. Since the arrival of the French mail there has been more disposition to operate, and we think purchases will now follow on the same scale. Fine Teas are for the most part being shipped on owners' account, the supply of this class being unusually short this season. Re-shipments of Hankow settlements have been 15,000 chests, and our stock is estimated at 30 chops, or 15,500 chests. Total shipments (including Hankow Settlements), 24,100 chests, against 56,000 chests at same date last year. Green Teas: The settlements comprise only 900 half-chests at 26 to 28 tls. proportion, prices about the same as those last quoted. There have been no reshipments, and our stock is reduced to 5,600 half-chests, only 4,000 of which are country packed, and all of undesirable quality. From Pingsuey we hear that the picking of the new teas has commenced, and we have received musters of the new leaf; but through unfavourable weather the teas will be somewhat later than last year in coming to hand. Total shipments to date: 4,500 half-chests, against 3,600 half-chests at same date last year. Quotations.—Gunpowder: Cargo, 27 to 31 tls.; superior, 33 to 39 tls.; fine, 41 to 48 tls.; finest, 49 to 58 tls. Imperial: Cargo, 22 to 24 tls.; superior, 27 to 29 tls.; fine, 31 to 36 tls.; finest, 37 to 42 tls. Young Hyson: Cargo, 12 to 18 tls.; superior, 21 to 28 tls.; fine, 29 to 35 tls.; finest, 37 to 43 tls. Hyson: Cargo, 23 to 28 tls.; superior, 31 to 39 tls.; fine, 41 to 50 tls.; finest, 51 to 64 tls. Twankay: Cargo, 9 to 12 tls.; superior, 13 to 15 tls.; fine, 17 to 19 tls.; finest, 20 to 21 tls.

FOOCHOW.—The mail has not arrived, owing to the steamer which should have brought it down being lost (no doubt) in a typhoon on the way up. The following is the report for the week ending 1st July. Congou, a large business has been done during the week, principally in the lower grades for Australia, which have advanced from 5 mace to 1 tael. Prices of other descriptions are about the same. The finest Kaisows are nearly all settled. Souchong.—A few chops have been shipped, but the terms on which they were settled have not transpired. The teamen reported bids for the finest chops as high as 35 to 37 taels. Oolongs.—A fair business had been done without any alteration in quotations. Scented Teas were being shipped freely, the market maintaining the high range of quotations last reported.

NINGPO.—Pingsuey: Since our last much higher prices have been paid up country for leaf, which now enhance cost of good chops to equivalent of Sh. 35 tls. per picul, proportion laid down in Shanghai.

HANKOW.—The latest date is the 29th ult. Settlements continued at the rise, caused by the news of the reduction of duty till the arrival of the English mail of 26th April, when less eagerness was shown, and there being few fine teas left on the market, purchases were made at somewhat easier rates. In all 75 chops have been settled during the fortnight. Some musters of second crop have come to hand, which are good in leaf, but wanting in strength. Reports are now, that notwithstanding the inducements offered by the high opening rates, the total yield will be within that of last year. There was a stock of 34 chops left on the market. Quotations were:—Oopacks, fine to finest, 26½ to 34 tls.; fair to good Oopacks and fine to finest Oonams, 23 to 26 tls.; common Oopacks and Oonams, 15 to 22 tls. Total shipments to date—187 chops or 9,906,600 pounds, against 223 chops or 12,130,200 pounds last year.

RAW SILK.—A quantity has accumulated here during the fortnight, owing to the anxiety of exporters to ship. This opportunity the Rangoon will carry about 4,900 bales.

SHANGHAI.—Since last mail 6,000 to 7,000 bales of silk have been settled at rather lower prices. The arrivals lately have not been on such a large scale from the interior, and the unsold stock is reduced to 3,000 bales. The reports of the second crop are less satisfactory, the yield not being considered so large as was expected; some of the silk may be expected down in Shanghai in a few days. The Yokohama mail arrived on the 1st inst.; by it advices were received to the 26th June. The steamer had only about 400 bales of silk on board, the transactions for the fortnight having been moderate; the unsold stock was estimated at about 400 to 500 bales. The following are the latest quotations:—Tsatlee, Chops No. 1, 500 tls. per picul; do., No. 2, 480 tls. per picul; do., No. 3, 460 tls. per picul. Taysaam, Chops No. 1, 420 to 430 tls. per picul; do., No. 2, 400 to 410 tls. per picul; do., No. 3, 380 to 390 tls. per picul. Yuenfa, Chops No. 1, 440 to 450 tls. per picul; do., No. 2, 420 to 430 tls. per picul.

YOKOHAMA.—The settlements for the past fortnight amount to about 700 (native) bales, comprising one or two small parcels of new crop. Owing to the favourable accounts from Europe brought by last mail, and the low Exchange ruling, prices are likely to open very high, though the season's yield is confidently expected to be a large one.

DRUGS, &c.—CANTON.—Cassia Lignea.—This article is higher again, and is now quoted $16 to $16.25, at which rate some 1,650 piculs have been taken: the remaining stock consists of 3,000 piculs. Cassia Buds: $59 per picul, nominal; the first arrivals of the new crop are expected in about a month. China Galls: no transactions; the article can be bought at $12.50. Vermilion: $37.50 per box of 50 catties; nothing doing for export. Musk: No arrivals, no sales, further supplies of inferior quality being expected, purchasers have withdrawn the offers previously made. Rhubarb: No arrivals, and no stock. Galangal: $2.20 per picul—no buyers. Essential Oils: very scarce.

CAMPHOR.—HONG KONG.—The last arrival from Tamsui brought some 1,500 piculs, of which 700 piculs have been sold at $18 per picul unpacked, which is to-day's market value. Stock on hand not very large, and demand not very active.

CHINA IMPORTS.

COTTON YARN.—In the absence of almost all inquiry the quotations for this article, which are put at about $5 per bale below those current under date of last report, must be regarded as quite nominal. The transactions of the fortnight consist of the sale of 65 bales and 9 bales of damaged twist sold by public auction. Grey Shirtings: A limited amount of business, estimated at about 9,000 pieces, has been transacted in these goods during the past fortnight, but importers have found it necessary in order to effect sales to submit to a reduction in prices equal to 10 cents per piece. Some 3,200 sea damaged cloths have been moved off by auction. White Shirtings: Continue to be in hardly any request, and settlements are limited to 1,000 pieces and about 1,750 pieces damaged Goods. T-Cloths: These goods again show a decline in value equal to that experienced by grey shirtings, without leading to any increased demand, and the business transacted during the fortnight is limited to sales 4,500 pieces.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies and Habit Cloths: Have met with a fair amount of inquiry during the past fortnight at the prices current under the date of last report, the settlements effected amounting to 844 pieces of Spanish Stripes and 160 pieces of Ladies and Habit Cloths at 80 c. to 95 c. per yard. Long Ells: Remain as quoted under the date of last report, with sales amounting to 1,000 pieces during the fortnight. Camlets: Have been in but moderate request at previous rates, the sales reported not exceeding 240 pieces of English manufacture and 60 pieces of Dutch. Lastings: These goods have not met with any inquiry, and there are not any transactions to notice. Blankets: Some 700 pairs have found buyers since the date of last report at the prices previously current.

METALS.—Iron, Flat, &c.: The transactions reported in Iron have been upon a moderate scale, but prices of the various qualities imported for consumption in this market show a slight decline as compared with those current under date of last circular. Holders continue to meet the market pretty freely, and there does not seem to be much probability of prices rallying for the present. Sales are estimated at 5,100 piculs of Nail Rod, 800 piculs of Square and Flat Bar, and 300 piculs of Hoop. Lead: The purchases of Lead in this colony during the fortnight amount to about 700 piculs, and prices are slightly firmer than under date of last circular. Tin: Sales are limited to 100 slabs. Tin-Plates: 200 boxes sold. Steel: Sales of 100 tubs are reported.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London: June 25, Bolina. From Liverpool: 20, Aden.

At NAGASAKI.—From London: June 22, Rifleman. From Rotterdam: 27, Japan Packet. From Amsterdam: 1, Kempner; 4, Waalstroon; 29, Engel.

At SHANGHAI.—From London: June 22, Stirlingshire, City of Quebec; 23, Solent. From Sunderland: 22, St. Andrew's Castle. From Glasgow: Glencoe. From New York: 25, Uncowah.

At HONG KONG.—From London: July 11, Yaratilda. From Sunderland: 10, Tael Vaw and Herald. From New York: 2, Samuel Russell; 10, Marianne. From Shields: 11 Maud.

At MANILA.—None.
At SINGAPORE.—From Glasgow; July 18, Priama. From Newcastle: 7, Drusus.
At PENANG.—From London (*via* Singapore): July 10, Ferozepore.
At BATAVIA.—From London: Ilma. From Glasgow: Maythorn and Majestic.

DEPARTURES.

From YOKOHAMA.—None.
From NAGASAKI.—None.
From SHANGHAI.—For London, 21, Guineveve.
From FOOCHOW.—For London, 29, Taeping.
From HONG KONG and CANTON.—For London, July 2, Salvia; for New York, 3, Shorkild.
From MACAO.—For London, July 2, Northfleet.
From MANILA.—None.
From SINGAPORE.—For Bordeaux, July 6, Java.
From PENANG.—For London, July 17, Hannover; for Falmouth, 15, Undine; for Boston, 20, Rainbow; for New York, 6, Triton.

LOADING.

At YOKOHAMA.—For London, Eleanor.
At HANKOW.—For London, Weymouth, Neville, Pegasus.
At SHANGHAI.—For London, Garrawalt, Highflyer, Ethiopian, Norwood, Eliza Nicholson, Art Union, Ellen Rodger, Golden Spur, Hampton Court, John Lidgett; for Liverpool, Woosung.
At FOOCHOW.—For London, Lauderdale, Japanese, Dunmail, William Mitchell, L. M. Joshua, Devana, Berwickshire, Coral Nymph.
At HONG KONG and CANTON.—For London, Seawfell, Heroes of Alma, Valdivia, Chrysolite, Johanne Maria. Arab Steed, Allendale.
At MANILA.—For London: Nelson, Zelandia. For Queenstown: Edward. For Boston: Fearless. For New York: Shirley.
At SINGAPORE.—For London: Cardew, Ernest Merck. For Liverpool: Early Dawn, Vigil.
At PENANG.—For London: Peter Roland, Edinburgh Castle, Shantung.
At BATAVIA.—(For Channel for orders) Malabar, Caduceus.

FREIGHTS AND CHARTERS.

YOKOHAMA.—To London: £3 per ton.
HANKOW.—To London: £4. 10s. per ton.
SHANGHAI.—To London: £2. 10s. per ton.
FOO-CHOW.—To London: £2. 10s. per ton.
HONG KONG AND CANTON.—To London: £2. To New York: £1. 13s. 6d. and 15s.
SINGAPORE.—To Great Britain: dead weight £1 measurement, £1. 10s. per ton.
PENANG.—To London: Sugar £1. 10s.; measurement £1. 15s.
BATAVIA.—To Europe: Rice £1. 10s.; light freight £2 per ton.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—June 26, Horsa, Cardiff to Shanghai; 26, Yaratilda, London to Hong Kong; 27, Helen Douglas, Newport to Shanghai; 28, Sea Mew, Liverpool to Shanghai; Harkaway, Sunderland to Yokohama; Benie Stanton, Cardiff to Shanghai; 29, J. H. Cushing, Swansea to Shanghai; Empress, Liverpool to Yokohama; July 2, Drusus, Newcastle to Singapore; 8, Glenclune, London to Shanghai.

From UNITED STATES to CHINA, &c.—July 10, Beshing, Boston to Amoor.

From CHINA, &c., to ENGLAND and CONTINENT.—June 24, Burdwan, Macao to London; 28, Richard Cobden, Singapore to Liverpool; July 1, Anglia, Sourabaya to Amsterdam; Cressy, Shanghai to London; 3, Bella Dona, Sarawak to Channel; 5, Bengalen, Samarang to Rotterdam; 6, Prophete, Singapore to Bordeaux; 8, Min and Young Lochinvar, Foochow to London; 9, Banda, Hong Kong to London; 10, Black Prince, Foochow to London.

From CHINA, &c., to UNITED STATES.—June 30, Milton, Manila to New York; July 11, Receife, Hong Kong to New York.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—Aug. 16, at Gibraltar, from Maujmain, Caroline; at Gravesend, from Shanghai, Antipodes, Gates; off Newhaven, from Shanghai, Vanguard, Scott.

DEPARTURES NOT INCLUDED IN THE TABLES.—Aug. 21, from Bremen, for Singapore, Herschel; 24, from Liverpool, for Bankok, Siam (s.); 25, from Falmouth, for Shanghai, Electricity; 19, from Rotterdam for Batavia, Robertus Hendrikus.

LAID ON.—At London: For Shanghai, Sir W. F. Williams; for Penang: Devonvale.

SPECIAL MEETING OF THE NORTH-CHINA BRANCH OF THE ROYAL ASIATIC SOCIETY.

A special meeting of the members of the North-China Branch of the Royal Asiatic Society was held on the 22nd of June, for the purpose of bidding farewell to Sir Harry Parkes, the president of the society, previous to his departure for Japan. A large number of members were present. In taking leave of the society, Sir Harry Parkes took occasion to congratulate it on the progress it had made, and on the fair prospects held out by the future. A new room had been secured and the working staff of the society increased by the addition to the Council of Messrs. Giquel and Probst. The post of secretary, which had been so well filled by Mr. Brown, had been assumed by Mr. Alabaster, so that no element of success was wanting. The speaker had therefore great confidence in leaving the society, and he assured the members that in his new field of labour he would continue to feel the deepest interest in any researches in which they might be engaged. Mr. Seward then called on the secretary to read the following address, which had been prepared for the occasion:—

Sir,—It does not seem fitting to allow you to preside for the last time at a meeting of our association without some expression of the feeling to which your approaching departure has naturally given rise. We desire to convey to you our sincere thanks for the care and assiduity with which you have laboured to revive the North-China Branch of the Royal Asiatic Society. Its resuscitation is mainly owing to your indefatigable and unremitting exertions. Amidst the pressure of harassing official duties you have always found time to engage in correspondence, to attend meetings, to peruse and select papers, in a word, to further in every way possible the best interests of the society. We feel that, though we might hope to find a president like yourself well versed in the Chinese language and literature, like yourself courteous and diligent, we can hardly expect to find any one who will unite, as you have done, wide Oriental experience with patience to encourage the humbiest student, and readiness to accept the smallest contribution to the general stock of knowledge. This kindness and patience, so essential at the institution or revival of a scientific society, we shall indeed miss when you say farewell to us, and the recollection of many instances when both have been conspicuous makes us heartily regret the deprivation we shall sustain. Our loss is deep in proportion to our appreciation of the benefits you have conferred upon us, and we are assured that to you the North-China Branch of the Royal Asiatic Society owes whatever it is, and to you whatever it will be.

We should only discharge a portion of our present task, however, were we to omit to offer our congratulations on the occasion which calls you away from Shanghai. It must be gratifying to you to receive so important and responsible a charge, as you are assured thereby of the estimation in which your past services have been held by Her Majesty's Government. The record of these services is not to be looked for in the transactions of a learned society—they are part of the history of foreign intercourse with the East—but we cannot fail to recognise the same energy in your public career which, employed in a smaller field, has revived our little association.

The duties of Her Britannic Majesty's Minister in Japan will tax your resources yet more than your previous position has done, and we can only earnestly hope that you will be blessed with health and strength to fulfil the trying duties which lie before you. May every success attend you in your new scene of usefulness, and may you see the two great results you have laboured throughout your public life to attain, viz., the overthrow of the policy of prejudice and exclusion, and the mutual understanding of the Eastern and Western nations.

VISIT OF JAPANESE TO MACCLESFIELD.

On the 19th of August the three senior members of the party of Japanese sent to this country by the Prince of Satsuma accompanied Edward Clarke, Esq., H.M.F.M.'s Consul for Kanagawa (who is in England on leave of absence) over the extensive silk-spinning and manufacturing establishment of Messrs. I. and T. Brocklehurst and Sons, of Macclesfield. Mr. Holme, of Nagasaki, was in charge of this distinguished party, who examined with great attention and pleasure this, the largest establishment in the world for the fabrication of silks, &c. An idea of this vast establishment may be gathered from the fact that this wealthy and enterprising firm employ sometimes up to as many as five thousand operatives in the manipulation of raw silk and silk waste, which they perfect in every branch, and then ship to various markets of the world. Here these Japanese visitors were shown the various and complicated processes necessary to convert the raw and waste silks of Japan, China, India, and Europe into ladies' dress silks, and numerous other costly fabrics. They were greatly surprised at the ingenuity and talent evinced in the silk waste spinning department, where waste of various qualities, and from different countries, including Japan, was being carded, spun, and woven into plain and figured cloth by steam power; and on entering the large power-loom shed, containing upwards of five hundred steam looms at full work, their astonishment was undisguised, and their exclamations of gratification frequent. Throughout the day the interest of the party never had time to flag for an instant, and they departed greatly pleased with the polite attentions of the proprietors, which were continued up to the time of their return to Manchester.

Prior to their departure from Macclesfield the party were introduced by the Portuguese Consul to the chairman of the extensive and valuable copper mines of Alderley Edge, in the neighbourhood. The chairman's invitation to inspect these works was gladly accepted, and we may be able to give our readers an account of the visit in a future issue.

BRITISH COMMERCE IN THE NORTH OF CHINA AND JAPAN.

(FROM THE TIMES.)

It is somewhat strange that the prevailing sentiment of an Englishman towards an Asiatic is one of contempt. Such a feeling may be understood with reference to the Negro, the Australian, and even the Red Indian, but towards a Hindoo or a Chinaman it is almost inexplicable. The intellectual deficiencies of the Negro are acknowledged even by Nigrophilists; the Australian is even less developed as a man. In the West "the noble savage" has disappeared before us, and though he was, according to Fenimore Cooper, not an unworthy type of man, it would be an idle sentiment to regret that a territory once occupied by a thousand red men is now peopled by a million white faces. But in the East we have encountered a different breed. We come into contact with civilisations far more ancient, and possibly in some respects more advanced, than our own; and the conflict for supremacy has been waged stoutly and with varying fortunes. Our countrymen have, indeed, been uniformly successful in arms, but the same victory has not always attended them elsewhere. For one thing, the Asiatic can live us down. We die away before him, just as the Australian dies away before us. Although we have had a secure footing in India for a whole century, no Englishman can be found there in the third, much less in a later generation. Had it not been for a perpetual introduction of fresh blood, the European would disappear from the East. Englishmen may assert their lordship and sovereignty, and teach the Asiatic the use of machines and the economy of labour, but he has in his turn arts which they have learnt from him with advantage, and the art of living under a tropical sun, which they have tried to learn without suc-

Digitized by Google

cess. Under such circumstances, a little respect for his civilisation, his traditions, and his invincible vitality would not be amiss, and it is certain that our relations with the East would be smoother were the respect oftener felt and manifested. It is, perhaps, hopeless to expect such a sentiment in British India, and it is equally improbable that it will ever be shown in our dealings with the Chinese; but Japan is a new country just opened to us, and the comparative sturdiness of the Japanese character might inspire some such feeling. The Japanese is disposed to feel some respect for us. He stood up in open resistance, and was fairly beaten, and is now ready to be a good friend. He stands to the ordinary Chinaman in much the same relation that a Sikh does to a Bengalee. The Sikhs resisted us more stubbornly than any other race of British India, but when once conquered proved the steadiest of supporters, under circumstances which tried their fidelity to the utmost.

The commercial reports of the Consuls in Japan and North China which have just been published by the Foreign Office show the extent to which our trade with these countries may be carried if our relations with them are only kept on a peaceful footing. Last year, it will be remembered, we were obliged to take into our hands the correction of the Daimio Chosiu by sending an expedition to Simonoseki. The expedition did not reach its destination till September, and it might be imagined that for some months previously the trade with Japan was slight and irregular. The fact, on the contrary, is that the returns both of imports and exports show a considerable advance on the returns of the previous twelvemonth, and, with the single exception of raw silk, there was an actual increase in the quantities of every staple export. The total tonnage which entered inwards at Kanagawa rose from 64,420 to 75,460, and out of this total the tonnage of British shipping rose from 34,790 to 61,498. The total value of exports and imports in the year amounted to £3,888,200, against £1,346,000 in 1863, the value in 1860 having been only £980,000. This is a rapid increase, but it is nothing to what may be hereafter. The Japanese merchants show the liveliest desire to push a trade with the pioneers of Western commerce, and the Japanese authorities have exhibited a commendable advance towards freedom in relaxing regulations which interfered with trade. The export of silk, which is one of the greatest importance in Japan, exhibits, as we hinted, a slight decline; but in spite of this the authorities have, for the first time, permitted the export of silkworms' eggs. The continuance of the disease among European silkworms naturally caused a considerable export directly the trade was opened, and 200,000 cards of eggs were shipped of the estimated value of £50,000. The same disease among European silkworms stimulated Mr. Taylor Meadows, our Consul at Newchwang, to make inquiries about the oak-leaf eating worm, or mountain worm, as it is called by the Chinese. It was at first thought that a beneficial result might follow a crossing of this oak-leaf eater with the mulberry-leaf eater, but on further investigation it appeared that the worms were of different species, and the hope had to be discarded. Something, however, might be made out of this mountain worm and his cocoons taken alone. He is described as an enormous creature; his cocoon is three times the size of that of the mulberry-eater, and in his flying stage he bursts into a large and richly-coloured butterfly, measuring from tip to tip of his expanded wings some seven to nine inches, "as large as a swallow!" But, apart from doubtful speculations about the oak-leaf eater, which is perhaps the well-known worm of Canada and elsewhere, the report of Mr. Meadows is most valuable from the information it gives about countries known even by name to few Englishmen outside the Civil Service Commission. Newchwang itself is at the head of the gulf cutting off the north-east corner of China from the rest of the Empire, and the nature of its climate may be guessed from the fact that the first vessel in 1863 arrived there on the 22nd of March, and was very much cut and damaged by the floating ice. Still farther to the east of Newchwang is the valley of the Yaloo, and the Yaloo itself—a river which at a distance of 25 miles from its mouth was 300 yards wide and 20 feet deep—separates China from the independent country Corea. All this country is at present supplied with European commodities through the port of Newchwang, and Mr. Meadows looks forward to an indefinite extension of the trade of the port in consequence, although it seems possible that some harbour may be discovered on the west coast of Corea which would naturally divert much of the traffic with Newchwang. The Coreans purchase the goods they require in a way which recalls the great fairs of mediæval Europe. Three times in the year—at the third, ninth, and twelfth moon—Corean traders cross the Yaloo and advance to a spot ten miles short of the last city on the Chinese side, where, under the jurisdiction of mandarins deputed for that purpose, buying and selling go on for a month. The Coreans are accompanied by innkeepers, who establish themselves in tents and provide entertainment for their countrymen, who pass to and fro on horseback, while the goods are brought to the mart on bullocks. The Coreans bring gold dust, tiger-skins, and ginseng, and take back foreign cotton manufactures and opium. A new trade is, however, springing up with the Coreans and the Chinese of the Newchwang district. Hitherto they have not known the use of window glass, and their windows are glazed with paper. This is an application of the commodity of which even the Chancellor of the Exchequer probably never dreamt, and it must be acknowledged that it has its drawbacks. To get any light through paper it is necessary that the whole of a room, from 3 or 4 feet above the floor up to the ceiling, should be window, and this in a climate where the thermometer falls 5 to 10 degrees below zero on a winter's night—indeed, once in Mr. Meadow's experience, it fell 30 degrees below zero—is rather trying. Glass, as Mr. Meadows observes, is itself a better protection than paper against the cold; but with its introduction the window space can be halved, while the supply of light can be increased, and the rest of the room front can be built up as solid wall. Glass is only now beginning to make its way there, but it is easy to see that an enterprising glazier could find no better opening for his abilities than the Consular district of Newchwang.

We do not suppose that our future intercourse with Jpan and the north of China will be free from peril or unchequered by vicissitudes. The last intelligence, that the Tycoon and Mikado were about to march against their rebellious feudatories points to troubles which have probably been precipitated, if not entirely caused, by our arrival in Japan, and the result of such a civil war can scarcely be increased goodwill to the intruders. The fact that the Tycoon and the Spiritual Chief have taken such a step is a convincing proof of the sincerity of their good intentions towards us, and the fidelity with which they desire to carry out their treaty engagements. Opposed as they were by tradition and policy to any extension of intercourse with the outer world, they have, by the course of events, acquired a respect and goodwill for us which we ought not to be slow to reciprocate. This consideration may fairly influence much of our future policy. As long as the Tycoon and Micado are faithful and energetic, and the mass of the people are friendly and willing to trade, we may be certain that our intercourse with them will increase, in spite of the resistance of the great feudal lords and the lawlessness of their armed dependents.

BANK OFFICERS IN INDIA AND CHINA.

(To the Editor of the *London and China Telegraph.*)

Sir,—As one who has for a considerable time been actively engaged in the working of one of the largest and most influential of the India and China Banks, I take the opportunity offered in your impression of 17th April to submit a few remarks in answer to an extract which you quote from the pages of one of your contemporaries, the writer of which makes a somewhat unwarrantable attack on the body of gentlemen whom I, on this occasion, represent. The "Bank Shareholder" commences by calling attention to the malpractices (somewhat strong term), of European officers in Eastern banks, one of which consists in accepting the privilege, permitted by the management, of drawing on London at sight at the usual six months' rate. This is certainly done I believe in every bank in the East, and I presume is allowed by the directors because, with greater liberality than "Bank Shareholder" can conceive, they decline to make a profit out of the well-earned remuneration of their staff. The same argument applies to the remaining "malpractice" touched on, viz., that of accepting the six months' deposit rate of interest on the *current account*, and in either of these cases it will be manifest to anyone who has the slightest knowledge of the profits on banking in the East, and the ways in which they are made, that no *loss* to the shareholders can possibly arise out of such privileges; while on the other hand, if the bank officers are treated on the same terms as ordinary clients, then a profit would accrue to the corporation on the salaries paid, and, I repeat, the directors, and I believe the body of shareholders, wish nothing of the kind.

The "Bank Shareholder" proceeds to suggest that as a very natural consequence of such privileges being allowed, the gentlemen who benefit by them will in all probability overstep the limit prescribed (*i.e.*, to family remittances), and (in plain terms) swindle their employers. "Every day's experience of mankind" says this philosopher, "proves that we are naturally liable to *err*, and that where self-interest is concerned, people are inclined to benefit themselves at the expense of others if they are made their own arbiters." What! has the "Bank Shareholder" no belief in the character and integrity of a body of gentlemen who are distinguished, even among English merchants, for their mercantile honour? Does he not know that appointments in the East are only as a rule given to men of whose character years of experience in banks at home can leave no doubt? Surely if he must see himself in print a little thought and inquiry might have been expended by this generous representative of the "Fountain Head." In no instance within my memory or experience have any defalcations been committed by *European* officers in the East, and the instances quoted in your extract do not apply to *them* in any way.

Again: "European Bank officers are very handsomely paid—in most cases ridiculously higher than their services are worth." The "Bank Shareholder" evidently knows nothing whatever of the expenses of living in the East; his ideas of eating and drinking are probably based on experiences extending within a radius of four miles from the Mansion-house. Let him live for a year in China on a limited income and then talk of overpaid bankers. But facts are the best arguments. The pay of a bank assistant on coming out is generally about £500 per annum, and my own experience is that, with strict economy and care, this will serve to feed and clothe him if his tastes are moderate: save money he cannot, and if unfortunately sick and compelled to indulge in the luxury of medical attendance, debt must inevitably follow. In all other business houses young men (generally with little or no experience) on entering receive sum of £300 to £400 per annum, and are supplied by the firm with everything they require—food, wine, servants, medical attendance, &c., &c., so that their expenditure need be very little. *None of these are supplied by the banks;* then are bankers "ridiculously" overpaid? In course of years of course the rewards become higher. A bank manager may receive from £2,000 to £3,000 per annum; but consider the rewards of other branches of trade, and how great is the responsibility and labour attached to the management of a large bank, and then judge are the rewards adequate, or are less excessive.

The idea that the possession of a certain number of shares is fully sufficient to enable the holders to correct errors of management of directors and managers is not uncommon among a certain class of men, and appears to be a failing with the "Bank Shareholder;" of course he is right and the whole list of directors in London and India totally wrong. Let him then suggest his improvements at the next general meeting of the banks which are fortunate enough to possess him as part of their "Fountain Head," and prove how small a minority his opinions represent.

—I am, Sir, your obedient servant,

Hong Kong, 13th June, 1865. Veritas.

THE SILK TRADE—FRANCE v. ENGLAND.

(from the economist.)

The famous project for depriving London of its supremacy as a silk market, which has long been under consideration in France, is again exciting attention. The French say that, as they are the greatest consumers of silk in the world, it is absurd that they should have to go to London to get the supply of Asiatic silk they need, when it would be possible to bring it direct to France at a much cheaper rate. The Minister of Commerce has more than once pressed the matter on the Chambers of Commerce concerned in the trade; not long ago he sent them a circular stating that, if means could be found to buy the silk in Asia, direct from the native producers, the steamers of the Messageries Imperiales would be able to carry to Marseilles any quantity of it. Recent letters from French traders in China treat the question with great interest. But the upshot of the whole busi-

Digitized by Google

ness appears to be this—that in order to change the existing state of affairs large capital must be sent to Asia, great latitude in the employment of it must be allowed to agents, and much time will be required. Now, the dealers of silk in France have not got large capital at their disposal; they are strongly disinclined to confide the control of what they do possess to men whom they cannot watch constantly, and they have not patience to wait for years for the success of a commercial operation. According to all appearances, then, the English will retain possession of the silk trade in Asia, provided they do not act in such a way as to render this monopoly absolutely intolerable; in which case they would have to fear that the Government would make up for the lack of means and energy of merchants, by, as the phrase goes, "doing something" itself. At present the English supply France with about one-half of the foreign raw silk she receives. The quantity she took out of bond for consumption in the first six months of the present year was 1,472,100 kilogrammes (1,472 tons), of the estimated value of 76,181,175f., and of it 719,000 kilogrammes, value 37,254,825f., were from England; 285,500 kilogrammes, value 14,774,625f., from Turkey; 53,000 kilogrammes, value 2,742,750f., from Italy; 500 kilogrammes, value 25,875f., from Belgium; 8,100 kilogrammes, value 419,175f., from the Zollverein; and 405,100 kilogrammes, value 20,963,925f., from other countries. In the designation "other countries" direct imports from British India, China, and Japan are comprised, and some of them also were made by the English.

ACCLIMATISATION OF THE SILKWORM.

The fifth annual report of the Acclimatisation Society contains the following interesting account of the efforts that are being made to naturalise certain species of the silkworm:—

THE AILANTHUS SILKWORM.

The hope expressed in our last report, that experiments with the *Bombyx cynthia* would be carried a step further during the spring of the present year, has been fulfilled; and another step in advance would have been gained but for a series of untoward circumstances. In spite of these accidents, however, the essential fact is established, viz., that the *Bombyx cynthia* is capable of free propagation in the open air in this climate, and that in the proper season the supply of its natural food is without limit. Moreover, much experience has been gained in spite of failure, and perhaps in consequence of partial failure.

In the month of October, 1863, ten cocoons, which had been spun in Mr. Willis's nursery grounds, were carefully collected and preserved. On the 11th of March ensuing, Dr. Collings, who has great experience in the management of silkworms, and was provided with a couple of ailanthus shrubs, kindly undertook the charge of the above-mentioned cocoons. The following note gives details of his proceedings:—

Wednesday, 23rd June, 1864.

"My dear Dr. Hoskins,—Our experiment with the ailanthus silkworm has come to an untimely conclusion. Yesterday evening I was in possession of thirty-nine fine worms already commencing their first change. This morning only one can be found, and that one lying in a disabled state upon the ground. The cocoons you brought to me I left in my study facing south, and on the 18th May, after several warm days, I found that three moths had already come forth; one of them was dead, with its wings undeveloped and imperfect; another, judging from its battered appearance, had been out some days, and was very languid; both of these were males. The third, a female, was in full vigour and quite perfect, but on the 20th her wings were battered, and her activity diminished, nevertheless she commenced laying, but her eggs were unimpregnated.

"On the 21st another fine female appeared, and on the 22nd an active male. In a few days the former laid many eggs, which were perfectly fertilised, and on the 12th June these eggs began to hatch.

"Some difficulty was experienced for the first few days in feeding the worms upon leaves detached from the trees; many of them died in consequence of the rapid withering of the leaves, although standing in water. On the 16th June I therefore placed the remaining worms upon a tree. The more vigorous soon sought appropriate places, and began to feed heartily, the weaker died and dropped off. The worms which survived attached themselves to the under surface of the leaves, and were protected during heavy rains which fell about this time. I afterwards placed the tree in the conservatory, which is cool and well ventilated, but, unfortunately, a pair of robins had built their nest in a citron tree against the conservatory wall, and, not discriminating between the *Bombyx cyntha* and the common worm, destroyed all our hopes and expectations.

"Adolphus Collings."

As a set-off against these disappointments, a fresh supply of eggs, which had been procured for us by the Council, was received by the Honorary Secretary of the branch on the 17th of last July. A portion of this welcome and timely consignment was placed at once in Dr. Collings's hands, and the remainder was committed to the care of Mr. Willis, who conducted the first experiment so successfully, and, in anticipation of a fresh crop of worms, had planted several rows of ailanthus shrubs.

On the 1st of August about twenty-five fine worms were placed upon the shrubs, and carefully protected by means of gauze netting. They began to spin on the 20th of the same month, and continued to do so, unaffected by a strong gale and heavy rain which occurred on the 24th of August.

On the 7th of September ten cocoons were gathered; another was found a few days after on an ailanthus, at a considerable distance from the hedge, but close to the spot on which the worms were placed last year; three more were obtained on the 21st, and the whole, amounting to fourteen cocoons, were preserved.

The eggs entrusted to Dr. Collings hatched in due course, and the worms were placed on shrubs in his conservatory. But another enemy, in the shape of ants, destroyed all the worms that he had reared, except one solitary individual, which spun a cocoon in great perfection.

Two of the fourteen cocoons produced in the open air were unexpectedly developed into moths as early as the 23rd of October, and in a few days another moth made its appearance. From these three precocious moths a number of fertilised eggs proceeded, and are carefully preserved in a cool place by Dr. Collings. On the chance of any worms being hatched prematurely, a few ailanthus shrubs have been planted in a forcing-house.

The plan originally adopted by Mr. Willis, that of planting the ailanthus so as to form low thick hedges, is by far the best, as the worms are enabled to wander from one plant to another, and the whole can be easily protected by means of horizontal piles, supported by cross stakes, over which netting can be spread and secured so as to form a sort of tent. This plan is found to be the one subsequently recommended by Dr. Forgemol to the French Société d'Acclimatation.

As the result of our own experience, it may be proper to state that the cocoons, during their formation, should be carefully watched, and removed from the plants as soon as ever the spinning process is completed. If allowed to remain longer than ten days on the shrubs after spinning has begun, the cocoons shrivel and lose their vitality. The open-air experiments are fortunately the most successful.

THE YAMMA-MAI SILKWORM.

Through the kindness of Monsr. Ramel, a consignment of the eggs of the Yamma-Mai silkworm has been received by Mr. Bush. These worms feed upon the leaves of common oak. The season is as yet hardly advanced enough to report with any certainty upon the probability of their succeeding in this country, but they have hatched out very healthily, with a vigorous appetite for oak leaves, showing a decided preference for the English oak, which, with the indefatigable and skilful care of Mrs. Bush, promises successful results, as far as a small number can indicate.

THE BOMBYX ATLAS.

The silkworm culturists in France announce the birth or hatching of the larva of the *Bombyx atlas*, an enormously large silk moth. This gigantic moth has never before been seen alive in Europe; and if it can be introduced into France it will prove of the greatest commercial value. Its cocoon is extremely large, and weighs nine grammes, whilst those of the ordinary worm do not exceed two grammes in weight. The grub lives on the leaves of a species of barberry shrub.

The Chinese.—The Chinese mind, like the horse in a mill, is ever treading the same dull, narrow round, which has been trod for ages; it is harnessed to the routine explored by successive generations. Will not a day of emancipation come, and fields be explored which have hitherto afforded no temptation to curiosity or inquiry? Must it not be discovered, even by the proud possessors of the central heaven-favoured land, that there is something to be learnt in the outer regions, and from the barbarous races? Will not a blind deference to the authority of the past be superseded by dawnings of light from the present and future? China is now, as Europe was for centuries, under the domination of her schoolmen. One great mind sufficed in Britain to lay the foundation of a new philosophy—the philosophy of inquiry, of investigation, of experiment. It said, "Let authority be barren; let experience be fertile." A single imperial mandate might suffice to give a new direction to the studies of a third of the human race. Useful knowledge and practical science, uninvited and even discouraged by the highest authorities as not belonging to the domain of public instruction, are not without representatives in the ingenious productions of Chinese industry; and these productions are evidence of great aptitude for improvement which may hereafter be called into full activity. The imitative powers of the Chinese have always been subjects of admiration.—Sir John Bowring, in the *Shilling Magazine*.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

Rotterdam, Aug. 14.

There is no news of great importance; the King still remains at Lucerne, and all the Ministers have left the Hague, making a proper use of the dead season. The favourable news received by the last mail will enable the Minister of the Colonial Department to stay some time longer at Kissingen. Mr. Thorbecke has left the Hague for Dresden, to be present at the great musical festival; and Mr. Betz also is gone abroad, so that the Budget for 1866 is no doubt already determined on in principle. The Minister of War is making a tour of inspection through Holland, while Mr. Huysfe van Kattendyke has not yet returned from his very long absence.

H.R.H. Prince Frederick has gone with his family to Ischl, the Austrian watering-place; he will return before the 24th, on which day the obelisk will be inaugurated at Scheveningen, which is to be placed on the spot where Prince Willem (King Willem I.) landed in 1813, on his return from his exile in England.

On the 9th August, at a shooting-ground near the Hague, experiments were made with 16-inch rifled cannon on armour plates of 4½ inch (English). The results were most satisfactory, the projectiles used being manufactured after the plan of Mr. W. de Fremery, Inspector of Marine Artillery, and constructed of hard iron in the Government foundry at Delft. These projectiles are found to be not only equal to, but even better than those constructed in the well-known manufactory of Krupp, at Essen. The projectiles were partly formed like the ordinary shells of the Whitworth system, and partly like fire-grenades filled with phosphorus. All the projectiles pierced the armour plates, and destroyed the thick oak frame to which they were attached. By the fire-grenades the frames were entirely set in flames, and such a phosphoric vapour was occasioned that it was quite impossible even to remain in the neighbourhood of it.

Digitized by Google

It is stated that a single projectile of this kind is sufficient to force a ship to surrender. It was observed that most of the projectiles that struck the plates were found to be not at all hurt or damaged by the concussion. It is intended to continue these important experiments on a large scale.

Some days ago Mr. Verloren read a paper at the Royal Academy of Sciences about the cultivation of the new Japan silkworm (*Bombyx Anthera—Yama mayu*), in which he stated that, after experiments, he had come to the conviction that it was impossible to breed the insect, because it was of an unfavourable species. A correspondent writes to the *Spectator* that the Verloren verdict is very wrong, and that it was neither the Dutch climate nor the unfavourable species (millions of the cocoons are produced in Japan that caused the failure of the experiment) but that it was rather bad treatment and the bad condition of the eggs, when imported, that interfered with the prosperity of the *Yama mayu*. From the 89,000 eggs imported in 1864–65, which, according to the pamphlet of Kitasawa Sihoo, translated by Professor J. Hoffman, were not of a fine description, only one hundred to two hundred cocoons were produced. Another attempt, however, will be made to import the seed of the *Yama mayu*, and notwithstanding the great difficulties, the correspondent thinks that within ten years the cultivation of this worm will prove of great benefit to Dutch commerce.

COMMERCIAL.

Coffee.—The 85,412 b. offered by the Trading Company at auction were all sold at improved prices; good ord. Java was paid with 45 to 45½ c. The brown sorts, however, were paid with 3 to 4 c. under last sale's prices; the blue and green sorts were sold at taxation. Since the auctions the demand has been animated, and the following lots were sold: 2,750 b. Java, ex Hendrina, at secret prices; 3,000 b. Padang ex Isaac da Costa at 45 to 48 c., 1,130 do. ex Maarten van Rossum at 45¼ c. besides a cargo Santos, ex L'Etoile du Nord, at various prices.

Sugar (Raw).—At somewhat declined prices, 4,000 kr. were sold during last week, and in proportion 1f. to 1½f. under July prices were paid.

Tea.—There is some inquiry for consumption, and several lots are imported from London.

Spices.—Without transactions, in consequence of the auction of the Trading Company, on which occasion a greater quantity will be offered than the trade wants.

Rice.—About 6,600 b. Java table, ex India, were sold at 10f. to 15f.

Indigo.—Very firm, and an advance of 25 c. was willingly paid.

Java Tobacco.—The trade is dull, the trade being occupied inspecting the parcels which will be offered to-morrow, and which amount to 11,038 b. of different marks.

Cotton.—The market was animated since the auction of the Trading Company, on which all was sold at the following prices:—1,000 bn. Tinnevelly fair, 66½ to 67¼ c.; 652 bn. Japansche good fair, 68½ to 69½ c.; 700 bn. Comptah good middling, 59½ to 60¾ c.; 144 bn. Ned. Oost-Indische fair, 45 to 45½ c.; 67 bn. do. (Sawginned) fair, 44¼ to 45¼ c.; 60 bn. do. (Sawginned) fair, 40 c.; 83 bn. do. (Sawginned) middling fair, 40 c.; 13 bn. do. inferior, 31 c.; 8 bn. do. inferior, 15¼ c. Since several parcels East Indian were sold.

Hides.—The 233 p. East Indian ex Maarten van Rossum were sold at 26½ c. On the 18th, 4,852 p. Ox, and 124 Buffalo will be offered by inscription.

Tin (Banca) dull, and without transactions. The nominal quotation is 55½ to 56 c.

Drugs.—Cubeben can be had at 47c. to 48½c.; Cassia Lignea is paid with 56c. to 57c.; Cassia Vera with transactions in the 1st and 2nd hand. Gum Benzoin, the lots imported lately are all sold. Gum Damar with more demand; 460 chests imported per Jacoba Christine and Tagal were sold. Gum Elasticum, without transactions, because holders decline to sell under 90f. Gutta Percha: without sales, in consequence of the high prices. Japan Wax: the stock is very unimportant; A without any stock, B 36½f. to 37½f.

Rattans.—Without transactions; in the following week some parcels will be offered.

Money-Market.—Remains in the same condition; the transactions are very dull and prices declined again. Dutch, 2½ per cents., 61⅞; 3 per cents., 72⅜; 4 per cents., 86⅞; Handelmaatschappy, 147⅜. E. I. Bank, 80; E. I. Railway, 91¼; Bank Discount 3 to 3½. Open market 3½ to 4 per cent. Changes on London 3 mo., f.11.79; 2 mo., f. 11.83; short, f.11.91½; Paris: 3 mo., f.46.95; 2 mo., f.47.05; short, f.47.25. Hambro': 3 mo., f.35; 2 mo., f.35.11; short, f.35.35.

Shipping.—Arrivals.—Aug. 6, at Texel, from Batavia, Java Packet; 8, at Brouwershaven, from Batavia, Dordrecht; 11, from Samarang, at Texel, Johanna Kalumez; 13, at Brouwershaven, from Banjoewangie, Rudolph, Ida Wilhelmina.

Departures.—Aug. 6, from Brouwershaven for Sourabaya, Boni; from Texel for Batavia, Anna Digna; for Sourabaya, Bellatrix; for Singapore, Bernard and Agnes; for Japan, Herman Maria Elizabeth; for Padang, Helena; 10, from Brouwershaven for Batavia, Hugo Grotius; for Samarang, Bilderdyk; from Zierikzee for Batavia, Jan Daniel; 11, from Brouwershaven for Batavia, Robertus Hendricus.

PASSENGERS OUTWARD.

For Java.—Per Anna Digna: Mr. J. B. Auervest and family, L. Schneithers, F. C. van Nes, M. H. Vis, and 125 soldiers.

PASSENGERS INWARD.

From Java.—Per Eva Johanna: Mr. P. C. Wynmalen, Mr. W. Tadema. Per Dordrecht: Messrs. Stock and family, Clingnett and family, Jansen, Parker de Jonge, Broehmaur, Barinky, Canter Visscher, Mrs. Meyer. Per Regina Maris: Messrs. Kornel, Annemaet and family.

Rotterdam, August 24.

La politique chome; the newspapers contain absolutely no news. A very large portion of mankind are snatching some sort of holiday—here the public enjoyed in full the "Kermes." The Houses of the States General are empty; the Law Courts are deserted; a death-like stillness prevails in the Stock Exchanges; the great retail tradesmen have almost suspended business for a while; everybody who can is on the move; no one works unless obliged. As nothing is being done, your correspondent has nothing to record.

One thing, however, troubles the peace, prosperity, and happy position that prevails, viz., the cattle disease, which first showed itself among the dairy cows in the neighbourhood of our city, and which is said to be extending itself into the provinces. This news has excited considerable alarm throughout the whole country. The Government is aware of the importance of the subject, and is exerting itself, so far as the existing laws will permit its action, to devise means with a view to mitigate and, we hope, ultimately to aid in the extirpation of the malady.

The King is expected to return from his trip on the 2nd of September. Baron van Hall, who was very ill, is now in a fair way to recover his health.

COMMERCIAL.

Coffee.—The market was steady, and in the last days with more demand. The following parcels were sold: 2,032 b. Java, ex Hendrina and Wilhelmina Johanna, at different prices; and 1,000 b. Java, ex Luconia, at prices that did not transpire. In auction 233 b. Java were sold: Triage at 22½c. to 38c.; 351 b. Santos at 32½c. to 40½c.; and about 900 b. do. damaged at 31½c. to 35½c.

Sugar.—Raw: About 6,000 kr. Java were sold at unaltered prices, viz., 1f. to 1½f. under July. Refined: Dull, in consequence of the dullness on the foreign markets.

Tea.—Dull, and unaltered.

Rice.—With more inquiry. 6,630 b. Rangoon, ex Macassar, were sold at 7¼f.; 9,475 b. Necrausie, ex Diana, at 7f.; and 1,200 b. do., ex do., at 7¼f.; Java, 8½f. to 11f.

Spices.—Without transactions; in waiting for the auction of the Trading Company. Cinnamon, No. 3, with inquiry at 100c.

Tobacco.—The market is unaltered. The 650 p. Java H and A Kedirie offered at auction were sold at 53 c., the 179 p. Java Blitar at 70⅞ c. The 105 p. Manila were partly sold at the following prices;—1a from 125 to 146½ c.; 2a to 117 at 125½ c.; 3a to 53½ at 58 c.; in the first days of the following month considerable quantities will be offered in public sale. To-day 592 p. FHS ex Electra were sold. Price unknown.

Hides.—367 p. E. J. ex Maarten van Rossem, 233 p dam. ex do., 625 do. ex Catharina Maria and 881 Buffalo ex Hendrina were sold.

Java Indigo.—With a good demand, and several lots were sold at former prices; with several ships about 500 ch. were imported, which will be offered on the forthcoming days. On the 26th and 28th Sept. the Trading Company will offer in public auction 775½ chests Java Indigo, 540 chests Bengal Indigo and 69 chests Java Cochineal. The Java Indigo is valued at 25 cents above the prices of the last auction, and the Bengal Indigo is valued after the last London auction.

Banca Tin.—Lower again, in consequence of the London market, were Banca is paid with £90. 500 slabs Banca were sold at 55¼f. and 500 slabs at 54½f.

Gutta Percha.—105 pic. ex Padang packets were sold.

Rattans.—400 pic. ex L. A. Lang were sold.

Shipping.—Arrivals.—Aug. 15, at Brouwershaven from Banjoewangie, County of Renfrew; 14, at Texel from Tjilatjap, Herman de Ruiter; from Padang, Antelope; 15, from Batavia, H.M.S. Adolf Hertog van Nassau; from Tjilatjap, Schelde; at Zierikzee from Batavia, Jacob; from Banjoewangie, Hollandia; 16, at Brouwershaven from Sourabaya, Henr. Elise Susanna; 21, at Texel from Banjoewangie, Theodora Machtelda.

Departures.—Aug. 20, from Brouwershaven for Batavia, Johanna; from Zierikzee for Batavia, Cornelis Wernard Eduard; 22, from Texel for Padang, Anna and Jeannette.

PASSENGERS INWARD.

From Java.—Per Ouderkerk and Amstel: Messrs. Rietveld de Brou, Sutherland, Moore, Doyen, Mrs. Radys and family, Mrs. Winters and family, Miss M. van Elk; the families Hoorn, Browver, Swart and Retel. Per Johannes Anthonius: Messrs. J. M. van Seventer and family, A. Broringmeyer, F. N. A. Mugge, F. Kamph, Mrs. Kieven-Versteegh. Per Maria Anna: Messrs. E. K. A. de Neve, J. Walraven and Mulder. Per Henriette Elisabeth Susanna: Messrs. F. A. F. van der Valk, J. Roeloss. Per Hollandia: Messrs. van der Roess and family, Uljée and family, Van der Linden, Schroder, Grolmar. Per Jacob: Messrs. J. F. Eyzendoorn, H. Bos Offer, Mrs. van Sinten, Francis. Per Cornelius: Wernard Edward, Mrs. G. Suermonds and family, Mrs. Sythoff and family, Mrs. Greef, Messrs. J. W. van Leeuwen and family, W. E. van Kervel, D. A. de Hoog, H. Sponhoff, G. K. Pik, A. K. H. Klokke, K. J. Jimmerseel, Van Ommeren, Steensra, Tonsfaint and Bille Dunge.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

August 14.

In my last letter I sent you some statistics of the general trade of this port last year, and now proceed to lay before your readers some particulars of our special commerce with the Far East.

The goods imported direct from China were of the value of 1,070,290 marks banco (showing a great falling off against 1864, when the value of the imports was 2,363,710 m. b.), principally from the insignificant quantity of tea, which was only 3,294 chests, against 16,264 in 1863. The most important of the other items are 16,164 chests and 610 bales of cassia lignea, value 569,300 m. b.; 5,633 bags of raw sugar,

Digitized by Google

70,940 m. b.; 1,156 chests of candied ginger, 24,370 m. b.; 44 chests of galls, 2,200 m. b.; 300 bales of galanga root, 4,710 m. b.; 300 chests of star annis, 33,280 m. b.; 156 chests oil of cassia, 63,640 m. b.; 270 chests oil of star annis, 76,320 m. b.; 70 chests of silk manufactures, 41,750 m. b.; and 170,000 canes, 12,190 m. b.

From the Philippine Islands were imported 36,830 bags of sugar, of the value of 284,800 marks banco, and 200 bales of hemp for 8,610 m. b., making a total of 293,410 m. b., against 538,170 in 1863.

From Netherlands India 9,280 bags of rice, value 63,300 m. b., 6 casks of nutmegs, 6 pipes of arrac, 155 chests of gum damar, 800 bundles of rattans, and 80,137 canes, of the aggregate value of 85,950 m. b., against 403,370 in 1863.

From British India 104,327 bags of rice, value 1,006,210 marks banco, 103 chests of ginger, 213 chests and 818 bales of terra catechu, 66 chests of shellac, 54, 816 hides, 428 casks of cocoanut oil, 13,635 bundles of rattans, 42,680 packages of cocoanut coir, and a few other items, making a total value of 1,446,380 marks banco, against 1,908,040 in 1863.

From Singapore the imports were too insignificant to enumerate the articles and quantities; suffice it to say that the whole value was only 36,140 marks banco, against 414,110 in 1863.

But though the foregoing shows a fearful falling off in the direct imports, there was a considerable increase in the indirect supply of many articles of China and Eastern produce contained in the following table extracted from the returns:—

Article	Quantity	Value in Marks Banco.
Coffee	737,916 centners	34,138,620
Tea	24,474 „	2,549,240
Raw Sugar	446,533 „	8,107,690
Rice	397,384 „	3,043,770
Sago	6,440 „	97,100
Arrowroot	1,028 „	27,410
Pepper	15,843 „	369,610
Cassia Lignea	13,140 „	753,830
„ Flores	327 „	64,110
Cinnamon	1,174 „	123,210
Cardamoms	448 „	159,170
Cloves	4,273 „	96,470
Mace	562 „	44,760
Nutmegs	397 „	27,520
Vanille	50 „	63,120
Ginger	4,404 „	147,770
Vermilion	502 „	88,560
Musk	117 lbs.	28,320
Rhubarb	189 centners	56,010
Galanga Root	500 „	7,210
Cassia Vera	714 „	26,890
Star Annis	555 „	52,530
Cubebs	90 „	7,030
Camphor—Raw	3,078 „	209,800
„ Refined	93 „	9,530
Gutta Percha	435 „	63,680
India Rubber	7,981 „	713,760
Castor Oil	969 „	34,210
Oil of Annis	15 „	13,080
„ Cassia	151 „	102,940
„ Cloves	295 „	41,920
„ Star Annis	376 „	185,700
Mother-o'-Pearl Shells	6,240 „	74,870
Tortoiseshell	18 „	18,540
Palm Oil	32,542 „	784,920
Cocoanut Oil	50,469 „	1,435,710
Rattans	28,519 „	555,780
Canes	5,394 „	92,440
Cocoanut Yarn	2,195 „	41,930

COMMERCIAL.

COFFEE.—Common descriptions, which of late have been much neglected, are now again in favour, and gave rise to considerable dealings for shipment. The result of the Dutch sale is considered satisfactory, and has tended to strengthen the market. Sales, 13,000 bags.

SUGAR.—There have been transactions to a moderate extent at former prices, business being confined to West India descriptions. Refined firm; 15,000 loaves changed hands.

RICE.—In fair request at full prices.

SPICES.—No alteration to report.

SPELTER.—This metal is dull of sale, and a shade cheaper. There is, however, but little to be had, as the principal holders are by no means anxious to sell, and keep out of the market in the expectation of a favourable reaction shortly. Nominal quotation for Silesian, in slabs, 14⅛ marks banco.

AUG. 23.

The Prussian Consul at Bangkok has sent home to his Government the *exequatur* or official document recognising his consular capacity in Siam, which, from the singularity of its ornaments and the richness of the covering, is considered such a curiosity that it is exhibited for the inspection of the public in the Royal Court at Berlin. It purports to be granted by "the King's Tribunal of Amant-Samagome, in the city of Satne-Corinder-Mahindrayuddhia, Bangkok, in the Kingdom of Siam, on Friday, the fifteenth night of the moon of the month Magh, of the third month of the cold season, in the year of the Rat of the sixth decade of the Siamese æra 1226." The first leaf is composed of gold paper embroidered with gold thread and silk, and at the head of the document are imprinted the three Great Seals of State, below which is the impression of the Royal Seal with the white elephant. It is rolled up in the form of a scroll, and wrapped up in a covering of silk interwoven with gold, the whole being enclosed in a box curiously carved and painted.

According to the treaty of 1861, concluded between China and Prussia, for herself and in the name of the German Zollverein, it is stipulated that each of the high contracting German States shall have the right of appointing a consul-general in China and a consul for each of the ports and other places opened by the treaty. But as in such cases only one consul can act as the representative of the Zollverein, it being agreed that that official shall be a salaried consul invested with the rights of jurisdiction and protection and precluded from engaging in mercantile transactions, the Government of the Grand Duke of Oldenburg—who is a member of the Zollverein—looked upon it as a matter of course from the very beginning that the appointment of the consuls should devolve upon Prussia, although there is nothing to that effect stipulated in the treaty itself, nor in the preliminary negotiations. Oldenburg has now, however, come to an understanding with Prussia on the subject, and in the last number of the official *Gazette* a ministerial decree is promulgated giving public notice that the Oldenburg consulates in China are abolished, and their rights and functions transferred for the future to the Consular representatives of Prussia. All Oldenburg subjects, and especially seafaring people requiring countenance and protection in the Chinese ports opened by treaty, have therefore to apply to the Royal Prussian Consuls. In all cases in which Oldenburg subjects claim the assistance of Prussian Consuls for some reason or other they must conform to the laws and regulations in operation as contained in the official instructions given to those officials, more especially with regard to the payment of the fees of office which they are authorised to exact.

At a late meeting of the Russian Imperial Geographical Society, held at St. Petersburg, Admiral Lutke in the chair, a new map, in six sheets, of the course of the river Sungari was exhibited to the Fellows. It was compiled by M. Simonow, Quarter-Master General of Eastern Siberia, during the expedition sent last year by the Governor-General to explore that river, some particulars of which I sent you in a former letter. The map has been engraved and lately published by the staff at Irkutzk, and the copy exhibited at the meeting, a present from the originator to the Geographical Society, is the first hitherto transmitted to Europe.

The section for Siberia has sent to the Society a tracing of a new sketch map of the country between a place bearing the formidable name of Tsowroukhaitouyefsk, on the river Argoon, and Blagovessensk, drawn by Prince Crapotkin, who was sent with a caravan to explore that part of the Chinese dominions. This journey was interesting in a twofold respect, for it shows the geographical features and astronomical positions of an almost totally unknown country, and demonstrates how useful and important a land communication between the above localities must eventually become, since the water road in descending the Argoon and Amoor is long and difficult for navigation, not to say dangerous, for the bed of those rivers abounds with sandbanks, shoals, and rocks.

COMMERCIAL.

COFFEE.—A better feeling prevails for this article, and the market is steady. Sales of the week 15,000 bags, arrivals 37,318 bags.

SUGAR.—Raw continues in a state of calmness. Of refined 18,000 loaves were sold and realised rather better prices.

RICE quiet, but not lower.

SPICES.—There is more demand for Cassia Lignea, which has in consequence undergone a trifling improvement. Ginger is firmer. In Pepper there have been some lively transactions, among which were 7,000 bags of Singapore, part ex warehouse and part for arrival at 3¼ to 3⅜ Sch. Bco., and 1,800 bags of sifted Penang at 3⅛.

TEA.—Purchases have chiefly been made for consumption, the only parcel that changed hands for shipment being 517 chests of Japan.

SPELTER.—A further decline in prices has induced buyers to come forward and operate, which gave some liveliness to the market, last week so stagnant. Among the sales reported are 1,000 centners afloat at 14.9, 4,000 centners deliverable in September and October at 14.10, 1,500 do. do. at 14.9, and 3,000 do. for arrival at 14.9½. The market closes firmer, and prices are looking up.

SHIPPING.—ARRIVED.—August 12, Dannebrog, from Singapore; 14, Carl, from Akyab; 16, Melissa, from Singapore; 19, Carl Julius, from Singapore, and India from Bassein; 21, Albert Edward, from Rangoon.

SAILED.—August 10, Frisch, to Singapore.

LONDON, MONDAY, AUGUST 28, 1865.

THE OPENING OF THE TEA SEASON.

Never was the truth of the old saying "ill news travels apace" more completely verified than it has been in the tenor of the telegrams which come to us from the tea-shipping ports in China. The newly opened telegraphic communication with India—which, by the way, is so carelessly and inefficiently managed as to be a source of constant complaint among those who are obliged to make use of it—now brings us intelligence from China in little more than three weeks; and the telegrams which follow each other in rapid succession indicate a degree of recklessness on the part of tea-buyers surpassing even that of last season. This is "ill news" indeed; but there is probably worse to follow. The experience of past years teaches us that when once this spirit of competition is roused, not even the prospect of certain and severe losses is sufficient to impose any restraint on the extravagant emulation it engenders among buyers; in the almost frantic desire to get the first cargoes away, merchants bid eagerly against one another, running up prices until even the Chinese tea-men are surprised and delighted at the paradise which opens itself to their gratified vision. No jealousy of one another, no hot impatience to push the markets exists among *them*, to prevent their reaping the full advantage of the situation. When buyers thus voluntarily open the markets at extreme rates, the native dealers have only to combine together and remain firm to keep prices up, which they do with unvarying success, pocketing enormous profits, and wondering the while at the folly which obstinately refuses to take a lesson even from such dearly bought experience as that of the last two years.

From the disastrous results of last season's shipments we had imagined there was at all events one crumb of comfort to be gathered—in the hope that such a severe lesson would prove a check to that growing tendency towards overtrading which we have more than once adverted to as an evil that threatens the very existence of our commerce with China. It cost us (as pointed out in an article in our issue of 26th January last, headed "Overtrading in Tea and Silk") not much less than a million and a-half sterling in the season 1863-4, and the season just closed will probably show an aggregate deficit of at least one million. So heavily have the losses fallen on some of the most respectable firms, that several have succumbed entirely, while others have found their credit seriously affected. Yet the warning, costly as it has been, is allowed to pass unheeded; telegrams reach us announcing the opening of the present season at extravagant rates—others, announcing a rise to still higher prices, caused by eager competition among buyers—still others, advising a further rise on receipt of intelligence of the reduction in duty (which is treated as being equivalent to a *rise* of 6d. per pound!), later still, we hear "tea and silk active and advancing"—and the latest, dated 29th July, says the markets are still "advancing." The new teas generally are said to be below the average, both as regards quality and condition; the prices are such as lay them down above the opening rates of last season (lower grades two or three taels higher); and these extreme rates will doubtless stimulate the growers to produce a large quantity of second and third crop. How this condition of affairs can be in any way reconciled with the sanguine expectations apparently entertained by tea-tasters at Hankow and Foochow we are at a loss to perceive. One thing is certain, and that is, that before the China merchants can hope to restore the trade to anything like its former lucrative condition, they *must* abandon the delusive idea that by paying higher prices for tea in China they can compel a corresponding rise in home quotations. Mincing Lane is not, and never will be governed by the China markets; and superabundant shipments of high-priced teas can only result in the accumulation of unsaleable stocks which have to be forced off at auction "without reserve," and a depressed state of the home market ruinous to individual shippers and detrimental to commercial credit in the China trade generally.

OUR JAPANESE VISITORS.

The party of Japanese sent to England by the Prince of Satsuma are fourteen in number, consisting of two officers of high rank, an interpreter, and eleven young men of good family and education, who are to remain in England for some years, in order to acquire a knowledge of the English language and an insight into the literature, arts, and sciences which form such important elements in European civilisation. For this purpose they have been placed in the care of Professor Williamson, of the London University, under whose able guidance their studies are already being prosecuted.

The three elder members of this "Satsuma Expedition" (if we may so term it) will only remain in Europe until the end of the present year. Their principal object is to acquire information regarding our system of agriculture and the machinery now so largely used therein, our silk and cotton manufactures, mines, arsenals, &c. For this purpose they have been occupied in visiting, firstly, some of the more important agricultural districts, secondly, the manufacturing towns of Manchester, Birmingham, Macclesfield, &c., and are now on their way northwards to Aberdeen and other places of note in Scotland. Returning thence, they intend crossing the Irish Channel to inspect the Dublin Exhibition, after which they will travel for a short time on the Continent, preparatory to turning their steps once more towards the "Land of the rising sun." Mr. Holme, the gentleman who accompanied them on their voyage from Japan hither, and under whose direction their investigations are being prosecuted, is from his long experience in Japan, and intimate knowledge of the wants as well as the capabilities of the natives, especially qualified to give his *proteges* the most effectual aid in their researches.

The two Japanese Embassies which were despatched to Europe by the Tycoon's Government have, we believe, done little, if anything, towards spreading a knowledge of the wonders of the Western World among the people of Japan. The members of the first embassy on their return seem to have subsided into obscurity; those of the second to have incurred disgrace, in consequence of their having failed to accomplish the political mission entrusted to the m, while all the information acquired was doubtless jealously guarded by the Government, to be used for its own sole benefit. From the visitors sent us by the Prince of Satsuma we may, however, hope for better things. When the three senior members of the party return to Satsuma, the tale which they will unfold to their master cannot fail to have a favourable effect on the mind of that liberal and enlightened Prince, and to give additional strength to the desire he has already manifested to benefit himself and his subjects by foreign intercourse and commerce. Still greater things are to be anticipated from the education in this country of a number of intelligent young Japanese. As they acquire increased proficiency in our language, we may obtain from them information regarding the internal polity of Japan, its social and political economy, which will be of immense value in our future intercourse with that country; and when, after a residence of some years among us, they return to give an account of their experience, they will convey no ordinary travellers' tales, no merely superficial idea of our manners and customs, habits and peculiarities, but will, we hope, carry with them and spread among their countrymen such a deeply-seated conviction of the greatness and superior civilisation of the people among whom they have sojourned, as will win for us an increased measure of respect and confidence from both Princes and subjects. More than this: may not the opportunities they will have of studying the principles of Christianity, and of observing its salutary influence on our social life as well as on our national policy, have a deeper and more lasting effect than the labours of even the most zealous missionaries could produce on the minds of their country-

Digitized by Google

men at home? We think so; and we are moreover firmly convinced that far more substantial benefit will accrue to the cause of civilisation from the private mission sent in so quiet and unostentatious a manner by the Prince of SATSUMA, than would result from half-a-dozen showy embassies despatched by the TYCOON to attempt to persuade European Governments to give up their treaty rights, to fail in their mission, to be a nine days' wonder, and then to sink into oblivion.

NEW THESAURUS OF THE CHINESE LANGUAGE.

AN important addition to Chinese educational literature is announced by the Rev. JAMES SUMMERS, Professor of Chinese in King's College, editor of the *Chinese and Japanese Repository*, and author of some useful minor works on the language. Mr. SUMMERS assumes that there is at present no single work capable of affording to merchants, diplomatists, missionaries, and students all the varied linguistic information required by them about the Chinese and their language, with the exception of Dr. MORRISON'S Dictionary, which was published in 1817, and which is now very scarce and very costly. Mr. SUMMERS proposes to remedy the want thus indicated by compiling (with the aid of other sinologues whose names are not yet announced) a complete "thesaurus" in eight volumes,—comprising six divisions, as follows:—I. An Index-Dictionary, containing *all* the characters arranged according to the radical forms, with their names and brief explanations. II. A lexicon of the 10,000 or 12,000 characters, in ordinary use, arranged alphabetically, with full explanations. quotations, &c. III. A Manual [Dictionary] of 4,000 characters, with combinations, colloquial expressions, &c. IV. An English-Chinese Dictionary. V. An English-Chinese Vocabulary, especially adapted to mercantile and missionary wants, and having a short grammar prefixed. And VI. A Topographical, Geological and Scientific Dictionary, including an account of productions and serving as a gazetteer of the empire. The publication of such a work will necessarily extend over several years, but at least one complete portion will be issued each year. The price of the entire work will be ten guineas.

IMPORTATION OF SILKWORMS' EGGS INTO FRANCE.

IN a late article on the Silkworm epidemic, we noticed a fraudulent practice which has grown up in France, of packing inferior European "seed" in the boxes which have been used by the Acclimatisation Society for importing it from Japan, and selling this as veritable newly imported Japanese seed. Late advices from Paris state that the Ministers of Foreign Affairs and of Commerce have issued a joint decree to prevent frauds which might be committed by the sale of silkworms' eggs, not coming from Japan, being placed in boxes used to import supplies from that country. All French agents in Japan are to be required to affix a special stamp, varying every year, to the boxes destined to France. Instructions have also been sent to the Minister of France at Yedo as to certain precautions to be taken in the transmission of living cocoons and eggs; the same to be communicated to all who may be desirous of such information. The Government, however, in adopting those measures does not intend to guarantee the quality of the eggs imported from Japan, but only their *bona fide* origin.

WHY NOT GROW SILK AT HOME?

(FROM OUR PARIS CORRESPONDENT.)

PARIS, August 24.

As you say, in your article on the silkworm epidemic, the European crop of silk this year is likely to be about the worst ever known; and this is a very serious matter, not only for the poor breeders and the large body of silk buyers, manufacturers, and sellers, but also for the commercial world generally for the ordinary course of trade is interrupted, and large and dangerous speculations are not unlikely to be the consequence. It is perfectly true, as you say, that M. Guerin Meneville, whose disinterested devotion to this question deserves the highest praise, refers the epidemic to the mulberry tree; I have had long conversations with that gentleman at Vincennes, where he has a piece of ground given to him by the Government, had an establishment in which he has reared worms of all kinds. and his opinion is that the epidemic must be classed with the potato and the vine disease, for which no satisfactory theory has yet been produced. But it is very important to add that he believes a change is taking place, or, in other words, that the worms are beginning to return to their normal condition; the principal evidence of this is the re-appearance of that form of disease which always was prevalent, more or less, amongst the worms; in fact, that as some worms are beginning to die naturally, there is good hope that the race is about to resume their natural mode of life. It must also be remembered that this is not the first visitation of the disease, and that it disappeared before as unaccountably as it, came.

Such visitations point naturally, as regards the future, to one thing, namely, the increase of the number and sources of our raw materials. We have passed through a cotton crisis which has given us a severe lesson, and there is no reason why we should not try and do something to prevent future silk crises. We have supplies of new and various kinds of silk from Japan and other places, and M. Guerin Meneville and others have been occupied for a long time in introducing and acclimatising the worms, which feed on the ailanthus, the oak, and other trees, and efforts are being made not only in France but also in America to bring the ailanthus worm into cultivation. The tree itself is not yet generally known in England, but it has been long grown in America, and is becoming common in France; several of the Paris Boulevards are now ornamented with it, and you see it in almost every quarter. It is commonly called in France the *Vernis de Japon*, a fact which requires explanation; it was indeed sent over from Japan as the tree which yields their incomparable varnish, but in error; it yields no gum, and is not even of the family of the varnish tree. But it is very graceful, grows with extraordinary rapidity and yet produces, in France—for I am told that it is not the case in America—very hard and durable wood, moreover flourishing in soil where scarcely anything else will grow. At Vincennes where M. Guerin Meneville has his experimental establishment, the ailanthus grow admirably in a soil which seems composed of stones exclusively; it grows on the boulevards quite as rapidly as the plane tree, and it flourishes on the banks of the railways like a weed. Now the worm which feeds on the ailanthus is a splendid fellow, as long as your little finger, makes a fine cocoon, and yields two or three crops a-year. I have at the present moment in my own possession a few worms, an inch or more long, produced from eggs laid this season. But this is not all. The ailanthus worm does better out of doors than in, after he has been hatched a few days; does not mind rain, against which he is prepared with his mackintosh, in the form of a wax-like powder which covers his whole body; and he will remain on the trees till the frost has stripped them of leaves. These facts are known in England, where a few gentlemen have given a good deal of attention to the subject, but they are not known to the world generally, and I think they deserve to be. M. Guerin Meneville assures me that the worm in question flourishes better in England and Ireland than in France; why then should they not produce their own ailanthus silk? It would be an excellent occupation for women. It is true that it does not wind easily; it is wanting in the gummy matter which causes the filaments of true silk to adhere together; it must be combed; in short, it yields what we call spun silk. But spun silk is a valuable article. India does an important trade in the Fussah-silk, which is the produce of a worm which feeds on the jujube tree in the plains and on the oak in the Himalayas. Moreover, I am informed that after a series of experiments made in France, a mode of winding the ailante-silk has been discovered and will shortly be put in operation.

Those who have not seen the moths of these worms will be startled at their size; they measure between four and five inches across their wings from tip to tip, and are beautifully spotted and striped. But these are small and plain in comparison with the great Atlas moth of India, which measures about six inches each way. This moth has been hatched in France, and I had the giant in my hand the other day, but unfortunately it was without a mate.

It is well for me to add that the official *Moniteur* of the sixth of June last announced the complete acclimatisation of the ailante worms, and gave the names of persons in six different departments of France who were prepared to furnish eggs to those who required them. M. Guerin Meneville, in his "Revue de Sericulture Comparée" gives other names and fuller information on the subject. This shows to what an extent the matter has already been pursued in France.

OUR TRADE WITH JAPAN.

YOKOHAMA.

The following is the report of Marcus Flowers, Esq., dated 21st April, 1865 :—

The statistics of the trade of this port, compiled, as usual, from the best available sources, show an increase in the general business of the port.

Shipping.—In the shipping, as in other respects, the increase in the trade is altogether British. The other nationalities represented here show a decrease of shipping in 1864 as compared with the previous year. This will be seen by the following table :—

Nationality of Vessels.	Arrived.				Departed.			
	In 1863.		In 1864.		In 1863.		In 1864.	
	Vesls.	Tnge.	Vesls.	Tnge.	Vesls	Tnge.	Vesls.	Tnge.
British	100	34,790	139	61,498	100	32,918	141	59,263
American	40	21,102	16	6,817	36	19,557	15	6,567
Dutch	13	3,364	11	4,407	16	4,124	11	4,407
French	7	2,156	6	2,139	7	2,156	4	1,327
Russian	2	598	1	140	2	598	1	140
Prussian	8	2,810	1	459	7	1,877	2	892
Total	170	64,420	174	75,460	168	61,260	174	72,596

The total arrivals of last year, as compared with the year before, show an increase of four vessels and of 11,040 tons; and the departures in 1864 show an increase of six vessels and 11,336 tons. It will be seen that this average improvement is almost entirely owing to the great increase in the number and tonnage of British vessels during last year. The following figures exhibit the steady improvement in the British shipping business at this port during the last four years :—

—	Arrived.		Departed.	
	Vessels.	Tonnage.	Vessels.	Tonnage.
In 1861	87	15,234	36	14,822
1862	65	19,181	52	15,202
1863	100	34,790	100	32,918
1864	139	61,498	141	59,263

The British arrivals in 1864 increased by 39 vessels of 26,708 tons, and the departures by 41 vessels of 26,315 tons. The regular bi-monthly arrival and departure of the Peninsular and Oriental Steam Navigation Company's steam-ships during last year also formed a noteworthy feature in the shipping of this port. One British vessel, the steamer *Yang-tze*, was sold during the year to the Japanese Government for 145,000 dollars.

Casualties.—On the 10th of September the *Fleda*, and on the 29th December the barque *Onward* were wrecked on the coast of Japan, not far from this port. The wreck of the *Onward* was ascribed by a Court of Inquiry to imperfect charts. The master and crew spoke in the highest terms of the kind treatment they received from the Japanese authorities at the scene of the wreck. Beyond these wrecks, and the striking of the Peninsular and Oriental Steam Navigation Company's steamer *Nepaul* upon a sunken rock in this bay in the month of November, there has been no casualities to British shipping on this part of the Japanese coast during that year.

The construction of a dock for the purpose of building and repairing vessels at or near this port is said to be in contemplation by the Japanese authorities, if not by a company of foreigners. At present there is no dock, but such facilities as the coast affords for repairing ships have been given by the Japanese Government when required.

Not the least remarkable and satisfactory feature in the shipping during last year was the great increase in the direct trade between this port and Great Britain. Eight vessels, of 2,638 tons, arrived direct from London and other ports in England during 1864; and 35 vessels, of 15,715 tons, were despatched direct to London and other ports in Great Britain, with full cargoes of raw cotton and other produce. Of these vessels, 33, of 14,723 tons, were British: the other two were Dutch. This amount of direct trade, as compared with that to other ports and places in Europe and America, will be found to be proportionally very large, and might fairly be augmented to the number of twelve vessels more, at least, on account of the cargoes shipped fortnightly direct to England in the Peninsular and Oriental Steam Navigation Company's mail steamships.

In the early part of the year freights were high, being in February and March as high as £7. 10s. per ton to London for silk, and £6. 10s. per ton for tea. About the middle of the year freights fell to £5 per ton for silk, and £4 per ton for tea; and towards the close of the year silk would be carried for £4 per ton, and tea for 3 per ton. Most of the coast and carrying trade was, as usual, between this port and Shanghai, the rate of freight being 3 dols. per picul for silk, and 5 dols. per ton measurement. On the whole the British shipping business at this port during last year advanced very satisfactorily, while that of America, Holland, France, and Prussia declined considerably as compared with the year before.

Trade and Commerce.—The declared value of the commerce of this port during the year 1864 exceeds considerably that of any previous year since the opening of the port. Indeed, the value of the import trade alone is nearly equal to the import and export trade of 1863, and more than equal to the total import trade of the first three years. There is still much room for improvement; and with the growing taste for various foreign manufactures and products, there is reason to think that the import trade will from year to year increase largely.

The exports also show a considerable increase, being almost 9,000,000 dollars, against 5,000,000 dollars of last year. This, however, is not such an increase as the producing capabilities of Japan and the trade capital of this port would warrant. It is difficult to avoid the conclusion that the export trade of the port is still rigorously controlled and hampered by the native authorities.

Although the general out-turn of the trade of last year is hopeful enough in some respects, yet the trade of that period was fitful, and at times very much depressed. Upon reviewing a file of trade circulars and market reports for the year, it appears that during the first half of last year, and until the result of the expedition to Simonoseki, became known at Yeddo, imports were much neglected, and exports were so high in price and so scanty in supply (excepting raw cotton) as to be highly unsatisfactory to foreign merchants, and doubtless so also to Japanese dealers. The success of the expedition to Simonoseki in September was, however, followed by a marked activity in trade, which continued to the end of the year, and no doubt made up the satisfactory general result which the following figures show for 1864, as compared with the four preceding years :—

Year.	Imports.	Exports.	Total.
	Dols.	Dols.	Dols.
1860	945,711	3,954,298	4,900,009
1861	1,478,315	2,682,952	4,161,267
1862	2,576,930	6,305,128	8,882,058
1863	1,595,170	5,134,184	6,729 54
1864	5,445,594	8,997,484	14,441 78

From this general view of the trade I may pass to a notice of the particular staple articles which have commanded most attention.

Imports.—As in past years, the fabrics called camlets figure highest in the Import Return, and show a valuation of more than 1,000,000 dols., or about double that of the year 1863. Other woollen fabrics have been equally well sold, and the result is a large increase of trade in those articles.

The demand for grey shirtings, chintzes, prints, velvets, and other cotton fabrics, has been large and steady since the revival of trade in the latter part of the year.

While some articles of import, which had been highly favoured by Japanese buyers in past years, were almost entirely neglected during 1864, other articles of import have been introduced, and have found a good market here. Among the former may be mentioned block tin, spelter and lead; and amongst the latter, iron and cotton yarn. These articles have been in good demand, especially iron, at fair prices. The quantity of iron sold during the year has been estimated by a person dealing in it at 20,000 tons. The valuation of grey shirtings is the second, and that of cotton yarn the third highest in the Return Table of Imports; and the figures in each instance exhibit a very large increase over the amount of any previous year. On the whole there has been a large increase in the import branch of the trade.

Exports.—In the export trade, raw silk as usual commanded much attention, and may be said to be the leading staple, though by no means the most remunerative. Indeed, I am informed that purchases of raw silk by foreigners in the latter part of the season 1863-64 were made, more as a mode of remittance for imports, than with a view to any actual profit on the shipnents. There appears to be little room to doubt the correctness of the allegation that the Japanese authorities tamper with and restrict the exportation of this valuable product. In a letter lately addressed to me by the Governor of this port, relative to the sale of ova or silkworm eggs for exportation, that officer avows a restriction on the trade which is in direct contravention of the express terms of the Treaty of Commerce. The quantity, and in some degree the quality also, of the silk exported in 1864 falls far short of that of the preceding year; but the price of the smaller quantity, 12,576 bales, shows an increase of more than 2,000,000 dollars over that of the 23,164 bales exported in the year 1863. This is a very serious matter, the blame of which is laid entirely to the charge of the Japanese Government.

Upon the subject of the silk trade of the port, I cannot do better than embody here *in extenso* the following able letter with which I have been favoured by a well-known resident silk inspector and merchant, J. M. Jaquemot, Esq., than whom no one can be better qualified to treat the subject :—

"Sir,—Agreeably with your request, I have the honour to send you my report on our silk market for the year 1864.

"The first two months of that year were a perfect blank for the silk trade, there was no stock for sale on the market, and the arrivals from the country were completely interrupted.

"In the month of March a few hundred bales were brought down, and business began slowly to revive, but at prices which, to all appearance, were not destined to leave much margin to exporters. The month of April was a little more active, with a continuance of high prices in the face of unfavourable advices from the European markets.

"In the month of May, the Japanese dealers having submitted to some reduction in prices, and reports having been at the same time circulated that the exportation of China silk for the ensuing season was likely to be much shorter than in former years, a very fair business was done, leaving only a small stock of silk on the market, which was completely cleared in June.

"The musters of the new season's produce began to come down in the first fortnight of July, of which about 100 bales were eagerly bought up at high prices. The second fortnight, however, it was stated by the native merchants that the Japanese authorities in the country were interfering with their trade, and no more silk was brought down to Yokohama that month.

"In August the arrivals from the country were limited to about 300 bales, which had been contracted for by some British merchants of this place, and were brought down under the flag and protection of the Daimio of Satzuma. With that exception, the silk trade was brought to a complete standstill. This state of things continued throughout the month of September, without any appearance of the illegal proceedings of the Japanese authorities being removed. Meanwhile, a good many merchants of all nationalities made advances to the native dealers, who repaired to Yeddo and other places in the country, where large stocks were accumulated, and smuggled in some 300 or 400 bales at an enormous risk to themselves, as well as to the foreign merchants who had made advances to them. It is, however, satisfactory to say that, with scarcely any exception, all the money that had been advanced to the native dealers for that purpose were eventually repaid.

"The position of the foreign houses engaged in the silk trade was at that time very painful. The advices from Europe and China left no doubt whatever of the deficiency of the last year's crop in those respective localities, and large orders had consequently been sent to Japan, as being

Digitized by Google

almost the only country from whence an abundant supply could be expected. On the other hand, it was well known here that the crop in Japan had been successful and abundant; silk coming from all parts of the country to Yeddo on the way to Yokohama, agreeably with an established custom, was detained by the Japanese authorities, and had accumulated to the extent of more than 6,000 piculs. The native dealers, whose intercourse with foreigners was thus hampered by their own authorities, were indignant, and made repeated applications to the Government at Yeddo, but to no purpose.

"The restrictions continuing to be severely enforced by the Japanese Government, and threatening to bring the trade of this port to a close, the foreign merchants memorialized their respective Ministers, who repaired to Yeddo in the beginning of October, and made such arrangements with the Gorogio as resulted in all the illegal impediments being removed almost immediately.

"So striking was the relief thus given to the trade of this port, that within the month which followed the visit of the Ministers to Yeddo, upwards of 4,000 bales of silk were shipped, of the value of rather more than 2,000,000 dollars.

"The demand was exceedingly brisk throughout the months of October and November, and was eventually stimulated by a considerable depreciation of the value of the Mexican dollar, large quantities of which had been set to China and Japan in anticipation, probably, of heavy purchases of cotton, which, however, did not take place, owing to the financial crisis which broke out in England in September and October last year. The abundance of dollars on this market, and the limited supply of suitable articles wherewith to make the returns, caused, as above stated, a fall in the exchange of fully 13 per cent. in the short space of six weeks. This reduction, all in favour of the exporters of silk, was unfortunately more than counteracted by the enormous rise which took place in the market value of this staple, to a point not only perfectly unprecedented, but which I feel assured the Japanese dealers, even in their wildest dreams, had never thought to attain.

"The excessive height of the prices brought, at last, most of the buyers to their senses; in December the demand slackened sensibly, but prices remained firm to the close of the year.

"The year 1864 has been remarkable for the intermittent character of transactions in silk, owing to the repeated restrictions alluded to above, and the excessive elevation of prices, as will be seen below. It is not, therefore, to be wondered at that the export of silk shows a poor figure, compared with the two former years. The total export of silk from Yokohama to all parts amounted to—

"12,576 bales* in 1864	..	Value 6,150 000 dollars.
"Against 23,164 „ in 1863	..	„ †9,960,000 „
"And 20,601 „ in 1862	..	„ 6,730.000 „

"In these numbers are not included a few hundred bales, more or less, of inferior descriptions, such as waste silk, floss silk, and nubs and husks, the total of which in 1864 may amount to 500 bales, of the value of 40,000 dollars. The average market prices, quoted below, may be found interesting in connection with the above table of exports:—

—	In 1862.	In 1863.	In 1864.
	Per Picul.	Per Picul.	Per Picul.
Mibush and Sincho	$460	$520	$620
Oshio	420	480	580
Coshio	370	430	530
Hashogee	310	370	480

"The remarks I was called on to make last year on the gradual increase of the market value of silk at Yokohama apply with a much greater force to 1864; whatever may have been the motives which induced the buyers, and there have doubtless been some good ones, it cannot be gainsaid that prices have been pushed up to an extreme, nay, a dangerous point. It may be granted in favour of the exporters that the demand for silk, owing to the deficient crops in China and Europe, was the more urgent, as there was no other country in the world from which a supply could be obtained. It must likewise be allowed that the intermittent character of the arrivals from the country, and their uncertainty, acted as a spur on the energies of the merchants, and fanned their eagerness to secure enough to fill their wants with all possible despatch. But it cannot be denied that the foreign buyers have shown far less discretion than ever in this market, in their dealings with the Japanese. In their haste to secure a supply, at almost any cost, they have put themselves in the power of the native dealers, who feel that they have a hold on them which will not be easily shaken off. They threw away the chance that fell in their way of a considerable reduction in the exchange, and gave the full benefit of it to the Japanese merchants: that was a great fault, and it will take I know not how many years to repair the mischief. The ruling prices here show now an absolute loss compared with those of Europe. It may be that the growing scarcity of silk in the western world will eventually force up the prices in England, France, &c., to a par with those which have been paid here within the last four months. But it is well known that an extreme elevation in the value of any article is almost invariably followed by a more or less sudden reaction. The value of raw silk has now reached a point in the markets of Europe which leaves scarcely any profit to the manufacturer; can it be supposed that the latter will continue working without any remuneration? On the contrary, I venture to hope that our merchants here will listen to the advices of reason, and stop in the course they are pursuing, in time to avoid further losses and disappointments.

"I have not alluded hitherto to a new branch of the silk trade which had in former years been very slightly developed owing to the difficulties with which it was surrounded by the Japanese authorities, I mean the silkworms' eggs. In consequence of the fatal disease which continues to attack the silkworms in Europe, great efforts were made last year to get seed from this country, former experiments of it having been quite successful. A considerable quantity was shipped, which may be estimated at 200,000 cards, of the value of 200,000 dollars. Should that seed give a satisfactory result in the spring of this year in Europe, I have no doubt that there will be a very active demand for it next season. It is satisfactory to find that the severity of the Japanese authorities, with regard to the exportation of this article, has been lately much relaxed, and that henceforth it may form no inconsiderable part of our exports.

"Small quantities of cocoons have also been shipped from here; but not having kept or had access to any record of the quantities exported, I only mention it here *pro mem.*; at all events, the value of the quantities exported is almost insignificant."

Raw Cotton.—The second article of export which demands attention is raw cotton, of which 64,000 piculs, valued at 1.792,000 dols., were exported, chiefly to England, in 1864, against 46,697 piculs, valued at 426,204 dols., in 1863, showing a greatly increased cost of the article in this market, so great indeed as to have recently led almost to a stoppage of the trade in this export. The native dealers are very firm in their demands, and must have made large profits on cotton as well as on silk during the year.

Tea.—Of tea there is little to be said. Supplies on the whole have been liberal, but prices were maintained so high as to leave no profit to exporters. It is asserted by some resident merchants that there has been a loss on almost every shipment of the article to London during last year. From the private statistics of merchants, it would appear that upwards of 5,000,000 lbs. of tea, valued at about 1,000,000 dollars, were exported at this port in 1864.

In the month of May last, Japanese tobacco was in active demand for exportation, at rates as high as 6 to 7 dollars per picul. This article however, has not become one of much importance in the market.

In Chow-chow articles for the China market the usual business has been done, but not to a greater extent than in past years. In timber and oil, which formed a considerable item in the exports of former years, there was no business done for export in 1864, the prices asked by native dealers being so high as entirely to preclude purchases.

Taking a general view of the trade of last year, it does, I think, appear that the import trade is the most satisfactory to foreign traders, although there is still a balance of trade to the amount of 3,500,000 dollars in favour of Japan.

Exchange.—The average rate of exchange on London throughout the year was, for Mexican dollars, from 4s. 10d. to 5s. for bank bills at six months' sight. In the months of September and October, however, the rate was as high as 5s. 2¼d. to 5s. 3¼d. for bank bills at six months' sight, and still higher for private drafts. In the month of November about 2,000,000 dollars arrived in three ships, and the rate of exchange fell to 4s. 8⅛d., and at the close of the year it was 4s. 6¾d.

The year 1864 will be memorable as that in which every reasonable man in this country must have been convinced of the utter folly of any Japanese Prince or party attempting to dispute by force the rights of foreigners in Japan. All the elaborate preparations and concentrated force of the Daimio Choshiu at Simonoseki were quickly destroyed in September last by the allied squadron; and the good effect of this check to the folly of that Daimio was soon visible in the greatly-improved state of this market. The last year also was, I regret to say, marked, like some of its predecessors, by a barbarous unprovoked murder of foreigners by Japanese. On the 21st November last, Major Baldwin and Lieutenant Bird, both officers of the 2nd Battalion 20th Regiment, in garrison at this port, were murdered at Kamakura, a place quite within the limits of this Consular district. On the 28th December, Shimidzu Seiju, one of the murderers, was publicly executed for that crime at Yokohama.

The foreign population of the port during the year 1864, including those afloat and ashore, might be taken, perhaps, at from 6,000 to 7,000 persons. Independently of the garrison and the fleet, the number of resident foreigners of all classes increased very considerably; and with this increase of population came a very oppressive increase in the prices of provisions, and generally in the cost of living, so as to render this port a rival to Shanghae in its immoderate expensiveness. House-rent in the Foreign Settlement has continued high, notwithstanding that building has been going on rapidly, and new houses coming into occupation.

The number of British residents on the Consular register at the close of last year was 200, of whom 90 were registered during the year. The resident civilians are, with few exceptions, persons engaged in, or connected with, the commercial pursuits of the port. The medical profession is fairly represented in the resident community, and during the year the skill of resident civil engineers became available in the planning and building of houses. At present there does not appear to be sufficient inducement for members of the legal profession to settle here. There are few resident shipwrights, carpenters, blacksmiths, and artisans, as many no doubt as can find remunerative employment in the port.

Sanitary.—The health of this community during the year has, in the main, been good. Some cases of small-pox occurred, and the exertions made to limit the spread of the disease led to the establishment of a small-pox hospital on the Bluffs, outside the Settlement. This institution, under the able management and careful superintendence of Dr. Willis, of the British Legation, has contributed largely towards mitigating and checking the spread of the disease. A Sanitary Committee also, composed of the heads of a few mercantile houses, were empowered to collect and expend small monthly contributions for the purpose of keeping the settlement clean and free from rubbish and offal, which, if allowed to accumulate, would engender disease. Several attempts have been made to form a Municipal Committee; but so far no such body has been elected for the general management of local matters.

Climate.—I am indebted to Dr. J. D. Hepburn, a resident missionary physician, for a copy of his observations on the state of the weather, memorandum of earthquakes, &c., during the year 1864. This information will, no doubt, prove interesting, and I attach it to this report as an inclosure.

Native Town.—The native population has increased very considerably during the last two years. In the beginning of 1863 the resident population of the native town of Yokohama and its suburbs was, I am informed, under 8,000. By a return received from the Custom-house, I find that the native population of Kanagawa, including Yokohama, is at present 18,722, of which about 12,000 belong to Yokohama. Of this number,

* All bales mentioned in these figures may be estimated at the weight of 85 catties each.

† The declared value in the official Return of last year amounts to 4,127,340 dols.—M. F.

Digitized by Google

519 are officials engaged in the Customs and Police administration of this port, and 1,922 are officers and men composing the native garrison and doing duty in the several guard houses. The number of houses in Yokohama-Kanagawa is stated to be 4,482, of which 2,876 are in Yokohama and its suburbs. Of the total native population 9,591 are males, and 9,131 are females. I am glad to observe that in the native, as in the foreign town, building had been sufficiently active during the year to show that the town has been extending and improving. The filling up of the remainder of the marsh or swamp lying immediately in the rear of the town, and which is expected to be completed this year, will be a very important improvement to the settlement in many respects.

Food Crops.—I have heard no complaints of the rice, wheat, and other food crops of last year. There is evidently no want or distress among the people of this district; they all seem to be well employed and to be contented. Their acuteness in obtaining from foreigners the highest possible prices for their produce is quite remarkable. This is effected through combination and reticence in matters of trade; and they certainly have succeeded in running the prices of export produce up to a very high pitch indeed.

Public Works.—A public road about five or six miles in length, and of an average width of thirty feet, had been commenced and almost finished last year. This road runs in a southerly direction from Yokohama, and was constructed by the Japanese Government for the accommodation of foreigners taking recreation in that direction, and perhaps with a view of having the Tokaido less frequented by foreigners. The road in some parts exhibits very respectable engineering ability, and is now quite finished; excepting this, there had been no public work in progress here during the year, and there are no manufactories in this locality. The fishing of the bay and coast employs a good many hands; the agriculture and horticulture of the district engage many others; and the remainder find employment in the sundry pursuits of the town, and in the traffic with Yeddo and other places, from and to which produce and merchandize are brought. The social condition of the Foreign Settlement during 1864 had been much the same as reported to have been during the year 1863. The large number of sailors and soldiers in the port caused spirit-shops to become unexpectedly numerous; the result of this was a great increase in the number of the police cases and criminal charges which came before the Consular Court: 102 cases had been heard and recorded in the course of the year. Some of these were civil suits, arising in the resident mercantile community. The work of the Consulate thus became very heavy for the officers attached to it; and it is to this constant daily occurrence of matters, which demand immediate attention, that I have to ascribe the delay in sending in this report.

I submit this report with the hope that it will be found to contain some useful information, and such as Her Majesty's Government desires.—I have, &c., (Signed) Marcus Flowers.

HAKODADI.

C. Enslie's report on the trade of this port, addressed to Earl Russell, is as follows :—

Hakodadi, January 1, 1865.

My Lord,—Inclosed I have the honour to forward you the trade returns of this port for 1864, and on comparing them with those of the previous year a very considerable increase will be found both in the import and export commerce of Hakodadi.

Notwithstanding the absence of precautionary measures on the part of the Japanese Government to ensure the safety of foreign vessels entering and leaving Hakodadi, the statistics for last year are extremely satisfactory, and show a large increase on those of 1863. During the past year our port was visited by 82 vessels of various nations, 48 of which were British, exceeding both in number and tonnage the total of all the merchant-men which entered Hakodadi during 1863. I would also take this opportunity of drawing your Lordship's attention to the marked increase in British shipping of 1864 over the years 1861 and 1862, in which respectively only 15 and 22 British vessels came to Hakodadi. Few men-of-war, however, called here, the total of 1863 being 12, 2 of which were British, and 10 Russian, whereas only 6 of the latter came to our northern port during the past year, the number of British men-of-war being one less.

This increase would undoubtedly bid fair for the future, were it not for the frequent shipwrecks which have lately taken place. No less than four vessels have been lost within fifty miles of Hakodadi during the last 13 months, 3 of which were British merchant-men. The main cause of these repeated disasters is the danger to which vessels are exposed in coming through the Tsugar Straits, and whatever measures might in future be adopted by the local authorities for the safety of shipping in general, the current in these straits, averaging in calm weather about three knots, will always present insurmountable obstacles to the prosperity of the Hakodadi trade. It is, however, to be hoped that the Japanese Government, appreciating the benefit accruing to them by foreign trade, will, by the erection of beacons or lighthouses at both the entrances of the Tsugar Straits, on the mainland or the coast of Yesso, which is so peculiarly dangerous and deceptive, especially during the winter months, from November to April, endeavour to facilitate the navigation of our vessels, and thereby materially increase their revenue.

It being extremely difficult to state the speed of the current accurately, the following examples will serve as forcible illustrations of the difficulties experienced by vessels entering this harbour. The *Alma* in 1863 made a nine days' passage from Shanghai to the entrance of the straits, and drifting through was 37 days before casting anchor in Hakodadi. The *Waverlet*, in the same year, made a six days' passage, and not wishing to enter this harbour during the night, also drifted to the eastward, and was 43 days coming into port. The *Beaver* left Yokohama in December, 1862, was in sight of Hakodadi, but was compelled to return to the former port after a passage of 43 days. The harbour itself is still in the same state; little has been done for the safe anchorage of foreign ships, although plans of a long talked-of lighthouse to be erected at the entrance of the harbour, near Hakodadi fort, are still entertained. Such an increase in the foreign shipping must be the natural consequence of an augmentation in commercial transactions, and on referring to the comparative table of exports for the last two years, you will perceive that the export trade for 1864 amounts to 414,846 dollars 56 cents, and has, therefore, exceeded that of the previous year by 148,711 dollars 73 cents. The various articles exported from Hakodadi during the last two years have, with one exception, remained the same, although the quantities have increased very considerably. Comboo (seaweed), the principal staple of export, shows an increase of more than 40,000 piculs, representing a value of 150,000 dollars; cut seaweed, also an article of consumption among the Chinese, likewise shows an excedent of 4,400 piculs, valued at 15,000 dollars. The other commodities which have either increased or formed new articles of export are, taking them alphabetically, charcoal, deer skins, ginseng, hotadikaimi, samenhile, salmon, silk, silkworm eggs, sulphur.

Comboo.—The most important article of export at this port during the past year is extensively used by the Chinese, principally as a substitute for salt. It is divided into three sorts, the best coming from Shimaru and Yokadsu, the second quality from Akish, and the third from Kusudri. This article appears in the Hakodadi market throughout the whole year, with the exception of the winter months, and has two crops, the first from September to December, the other from May to August. The average prices paid were:—

1st quality	.. .. ..	2.45 dollars to 3 dollars	
2nd „	.. .. ..	2.40 „	to 2.80 „
3rd „	.. .. ..	2.25 „	

A very considerable increase has taken place in the exportation of this article, but a large stock still remains unsold at Hankow and other ports in China; the prospects for next year are good, and large supplies of this article will be imported from several other parts of the coast of Japan.

Awabee, a kind of oyster, and highly esteemed by the Chinese, has not been exported during the past year to the same extent as in 1863; prices have been very high, and this may partly account for the decrease. The various places whence this article is brought are: the west coast of Yesso, Shendai, Tsugaru, and Nambu. The fishing season commences in March, and, after being dried, this commodity is brought to Hakodadi until November, after which there is a great scarcity.

The prices paid during the past year vary from 17 to 18 dollars, but have now risen to 22 dollars per picul.

Irico, also an article of food for the Chinese, is brought from the west coast of this island. The fishing season is the same as that of awabee, and the prices paid are from 21 to 23 dollars per picul. There is little prospect of an increase in the exportation of the last two commodities as long as large supplies are sent to Nagasaki in native crafts.

Silk has been exported in small quantities, and the prices vary from 430 to 510 dollars. Small lots of good silk still now and then appear in this market, but the native merchants are generally little inclined to incur the risk of sending large shipments in junks across the Tsugar Straits, besides which a very scanty inducement is held out to the small number of foreign merchants residing here. Large purchases have been made in Shendai and Daté by the Kioto merchants, and should this be the case again this year, or the state of the interior of Nipon, at present invested everywhere with strongly armed bands of Ronins, not ameliorate, little hope can be entertained of an increase in the silk trade of this port.

Deer skins are brought to this place from April to August, and come from the north of Yesso; the average price is 13 dollars per picul.

Deer horns have increased in price considerably, in 1863 the prices varied from 3 dollars 50 cents to 4 dollars, whereas 8 dollars have been paid per picul during the past year.

Cuttlefish comes from Esasi, Matsmai, and the west coast of Yesso, Fugaro and Yetzidzen generally during February and October, and the prices paid vary from 14 to 16 dollars 50 cents. During the past year small quantities have been brought to Hakodadi from Sado Island, situated near the west coast of Nipon; it is said to be of a very good quality, and bids fair for the future.

Hotadikaimi, another species of oyster, come from Nambu, and vary in price from 8 to 10 dollars.

Sulphur, exported in small lots last year, is found in large quantities in this island, owing to its volcanic nature. Yessan and Komagataki, two volcanoes within 30 miles of Hakodadi, are the principal places whence this commodity is procured. The average price is 1 dollar per picul.

Oil.—This article of export, principally fish oil, is extracted from herrings, which are caught on the coast of this island and the north of Nipon; the fisheries afford employment to thousands of the Mo inhabitants, and are a source of immense profit to the Japanese, who farm them from the various Daimios, who are charged by the Japanese Government to protect this island. The prices vary from 12 to 14 dollars per picul.

The other kind of oil is extracted from rape-seed, has been exported in small quantities, and averages about 9 dollars per picul.

Tobacco.—Although less was exported during 1864 than in the previous year, still the actual value is much higher, owing to the increase in price, the cost per picul varying from 2 dollars 50 cents to 2 dollars 75 cents in 1863, whereas the prices during the past year averaged 3 dollars 50 cents. This article of export comes from Diwa, Shendai, Nambu, and Yetzidzen; that from Diwa is generally considered the best, owing to the size and colour of the leaves. Mixed with other tobacco it is well adapted for smoking, alone it is however too mild to suit others but Japanese.

Timber.—The Island of Yesso is thickly covered with immense forests, containing numerous kinds of wood admirably adapted for building purposes; oak and ash come from the interior of this island; Shendai and Nambu supply us abundantly with pine. A small export trade has been carried on in this article by one of the foreign British merchants at this port, who has also erected a steam saw mill. As yet little business has been transacted with the Japanese, but there can exist no doubt that the endeavours of the head of the West Pacific Company will be ultimately crowned with a brilliant success, and that the Japanese will speedily appreciate the immense superiority of machinery over manual labour. The machinery in the mill consists of one frame saw, two circular saws, and one tree-nail machine. The engines are 15-horse power (nominal), and the amount of work done per diem is 6,000 lumber feet. The timber exported from Hakodadi is:—

1st. Softwood: Consisting of two species of pine, costs 15-100 boo per cubic foot for logs not over 14 feet in length, if longer much more expensive; price of sawing is 7 dollars 50 cents per 1,000 feet.

Digitized by Google

2nd. Hardwood: Oak, ash, beech, &c., the average price is 35-100 boo per cubic foot, sawing expenses 10 dollars per 1,000 feet. No difficulty has been experienced in obtaining timber, and the Japanese are exceeding apt at learning the manner of working the machinery.

Public Works.—With the exception of two forts, one at the entrance of the harbour, the other at Kamida, about three miles from the town, and now the residence of the Governor, nothing has been undertaken by the local Government for some years past to promote the prosperity and welfare of the inhabitants of this island.

Agriculture.—The geographical position of this island renders it impossible for the native inhabitants to undertake any very extensive agricultural operations, and carrots, turnips, potatoes, and peas, are the only things which Yesso produces.

Mining.—Several mines are at present being worked in this island, although, owing to the primitive system adopted by the Japanese, they are of little importance. A new coal mine has lately been discovered in the neighbourhood of Iwanai, in the north-west part of Yesso, it is said to contain coal of a very good quality, and, if properly worked, might produce coal very far superior to that of the other parts of Japan. This mine is the first one worked according to European system, and promises fair for the future.

The native population of this port is very fluctuating, but on comparing the various statistics received I am led to suppose that it averages about 45,000.

Insurance.—In the interest of all the foreign residents at this port, it is much to be regretted that up to the present time no Insurance Company has established a permanent agency here.

Imports.—A very considerable increase has taken place in the import trade of Hakodadi; the statistics for 1863 show a total of 5,132 dollars, whereas during the past year the Custom House returns amounted to upwards of 90,000 dollars; adding to this 20,000 dollars for merchandise, which being reimported from Yokohama and Nagasaki paid duties at those ports, and does not appear in the Hakodadi Custom House returns, an increase is obtained of more than 100,000 dollars. Prospects of a still larger import trade are held out for this year.

General Remarks.—Having thus noted the various mercantile transactions of 1864, I now have the honour of submitting to your notice a brief account of the circumstances under which they took place.

The local Government of Hakodadi with regard to the foreign interests at this port.—Ever since Hakodadi was opened to foreign trade, numerous and endless complaints have continually been made against the native authorites. Most prominent amongst them is the laxity and indolence with which business is conducted here by the native officials, nowise ameliorated by the bad example set by the Governor, who, since his change of residence to Kamida fort, only comes to Hakodadi on business once a week; no request, however urgent, or business, however pressing, can bring him to the Custom House on any other day except Monday, and this must naturally greatly impede the transaction of business in cases which require the presence of the Governor. The apparent indifference of the Governor for foreign interests at this port, and his repeated assertion that the governance of the affairs at Yesso demand his presence elsewhere, are urgent causes for a speedy change in the manner in which affairs are conducted here. Another great cause for complaint is the glaring partiality displayed by the native authorities towards the Japanese in their commercial and private intercourse with foreigners. Notwithstanding the repeated remonstrances of the Consuls, the old system of advancing money on contracts still exists, and continues to be a source of considerable losses to foreign merchants' as in cases of non-fulfilment of contracts no redress can be obtained. One striking instance will serve to illustrate the whole, a Japanese merchant contracted in 1863 to deliver certain merchandise to a foreigner in the commencement of 1864 money was advanced, the contracted time elapsed, but only part of the merchandise appeared. With a view to settle matters amicably, the foreign merchant frequently applied to the Custom House personally, and from May to December he hoped to see the matter settled, owing to the reiterated promises of the native officials, who urgently requested him not to mention the matter to his Consul. At length, however, the Japanese, having in a measure offended against the laws of his country, was seized and imprisoned. It then became an urgent necessity of the British merchant to apply to his authorities, the matter was brought before the Governor, who professed utter ignorance of the case. As yet I am unable to say how this matter will end; owing to the false promises of the native officials considerable time has been lost, the officials to whom the matter was mentioned originally have left for Yedo, and the policy of the Governor justifies me in stating that, justice being a dead letter, the result of my endeavours will in all probability be nil. Not only is Japanese justice at this port one-sided in disputes regarding mercantile transactions, but also in differences which take place, between foreigners and natives in every day life. Numerous instances of theft committed by Japanese upon foreign residents have been brought to the notice of the local authorities, but neither has any justice ever been done, nor the stolen property returned; even in one case when the delinquent was delivered to the authorities he was allowed either through mismanagement or wilfulness to escape.

The greatest of all grievances, and the main bane of foreign trade, is the continual interference of the native authorities with mercantile transactions, and the exorbitant duties which are imposed upon merchandise sold to foreigners. According to treaty stipulations, a 5 per cent. duty is levied on exports, but beside this 6 per cent. is paid on all native produce before it is sold to foreign merchants; of this 2 per cent. is levied by Government on all produce entering Hakodadi, 2 per cent. is also charged by the Toya or agent, and another 2 per cent. is charged by Government on produce when sold to foreigners, thereby giving a total of 4 per cent. for native traders, and 6 per cent. for foreign merchants. One of the native brokers at this port, a person who has considerable influence with the Government officials, owing either to the superintendence of Government monopolies or other causes, has found means to evade the last-mentioned 2 per cent. for foreigners who do business through him, thereby creating privileges for some which all do not enjoy.

Another cause for complaint which has already been brought to your notice is the exportation of Awabee and Nico, articles in high repute with the Chinese, to Nagasaki for sale to the guild, a corporation of Chinese merchants who, without treaty or other rights, are allowed to trade in Japan.

The well-known habits of the Celestials enable them both to pay higher prices in Japan than Europeans, and undersell them in the China markets, thereby doing an immense injury to our commerce.

The depreciation in value of Mexican dollars in Japan, owing to the non-curreney of this coin throughout the country, treaty ports excepted, is another source of considerable loss to foreigners.

Everybody connected either directly or indirectly with foreign trade is not however a loser, for the Japanese Government, to whom nearly all the dollars ultimately come, make from 60 to 80 per cent. by recoinage into Japanese money.

Having thus briefly touched upon the various subjects of interest intimately connected with the welfare of foreign commerce at this port, allow me to say a few words about the present farming system of the various fisheries, &c., of this Island.

Ever since 1854, when the Japanese Government took the control of this island from the Daimio of Matsmai, for which the latter received a pecuniary indemnity and an increase of revenue, several of the Daimios inhabiting the north of the empire, such as Shendai, Fugaru, Nambu, &c., have been charged with the protection of Yesso. To remunerate them in some degree for the additional expenses incurred in the performance of this duty, they were invested with seigneurial rights over the various portions of the island confided to their care. All immediately commenced to encourage the fisheries, which would soon have been sources of considerable profit to them, had it not been for the ignorance or dishonesty of the officers sent to this island, who rented these mines of wealth to native speculators for a mere nominal rent.

This state of things has continued up to the present time, the needy farmers have become wealthy merchants, and the lordly owners have always complained about the useless and heavy expenses, unaccompanied by profit. Now, however, the Daimios commence to perceive their mistake, higher rents have been demanded, and they hope that there fisheries, coming into other and more enterprising hands, will prove more profitable. One example of the price paid for a fishery, and the profits accruing from it, may illustrate the whole. Jamanda, one of the largest farmers, paid a yearly rent of 1,250 rios (1 rio equals 4 boos), his receipts amounted to 70,000 rios, and as his annual expenses did not exceed 15,000 rios, he made a clear yearly profit of 55,000 rios.—I have, &c.,

(Signed) JAMES J. ENSLIE.

NAGASAKI.

The following letter, addressed to Sir R. Alcock, contains Mr. Gower's report on the trade of this port:—

Nagasaki, Jan. 3, 1865.

SIR,—In compliance with your expressed wish to have a kind of memorandum on the trade of this port during 1863, I now have the honour to inclose a copy of the Returns (five in number) which were made for that year, and which I purpose to include in my double Report for 1863-64, which is in course of preparation, and will be sent to the Legation in a few days.

I am sorry there is no material time before your departure to-morrow to complete the Returns of 1864, and thus enable me on facts, namely, on totals, to give a comparative account of the trade during these respective years; but I can safely state that, although continued serious political disturbances greatly affected commerce at this port at that period, the latter year was in general the most prosperous, when also large operations of a new nature were transacted in the sale of steamers, fire-arms, and munitions of war.

The political state of the country in 1863 was at one period of so threatening an aspect as to render foreign life and property in Japan most insecure, and especially so at Nagasaki, owing to its proximity to Kagosima, the capital of the Prince of Satsuma, with whom we were in active hostile relations.

The threatened expulsion of foreigners, and the fear of the native merchants that such would really be the case, caused at different times a sudden demand to spring up for imports, which frequently enabled our merchants to clear off large stocks with facility; but this temporary demand unfortunately subsided as suddenly into complete inactivity as soon as the anticipations of the native dealers with regard to the expulsion of foreigners from the country were dispelled.

The closing of the Straits of Simonoseki again greatly injured the mercantile interest of this port in 1864, this being the depot of exports and imports for the Islands of Kiusiu, Sikoku, and Nipon up as far as the commercial capital of Osaka, native junks being the chief means of conveyance, which invariably chose the safe lake-like route of the Inland Sea.

The principal imports of this port are cotton-manufactured goods, such as grey shirtings, cambrics, camlets, &c., the demand for which is increasing, and we can anticipate will become still greater as the Japanese are now commencing to export so much of the raw material. To these may now be added woollen-manufactured goods. The demand for foreign medicines, in which Dutch merchants principally dealt, has steadily been decreasing.

The principal exports are—

Tea, the cultivation of which is rapidly increasing, and large shipments are now made direct to England.

Vegetable Wax, which is also much cultivated to meet foreign demand.

Raw Cotton, also greatly increased and increasing.

Tobacco.—A considerable business in this article has commenced at very remunerative prices.

Timber formerly was largely exported to China, and increased much the coast shipping; but, owing to the rebellion there having partly been put down, the business in this article has now almost entirely ceased.

So little was done in *Silk*, owing to the great distance from the producing districts, that it is hardly worth while placing this valuable article amongst our principal exports; but there is every probability that under this head will be classed—

Sugar, the cultivation of which is increasing in the Island of Sikoku, and the Prince of Satsuma has sent to England for machinery to manu-

Digitized by Google

facture and purify what is now extensively grown in the Islands of Siu-kiu (Lew-chew).

To the accompanying Returns of 1863 I may add that seven steamers were sold to the Japanese, viz. :—

		Dollars.
March—The Sir Charles Forbes	for	58,000
„ The Victoria	„	22,000
April—The Contest	„	95,000
„ The Shanghai	„	135,000
„ The Sir George Grey	„	85,000
October—The Sarah	„	75,000
„ The Shoey-Leen	„	100,000
Giving a total of		$570,000

In conclusion, I have the honour to remark that owing to the successful re-opening of the Inland Sea, trade is rapidly reviving at this port, and that the general opinion of the Nagasaki trading community is, that there is every reason to hope a very flourishing business will be transacted in 1865.

Not having been at this port in 1863, I am not able now to form a correct idea of the real value of trade during that year, which the inclosed Returns only represent in part; but, to the best of my knowledge and means, I shall endeavour to give all the required detailed information and valuation in pounds sterling in my Official Report for the two past years.

BANKRUPTCY COURT.

(*Before Mr. Registrar* Pepys.)

IN RE CHARLES JAMES NASMYTH.

At a first meeting held under the bankruptcy of Mr. C. J. Nasmyth, of 32, Great St. Helen's, merchant, Mr. R. S. Tomlin, of Bank-buildings, Lothbury, Secretary of the Hindustan, China, and Japan Bank (Limited), was appointed trade assignee. No statement of debts and liabilities has yet been presented, but the aggregate amount may be estimated at £60,000, with assets of unascertained value. The Hindustan, China, and Japan Bank (Limited) is a creditor for £12,240, subject to certain securities.

A New Railway Route.—According to a Florence letter in the *Siecle*, a project is on foot to establish direct railway communication between Italy, Switzerland, and Germany, by a passage over the Helvetic Alps, and a few days ago a committee, named by the Italian Minister of Public Works, began its sittings. The statistics distributed among the members of the committee turn in favour of the St. Gothard as being the best passage in the Alps for establishing more direct communications with Frankfort, Bremen, Lubeck, Prussia, &c. But when this passage is adopted, it will be necessary to find the funds necessary to complete so great a work, as more than 200,000,000f. would be required. It remains to be seen if Switzerland and Italy are disposed to provide the funds for this great undertaking, as no private company would be able to contribute more than 40,000,000f. to the work.

Monetary and Commercial.

Our attention having been attracted by rumours which were lately current regarding the Bank of Hindustan, China and Japan, to the effect that several actions were being brought against that bank by shareholders in the late Imperial Bank of China, arising out of the amalgamation of the two banks, we were led to make inquiries, and are enabled to state that no such actions are pending, and that the reports alluded to are entirely without foundation.

The report of the Oriental Commercial Bank, presented on the 23rd of August, recommends a dividend at the rate of 10 per cent. per annum, which will absorb £5,738, and leave £3,913 to be carried forward.

The report of the English and Swedish Bank for the half-year ended the 30th of June shows an available total of £14,156 (including a previous balance of £2,224), and announces an *interim* dividend of 8s. per share, or at the rate of 4 per cent. per annum, which will leave £6,238 to be carried forward.

Joint-stock bank shares have again shown steadiness, and a rise has taken place in Alliance, Chartered of India, Australia, and China, and London Bank of Mexico. Standard of British South Africa also exhibit a partial recovery. Ionian Bank and Mercantile and Exchange were exceptionally dull.

The *Salut Public* of Lyons states that the quantity of raw silk received in that town is very small. The amount registered there last week was 470 bales, weighing 29,681 kilogrammes, against 1,197 bales, weighing 82,941 kilogrammes, received in the corresponding week of last year. Manufacturers still maintain the same mistrust of the future, and the struggle between them and the holders of raw silk is continued. Manufacturers whose stock of raw silk is not yet exhausted abstain from buying as long as possible, and this abstention has caused a fall of 5 per cent. in the price of some articles, such as thrown silk from Broussa.

The remittances of specie to the East show a decline, the amount engaged for transmission by the steamer *Poonah* on the 27th inst. being only £8,415, of which £6,115 is silver for Bombay, and £2,300 gold for Alexandria.

The India Office give notice that the amount for which tenders for bills on India will be received on the 6th of September will be £250,000, of which not more than £100,000 will be drawn on the Government of Bombay.

A meeting of the creditors of Messrs. Scott, Bell, and Co., East India merchants, who suspended payment in the early part of last month, is called for the 31st inst.

An agreement has recently been concluded for the amalgamation of the Estates Bank with the General Exchange Bank in Lombard-street. The latter bank was constituted in the early part of the present year, with a capital of one million, of which £150,000 is, or is in the course of being, paid up. The Estates Bank was formed in January, 1862, with a capital of £500,000, and has already acquired a very extensive connection, through the medium of branches and agencies in England and Ireland. There are about 2,000 shareholders in the Estates Bank, and nearly 3,000 shareholders in the General Exchange Bank, making together nearly 5,000 shareholders; and these, with the combined capital of the two companies, will constitute the basis of a company which ought to become powerful, and to command a large, safe, and profitable business.

The annexed letter raises a question of great commercial importance as regards the rights and practices of the London banking institutions connected with India :—

"32, Great St. Helen's, Aug. 19.

"Sir,—As a question of great commercial importance has been raised by some of the Indian banks, we think you will consider it necessary to insert the following statement in your Money Article.

"We have accepted certain documents—bills which are held by the Asiatic Banking Corporation. According to the universally recognised custom, and in terms of the usual letters of hypothecation of all the Indian banks, we tendered as usual the amount of our acceptances to retire the draughts with the documents attached.

"To our great surprise we have been refused delivery of the documents on the plea that the bank had a right to hold the surplus of the shipments against some claims the bank has on the drawer (who has failed) of the bills, on some transactions entered into in Bombay, and to which we are in no way whatsoever parties.

"The Central Bank of Western India has also made a similar refusal on as strange a plea—that their Bombay office has telegraphed to them not to part with the documents; as if the rights of third parties should be determined by what the different officers of the bank choose to telegraph to each other.

"The letters of hypothecation of all Indian banks provide that the banks have authority to hold and appropriate the documents only in the case of default by the drawers or acceptors. But as long as the acceptors are solvent, and able to pay their acceptances, they are entitled to retire the acceptances, and get possession of the documents attached.

"We cannot help expressing our surprise that gentlemen like the directors and managers of such banks could feel themselves justified in endeavouring to saddle upon others their own imprudent or unfortunate transactions. Be this as it may. The claim and excuse set up by these banks are so entirely subversive of all mercantile credit, confidence, and honour, and calculated to produce such serious consequences, that we feel it our duty to bring the matter to the notice of the public at once.

"We remain your obedient servants.

"Dadabhai Naoroji and Co."

The following, from the *Times'* City Article, relates to the Indian Telegraph line, which is now almost an incubus on our Eastern commerce. The writer assumes that the company have the control of all the arrangements, but the chief blame rests with the Turkish and other Governments, through whose territories the messages pass, and no remedy, therefore, is likely to be adopted until our own Government shall feel it proper to make some representations on the subject :—

"London, Aug. 21.

"Sir,—I trust that your remarks on the disgraceful working of the Indo-European Telegraph may have due effect in the proper quarter, otherwise this most wonderful invention will become a curse to our commerce, and all this through the incapacity or carelessness of the parties who have been intrusted with the direction of the undertaking.

"All the faults enumerated by you are ascribable to ignorance or neglect, as the scientific precision of the telegraph is well known.

"Surely the charge made to the public for the messages are heavy enough to enable the company to place intelligent, able, and trustworthy clerks at the various stations.

"Responsibility, the one thing which would have brought the directors quickly to their senses, is scrupulously guarded against by a clause that in no case is the company responsible for either alterations, mutilations, retardations, or even for non-delivery.

"A chief source of mistakes is that the clerks busy themselves to understand the messages, and often attempt to alter words, in order to make them clear to themselves, while it is well known that the abbreviations used between two correspondents are such that in most cases no meaning could be extracted by a third party; and the only safe treatment of a message by a telegraph clerk would simply be to transmit every letter correctly.

"Pray continue to use your vigilance in this important matter.

"I remain, Sir, your obedient servant,

"M."

The right of carrying the Russian flag has just been extended

Digitized by Google

to ships the property of commercial firms, having partners or managers who are Russian subjects. Two or more persons may also agree to buy or construct a ship at their common expense, to sail under the Russian flag if one of them, and that the principal partner in the venture, is a Russian subject. The measure is apparently intended to add to the number of the Russian commercial fleet, which, although swelled by many Greek vessels, is still a minority, even in the Russian harbours. The Russian commercial fleet consists of about 2,000 ships, with a total of less than 190,000 tons.

The Messageries Imperiales steamer *Moeris*, which left Marseilles on the 19th instant with the mails, took specie to the amount of £4,000 for Alexandria, and £181,760 for India and China.

Messrs. J. Samuel and Son, East India merchants, of Manchester, have stopped payment. Liabilities said to be small.

Among the dissolutions of partnership announced in the *Gazette* we notice the firm of J. and E. Tetley, tea dealers, of Mincing-lane.

The *Ceylon*, which left Southampton on the 20th, with th heavy portion of the present mails, took the folowing specie, &c.—For Alexandria—sovereigns, £13,000. For Ceylon—precious stones, £344. For Madras—sovereigns, £1,768; gold thread, watches, &c., £411. For Calcutta—watches and jewellery, £1,259. For Singapore—dollars, £25,000. For Hong Kong—bar silver, £20,000; dollars, £1,800; gold thread, watches, &c., £415. For Shanghai—dollars, £43,160; bar silver, £2,000. For Melbourne—jewellery, £80. For Hobson's Bay—jewellery and watches, £1,100. For Sydney—silver coin, £1,000; watches, £1,027. Total, gold, £14,768; silver, £92,960; jewellery, watches, &c., £4,636.

ARTICLES OF IMPORT.

TEA.—There has been more life in the Tea market during the past fortnight than for some time past. The deliveries continue on a satisfactory scale, and a fair trade has been done both for home use and exportation. The arrivals have been few, and the stock will consequently be found by the end of the month to have shrunk to about 90,000,000 lbs.; on the 31st of May it stood at 125,000,000 lbs. Private telegrams arrived on the 21st instant, with dates to 29th July from Hong Kong; 8,000,000 lbs. of tea had been shipped off in the fortnight, which brings the total shipments of new season's teas to date to 29,000,000 lbs., against 35,000,000 lbs. last year. The quantity of tea on the water is now 33,000,000 lbs., due by the 7th December. The deliveries by that time will be 36,000,000 lbs. Sales of 2,743 packages of Indian and Assam teas commenced on the 22nd, and terminated yesterday. Nearly all sold, Medium and fine kinds went off with spirit at about previous rates, while inferior sorts sold irregularly, and in some instances at lower prices. Congou.—Red and black-leaf from 11d. to 1s. 1½d. have been in fair demand. Red-leaf has been more readily taken by the trade, as being better suited to their wants; better kinds of Monings and Oopacks up to 1s. 8d. have also been in request, while in fine and finest but little has been done. Souchong: The commoner grades are more enquired for. Fine kinds neglected. Oolong: Fine continues very scarce. Common remains without enquiry. Flowery Pekoe: No change to report. Scented Teas: Both Capers and Scented Orange Pekoes, from recent arrivals, have been taken readily at full rates, the latter in some instances showing an advance in price. Green Teas and uncolored Japans: Common Greens are only saleable at reduced rates, while fine and finest kinds have been taken freely, both for export and home use, at very full prices. For uncolored Japans there is no demand, the enquiry for export having altogether ceased.

SILK.—There has been a large business done in the first arrivals of new China Silk. Prices opened on a parity of 28s. for classic N. 3 Tsatlee, but have advanced to 29s., at which rate there seems little or no demand. A fair proportion of the business transacted during the past fortnight may be attributed to the immediate requirements of the home trade: one or two of the export houses have bought freely in anticipation of orders which do not seem to follow, hence we are for the moment brought to a stand still, everybody waiting with anxiety to see how the leading operators will deal with the large supplies close at hand. In Japan Silk there has been some little business principally in second hand parcels. Deliveries from 1st to 24th inclusive:—China, 1,616 bales; Japan, 857 bales. Total, 2,473 bales.

COTTON.—The market opened quietly for the business week ending August 25, but on the 19th and the early part of the week beginning the 21st there was an improved demand, and a fair extent of business was transacted. During the 23rd and 24th there has been less animation, and the market closes dull; but as holders are not pressing their stocks, no actual decline in prices can be noticed. The London Cotton Brokers' Association report sales during the week of 20 bales China fair, at 11d.; and 150 bales Japan fully fair to good fair, 12¼d. to 12⅝d. The sales in Liverpool this week have reached 87,190 bales; of which the trade have taken 49,110 bales; speculators and exporters, 38,080 bales. Imports this week, 17,884 bales; this year, 1,497,630 bales. Actual export this week, 10,037 bales; this year, 891,073 bales. Middling Orleans is quoted at 18½d., and fair Dhollerah at 13d. per lb. The total stock in London on the 24th August was 62,295 bales, against 66,249 last year; the stock of China and Japan 3,743 bales, against 25,129 last year. Of cotton afloat to Europe on the 25th, there were 5,954 bales China, against 69,027 last year, and 294 bales Japan, against 10,205. The total stock of cotton in Liverpool on the 25th was 430,070 bales, against 312,620 last year.

SUGAR.—An improved tone prevailed at the close of the business week ending the 18th, and has since been fairly maintained, and with more free buying towards the close of the present week, important transactions have been effected. By private contract, 900 bags grey Penang have gone off at 33s. to 33s. 6d. In foreign, from the Far East, the only business reported is, by private contract, 2,000 bags Muscovado Manila at 28s. Increased activity prevailed in the market on the 25th, and a large business has been done at full previous rates, and in many instances an advance of 6d. per cwt. has been established. At public sale, 2,576 bags Penang went at, good brown to low yellow, 29s. to 31s. 6d.; low middling to good yellow and grey, 32s. to 34s.

COFFEE.—A fair demand is experienced for Colonial descriptions, and transactions have generally been concluded at the former currency. In public sale, 1,250 casks 750 barrels and bags Plantation Ceylon were taken with some spirit at about last week's rates; fine ordinary to low middling, 76s. to 80s. 6d., middling to good middling, 81s. 6d. to 85s.; but 1,688 bags Native were chiefly disposed of on easier terms, good to fine ordinary, 66s. to 68s. 100 bags fine ordinary dull Manila were sold at 70s. At public sale on the 25th 500 casks, 160 bags and barrels Plantation Ceylon were sold with a fair competition at steady rates.

RICE.—4,900 bags good Rangoon (of the new crop), at auction on the 25th were withdrawn, but part has since been taken at 12s., being dearer. Nearly 40,000 bags old Soft Grain have also been sold privately, at a further improvement in prices, Rangoon, 10s. 6d., Bassein, 10s. 3d., and ordinary Nakrenzie at 9s. 6d. to 9s. 7½d.

CAMPHOR.—Has been much depressed: some small parcels China were forced off at 80s. per cwt., but there are no other sellers under 90s., and a few chests are reported at 92s. 6d. 134 cases at auction retired.

CASSIA LIGNEA.—Has improved conspicuously, and large business done at 81s. to 85s. per cwt. for ordinary coarse to fair. 286 bales at auction mostly sold at 82s. to 86s. per cwt. 2nd to 1st pile. Buds: Enquired for: only 2 boxes at auction retired at £11 per cwt.

CINNAMON (CEYLON).—We quote 1st sort 1s. 7d. to 2s. 9d. per lb.; 2nd 1s. 5d. to 2s. 4d.; 3rd 1s. 4d. to 1s. 10d.; 4th and Jungle 1s. 1d. to 1s. 5d. Firm market, with moderate business.

COCOA-NUT OIL.—This market has been firm, with fair amount of business in both Cochin and Ceylon up to the higher quotations of £45 and £43 respectively. 168 casks Cochin, 848 casks Sydney, and 43 casks Manila at auction.

DRUGS.—Cubebs: Flat; 140 bags at auction retired. Dragon's Blood: Quiet; of three cases at auction one sold at £5 per cwt. for middling lump. Galangal Root: Nothing doing. Rhubarb: In increased demand, and 3d per lb. dearer; fair business done privately, and 23 boxes sold at auction at 5s. 3d. to 5s. 6d. per lb. for fair round and flat.

GUMS.—Benjamin: Remains steady; 3 cases Siam at auction retired; and of 156 cases Sumatra, half sold at £10. 5s. and £11. 12s. 6d. per cwt. for false packed 2nd quality, and £6. 10s. and £6. 12s. 6d. middling 3rd. Damar: In more adequate supply, and quiet, and 265 cases at auction all retired. Gamboge: Nothing doing.

GUTTA PERCHA.—A little fine quality has been sold for export at 2s. 3d. per lb., otherwise the market is perfectly inactive.

HEMP (MANILA).—This market has been much excited; speculative operations very large; prices had risen £3 to £4 per ton, but have since receded 10s. to 20s. 5,100 bales at auction chiefly placed. Range of prices £33 to £35.

HIDES.—There was a good demand for East India Hides, at the sales on the 17th, for consumption, and a moderate one for export, and the greater part of those offered found buyers generally at the full prices of

Digitized by Google

last sales, but occasionally at a slight advance on the best qualities. 374 Singapore Buffalo hides offered and sold at 5⅞d. for best, and 4⅛d. for light.

Horns (Deer).—Remain firm; 4 tons Ceylon and 3½ tons Madras sold at auction at 59s. per cwt. for 11b. average, and 45s. 6d. to 51s. for 2¼ to 2lbs.

India Rubber.—Very scarce; buyers at higher prices, but very little to be had.

Japan Wax.—Quiet, without business.

Oils.—Anniseed: Small sales effected privately from 7s. 6d. per lb. down to 7s. 4d.; market remains quiet; 10 cases at auction retired. Cassia: Lower, and dull; a few cases sold privately at 8s. down to 7s. 10d. per lb. 13 cases at auction retired. Cinnamon: Of 4 cases at auction two cases sold at 2s. 3d. per oz. for fair.

Pepper.—Black: Is again the turn easier. Of 2,107 bags Singapore at auction, four-fifths sold at 3d. to 3⅛d., with one lot at 3¼d. per lb. 2,988 bags Penang sold at 2⅞d. to 3d.; of 1,967 bags Trang, a few sold at 3d.; and 445 bags Batavia retired. White: Steady; and 353 bags Singapore sold at auction at 5¼d. to 5½d. per lb. for middling to fair.

Sago.—Steady; 794 packages at auction sold at 19s. 6d. to 20s. per cwt. for good small, and 21s. to 21s. 6d. middling to fair bold. Flour: Very quiet; 327 bags at auction all retired.

Shellac.—Generally a little better; Button especially recovering 3s. to 5s. per cwt., but demand still very partial; private business small. Of 1,292 packages at auction, about half sold; Orange at 87s. 6d. to 93s.; Garnet, 70s. to 73s. 6d.; Liver, 58s. to 76s. 6d.; Native, 66s. to 72s.; Button, 42s. 6d. to 78s., and blocky 62s.

Spices.—Cloves: A large importation; 5,116 bags Zanzibar sold at auction at 3d. to 3⅛d. per lb. for ordinary to good, being rather lower; 12 cases Penang retired. Mace: Pale sorts dearer; and 17 cases Penang, and 6 cases Singapore at auction, sold at 2s. 4d. to 2s. 8d. per lb. for good palish, and 1s. to 1s. 2d. ordinary to middling reddish. Nutmegs: Firm: 30 cases Penang, and 10 cases Singapore at auction, sold at 3s. 5d. per lb. for good bold, and 1s. to 1s. 10d. middling small to fine medium.

Terra Japonica.—Cutch, Pegue: Very quiet, but very little good quality in the market: 810 bags at auction all retired. Gambier: Is again lower by 1s. to 1s. 6d. per cwt.: 2,588 bales at auction retired: moderate business done privately at 19s. to 19s. 9d. per cwt. middling to fair quality.

Tin.—This metal has been flat, with receding prices, from £89. 10s. per ton down to £87. 10s. cash for Straits; moderate quantities changing hands. Banca sold to a limited extent; latest price £90 cash.

Miscellaneous.—Galls: Very quiet: 85 pockets Bombay at auction were all retired: limited business in China at 62s. to 62s. 6d. per cwt.: enquiry for Japan. Musk: Of 38 caddies Tonquin at auction, two-thirds sold at the former worth, viz., 26s. to 30s. per oz. for fair to good; 21s. to 22s. ordinary rough; and 15s. to 19s. pickings. Rattans: Of 6,686 bundles Singapore, 8,232 bundles Penang, and 1,557 bundles Calcutta at auction, three-fourths sold, but without much spirit, at 3s. 9d. to 7s. 6d. per 100. Sapanwood: Scarce, and dear: 10 tons Siam at auction sold at £18 to £13. 2s. 6d. per ton, and privately old poor Manila has realised up to £9. 10s. Mother o' Pearl Shells: Firm: 106 cases from Singapore at auction retired at £6. 10s. Soy: Continues very quiet; 4 casks at auction retired. Star Anniseeds: Continue very scarce, and are much wanted. Sticklac (Siam): Very flat, and much lower: of 375 boxes at auction, a few only sold at 38s. per cwt. for good, rather small, and 30s. very small. Tortoise-Shell: Of 6 cases Singapore at auction two sold at 12s. and 15s. 6d. per lb., being full value. 11 cases Sydney sold at 10s. 6d. to 12s. ordinary to middling sorts, and 5s. to 9s. scabby pickings. Vermilion: Very scarce; and realised in retail, 3s.

ARTICLES OF EXPORT.

Iron.—The quotations in London are for Welsh bars, £7 to £7. 5s.; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10.; sheets, single, £10. 10s. to £10. 15s.; Staffordshire bars, £8. 10s. to £9. 10s.; rails, £7 to £7. 5s.

Steel.—Swedish keg, £15.

Copper.—Sheet and Sheathing, £91 per ton; yellow metal, 7¼d. to 7⅜d. per lb.

Tin.—93s. to 94s. for block; 94s. to 95s. for bar. Tin plates, best charcoal, I.C. 29s. to 30s.

Lead, &c.—English pig, £19 to £19. 5s.; W.B., £20. 10s.; shot patent, £22. 10s.; sheet, £20 to £20. 5s.; spelter, £22. 5s.; zinc, English sheet, £27. 10s.; quicksilver, £7. 18s. 6d. to £8.

The following is from the Circular of Messrs. French and Smith:—The last few days there has been some slight improvement in demand for metals, but not sufficient to strengthen the prices or in some cases even to check the downward march. Iron is steady, Copper quiet, Tin dull. Straits has been sold as low as £87. 10s. We quote to-day for fine 88s.; in one instance a forced sale of Banca was made at 90s. In Lead and Spelter no change.

EXPORT OF BULLION TO CHINA, &c.

FREIGHTS AND CHARTERS.

Coal freights to China are quieter, and rates a shade easier, ships for general cargoes are in fair demand, and move off steadily.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 35s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £44 and £43 and £2. For Shanghai: £53 and £2. 10s. For Manila: £1. 17s. 6d. For Batavia: 24s. to 26s. For Singapore: £29 and £1. 8s. For Galle: £28 and £29 and £1. 7s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

CASUALTIES.

The Carl Julius, from Singapore for Falmouth, which was spoken with in lat. 25 N., long. 36 W., reported that the master died on the 1st of July.

The Electricity, Burmister, from Cardiff for Shanghai, put into Falmouth, Aug. 15, leaky.

The Conqueror, Noel, from Colombo for London, put into Mauritius July 11, making 10 inches water per hour.

The Cowslip, Stephens, from Colombo for London, put into Mauritius, July 12, with foremast and foreyard sprung.

The Luchow (brig) of Hamburg, Ulrichs, for Singapore, which was assisted into Harwich, from off the Shipwash, has been surveyed and will discharge.

The Bintang, Webber, from Liverpool for Singapore, put into Simons Bay, on the 7th of July, with damage, having on the 1st, in lat 36 S., 10 E., experienced a gale from the S.W., during which she lost boats, bulwarks, and rails.

The Hermine Maria Elizabeth, Dyker, from Amsterdam for Japan, which put into Falmouth on the 19th August leaky, has been surveyed and ordered to discharge.

MISCELLANEOUS.

At Ascension.—July 17, from Java, Nagasaki, Mos, and sailed 12 for London.

Off Ascension.—July 9, from Manila, Osprey; 11, from Shanghai, Antipodes; 17, from Colombo, No. 0645, 3rd d.p. from Penang, Britannia, all for London.

At St. Helena.—July 5, Japan (s.). Bell, sailed for Cape of Good Hope and China; 7, from Shanghai, Vanguard, Scott, and sailed for London; 21, from Sourabaya, Cornelia Hendrika, v. Straaten.

At Table Bay.—June 19, Anna, Borkmann, sailed for Batavia.

At Simons Bay.—July 7, from Liverpool for Singapore, Bintang, Webber (with damage); 9, from Hong Kong, H.M. steamer Euryalus; 9, Willem Hendrick, Beckering, sailed for Batavia.

At Mauritius.—July 11, from Colombo, Conqueror, Noel, 12, Cowslip, Stephens, both for London; 11, from Sourabaya, Maurice, Lauratet; 9, Visir, Bregeon, sailed for Singapore; 12, Duplex (s.), Melizan, sailed for Singapore and Hong Kong; 17, Antoinette, Chabannes, sailed for Singapore.

At Reunion.—July 13, from Sourabaya, Maurice, Lauratet.

Last week there was launched from the building-yard of Messrs. Robert Duncan and Co., Port Glasgow, a screw steamer of 1,000 tons, named the Earl Canning, to be fitted with engines of 150-horse power, by Messrs. Blackwood and Gordon, Port Glasgow. Her dimensions are:—Length, 220 feet; breadth, 30 feet; depth to awning deck, 23 feet six inches. This vessel is built for the Bombay Coast and River Company, and specially fitted for the East India trade, under the superintendence of Capt. Johns.

M. Norman, shipbuilder, of Havre, has launched a small steamer, built for the purpose of testing certain inventions for which he has taken out patents, and one of which is the employment of a single paddlewheel of a new form, placed in the very centre of the vessel.

Head Office—No. 4, Lombard-street.

Agencies and Branches are established at Bombay, Calcutta, Singapore, Ceylon, Hong Kong, Shanghai, and Melbourne.

The Corporation grant drafts and negotiate bills of exchange payable at the above places, issue letters of credit, and conduct every description of banking business connected with the East. They effect the purchase and sale of Indian securities, the receipt of dividends, &c. and undertake the safe custody of securities. They also receive deposits, bearing interest, for fixed periods. Rates of interest and exchange may be ascertained at the Head Office.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

DR DE JONGH'S
(KNIGHT OF THE ORDER OF LEOPOLD OF BELGIUM)
LIGHT-BROWN COD LIVER OIL

Universally recognised to be Incomparably Superior to every other kind.

Prescribed by the most eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, GENERAL DEBILITY, RHEUMATISM, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, and ALL SCROFULOUS AFFECTIONS.

In cases of EXHAUSTION and PROSTRATION produced by the exhausting diseases of unhealthy climates or resulting from Tropical Disorders, DR. DE JONGH'S COD LIVER OIL is much more safe and useful than the ordinary stimulating tonics, and it has been resorted to with the most unequivocal effects after the whole range of these had been tried in vain. By its administration the natural appetite is revived, and the functions of digestion and assimilation are improved, reinforced, and regulated; the muscular power and activity are sensibly and rapidly increased; and when its use is steadily persevered in, its peculiar nutritive and reparative properties entirely restore health and strength to the most feeble and deteriorated constitutions.

SELECT MEDICAL OPINIONS.

SIR HENRY MARSH, BART., M.D.,
Physician in Ordinary to the Queen in Ireland.

"I consider Dr. DE JONGH'S Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

SIR JOSEPH OLLIFFE, M.D.,
Physician to the British Embassy at Paris.

"I have frequently prescribed Dr. DE JONGH'S Light-Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."

DR. LAWRANCE,
Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.

"I invariably prescribe Dr. DE JONGH'S Cod Liver Oil in preference to any other, feeling assured that I am recommending a genuine article, *and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed.*"

DR. LETHEBY,
Medical Officer of Health and Chief Analyst to the City of London.

"It is, I believe, universally acknowledged that Dr. DE JONGH'S Light-Brown Cod Liver Oil has great therapeutic powers; and, from my investigations, I have no doubt of its being a pure and unadulterated article."

DR. LANKESTER, F.R.S.,
Coroner for Central Middlesex.

"I consider the Cod Liver Oil sold under Dr. DE JONGH'S guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."

"Dr. Granville has found that Dr. DE JONGH'S Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, *and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil.*"

*** DR DE JONGH'S LIGHT-BROWN COD LIVER OIL *is sold* ONLY *in bottles, each bottle being sealed with a stamped metallic capsule, and bearing beneath the pink outside wrapper a label with* DR. DE JONGH'S *stamp and signature; to these capsules and marks purchasers are earnestly requested to pay particular attention.*

WITHOUT THESE NONE CAN POSSIBLY BE GENUINE.

FULL DIRECTIONS FOR USE ACCOMPANY EACH BOTTLE.

Sole Consignees, ANSAR, HARFORD, & Co., 77, STRAND, LONDON, W.C.

Sold by most respectable Chemists and Druggists throughout the World.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

TOZER'S BOOTS AND SHOES,

For Ladies, Gentlemen, and Children, are FIRST CLASS in QUALITY and STYLE, and most ECONOMICAL IN PRICE.

161, NORTH STREET, BRIGHTON,

AND 40, GRACECHURCH STREET, LONDON,

Patentee of the Improved Cork Sole Clumped Boots, for Ladies or Gentlemen, for lightness unequalled.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, in all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot of 12, RUE RICHER, PARIS.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S PILLS.—ENFEEBLED EXISTENCE.—This medicine embraces every attribute required in a general and domestic remedy; it overturns the foundations of disease laid by indigestible food and impure air. In obstructions or congestions of the liver, lungs, bowels, or any other organ, these Pills are especially serviceable and eminently successful. They should be kept in every family, as they are a medicine without a fault for young persons and those of feeble constitutions. They never cause pain or irritate the most sensitive nerves or most tender bowels. Holloway's Pills are the best known purifiers of the blood, and the best promoters of absorption and secretion, which remove all poisonous and obnoxious particles from both solids and fluids.

THE INCOMING MAILS.

The next inward mails, due here on the 12th instant, will probably not be delivered before the 15th, a telegram having been received announcing the arrival of the *Bengal* at Suez on the 5th instant.

TELEGRAPHIC NEWS.

Telegrams have been received from Shanghai via Kiachta to the 29th July, and via Galle, by overland telegraph, to 5th August and Hong Kong 12th August. A famine was anticipated in China. Grey Shirtings and Twist advancing. Silk advancing; total export to date 25,375 bales. Tea quiet: total export 36,000,000 lbs. Exchange at Shanghai 6s. 3d., at Hong Kong 4s. 5¼d. Messrs. Sillar and Bateman have received a telegram bringing same dates as above, and from Foochow to 7th August. The export of Tea for the fortnight had been 10,000,000 lbs., and freights at Whampoa were under £2. None of these telegrams make any mention of the reported fall of Peking, which was evidently untrue. Affairs in Japan are said to be quiet.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

We have received no files of newspapers direct from Yokohama by the present mail. We take the following extracts from Shanghai and Hong Kong journals.

Some influential and well-informed Japanese, who have lately come from the South, say it is the general impression that, in spite of the great preparations made by the Tycoon, and Choshiu and Satsuma, there are hopes of an understanding being come to without a resort to arms. The following is a translation of a circular sent round by the Japanese Government, calling for money to defray the charges of the present expedition :—

TO THE HEADMEN (OF THE CITY).

For some years the expense of protecting the coasts, and also of repairing and building the Tycoon's palaces, besides that incurred during the last three years (in which the Tycoon has been twice to Kioto to visit the Mikado) has been very great. But now he is again about to leave Yedo upon an expedition requiring more money than ever. Therefore :—

Let it be known in Yedo, Osaca, and all the provinces belonging to the Tycoon, that they must give to him as much as they can. And, particularly, tell the merchants of Yedo, who are always with the Tycoon, and whose presence renders their business more safe and very much larger than is the case of the other provinces, and who, although they so profit largely by him, do nothing for him in return, they ought to provide a portion of the profits they have been making for so long a time.

The circumstances are now different to those formerly existing. The Tycoon, really, has not money in anticipation of the present case. So inform the merchants and shopkeepers that they must provide as much as they can. And order the headmen [every five or six houses in Yedo has such an officer] to write out the names of contributors and the amounts they give, and send in the writing to Tachi Chimo. It is to be hoped that all will give their utmost, but let these headmen (of five or six houses) know that if they do not exert themselves in persuading all to give liberally they will be punished.

P.S. This money shall be paid back in ten years, by instalments of so much a year—or so much a month—from next year. Let this be explained to every one.

It may not be generally known, but it should be, remarks the *Japan Herald*, that the Tycoon has a powerful friend in the Emperor of the French. H.I.M.'s troop ship *Sarthe* brought out no less than sixteen 12 pounder rifle guns, with ammunition and naval carriages complete. They were not sent as a present, but the charge made for them was only about equal to the cost of the metal. They were of course delivered free of freight or any extra charge.

The Japanese agents of the Tycoon had left for Europe. They are six in number, and the *Herald* trusts that the commercial spirit thus evidenced may speedily show itself throughout all Nipon. The thin edge of the wedge being now inserted, we feel assured large effects will speedily follow.

NAGASAKI.

A correspondent, writing under date of the 30th June, furnishes us with the following additional details regarding the late outrage at that port. It appears that Mr. Smith, late of Shanghai, was standing at the gateway in front of his house when he saw a Japanese with a double-handed sword at the corner of the street, talking in an excited manner to a Chinaman. Turning round suddenly he saw Mr. Smith, and immediately advanced towards him at a steady pace, but with a

Digitized by Google

threatening manner. Mr. Smith took little notice of what was going on, but when the native was within a few paces of him, he was horrified to see him draw his sword and make a sweeping cut at him. As he was partly within the gate posts the cut took no effect, when finding himself totally unarmed, and remembering that his room was locked, he ran towards the Royal Hotel, hotly chased by his assailant. Fortunately, as the ruffian was in the act of making another blow, a dog belonging to Mr. Smith flew at him, and fastened on to his leg. He stopped to cut the dog down, but the animal, true to his instinct, held on until he had received three horrible wounds on his back. Mr. Smith got safely into the hotel, where he met a Japanese whom he begged to come out and see what was going on. When they came into the compound they found that the man had disappeared, and Smith seized the opportunity of getting his revolver. While doing so he heard a thud, as of a heavy cut, followed by a groan. This proceeded from the unfortunate coloured man, William Henry, barkeeper of "The Royal," who, hearing the disturbance, had run to see what the matter was, and was met by the Japanese, who, without a moment's warning, inflicted a cut of about seven inches in length upon his head. As soon as he had done this the Japanese ran away, but a moment afterwards a yell was heard from the next street, and it was found that a Chinaman employed on board the *Australian* had received a severe blow across his face. It is much to be regretted that Smith, who was now armed with a rifle and revolver, did not give chase and shoot the Japanese, down before any further mischief was done. Being, however, a stranger in the place he hardly knew what to do. Meanwhile the Japanese, seeing that no one followed him, pursued his course, and next wounded two Chinese employed in Alt and Co.'s tea-firing establishment, and two others belonging to the *Australian*. Messrs. Maltby and Colthrop, who were returning from a walk, while going through the narrow passage which leads from the native town to the foreign quarter, were astonished to meet the same infuriated individual with a drawn sword held in both hands perpendicularly before him. These gentleman passed without molestation, when suddenly a Chinaman with a frightful wound on his right arm ran up and said, "You see that man have makee cutty my." The Japanese, hearing the loud voice behind, looked round, but seeing that the party were determined to make a stand, he sheathed his weapon and ran into the native town. Lucklessly, neither Mr. Maltby nor Mr. Colthrop was armed, so that it was vain for them to pursue him. The wounded were at once taken on board the *Barossa*, and a party of Marines were landed to patrol the settlement. On the 14th June, the British Consul and Capt. Boys, R.N., had an interview with the Governor of Nagasaki. They endeavoured to impress him with the necessity of having the culprit arrested and punished. The opportunity was also taken of proving how utterly useless are the guard-houses which have been placed round the settlement since September 1864, nominally with the purpose of looking after foreign interests, but really for the purpose of spying. The Governor had intended to pay a visit on board the *Barossa* on the 12th, but in consequence of this sad affair begged to be permitted to postpone it until the 16th. Capt. Boys, however, informed him that he had better again postpone it until he had arrested and punished the culprit. The Governor promised to do all in his power, and signified his intention of punishing the soldiers at the guard-houses who had taken no steps to seize the assassin, although a Chinaman had been cut down only a few yards from one of the sentry-boxes. The name and residence of the culprit are known, He lives at a village near Mongy, and is not a Yakonin, as at first reported, but an ordinary rowdy. Several police officers have been put on his track, but up to the present nothing is known as to his whereabouts.

The Prince of Fizen paid a visit to the settlement a few days ago. He called first on Messrs. Glover and Co., with whom he breakfasted, thence he went to the English Consulate, and subsequently visited Mr. French. He seemed much pleased with European "fashion," and more especially with European chowchow. Two days afterwards he called on board the *Barossa* where he was received with all the honours paid to a European prince of corresponding rank. He remained on board for a considerable time, and lunched with Captain Boys, after which he witnessed the naval exercise. The *Barrosa* hoisted the Prince's flag, and fired a salute of fifteen guns, which was immediately returned by one of the forts.

The wreck of the *Satsuma* has been broken up. Every attempt was made to get her off, but without avail. The investigation will be resumed in a few days. The French barque *Rigi* is reported a total wreck on Cape Gotto.

H.M.S. *Leopard* arrived on the morning of the 27th, and was to have left on the 1st July. The Governor of Nagasaki paid an official visit to Sir Harry Parkes on his arrival.

Messrs. Norton and Hughes and Mr. Kelly, of the *Barossa*, have signalized themselves by a daring pull in an outrigger from Nagasaki to the wreck of the *Satsuma*, a distance of about twelve miles. They started at 3 P.M., and returned at 5 o'clock on the following morning, having taken about two hours to pull each way.

The following is from Messrs. Alt and Co.'s Circular:

IMPORTS.—We have again to report a very small business in imports during the past month. Prices of all plain cotton goods are lower, and, with the exception of 8¼ lb. Grey Shirtings, in little demand. Dyed Brocades are in good demand at quotations. Chintzes, with the exception of very favourite patterns, remain dull of sale, and Turkey Red Cambrics are without change. Considerable arrivals of Camlets has checked, for a time, business in this staple, but for most other woollen goods a fair demand exists. Long Ells, 12 lbs., all scarlet, are still wanted at quotations. Figured Orleans are saleable at $7.60, and for favourite assortments $8.50 is offered. Metals continue dull of sale without improvement in prices. For Flat Bar Iron there is a small demand.

EXPORTS.—Under this head business has been equally restricted, operations having been chiefly confined to barter transactions. Supplies of produce are not large. In Vegetable Wax a small business has been done at $10 to $10.50 per picul. Tobacco and Galls have been in limited supply. In Cotton nothing has been done. Tea: We have as yet no transactions to report in this season's leaf; prices required by the holders of parcels now on offer are almost on a par with last year's, but we look for the opening of the market shortly at a considerable reduction on last season's rates. Small quantities of old import are taken for Shanghai market at about previous rates. Stocks: Ordinary to medium sorts about 1,500 piculs. Fine: None to be had. Silk: No arrivals.

EXCHANGE.—On London six months 4s. 6d. On Hong Kong, nothing doing. Bills on Shanghai, fifteen days have been sold at par. Ichiboos 256 per $100.

FREIGHTS.—To London nominally £4; to Shanghai $3 to $3.50; to Hong Kong $5. Vessels loading: For London, none.

EXPORTS of tea from all Japan from 1st June, 1864, to 1st June, 1865:—

From Nagasaki to United Kingdom	1,771,839 lbs.	
ditto to America	669,148 lbs.	2,440,987 lbs.
ditto Yokohama to United Kingdom	2,529,856 lbs.	
ditto to America	2,222,342 lbs.	4,752,198 lbs.

Total from all Japan from 1st June, 1864, to 1st June, 1865, 7,193,185 lbs

CHINA.

PEKING.

Prince Kung is now totally unconnected with any department of State except the Foreign Board. The Queen Regent (whether the young Emperor's mother or the late Emperor's first wife is not known) is said to transact the business of the State personally, and to do so with much more than the average of male ability. She is not, of course, visible to foreigners, and to few, if any, Chinese courtiers.

The rebels had approached within some 200 miles of the capital (not 100 miles as previously stated). They are a somewhat formidable body, consisting of (1) the Nyen-fei, (2) a body of Taepings, (3) the Mahomedan rebels, and certain other non descript filchers, all massed together, and amounting in numbers to about 300,000, only a tenth part of them being properly armed in European frshion. They have been "turned back" it is true, but their career must be one of devastation for a long time to come.

SHANGHAI.

From this port our latest date is the 15th of July. The English Mail of the 26th of May had been delivered there on the 11th July.

There still seems to be some doubt (says the *North China Herald*) as to whether Burgevine has in reality been handed over to the Chinese authorities at Soochow. Careful inquiries made in that city have failed to elicit any information as to his whereabouts, although the demand for his rendition made by the American authorities did not produce any assertion of ignorance as to his whereabouts. Some three weeks had elapsed since he left Foochow on his overland trip to Soochow, and we can well imagine the privations and hardships which he is probably suffering at the hands of his captors. However culpable he may be, and we indeed can find no excuse for his quadrupled treachery, we can hardly realise without a shudder the treatment to which his custodians probably subject him. It seems to be as yet a moot point whether the Chinese will give him up, or whether they may not take the law into their own

Digitized by Google

hands, and either punish him after the form of a trial, or put him out of the way without even that empty farce.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, July 15, 1865.

You will doubtless have heard before this of the electric telegraph Mr. Reynolds has been constructing to the Beacon, and that one morning just at its completion, some three weeks ago, all the posts were found to have been cut down and destroyed the previous night. Mr. Reynolds laid his complaint before H.B.M.'s Consul, who represented the matter to the Taoutai, demanding the punishment of the offenders, and urging that compensation was due to the owner of the property destroyed.

The reply of his Excellency was made on the 5th instant, and being as a specimen of Celestial impudence and contempt of the "Redhaired barbarians" unrivalled, I cannot resist sending it to you at length.

H.E. THE TAOUTAI, TO H.M.'s CONSUL.

SHANGHAI, 5th July, 1865.

In reply to H.M.'s. Consul concerning the telegraph established by Mr. Reynolds, and pulled down by the country people, the Taoutai begs to state that he ordered the Shanghai Heen and Chwan Sha Ting to report upon the circumstances. The substance of their report was that their police could only discover that the posts were standing one night and next morning were found to have been pulled down;—who did it they could not find out.

Just as they were sending this report, a petition came in from the country people, stating that the posts were prejudicial to the Feng-shui of the place, and that one person had already fallen sick and died without any apparent cause, and imploring the magistrate to request the Taoutai to communicate with the Foreign Consuls, and find out the person who had put up the posts, that he might be called upon to give compensation for the life lost (or to give his life for the life lost).

On the above report the Taoutai reports that there is no doubt that the man who died must have died because the Feng-shui was injured; Mr. Reynolds benefiting himself at the cost of others; but as there was no intention to kill on his part the claim for compensation need not be entertained.

But at the same time he never applied to H.M.'s Consul to obtain permission of the Imperial Commissioner through the Taoutai, but disregarded the treaty in putting up the telegraph, thus casting a slight on the authority of H.M.'s Consul, and the Taoutai would leave it to H.M.'s Consul to make him answer for his actions. He (the Taoutai) has nothing to do with it. As regards the people pulling down the telegraph without first presenting a petition stating that it interfered with the Feng-shui, they should of course be punished, and the Taoutai will cause further investigation on the subject.

H.M.'s Consul asks the Taoutai to give permission to have the telegraph re-established, but the Taoutai really has not the power to do so. He can only memorialise the Imperial Commissioner and ask his permission. When he receives a reply he will further communicate with the Consul on the subject. Translated by CHAS. CARROLL.

Your readers will at once ask who or what is the Feng-shui? I must candidly acknowledge it is difficult to determine accurately. Our friend of the Haymarket, *Lord Dundreary*, might truly say of it, "it's a thing no feller *can* understand." I am rather inclined to the opinion that the Feng-shui bears a likeness to a very old acquaintance of ours, a strong family resemblance to that extraordinary and dreaded visitor of our pinafore days, with a respect for whose powers we were duly impressed by our kind intelligent nurses, the terrific Bogey. As many of your readers may be dissatisfied with this explanation of the Feng-shui, I hasten to place before them another. I have copied from a local journal. "What is it! The Chinese themselves, there is reason to believe, have but an imperfect knowledge of the subject. To some it may be much, to others it may be nothing. It is an idiosyncrasy strong or feeble according to the state of the geomancer's bowels. Fung-shwuey in the native character signifies wind and water. Dr. Morrison describes it as a kind of geomancy deduced from the climate, the aspect of buildings, doors, graves, and so on, and in further illustration of its meaning gives addenda of the words koo-hwo, signifying "befooled by the wind and water-superstition." Dr. Williams' definition of Fung-shwuey is terser still. He gives it simply as geomancy; one of the four branches into which Dr. Johnson says Divination is divided, namely, hydro-pyro-acro and geomancy."

With this introduction of the Feng-shui I leave H.E. the Taoutai's letter to speak for itself, observng only that his report that the men who cut down the posts could not be found, is a falsehood, the country people stating they did it by order of their magistrate, the Ting of Chuen-sha.

Under whatever favouring circumstances Mr. Reynolds laid down his telegraph, it is evident by the treaty that he had no legal right to do so without permission of the Imperial Government; still the destruction of his property and failure of his scheme are much to be regretted.

The establishment of his enterprise, profitable or otherwise it might have proved to him, would have been the introduction of the thin end of the wedge, and formed perhaps a nucleus to not very distant enlarged telegraphic works. Railroads and telegraphs—where could be greater safeguards for China against rebellion?—where stronger levers to lift a land so teeming, industrious, and fertile to peace, prosperity, and strong Government? That the Imperial Government should be blind and imbecile enough not to recognise these facts—that they should fail to see how by the employment of these two agents their present weak, trembling authority would grow powerful and nervous may surprise those unacquainted with Chinese character, but causes extreme vexation, anger, and disgust to others.

The esoteric authorised destruction of Mr. Reynolds's telegraph, and the insultingly absurd, open justification of it, should be carefully considered by the promoters of Sir McD. Stephenson's scheme in the South, and may be serviceable in pointing out some of the rocks in their way.

The "rowdies," a term generally applied here to our houseless and penniless castaways, scamps, and criminals indiscriminately, have again been distinguishing themselves by breaking into a native cash shop. On resistance two of the inmates were shot, but the alarm being raised, the ruffians made off, pursued by the police, and after a desperate struggle, firearms being freely used on both sides, several were captured and others shot down. This event seems to have aroused a long dormant philanthropy on the part of H.E. the Taoutai, who, in a circular to the consuls, dated 4th July, deplores the state of foreign crime, and recognising the causes that have doubtless brought about much of it, expresses a large pity for the villains, "who"—His Excellency picturesquely writes—"as highly principled men traversed many myriads of miles, and encountered the dangers of raging seas, find themselves unable to acquire a competence wherewith to return, and are for many years thrown unsupported upon themselves." After stating that he had thought of supplying them with money to help them back to their homes, but that the number of claimants for such assistance, and the sum of money requisite could not be ascertained, he offers, if three thousand dollars would send away the entire lot at once, to collect and hand the Consuls that amount—provided, he very naively remarks—"they could be prevented coming back again."

The document is a curious one, and on a hasty glance is creditable to H. E.'s good nature and benevolence. Such, however, is far from my appreciation of it. The assistance he offers, he sagely observes, must depend on the non-return of the departed, which to a less subtle brain than a Chinaman's must have demonstrated the impracticability of his suggestion. The premium it holds out to the universal brotherhood of crime to rush hither must have likewise been obvious to him.

The well known severity—the savage cruelty—of the Chinese Criminal Code contrasts too strongly with the excessive tenderness of His Excellency's proposed treatment of the scoundrels of the "hated foreigners," not to throw some doubt on the object of his letter.

The worthlessness of his suggestion I cannot believe to have been unseen by him, and I take his notification as so much "soft solder," slyly laid down for the reception of his letter of the 5th instant, which exposes the true nature of Chinese largemindedness and liberality.

The weather here has not been stormy, but very wet, and for the time of year rather cool than otherwise. The crops having suffered from heavy rains, the Shanghai Hien ordered a general abstinence from animal food during three days (8th, 9th, and 10th inst.), and further instructed the faithful and obedient to be abstemious in their consumption of rice and fish during this time. The propitiation of their infuriated Jupiter Pluvius does seem to have been effected by the penance, the last two days having been dry and very hot.

By the *Reiver's* arrival on the 9th inst. (after a run from Calcutta, including stoppages at Penang, Singapore, and Hong Kong, of twenty days) we had advices from London to 13th June, which mails came up on the 11th inst. per steamer *Aden*. *Apropos* of the *Reiver*, *on dit* that her owner's letters were cleverly landed on the night of the 7th inst., though she did not arrive here till the 9th. On the 8th silk had risen some 15 tls., but not before a thousand bales had changed hands.

By the *Aden's* mail we heard of late President Davis's capture and pending trial. The general feeling among all classes here is one of regret, and a strong hope, in which, as far as I can

Digitized by Google

learn, the whole community joins, that the Federal Government will not commit so gross an outrage on humanity as to adjudge a man, who, by the voice of his fellow citizens, was called to, and for no interested and mercenary motives of his own, accept the direction of the rebellion. The execution of Jefferson Davis would, it is felt here, be little short of murder—a lasting stain and reproach to President Johnson's Government and the whole American nation.

The *Aden* brought up Sir. C. Hornby and Judicial Staff, and we may shortly look for a change in our courts here, but as yet no official intimation of anything of the kind has been made. Touching legal affairs, I am reminded of a curious feature of Chinese law, very important to trading men, which has been enunciated before a mixed Court in a suit for breach of contract. A Chinaman having bought some goods "afloat," refused on their arrival to take delivery, and the English merchant who sold them having brought an action against the purchaser, it was decided that unless a seller receive bargain money from a buyer, any contract is null and void, and when bargain money is paid, the claim of a seller, in the event of buyer's non-fulfillment of his contract, does not exceed the amount of the bargain money.

You will have seen by the last mail that another Japanese Embassy is on a visit to Europe, accredited, I am given to understand, to the English and French Powers, but I was unable to learn of their mission further than that it had a politico-military object.

A couple of Satsuma's men have been living here during the last fortnight, whose business seems to be the gathering of information generally, and of the construction of docks particularly. One of them speaks English excellently well, and told me he had commanded and taken over to San Francisco in 1859-60 the yacht Her Majesty presented the Tycoon with at the time the Treaty was negotiated by Lord Elgin. This he states he did without any previous practical knowledge but what he had attained in Yedo through translations of Dutch works on steam navigation.

I attended a horse sale a few days ago, and could not help noticing at it the changed tone of this community. The old vigor and life seemed collapsed. The competition was slack, money appeared scarce, and there were few buyers. A mare named "Miss Mowbray," which I heard had formerly been bought for 1,000 taels, and once raffled for 1,200 taels, was now sold at 215 taels. "Godolphin," a handsome little chesnut Arab, winner of the 1863 Shanghai Challenge Cup, went for 65 taels. "Gorilla," a steeple chaser, for 50 taels. "Upperhand," a well-known one, fetched 45 taels. This depreciation in horse-flesh marks "something rotten in the state of Denmark."

It may interest former boating men of Shanghai to hear that an English eight has been formed. One crew (composed of Johnstone Smith, No. 1; B. W. Fellows, No. 2; H. Cope, No. 3; Rev. W. Grey, No. 4; No. 5 not named; J. A. Maitland, No. 6; E. Whittall, No. 7; A. Dent, stroke; and W. Stout, cox.), went out for the first time on the 5th inst., and pulled up the Soochow Creek above the boat-house. A little difficulty was experienced turning the sharp bends, but it is thought that there is plenty of room on the river for two boats. The eights will form a new feature in the next Autumn egatta.

The Asiatic Society held a meeting on the 6th inst., when an interesting paper forwarded by the Rev. Mr. Brown, of Kanagawa, was read. It was a translation of a Japanese manuscript, containing an account of the seizure, examination and death of Pére Jean Baptiste Sherotte, the last Roman Catholic missionary to Japan previous to the re-opening of the country in 1858. The manuscript bore date about 1708, the writer being the native interpreter through whom the examination of the unfortunate priest was conducted.

Dr. Lamprey also read a paper on the Water Supply of Shanghai, and from the discussion which followed, cockneys will be happy to know that their beloved Thames is not so dirty after all, for water taken from the river at Westminster has by analysis shown a less amount of impurity than what "princely merchants" draw from the Whangpoo at Shanghai.

The Nien-fei are reported to have sustained considerable reverses, and to be retreating from the Shantung province. A son of the famous Imperial General San-ko-lin-sin, named the Po-wang, has also been distinguishing himself against these rebels.

Major Jebb, with Messrs. Cardew and Lempriere, of the 67th Regiment, have returned here with their drill sergeants from the Chinese camp at Fung-wung-shang, recalled to join the head-quarters of their regiment, at present at Shanghai, about to proceed to the Cape. The Fung-wung-shang camp, as many of your readers may know, is about twenty miles hence, and was organised and is upheld by the purse and authority of the Taoutai, acting independently of Pekin. The command of the camp, in which no military officer or instructor is now serving, has, it is said, been given by the Taoutai to Mr. Winstanly.

SHANTUNG.

The Nienfei rebels have sustained severe reverses in this province. The *North China Daily News* has the following intelligence regarding the present aspect of the movement:—

The reports brought down by native couriers from the seat of war in the province of Shantung have lately become somewhat more favourable to the Imperial cause. For many months tales of disaster were repeated and reiterated until it seemed probable that the tide of success would turn altogether in favour of the insurgents, and involve the Imperialists in utter destruction. Now, however, a change has come over the aspect of affairs. Either the vast increase made in the numbers of the Imperialist armies has had a purely mechanical effect on the fortunes of war, or, Chinamen-like, the rebels have been disheartened by some trifling calamity, and are now as eager to escape as they were before anxious to press onwards. The history of strategic operations in China is a history of alternate successes and reverses, not such in the sense wherein we as Europeans would use the terms, but arising from some unforeseen conjunction of circumstances, which has had the effect of encouraging one side while casting the other into a corresponding state of despondency. The miraculous interventions, so often dwelt on in the *Peking Gazette*, in acknowledgment of which temples or votive tablets are decreed to the favouring deity, are simply circumstances unimportant in themselves, whence comfort and support are derived by one side, disquiet and dejection by the other. Whatever be the cause, whether the local deities have declared for the sacred right of kings as opposed to the right of an oppressed people to assert their independence, or whether the overwhelming force brought to bear by the Imperialists is having its natural effect, the result is that the Nienfei bands are gradually *retiring* before the Government troops, and have already sent *large* bodies into Shansi in order to secure a footing in that province. This would appear to be the first step towards a return to the province of Kansu, whence in the first instance they came. There, amid vast plains surrounded by lofty and rugged mountains, the rebellion took its rise, and there it will in all probability be extinguished. However paradoxical it may appear, we are always astonished at either side succeeding in a purely Chinese struggle. The odds are so nicely balanced, as far as disorganisation and want of discipline go, the likelihood of running away is so exactly divided between the two sides, the venality of the officers is so important an element in the constitution of both armies, that we are equally struck with amazement, no matter which side remains faithful to its colours. Whatever may be the cause, the Imperialists are now enjoying the smiles of fortune at the expense of their less fortunate opponents, nor does our experience of the Nienfei lead us to regret the reverses which have of late befallen them.

HONG KONG.

From this port we have files of papers up to the 22nd of July. Up to that date nothing had been heard of the ill-fated steamers *Corea* and *Chanticleer*, although all the steamers lately passing down the coast have searched diligently for some traces of them. The *Azoff* went out specially for the purpose, and looked in everywhere where it was thought probable the vessels might be laying disabled—the search was futile, however, and there is little doubt that both vessels must within a short time of each other have foundered and sunk. From the many conjectures as to the fate of these unfortunate vessels we take what we consider the two most plausible, viz:—The *Corea*, being very light and an extremely crank boat, capsized; and the *Chanticleer*, being very deep, foundered; or that the *Chanticleer*, being ahead, and fearful of the approaching gale, putting back, came into collision with the *Corea*, and so caused the destruction of both. With most of the officers of the *Corea* it was their first trip in her.

The new silver currency was being counterfeited, a gang of "smashers" having put into circulation a large number of ten-cent pieces so carefully executed as almost to defy detection. The body of the coin is iron, on which a thin coating of silver

Digitized by Google

has been by some means fixed. The cleverest part of the fraud is the milled edge, which is simply perfect; it was this milled edge which it was supposed the Chinese could not imitate.

The Hong Kong and Shanghai Banking Company have commenced the issue of notes. $200,000 is the full amount received from London as yet. The design is better than those of the other banks, and much more difficult of imitation. Shares in the bank are quoted at 2 premium.

Some anxiety prevailed as to the fate of that fine collection of books belonging to the Hong Kong Library and Reading Rooms. The library consists of several thousand carefully selected books, both new and old. It is now proposed that it be dispersed among the community through the medium of the auctioneer's hammer. It is easier to disperse a collection of volumes than to amass the same; and, as the books in question are well worth the sum wanted in order to pay off a lien upon them, it is astonishing that some means of paying off that lien (or debt) upon them, and of keeping the library open to the public in some shape cannot be devised.

A Portuguese clerk in the Commercial Bank, named Gutierrez, had defrauded the Bank of some $19,500, by appropriating the proceeds of certain cheques and falsifying the books in his charge. He absconded, and took refuge in Macao; the Governor of which colony not only ignored the warrant issued in Hong Kong for his apprehension, but is said to have even refused to allow the placards offering a reward for his capture to be posted on the walls or distributed in Macao. Should His Excellency persist in this course, there will be an objection to giving Portuguese subjects employment in mercantile firms.

The following short narrative is given by three Malay seamen, supposed to be the only survivors of the crew of the Siamese ship *Goldfinder*, which vessel (bound from Hong Kong to Shanghai) foundered in the late typhoon :—

On the 29th June, at eight o'clock in the morning, our vessel, the Siamese ship *Goldfinder*, J. C. de Castro, master, left the port of Hong Kong, bound to Shanghai. The same night about twelve o'clock it blew very strong, and the gale increased to a perfect hurricane, which continued to rage throughout the night, the vessel being unmanageable. About eight o'clock on the morning of the 30th the ship heeled over, filled and went down, we sinking in her. On rising to the surface we saw several other men swimming and clinging to casks, spars, &c. We three held on a cask for four days and nights, being picked up on the 3rd July by a fishing boat, from which we were landed on the shore hard by, but we are unable to say what was the name of the place. Here we remained eight days, when a junk laden with salt bound to Hong Kong gave us a passage, and we arrived here on the 18th. We saw nothing of either the captain or mate after the vessel sunk, and believe they both perished. Four other Malays who were also clinging to a water cask may possibly have been saved.

STRAITS OF MALACCA.

SINGAPORE.

Dates hence are to the 31st July. The London mail of the 26th June arrived out on the previous day.

The Governor and suite were to leave Singapore on the 31st, in H.M.'s steamer *Pluto* for Penang, and would be away three months. That steamer and the *Banterer* returned on the 23rd, after a fruitless search for pirates as far as Tringanu. The *Pluto* reported having seen the ship *John Cropper* ashore on the Moran Rocks, a total wreck, and the ship *Maribell* rendering every assistance in her power.

A proposal has been made by the Gas Company to lead the water into and distribute it through the town from the point at which the Government is to hand the waterworks over to the Municipal Commissioners. With the experience Mr. Wells, the secretary to the company, and his assistants, have acquired of the gradients of the town, the undertaking could not be entrusted to more efficient hands. The executive and municipal authorities are fully alive to the necessities of the poor, and ample provision will be made for a gratuitous supply of water to them. They could scarcely do otherwise, seeing that the late Tan Kim Sing's munificent gift of 13,000 dollars, which was given for the purpose of providing his poor countrymen with wholesome water, forms the nucleus of the fund now being employed in carrying his intentions into effect.

Complaint is made that within the last few years a number of European convicts from Western Australia have found their way to Singapore in charge of horses, whilst others have paid their passages. Some of these men are understood to have received a conditional pardon, or are on ticket-of-leave. Scores of such men are abundant in China, where their rowdyism has been carried on in several instances to a great extent. The passport system, says the *Free Press*, should be introduced into all the Australian colonies used as penal settlements, and convicts permitted to go abroad under certain conditions should be enforced to report themselves personally to the head of the police in any of Her Majesty's dominions.

Seven seamen of the British ship *Agenoria* were brought up before the Marine Magistrate on the 24th July for a refusal of duty. They were ordered to forfeit ten days pay, and to imprisonment in the House of Correction for twelve weeks.

Hanakay Maistry, a libe[illegible] Bengalee convict of considerable wealth, died on the 2[illegible]th, at Campong Bencoolen. His estate, which is worth about 50,000 dols., has been divided amongst his sons. He appointed Mr. Woodford one of his executors.

On the 12th July a Chinese entered the shop of a respectable trader, and purchased cloth to the amount of 63 dollars, and requested one of the clerks in the shop to accompany him for the money. As the clerk did not return in reasonable time the master went in search of him. While out, he remembered that a debt of 45 dollars due to him had to be collected that day, so he called at the debtor's shop and asked for payment. To his surprise he learnt that the missing clerk had preceded him by half an hour, and had received the money. He returned to his shop and found the clerk still absent; and eventually the master took out a warrant for his arrest for embezzlement. On the 20th the culprit was found in an empty house at Tangong Katong with five dollars in his pocket. On being arraigned before the sitting magistrate he admitted the charge, and stated that the nacodah of a junk had induced him to rob his master, and promised to take him to China with his booty. It was the nacodah who entered the shop and made the fictitious purchase. After leaving his master's shop he went and obtained the 45 dollars, and handed over the cloth and thirty dollars to the nacodah. By the latter's suggestion he concealed himself in the house where he was found. On the day appointed for his embarkation, he went to the harbour, and learnt to his dismay that the junk had sailed on the previous night. He therefore returned to his hiding-place. Besides the thirty dollars, the nacodah got his victim to pay eight dollars on his account to a shopkeeper in Campong Giam. The prisoner was committed for trial.

A European seaman, named Charles Belton, died suddenly on the 19th July, at the Old Albion, in North Canal-road. An inquest was held, and the verdict was, "Died of Apoplexy." The man had been indulging in drink for four days, being flush of money, having been recently paid off from his ship.

Exchange on the 29th July.—Bank bills 4s. 5½d.; private 4s. 6d. Tonnage excessive, and freights very low.

PENANG.

Recent arrivals from Assahan (say the *Gazette*), report that there were four Dutch steamers and six sailing vessels anchored off Batta Bara, a distance of six hours' sail from Aasahan; that they had attacked four Assahan coasters, and drove the men into the jungle. It is also stated that the Dutch had remonstrated with the Yang-Tuan for flying the British flag, and that they had given the Yang-Tuan six weeks' time to consider whether he would pull down the British flag and hoist up the Dutch in its stead. In consequence of these measures of the Dutch, the native coasters have been afraid to continue their trade. It is also said that the Dutch have instigated the people of Pagarawan to attack the Padang (E. C.) men, because the latter would not shake off the yoke of Assahan and fly the Dutch flag as the former have done. The question of Dutch aggression in the native States on the East Coast of Sumatra is not by any means a new thing, and notwithstanding the numerous protests that have from time to time appeared in the Straits Press, no measures have as yet been taken by our Government towards a settlement of the matter. The trade with these States and Penang is now almost completely paralysed, and there is every prospect of its remaining so if no steps are taken by our authorities. We thought the illegality of the Dutch proceedings in the East Coast was settled long ago by Lord Palmerston's despatch in 1851, but it appears that the Dutch, in consequence of their insignificant position in relation to European affairs, have more time to develop their schemes

Digitized by Google

of aggression in the East than we have to look after our own interests. It rests, however, with the Straits Government to represent this matter in its true light to the Home Government, and we hope this time with success.

Notwithstanding the advantages which iron vessels possess over those built of wood, there is one great drawback to their usefulness in these seas, especially the Straits, namely, that of becoming so foul as to seriously impede their sailing powers. In Penang, where there is no dock accommodation, this disadvantage is felt more than in other places possessing facilities for cleaning iron vessels. About six months ago the captain of a large iron built three-masted schooner, the *Yuh-Shun*, succeeded in having his vessel hauled on shore alongside of the jetty, and had her effectually cleaned and painted previous to his voyage to China. At present we have the iron built ship *Edinburgh Castle*, 627 tons burden, which has become dee harbour for some time and had got very foul; but as the bros most of her cargo on board for London, it was impossible to adopt the same process as was taken with the *Yuh-Shun*. The method used by Capt. Inglis, however, which appears to have been perfectly successful, is one that we think ought to be widely known. It consisted of a large triangular sort of brush, made of small stiff green bamboos fixed into a strong frame, and passed along the bottom of the vessel from forward aft, with chains forming guys to keep it close to the bottom of the ship. The length of the sides of this brush was about five feet, and it has brought away some tons of shells of several different species. Some of these shells were very large, and would have proved a very serious impediment to the progression of the ship on her voyage home. We measured one which was five inches long by two and a half broad, and the barnacles were something enormous. These were shown in the Penang Exchange, and a good number have been preserved by several gentlemen who saw them there. This method of cleaning iron vessels is certainly a capital one, and may be of use to others similarly situated as Capt. Inglis. By it a large ship can be thoroughly cleaned in a couple of days without the trouble of beaching, which in many cases, as in this, was impossible.

Another Hamburg vessel, the brig *Johanna*, has been sold at, Penang during the week to a Chinese trader. We append a list of the ships which have been sold within the space of the last three months. Three of them were built by the well-known shipwright, Torkild Anderson, of Apenrade in Schleswig, and most of the others were also built in the Danish Duchies, and owned by Danes, until the Schleswig-Holstein quarrel arose, when they were transferred to the Hamburg flag. The *Snap Dragon* was formerly an American clipper. With two exceptions, Chinese merchants were the purchasers. There is still a good demand to purchase small and middle sized ships:—

1. The Hamburg brig *Capibaribe*, of the burthen of 3,800 piculs, 30 years old, sold for Drs 3.750.
2. The Siamese barque *Snap Dragon*, of the burthen of 12,000 pls., 12 years old, sold for Drs. 17,500.
3. The Danish barque *Therese*, of the burthen of 7,000 pls., 8 years old, sold for Drs. 10,000.
4. The Hamburg brig *Buenos Ayres* of the burthen of 3,500 pls., 12 years old, sold for Drs. 4.600 (now known, as the *Forbes Scott Brown*).
5. The Danish brig *Susanna*, of the burthen of 5,000 pls., 8 years old, sold for Drs. 6,400.
6. The Hamburg brig *Carl and Johanna*, of the burthen of 3,800 pls., 15 years old, sold for Drs 5.100.
7. The Hamburg brig *Johanna*, of the burthen of 2,900 pls., 19 years old, sold for Drs. 3,000.

The Comparative Statement of the value of imports and exports at Prince of Wales' Island during the official years 1863-64 and 1864-65 puts down the total value of the commerce of Penang for the year 1864-65 at rs. 44,962,059, being an increase on the previous year of rs. 4,140,342. The imports of merchandise were of the value of rs. 18,041,425, and the exports rs. 26,913,634. The tables also show that our trade, says the *Argus*, is increasing in imports as well as exports. This speaks volumes for the general prosperity of the inhabitants of Penang and Province Wellesley. Great Britain and her settlements have been our best customers, the trade with the former alone being more than with the whole of Europe. The value of the imports from Europe is stated at Rs. 1,176,210, being in excess of last year by Rs. 675,255. The trade with Calcutta, Bombay, China, Sumatra, the Malayan Peninsula, and British Burmah has increased, but the contrary with America and Madras. With Cochin China, Java, Rhio, and Borneo the exports and imports are absolutely nothing. With British Burmah the table shows the pleasing fact of an increase of Rs. 165,275. To America the imports have been only Rs. 4,190, and exports 224,300, showing a decrease of Rs. 672,030.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

DAVIDSON—On the 18th July, at Hong Kong, the wife of Wm. M. Davidson, of a son.
DICKINSON—On the 29th July, at Hong Kong, the wife of Henry Dickinson, Esq., of a son.
COLLINS—On the 22nd July, at Hong Kong, the wife of Charles Collins, of a daughter.
KING—On the 20th July, at Elgin-terrace, Hong Kong, the wife Geo. King, prematurely, of a son.
MARKHAM—On the 9th July, at H.B.M.'s Consulate, Shanghai, the wife of J. Markham, H.B.M.'s Vice-Consul, of a daughter.
ROYSTON—On the 27th Aug., at the British Embassy, Paris, Viscountess Royston, of a daughter.
SANGSTER—On the 13th July, at 3, Alexandra-terrace, the wife of Charles F. A. Sangster, of a son.

MARRIAGES.

ENNISKILLEN—BRODRICK.—On the 5th inst., at St. George's, Hanover-square, by the Hon. and Rev. Sir Francis Stapleton, Bart., uncle of the bride, William Willoughby, Earl of Enniskillen, to the Hon. Mary Emma Brodrick, eldest daughter of Charles, late Viscount Midleton.
LIPSCOMBE—GREEN.—On the 29th Aug., at St. Martin's Church, Scarborough, by the Rev. R. H. Parr, George Lipscombe, Esq., of Singapore, to Mary Anne, youngest daughter of the late David Green, Esq., of Lydd, Kent. No cards.
LISTOWEL—BRUCE.—On the 31st August., at St. George's Church, Hanover-square, by the Rev. J. H. North, M.A., incumbent of St. George's Chapel, Brighton, the Right Hon. William, Earl of Listowel, to Ernestine Mary, younger daughter of the Right Hon. Lord Ernest Bruce, M.P.
MUNSTER—ERSKINE.—On the 22nd Aug., at Dysart House, Fife, N.B., by the Rev. Robert Cole, chaplain, George Herbert, Count Munster, Marshal Hereditary of the Kingdom of Hanover, to Lady Harriet Elizabeth St. Clair Erskine, only daughter of Lieut.-General the Earl of Rosslyn, Colonel 7th Hussars.
SOUTHERN—NICHOLS.—On the 5th Sept., at St. Leonard's Church, Streatham, Surrey, by the Rev. —. Nicholls, rector, Richard Latimer, of 6, Mincing-lane, City, only son of George Southern, Esq., of 36, Glengall-grove, Old Kent-road, to Mary Elizabeth, eldest daughter of W. H. Nichols, Esq., of Streatham. No cards.

DEATHS.

ASTROM—On the 11th July, on board the Swedish barque Mina, Hulda Maria Gesbaris, daughter of Captain Astrom, aged 14 days.
BISHOP—On the 14th July, at Miss Baxter's School, Bonham-road, Hong Kong, Louisa Bishop, aged 2 years.
BRAND—On the 20th July, at Hong Kong, of fever, William, son of the late Andrew Brand, Esq., of Glasgow, aged 27.
COUTTS—On the 17th July, at their residence, Praya East, Hong Kong, Barbara, wife of Alexander Coutts, of cholera.
GORDON—On the 28th Aug., the Lord Henry Gordon, aged 63.
HANFF—On the 20th July, at Tukwing, Canton River, Rev. S. Hanff, of the Rhenish Mission, of disease of the lungs, aged 24 years.
LAPIDGE—On the 4th June, at Hong Kong, George Lapidge, Esq., Paymaster H.M.'s ship Coquette.
MANN—On the 18th July, at the Seaman's Hospital, Hong Kong, Capt. Mann, of the ship Ruby, aged 35 years.
MARWOOD—On the 17th July, at Hong Kong, Thomas Christopher Marwood, late Master of the brig Trebizond, aged 33 years.
ROBINSON—On the 6th July, at the General Hospital, Shanghai, Captain Robinson, of the British barque Celestial.
SWIFT—On the 17th July, at Wanchi, Hong Kong, John H. Swift, boiler-maker to Messrs. Russell and Co., aged 23 years, of cholera.
WAKEFORD—On the 11th July, at Hong Kong, Frank Darvall Wakeford, youngest son of William and Maria Wakeford, of Southampton, aged 32.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—September 4, at Falmouth, from Maulmain, T. E. Millidge; 1, at Texel, from Batavia, Margaretha; August —, at New York, from Rangoon, St. Louis; 30, at Sandhamn, from Samarang, Emilie; September 7, at Falmouth, from Rangoon, P. M. Muller.

DEPARTURES.—September 2, from Cardiff, for Shanghai, Nelly; 5, from London for Yokohama, Fusi Yama; 4, from Cardiff for Batavia, Europa; 4, from Liverpool for Hong Kong, Ariel.

SPOKEN.—Graaf van Hoogendorp (Dutch ship) for Batavia, 19th July, 11 S. 34 W. Bulgersteyn, Liverpool to Batavia, 26th August, 48 N., 10 W. Cornelis Wernard Edward, Zierikzee, to Batavia, 27th August, 48 N., 8W. No. 4302, 3rd d.p. Singapore to London, 13th May, off Acheen Head. Sanderson, Sunderland to Galle, 2nd September, 48 N., 7 W. Royal Bride (barque), Colombo to London, 15th July, 5S. 82 E.

At MAURITIUS.—July 18, from Colombo, Eliza Goddard, Davies, and sailed Aug. 2 for ———; 22, from Batavia, Clara Sayers, Bremner, and sailed Aug. 5 for Dunedin; from New York, &c., Suno Nada (s.), Tayne, and left 30 for Singapore; 27, from Singapore, Ocean Belle, Jarvis; 25, Antoinette, Chabanness, sailed for Singapore.

The Admiralty have invited tenders for the conveyance of 109 tons (meast.) porter to Hong Kong, and 30 tons naval stores to Trincomalee, from the River Thames.

LAID ON.—At London, for Colombo, Frances.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—From Sunderland, July 9, Fanny; 5, from Newport, Minerva; 11, from Antwerp, Indus.

At HONG KONG.—From Glasgow, July 13, Otentosama (st.), from Cardiff; 16, Victoria, from New York; 21, Enoch Train.

DEPARTURES.

From SHANGHAI.—For London, July 5, Highflyer; 9, Gossamer; 11, Hampton Court. For New York, 13, Caprera.

From FOOCHOW.—For London, City of Aberdeen, Taeping, Lauderdale, Japanese.

From HONG KONG.—For London, July 22, Johanna Marie. For New York, Benefactor.

MR. CHISHOLM ANSTEY.—A telegram from Bombay, dated 8th August, states, that Mr. Chisholm Anstey has been appointed an Acting Judge in the High Court of Bombay.

COUNT KLECZKOWSKI.—By a Royal Decree, dated Bruxelles, 16th August, 1865, Corneille Kleczkowski, Esq., Major of Artillery on the retired list of the Belgian army, and Commissioner of Chinese Imperial Customs at Amoy, has been promoted to the honorary rank of Lieut.-Colonel.

THE PSALM OF LIFE AT PEKIN.—Mr. Burlingame brings an interesting gift from China to Mr. Longfellow. It seems that Mr. Wade, a member of the British embassy at Pekin, who is a skilful Chinese scholar, made a close translation of Longfellow's Psalm of Life, which was then inscribed, as the manner of the country favours, on the door-posts of his house. There the calm, pure wisdom and beauty of its sentences greatly impressed a learned dignitary poet of the empire, who thereupon put it into pure Chinese poetical form of the last polish, and so writing it out with his own hand on a beautiful fan, sent it as a present to his brother bard at Cambridge. It is pleasant for all of us admirers of that charming poem to know that thousands of Pekin folks stop to read, and admire it, too, as they pass Mr. Wade's door.

ROYAL ASIATIC SOCIETY.

Minutes of the 14th regular meeting of the North-China Branch of the Royal Asiatic Society, held at the Society's rooms, the 6th day of July, 1865.

Present:—G. F. Seward, Esq., V.P., in the chair. Revs. C. H. Butcher and F. K. Mitchell. Drs. Lamprey, Robson, and Jones, Messrs. Alabaster, Giquel, Probst, Kingsmill, Thorne, Maitland, Robinson, Wylie, Meadows, Reynolds, &c., &c.

The minutes of the last meeting having been read and confirmed, the ballot was proceeded with, and the following gentlemen were elected members of the society.

Resident: C. Dillon, A. C. Dulcken, the Rev. M. Kaufmann, A. Sparrow Knight.

Non-Resident: Dr. Falconer, Dr. Reid, R. Watmore, and A. Littledale.

The following gentlemen were then proposed for election at the next meeting:—

Resident: Proposed by Mr. Kingsmill, seconded by Mr. Mitchel: J. S. Forsyth and H. Gribble. Proposed by Mr. Seward, seconded by Mr. Alabaster: F. Bell. Proposed by Dr. Robson, seconded by Mr. Alabaster: Dr. Jones.

Non-Resident: Proposed by Mr. Kingsmill, seconded by Mr. Mitchel: T. Whitmore.

The following articles were then presented to the society:—

A brick from the porcelain tower, Nanking; presented by Mr. Kingsmill on behalf of Mr. J. McL. Brown. Six bottles of Shanghai snakes and the saw of an extraordinarily large saw-fish; presented by Mr. C. T. Jones.

The thanks of the society having been accorded to the donors, a paper forwarded by the Rev. Mr. Brown, of Kanagawa, being the translation by him of a Japanese manuscript, was read.

The manuscript, the production of one of the litterati in Japan, and written about the year 1708, contains an account of the arrest, examination, imprisonment, and ultimate death of Pere Jean Baptiste Scherotti, the last Roman Catholic missionary to Japan previous to the year 1858. This intrepid servant of the Cross appears to have studied Japanese in Europe, and landed in Japan in disguise. He was immediately arrested and after an imperfect examination at Nagasaki was sent overland to Yeddo. Here the author of the manuscript was called in to interrogate him, the regular interpreters having failed to thoroughly understand him, and the manuscript is the result of this examination, which was prolonged during some four or five days, the prisoner being questioned first about himself, then about foreign countries, and finally about his religion. At the termination of the inquiry he appears to have been remanded to prison, where his patience under suffering and his undying faith so impressed two servants appointed to attend him that they publicly embraced his religion in the full consciousness that the penalty of doing so was death. After this the rigours of imprisonment appear to have been increased, and after some months of suffering he followed his two converts to the grave.

At the conclusion of the paper the acting PRESIDENT remarked that the paper appeared to him to be a most valuable contribution, apart from the mere temporary interest attaching to it, both as affording an insight into the habit of thought of the Japanese and as an indisputable record of facts. Mr. Brown had volunteered to give the society translations of the remaining two parts of the manuscript, and the society would be deeply indebted to him. The paper just read would, he had no doubt, be included by the publishing committee in the next publication of the society, and he thought it well worthy of being so.

Mr. WYLIE remarked that the paper just read was an interesting document in more respects than one. It related to a period in the intercourse of European nations with Japan, the accounts of which had hitherto reached us exclusively through one channel, and that a very suspected one. Indeed, the opponents of the Catholic missionaries had not been slow to impugn the veracity of their statements. He believed that although there was truth that was overdrawn in their reports, yet distrust and suspicion had frequently, to an undue extent, been lodged against them. Here we have an unexpected and unbiased witness coming forward to add his testimony, and it is not a little remarkable how perfectly his narrative coincides with the European accounts we have of this same John Baptist Scherotti, while the document carries with it an air of truthfulness. The two accounts coming from such independent and even antagonistic sources furnish the most satisfactory guarantee for the truth of the main facts of the case. Japanese annals are silent on this sad episode in the national history, but there are doubtless many manuscripts in existence relating to the period in question. He (Mr. W.) had seen a document of a kindred character at Nagasaki, a translation of which he had hoped would have been given to the public ere this. It would be well if students of the language in Japan would set themselves to gather up these mementoes of the past, and render them accessible to their less gifted countrymen; and it is surely a legitimate object of the Asiatic Society to encourage such researches. While thanking Mr. Brown for his contribution, he hoped the society would specially request him to furnish a translation of the remaining portion of the M.S. which promises to throw some light on a tragic chapter in the tragedy of Missions to Japan.

Mr. KINGSMILL then proposed the following resolution:—"That the very cordial thanks of the society are due to the Rev. Mr. Brown for his valuable and interesting translation."

Having been seconded by Dr. Lamprey, the motion was put to the meeting, and carried unanimously.

SUPPRESSION OF THE BISHOPRIC OF VICTORIA.—Some months since, Dr. George Smith, who is now in England, resigned the Bishopric of Victoria (Hong Kong), and it is stated that the difficulties in connection with the letters patent are so great that no successor to Dr. Smith will be appointed. The see was founded in 1849, and the jurisdiction of the bishop extends over the congregations of the Church of England in China, the income being £1,000 a year, payable from the Colonial Bishoprics' Fund. There are about 20 clergy in the diocess.

LONDON, THURSDAY, SEPTEMBER 7, 1865.

THE EXPORT OF SILVER TO THE EAST.

M. C. ROSWAG, a French writer, has recently published a work on the precious metals, which contains some curious facts, and, amongst other matter, some statistics respecting the export of gold and silver coin to the East. "From time immemorial," says M. ROSWAG, "there has been a flow of the precious metals towards the East;" it existed in the time of SOLOMON, of HIRAM, of the PTOLEMIES, and of FRAYAN. MONTESQUIEU said:—"The Indies have ever been and will ever be the same; "whoever trades with those countries must carry money there "and bring none back again." But to descend to modern times. HUMBOLDT calculated in 1800 that the export of gold and silver to India and China was more than five millions and a half a year, of which nearly two-thirds went by the way of the Cape, and the rest by the Levant and Siberia; but he said also that some small portion of this stopped on the road in the Levant. This statement has been examined by other writers, who came to the conclusion that HUMBOLDT'S total was too high by twenty per cent. MONTESQUIEU'S sweeping statement was invalidated between 1825 and 1830 as regards China, for his word *Indies* included all the East, by the import of Sycee silver. Upon this subject M. ROSWAG says—the Chinese gave Sycee silver in payment for the large quantities of opium which they wanted. In spite of the prohibitions both against the exportation of bullion and the consumption of opium, between 40,000 and 50,000 chests of the latter were introduced annually. Setting the value of a chest of opium at £140 he arrives at a total of nearly eight millions sterling per annum, of which he says eighty per cent. was paid in silver. In 1853, he adds, the value of the opium imported into China was estimated at eight millions sterling, and since the last war at 70,000 chests a-year. Since 1853 the current of gold and silver, says M. ROSWAG, has returned to its old direction, in consequence of the increase of the trade, and he quotes from M. NATALIS ROUDOT, an authority on the subject, the following statement of that increase. The total amount of the imports and exports combined, between Europe and America and China, were in 1810 little more than nine millions sterling per annum; while in 1858 they exceeded forty millions, the imports into China surpassing the exports from that country by about one-tenth. The opium is not included in this estimate. In 1856, according to M. NATALIS RONDOT, tea alone represented six millions sterling of the imports. The diminution of the commerce, caused by the civil war in China, is estimated by another French statist, M. LEVASSEUR, at nearly one million and a quarter sterling, and this produced an increase in the export of gold and silver, which was further augmented by the increasing demand for Chinese productions, especially, as regards France for tea and silk; in the former article because of the increased consumption, in the latter principally on account of the diminution in the home product, caused by the disease amongst the silkworms. The balance of the movement in gold and silver in the favour of the East, according to M. ROSWAG, was £6,200,000 in 1856, and only £4,400,000 in 1858. The total export of precious metals from 1848 to 1850 is said to have been under six millions. From 1851 to 1856, six years, the exports to the East are given as follows:—Gold, £4,884,800; of which £4,430,000 went from English ports, and £454,800 from the Mediterranean. Silver, £36,528,000; of which £30,715,000 from England, and £5,813,000 by the Mediterranean. Total, £41,400,000, or, on the average, £6,880,000; of which 97½ per cent. was in silver. In 1857 the total was, Gold, £528,000; Silver, £20,545,000; total, £21,073,000, or three times the average of the six previous years.

Mr. JAMES LOWE'S tables give the exports from Great Britain during the seven years ending with 1858 as above five millions of gold and forty seven millions of silver. Taking, according to the account of M. ROSWAG, £7,200,000 as the average annual export of the precious metals during the period commencing with 1848 and ending with 1856, we have a total of £64,800,000, or about one fifth of the whole production of the mines of the West; while the average of the latter portion of that period was nearly equal to the whole amount of the production.

This immense export of silver to the East is certainly sufficient to account for the premium at which at present it stands in Europe; and as the exportation is still as great, if not greater than ever, and that the West must find, in order to maintain its commerce with the East, from twelve to sixteen millions of silver per annum, it is not surprising that the money markets should be in a curious condition, and that the financial world should be sorely puzzled to find an easy road out of the difficulty. M. ROSWAG, like most writers on the subject, attributes the disappearance of the silver to the secretive character of the Orientals, and to the want of confidence in their Government; but they do not seem to take into account the fact that the accumulation of silver in the East must cheapen it there, as the reverse is happening in the West, and that as soon as that effect appears, the Orientals will help us out of the difficulty. They cannot eat the silver, and they are far two shrewd to keep it by them when they find it deteriorate in value.

JAVA AND CEYLON.

OUR Dutch neighbours, like other nations not far distant from them, are becoming prompt to adopt suggestions from our trading, financial, and industrial organisation. The project of certain Dutch capitalists, detailed in a late letter from our Rotterdam correspondent, for assuming the cultivation of coffee in the Government lands of Western Java is an instance in point. It is seen that individual enterprise can secure larger returns than are possible under the present system, which discourages the introduction of additional European capital, and is neither favourable to quality nor amount of production. Should the Dutch Government accept the proposition, we may anticipate it will lead to very important changes of internal policy. That portion of the scheme that contemplates payment to the labourers and ultimately the division of portions of the land into lots of which they may purchase the right of cultivation, and thus be relieved from obligatory services, would, in its success and extension, raise the condition of the Javanese, and so render them in the end larger consumers of imported articles. The error of the Dutch Government has been in seeking too direct returns, and in endeavouring to appropriate both the profits of production and the gains of trade; but it is easy to demonstrate that a policy less leavened with the spirit of monopoly would have produced more satisfactory results. The Government at the same time must be credited with having rendered the Javanese cultivators the important service of guaranteeing the contracts at which the produce delivered is rated, and taking upon itself the responsibility of the failure of crops where not attributable to a want of due vigilance and care; and it may be made a question whether a similar system of guarantee, free, of course, from the condition of obligatory labour, might not advantageously be adopted in Ceylon as respects its native population, either by the Government or a body of private capitalists. As to any change of Dutch policy in Netherlands India, Ceylon, with the freedom of its industry and trade, has nothing to apprehend. She is on the eve of a still greater development of her resources, for which the requisite financial facilities will be speedily forthcoming.

OUR JAPANESE VISITORS.

We have to correct an inaccuracy in the account given in our last issue of the "Satsuma Expedition." The number of students who remain to complete their education in this country is sixteen, and not eleven as then stated.

Digitized by Google

The last homeward mail brought to Europe another party of Japanese, who are at present in Paris, and have been described in the public journals there as members of an embassy from the Tycoon. They turn out, however, to be simply agents of the Government sent to visit France and England for purposes of travel and investigation. The party consists, we believe, of two commissioners, two interpreters, a secretary, and four attendants; in all nine persons.

OUR TRADE WITH CHINA.

In our last issue we published the Reports of Her Majesty's Consuls at the three Treaty Ports in Japan. We now proceed to deal in the same way with the Chinese Consular Ports, commencing with

SHANGHAI.

Shanghai, Dec. 31, 1864.

SIR,—In my despatch of the 29th July I forwarded an approximate estimate of the British trade of this port for 1863, and stated that I was engaged on the preparation of more detailed returns. A great pressure of work during the summer months, and the exceedingly cramped and inconvenient offices in which it had to be conducted during the repair of the Consulate, has hitherto interfered with the execution of this wish.

I now forward a series of eight Returns, which may be valuable for reference hereafter, although I am aware that they are less acceptable at this late date than if they had been earlier supplied. I may mention, however, that similar Returns have not been furnished from this Consulate since 1861, it having apparently been considered sufficient to forward the printed Customs Returns, which, however, did not supply full particulars of British trade as distinguished from the general foreign trade of the port. To arrive at the value of the former, which is given in the Returns I now send, every item of the imports and exports in the elaborate Customs Returns has had to be freshly calculated and retabulated. Certain improved arrangements in the Customs books, lately made by the present Commissioner of Customs, Mr. Dick, will save this office much trouble when making up the Returns of British trade for the year now closing, and I trust, therefore, that they will be much more punctually forwarded.

It is scarcely desirable, at this late date, and in view of the occasion shortly devolving on me of reviewing the trade of the expiring year, to attempt a report of that of 1863, during which period, as you are aware, I was not present at this port. I have therefore limited my remarks to a Memorandum which I forward with the Returns, in which I have condensed in a form which I trust may prove convenient, the statistics which they contain.

In order to save the time that must be lost, especially at this season of the year, in the transmission of these Returns to England through the Legation, I am forwarding copies to the Foreign Office direct, which I trust you will approve.—Respectfully, &c.,

(Signed) HARRY S. PARKES.

MEMORANDUM OF THE RETURNS OF TRADE FOR 1863.

The series comprises eight Returns:—

Return 1 gives the total amount of British shipping of all classes that entered and cleared from the port throughout the year, and furnishes a comparison with the tonnage of the previous year of 1862. The result is as follows:—

—	Entered.		Cleared.		Total.	
	Ships.	Tons.	Ships.	Tons.	Ships.	Tons.
1863	1,790	530,921	1,810	554,716	3,600	1,085,637
1862	1,532	390,139	1,531	389,280	3,063	779,419
Increase in 1863 ...	258	140,782	279	165,436	537	306,218

Return 2 gives the distribution of this tonnage, and shows, by a continuation of the same comparison for the two years, that the increase is general to the shipping from all quarters. An analysis of this Return shows that seven-tenths of the British shipping of the port are employed in the local coasting trade, which term includes the trade with the Yang-tze ports, as well as that with Hong Kong and Japan; two-tenths in the direct trade with Great Britain, inclusive of the mail-steamers loading with home cargoes; and one-tenth in the trade with British Colonial possessions and those of other Powers in the East. This conclusion appears by the following figures:—

—	Entered.		Cleared.		Total.	
	Ships.	Tons.	Ships.	Tons.	Ships.	Tons.
Coast Trade	1,462	342,574	1,602	427,317	3,064	709,891
Great Britain, direct trade...	208	111,925	163	100,727	371	212,652
Colonial trade	120	76,422	45	26,672	165	103,094
Total	1,790	530,921	1,810	554,716	3,600	1,085,637

Return 3 gives the tonnage of each foreign nation trading at Shanghai exclusive of British, and the addition at foot of the British tonnage shows the relative amount of foreign and British tonnage, and furnishes the grand total of all the foreign tonnage of the port. The following is the result arrived at:—

—	Entered.		Cleared.		Total.	
	Ships.	Tons.	Ships.	Tons.	Ships.	Tons.
Foreign tonnage, other than British	1,416	422,982	1,378	432,588	2,794	855,570
British tonnage	1,790	530,921	1,810	554,716	3,600	1,085,637
Grand total, foreign tonnage	3,206	953,903	3,188	987,304	6,594	1,941,207

The total foreign tonnage of the port for 1863 is thus little less than 2,000,000 tons, the British proportion of which is a ·56 to ·44 of all other States. The tonnage of the Federal States of America consisting of:—

Entered.		Cleared.		Total.	
Ships.	Tons.	Ships.	Tons.	Ships.	Tons.
820 ..	272,428 ..	884 ..	287,021 ..	1,704 ..	559,449

Comprises two-thirds of the foreign tonnage, the remaining third being made up of that of the Hanseatic towns, Holland, France, and Denmark, and fourteen other States.

Return 4 is a statement of duties paid to the Chinese Government. Part I., purporting to be those paid by British vessels, is incomplete, as it does not distinguish the British share (probably eight-tenths) of the opium and coast trade duties which appear in the second part of the statement. The following comparison appears in the collection on all foreign vessels for the last two years:—

	Taels.	£.
In 1862	4,172,019	= 1,433,019
In 1863	2,526,621	„ 894,239
Difference in 1863	1,645,398	538,780

This difference is thus explained. In 1862 the duties on various produce exported from Hankow and Kiu-kiang and the tonnage dues of steamers trading on the Yang-tze were paid at Shanghai. In 1863 Custom-houses were established at those ports, and they collected about 1,600,000 taels, which at once accounts for nearly the whole of the apparent decrease. A rule also came in force, in 1863, which required the issue of drawbacks when applied for by merchants, for duties paid on foreign goods, instead of the exemption certificates which had always been granted before. The former secure a return of duties on the spot.

Return 5 gives the quantities and value of every article of merchandise imported in British vessels; and

Return 6 shows what portion of these goods were again re-exported to other ports. It will be seen that, exclusive of opium and treasure, the—

	Taels.
Total imports were	34,330,680
Total re-exports	23,384,732
Leaving for local consumption ..	10,945,948

Or rather less than one-third—a circumstance which is a marked indication of the character of the trade, as denoting the extent to which Shanghai serves as the emporium for the ports on the Yang-tze and the coast.

Return 7 is a detailed statement of the quantities and value of all the exports in British vessels.

Return 8 is a convenient synopsis of the three previous returns. On the import side it distinguishes the relative amounts of the direct home trade—that with British Settlements—the Chinese coast trade, and that with Japan. It also states, separately, the amount of opium and treasure imported, which, being on foreign as well as on British account, cannot be strictly described as entirely British.

	Taels.	£
The general trade amounts to ..	34,330,608	= 10,871,382
Opium and treasure	31,308,006	„ 10,141,429
Total	66,138,686	21,012,811

Of the former the imports direct from England amount, it will be seen, to 10,723,060 taels, or £3,406,805. 10s. 5d., one-half of which have been absorbed on the spot, and the other half re-exported.

The total value of exports is 29,427,109 taels = £9,349,238, more than nine-tenths of which are home shipments.

The undersigned has not the means of making a detailed comparison of the British imports and exports for the years 1862-63. The general result may be stated to be an increase in the import trade, principally in rice from India, and a falling off in the export trade. The decrease in exports is entirely attributable to the diminution in the production of silk, the export in 1863 being only 2,877,152 lbs., against 9,861,671 lbs. in 1862.

There has been an increase, however, of the export of tea, as compared with 1862, of 13,273,851 lbs., and the raw cotton trade which has been called into existence by the prolongation of the American war, offers no inconsiderable compensation for the loss on silk, as the export in 1863 had reached 54,988,106 lbs., against 18,148,382 lbs. in 1862.

(Signed) HARRY S. PARKES, Consul.

TIEN-TSIN.

REPORT ON THE TRADE OF THE CONSULAR DISTRICT OF TIEN-TSIN FOR THE YEAR 1863.

Section 1.—*Shipping and Navigation.*

British and Foreign Vessels.—The Shipping Returns for the year 1863, as compared with the returns of 1862, exhibit an increase in the number of British vessels trading at the port of Tien-tsin equal to one-half. Indeed, the British vessels exceed all the other foreign flags, exclusive of the Americans, which visit this port, by a little more than one-third. The subjoined Table will fully illustrate the truth of this;—

Flag.	Shipping in 1863.		Shipping in 1862.	
	No.	Tons.	No.	Tons.
British	69	19,108	39	10,671
American	20	6,558	18	4,436
Sundry	45	10,610	54	11,464
Totals	134	36,276	111	26,561

The decrease with the returns exhibit in the number of "sundry" vessels is accounted for, first, by the British merchants extensively employing small steamers in the Tien-tsin trade; and, secondly, by the British merchants having a quantity of light handy sailing vessels suitable for this trade.

First. I mentioned in my Report of 1862, the decrease of "sundry" vessels as compared with 1861, and I employed the following remarks as being, in my opinion, explanatory of the fact:—The increase of small

Digitized by Google

steamers in 1862 (as now in 1863), connected with the Tien-tsin trade is, however, the principal cause of the decrease of continental shipping. These small steamers, nearly all of which hoist English colours, are undoubtedly by far the most convenient class of vessels for the traffic at this port. The city of Tien-tsin stands about 65 miles from the village of Taku, upon a river which, owing to its insufficient depth of water and tortuous course, is extremely difficult of navigation. At the mouth of the river (Pei-ho) there is a bar, which renders it unsafe for vessels drawing more than 11 feet 6 inches of water to enter Taku anchorage; while outside in the gulf the weather is often so boisterous, and the swell so high, that vessels cannot discharge their cargoes for several days together. The convenience, therefore, of a class of steam-vessels able not only to clear the bar, but to carry their cargoes right up this 65 miles of river navigation to the very gates of the merchants' godowns is very great.

The trouble of hiring native boats, the slowness and stupidity of the native sailors, their dishonesty, the inconvenience of transhipment, and the delay which it occasions, have induced merchants to employ light swift steamers. Three such vessels have run regularly in 1863 between Tien-tsin and Shanghai, and several others have made occasional trips at moderate intervals.

Secondly. The British merchants at Tien-tsin have a sufficient quantity of sailing vessels of a light draught of water, which renders the chartering of continental vessels superfluous. This was not so in 1861. British vessels could not be obtained of a size small enough for the Tien-tsin trade. The British merchants had, therefore, to charter continental vessels.

But the freight of German and Danish vessels has fallen in the market. The five or six British steamers, which trade between this and Shanghai, have engrossed the trade which belonged to continental vessels in 1861, and British merchants like British vessels better than those flying the flags of other Powers.

Coasting Vessels.—Foreign and Native.—The foreign vessels that visit Tien-tsin are, in the vast majority of instances, engaged in a merely coast trade. The merchants, foreign and native, in Hong Kong, Canton, and the other southern ports, charter foreign ships to transport their merchandise to Tien-tsin; and the merchants, foreign and native, in Tien-tsin employ foreign vessels to export their merchandise to Shanghai, Hong Kong, Canton, and other southern ports; the foreign ships and steamers generally touch at Shanghai, or make Shanghai their destination. The coasting trade at Tien-tsin, the only trade of the port, in the great majority of cases is done by native or foreign Shanghai houses.

Not only are foreign vessels employed in a coasting trade between this port and Southern China, but they import and export native produce. Foreign vessels bring up to Tien-tsin, not only foreign manufactures, but sugar, rice, tea, oil, medicine, paper, and other native produce, for which there is an extensive market at this port; and foreign vessels carry away not merely re-exports, but beans, peas, cotton, wool, hides, fruit, medicine, and other produce of Northern China, as well as the native junks. For particulars of the coasting trade, I beg to refer to my report on the trade of Tien-tsin in 1861-62.

The native junk is rapidly disappearing from the highways of commerce; the native merchants do not engage them; the principle of marine insurance annihilates the native craft. "Can you insure?" is a question which the Chinese merchants almost invariably put. Eighty southern junks came in 1863, one-third of their holds were empty; 127 came in 1862. The eighty junks which entered in 1863 contained rice, sugar, tea, oil, paper, medicine, fruit, preserves, silk pieces, native hardware, wood, prepared opium, birds' nests, fish, sharks' fins, &c., and they took away peas, beans, salt, fruit, vegetables, fish, wheat, barley, millet, medicine, ginseng, &c.

The coasting trade done in this Consular district by the native junk is very great.

Ports and Harbours, Buoys, Lighthouses, and Junk Buildings.—For a description of the ports, harbours, buoys, lights, lighthouses, and junk buildings, I must refer to my Report drawn up in 1862.

Section 2.—*Trade and Commerce.*

Foreign Trade Imports.—The import return for 1863 sufficiently indicates the nature and extent of the trade transacted at Tien-tsin during 1863. Except cotton manufactures, the returns for 1863 compare very favourably with those for 1862.

Manufactured Cotton.—The import of cotton manufactures has, in 1863, steadily fallen off. The civil war in America and the defective supply of cotton in England fully accounts for this. Merchants' manufactures when brought into competition with native cotton manufactures, owing to a rise in their price, ought as a matter of course to go to the wall. Foreign cotton manufactures in 1861 sold at Tien-tsin for about half the prices of native cottons. As a consequence, the people of the towns and villages, scattered through Chi-li and the neighbouring provinces, purchased foreign cottons as being cheaper than their own cottons; but the country population adhered to their native manufactures. The country people, who work a great deal at rough employments, when manufactured cottons sold at one-half the price of native cottons, bought the native rather than the foreign, because the native lasted much longer than our Manchester goods. Native cottons, though not so comely, are much adapted for the rough work of the rural population.

The scarcity of cotton has raised the price of Manchester goods so near the price of native cotton manufactures that not only the country people but the town and village population purchase their home manufactures instead of merchants' goods. Till the normal state of the cotton market returns, and as a consequence till the prices drop very much lower than the prices current in 1863, the native cottons must rule the market.

Woollens.—The import of woollens has been unfavourable. In the Trade Report for 1862 I explained the cause. At Tien-tsin, and throughout North China in general, the winter months are dry, but the cold is very severe; as a consequence the Chinese prefer cottons or silks lined with fur for winter dresses rather than foreign woollens. In upholstery a good deal of woollen cloth is used, but for the most part the woollens are Russian, not English. The English woollens imported into Tien-tsin are too dear, of the wrong colour, and too heavy for the natives. Upon the whole then, the market for British woollens remains insignificant.

Opium.—This import maintains its high character; 182 chests of Malwa have been imported in 1863 more than in 1862; and though the Shensi crop of native opium was fair, the Chinese favour the Indian, not the native drug. The native opium is, though very much cheaper, insipid, and very few of the Chinese smoke native opium, unless it is mixed with the Indian. If they can get the Indian, of course so much the better, but a Chinaman reduced to a state of poverty, to which the habit of excessive opium smoking invariably leads, unable to purchase the Indian, mixes the native with the Indian, or even gathers up the cinders of the Indian opium twice smoked, and smokes them a third time.

Malwa opium is sold for about 600 taels, while native Shensi opium is sold for about 400 taels. In 1862 native opium was offered in the market at 650 taels; this rise in the price of native opium was caused by political disturbances in Shensi, ultimately calmed down by means of bribes and donations, which threatened with extinction the whole trade of that province. The quantity of Indian imported into this district depends entirely on the state of the Shensi crop. When the Shensi crop is deficient, the demand for Indian opium increases, and *vice versa*.

Of the opium imported into Tien-tsin, from 150 to 200 chests a month are purchased for consumption in the capital. What Peking consumes in the native drug I do not exactly know; it must, however, have been large.

Produce of China and the Straits.—The Returns for 1863 show very favourably as compared with those of 1862.

This trade is partly in foreign and partly in native hands. The raw material is imported by foreign merchants, while the prepared material falls to the lot of the native merchants. I should judge that one-half, or perhaps a little more, of this is carried on by the Chinese. The native houses in Tien-tsin have agents in Hankow, Canton, Singapore, acute in business transaction. It is only in dealing with places in which Chinamen do not exist that the native merchants meet with a difficulty; but wherever Chinese reside, the native merchant can do business very much cheaper than the foreign houses in China; and, moreover, his knowledge of the tastes and habits of his countrymen guarantees him against any gross mistakes, especially with reference to prepared commodities.

Foreign Trade Exports.—The Export Returns of 1863 compare favourably with those of 1862.

CANTON.

REPORT ON THE FOREIGN TRADE AT THE PORT OF CANTON FOR THE YEAR 1863.

The Returns annexed to this Report are as follows:—

No. 1. A return of the British shipping at the port of Canton in the year 1863, showing the direct trade in British vessels to and from Great Britain and British colonies.

No. 2. A return of the British and foreign shipping at the port of Canton during the year 1863.

No. 3. A return of the foreign (other than British) shipping at the port of Canton, during the year 1863.

No. 4. A synoptical return of the import trade at Canton during the year 1863, and contrasting the same with the value of the imports in 1862.

No. 5. A synoptical return of the export trade at Canton during the year 1863, and contrasting the same with the value of the exports in 1862.

These returns, like those of the preceding year, have been compiled from the Custom-house Reports, and in so far may be considered as correct; but they must not be assumed as representing the actual trade of this portion of the Chinese Empire, from the fact that a very large business in foreign manufactures and opium is done at the British colony of Hong Kong, and the goods and produce there purchased are conveyed chiefly down the coast, and being landed at the numerous towns, or carried up the rivers, find their way into the interior in all directions. To obtain therefore a true estimate of the amount and value of foreign trade with this part of China would require returns from all these various places, which is simply impossible. The position may be shown in very few words. On a coast line of nearly 700 miles, studded with bays, harbours, cities, and towns, and with rivers such as that called the West River, penetrating far into the interior, there is one treaty port, Canton, and an open and free mart, the colony of Hong Kong. It is but reasonable therefore that if Chinese traders can purchase goods at Hong Kong and land them on the coast, they will not pass them through the foreign Custom-house at Canton, but will ship them direct to their destination. The same may be said with regard to exports from these places. Hence it follows that no estimate can be formed of the foreign trade in this part of China from the published Canton Custom-house Returns, for they represent a local trade only.

A comparison of the returns of the past with the preceding year will show a decrease generally in the trade of the port, but by no means to the extent anticipated. To begin with—

Imports.—The total value in sterling for the year 1863 is estimated at £2,281,354, against £2,412,515 in 1862, showing a decrease amounting to the sum of £131,161 in the past year's trade.

As regards the causes of this decrease, the falling off must be attributed as much to failure in supply as to failure in demand; the rise in piece goods, owing to the American supply of raw cotton ceasing, having brought the foreign into competition with the native manufactures, and as the Chinese prefer the latter, from being heavier and of more lasting qualities, they abandon the former the moment its price places it beyond the denomination of being a cheap article for clothing.

Compare, for instance, the imports of cotton-manufactured goods for the two preceding years, and a large deficiency in plain goods will appear, and particularly in the article of Bombay raw cotton, whilst in fancy goods the difference is rather in favour of 1863. This latter may be accounted for in the heavy stocks on the manufacturers' hands, which rendered their going off beneficially to the holders, and therefore the prices were not affected in a ratio proportionate to that of the plain manufacturers.

But take the imports of woollen manufactures, and it will be seen that the balance is in favour generally for 1863, and this arises from the fact

Digitized by Google

that wool has not been subjected to the fluctuations of raw cotton or deficiency in supply, and therefore, if anything, there has been an improvement and not a deficiency in this branch of the import trade.

The result of these comparisons tends to show that the decrease in the value of the import trade of 1863, viz., £131,161 sterling, is owing as much to foreign as to native influences, and that under such circumstances the past two or three years will afford no criterion of the capabilities of Canton as a mart for foreign manufactures.

The import of opium in 1863 as compared with 1862 differs in amount but little. The temptation to smuggle so valuable an article, and the facilities the coast affords for that purpose, are so great, that in all probability what passes through the Canton Custom-house is for local consumption only, and so it will be until the Chinese authorities establish a preventive service.

Exports.—The value of this trade may be taken at £3,862,039, against £4,060,746 sterling in 1862, showing a decrease of £198,707 sterling. This may chiefly be attributed to the short supplies of teas, the export in 1863 being less than in 1862 by at least 7,418,890 lbs., but less though it be, it is more than was anticipated, the opinion being at the close of last season that little or no teas would come again to Canton; but notwithstanding this, not only did they come down, but the teamen held out for high rates, and generally obtained them.

As regards silk, the export of the two years 1862 and 1863 is much on a par.

Of a trade, stationary as this is, there is little to be said. Hong Kong is doubtless a formidable rival to Canton, because, as before observed, it is a free port and a depot for the neighbouring coast of China, but Hong Kong produces nothing and consumes nothing, and it is to the interior provinces we must look for both. At present the disordered state of the Empire paralyses its capabilities, and the necessity of raising a revenue to meet its war expenditure presses heavily on the people, but it is to be hoped, and indeed there is every prospect of an improvement in this state of affairs, and with internal peace will come a development of those mercantile energies which are now only in abeyance and not extinguished. For, seeing that the Province of Kwang-tung alone comprises an area of 79,456 square miles, with a population of above 20,000,000, the adjoining one of Kwang-si 78,250 square miles, with a population of above 8,000,000, Sze-chum, bordering on the latter, 166,800 square miles, and a population of 22,000,000, and Hu-nan immediately adjoining that of Kwang-tung, 74,320 square miles, with a population of 19,000,000, showing a total of 398,826 square miles, and a population of 69,000,000 of inhabitants, it may be safely assumed that our trade with these alone, independent of the other portions of this vast empire, is as yet undeveloped, and their capabilities of production and consumption unknown. It is true that the ports of Hankow and Foo-Chow have withdrawn from that of Canton the chief trade in teas and on the other hand foreign events have swept away from it the great trade in raw cotton which formerly existed, but Canton has seen its worst, and what it is this year it will probably be next, neither better nor worse, unless the peace of the West, and peace in the empire follow, and then indeed there is a hopeful future before it, rich in promises and certain in results. (Signed) D. B. ROBERTSON, Consul.

British Consulate, Canton, June 20, 1864.

SWATOW.

REPORT ON THE TRADE OF SWATOW FOR THE YEAR 1863.

British Shipping.

The Shipping Return for the year 1863 exhibits a large increase in the number of British vessels entering this port. This will best be seen by a glance at the following table:—

ENTRIES.

With Cargo.		In Ballast.		Tonnage.	
1862.	1863.	1862.	1863.	1862.	1863.
130 ..	215 ..	33 ..	23 ..	62,965 ..	93,085

or, total arrivals, 238, against 163 of 1862, being an increase of 75 vessels, and a tonnage of 30,120 over the previous year.

CLEARANCES.

With Cargo.		In Ballast.		Tonnage.	
1862.	1863.	1862.	1863.	1862.	1863.
101 ..	184 ..	58 ..	52 ..	60,815 ..	92,382

The above shows an excess of eighty-three vessels leaving with cargo.

The trade between Singapore and this port has been almost completely driven away by reason of the heavy sums demanded by the Chinese officials on each voyage, and also in consequence of the extortions levied by the villages near Swatow on all Chinese passengers. The amount charged for merely landing them is 10 dollars per head; whereas passengers from Hong Kong by steamer save two dollars, the charge being eight dollars. These are most iniquitous charges; but the officials appear unwilling, or perhaps are unable, to put down extortions levied by such powerful clans as those inhabiting the villages of Swaboe, Goswa, &c. The Singapore vessels now discharge their cargoes into lorchas at Hong Kong, which can, being native owned, dispose of their goods at any of the ports between this and Hong Kong, many going to Cupchi, between which port and Hong Kong a large trade, I am told, has sprung up.

Foreign Shipping.

There has been a very large increase in the number of vessels under flags of continental States frequenting this port, as compared with former returns.

These vessels average from 150 to 300 tons, and are better suited to the coasting trade under Chinese charter than our larger vessels, which require more cargo than can be stowed at Swatow, where there is a paucity of godown room; goods have, therefore, to be retained up country until the vessel is ready to take in her cargo, when it is sent down in boats, which go at once alongside to put it on board. Nearly all the vessels employed in the trade of the port, exclusive of course of steamers, are chartered by Chinese merchants, who much prefer these smaller craft, which are besides chartered at a lower rate than either British or American vessels.

It will be perceived that foreign shipping has increased in much greater proportion than the British; and if steamers be not taken into account, foreign ships exceed the British by sixty-nine vessels—the tonnage of the former being 55,147, and of the latter 31,808, or an increase of 23,344 tons in foreign bottoms. The coast trade in steamers is, however, still monopolised by British vessels.

Imports.

The total value in sterling of the import trade for 1863 is estimated at £1,770,635, whilst that of the previous year was £1,264,444; being an increase of £506,191 over the year 1862, this excess being principally in the following items, viz.:—

In Beancake	£232,053
Beans and peas	50,424
Opium	97,035
Native cotton	84,596
Tin	14,635
Cotton yarn	9,867

In the above imports foreign goods in native bottoms have been taken into account; the value of this trade for the year 1863 amounts to £22,029, which, as compared with 1862, shows a falling off of £35,734. This has been caused by the preference which is now given to foreign vessels by the native merchants over their own unwieldy junks, very few of which now visit this port. The lighter and smaller built vessels of the lorcha or west-coast boat class trade between Hong Kong and this, a line on which there is no traffic in foreign bottoms except by steam vessels. Goods shipped in west-coast boats have a great advantage, as, being native craft, they can visit any of the ports, and so choose their market. Much smuggling is carried on in this way.

Exports.

The total value of the export trade for 1863 amounts to £808,069, which, when compared with that for 1862, shows an increase of £84,479. This excess is chiefly perceptible in sugar, the increase in this article being £51,818. There is also an increase in the quantity of tobacco exported, of the value of £21,273.

Sugar, tobacco, paper, coarse chinaware, and grasscloth, are the principal articles of export.

The total estimated value of the trade of this port for 1863 (exclusive of native trade in native vessels, of which I have been unable to procure any returns) is, therefore, £2,578,704, or an increase of £590,670 over the previous year, being an excess of considerably over half a million sterling; which, considering the many disadvantages this port labours under, in its foreign merchants being denied access to the chief cities through the non-reception by the Chinese officials of Her Majesty's Consul at Chao-chow-foo—the heavy mulcts demanded by powerful village clans on all goods sent inland—as well as the disturbed state of the country, village feuds being the rule and not the exception—will afford a very fair idea of the steady advance of the trade of the port.

Since my last report was written, the Consulate has been removed from Double Island to Kahchio, immediately opposite Swatow, between which two places all the shipping lie. Some dwelling-houses have lately been built at Kahchio, as well as godowns, and more of the latter are in course of erection.

I understand that much extra ground has been set apart this year for the cultivation of sugar, in consequence of the demand in the North of China for this product. The Chinese method of pressing sugar is most rude; the cane is passed between two perpendicular granite cylinders, one being turned by oxen, give a motion to the other by means of cogs cut in the granite, and shod with hard wood; the juice is thus expressed, and runs through a channel cut for that purpose into a large wooden tub, from which it is removed to the boiling-hut closely adjoining. These cylinders are not at all firmly fixed, depending altogether upon their weight to keep in position. I believe a company of Europeans, working one of the modern sugar-mills, might make a large profit, if the Chinese would consent to sell their crops when ready for cutting. They cannot be induced to use the European sugar-mills themselves. Messrs. Bradley and Co. imported one, but the natives refused to purchase or even to try it.

(Signed) G. W. CAINE, Consul.

Swatow, June 15, 1864.

OUR COMMERCIAL INTERESTS IN THE COREA.

(To the Editor of the *London and China Telegraph.*)

SIR.—That portion of the report of Her Majesty's Consul at Newchwang, descriptive of the triennial fairs that take place on the border line of Corea and China Proper, is certainly suggestive of the profits eventually to be obtained by a direct trade between this country and the Corean peninsula. As the Coreans take from Chinese traders our manufactured cottons and opium, giving besides ginseng root, gold dust in exchange, it is evident that the materials exist for profitable intercourse, the population besides being both numerous and industrious. The relation of the Corea to the islands of the Indian Archipelago would render a settlement there extremely valuable; not to speak of the large coasting trade that might be had with China. You advocated some time since the sending an embassy to this country. The present period would be propitious; and it is to be hoped that the Government will give instructions to Sir Rutherford Alcock to organise an embassy at the first convenient opportunity.—Yours, &c. A TRADER.

London, Aug. 30, 1865.

THE RUSSIANS IN CENTRAL ASIA.

The following, having reference to the occupation of Tashkent by the Russians, is from the *Invalide Russe*:—

Tashkent was occupied some time ago, in accordance with the expressed desire of the inhabitants. The latter, finding it impossible to shake off the yoke of Zadyk Kenisarin, a Khokand chief of mountaineers, who had made himself master of their quiet and industrious town, had repeatedly sent to General Tchernayeff, soliciting his protection. The general at first would not meddle with the internal affairs of the Turkish tribes, although, as he was well aware, Russian exports to Tashkent had considerably fallen off in consequence of the ascendancy of Zadyk Kenisarin; but when he found that the people of Tashkent, rather than submit to the arbitrary rule of their new master, were inviting the Emir of Bokhara to

Digitized by Google

come and take possession of the town, he, very much against his will, discovered the necessity of protecting his own interests in a more forcible way, and took Tashkent by storm. The Russian columns were headed by a priest, carrying aloft a crucifix, and the enemy, after some resistance, evacuated the place. The Russians had 25 men killed, 89 wounded, and 28 bruised. This occurred in the night of the 27th of June, and, as the Russian general hoped and trusted, was to be the last and concluding scene of his military activity in those parts. But the Emir of Bokhara, the proud chief of a fierce and fanatic tribe, resented the capture of the contested city as an insult offered to him and his race, and in most offensive language claimed Tashkent, which, it is true, had asked for his assistance a few weeks before, as a place to which he had a lawful title. His troops appeared at the same time in the neighbourhood of the city, and things looked as though he was going to vindicate his claim by force of arms. To have diplomatised with an Asiatic prince would have been useless under these circumstances, and so the Russian general resolved to have recourse to reprisals without loss of time. The Bokhara merchants in Orenburg were placed under arrest, their goods sequestrated, and those on their way to Nijni Novgorod prevented from proceeding on their journey. The Emir was visibly overawed by the energy of the Russian general, and in his intercourse with M. Tchernayeff began to observe again the ordinary forms of politeness, which he had neglected for a time. His troops have since been withdrawn, and his claims, it is possible, will be abandoned for good. Still, Russia must be on her guard. What if he only wishes to gain time, and prepare for making good his claim by superior numbers? Russia has no more ardent desire than to be able to evacuate Tashkent and to restore the inhabitants to their former state of prosperous and self-controlled independence; but the necessary condition of her retreat is the abstinence of the Emir of Bokhara. A Russian force is being concentrated at Tashkent. The troops either cross the Caspian Sea, and, landing on its north-eastern shores, march through the steppe till they reach Lake Aral, when they embark again and proceed in steamers to their destination; or they come from Orenburg, and take water in a military port on the north-western shores of Lake Aral. General Krishanowski, the Governor-General of Orenburg, has just instituted a municipal committee at the capital of his province to consider the question of establishing railway communication between that city and Samara, one of the principal harbours on the Volga. After the construction of this railway there would be a nearly continuous line of steam communication between the central provinces of Russia and Turkistan, the only gap occurring in the steppe on the eastern shores of the Caspian Sea, and being rather less than 500 miles. Bokhara is a cotton-growing country, and sells large quantities of the article to Russia.

Monetary and Commercial.

At a meeting of the creditors of Messrs. Scott, Bell, and Co., held on the 31st ultimo, a statement of the affairs of the firm was submitted by the accountants, Messrs. Coleman, Turquand, Youngs, and Co. The liabilities amount to £1,487,592, and the assets (which have been so computed as to allow a considerable margin for depreciation) are estimated at £1,515,329. This includes a large sum due from Messrs. Dow and Co., of Shanghai, who will also be compelled to suspend, but whose estate, when realised, will probably be more than sufficient to meet all liabilities. A paragraph which appeared in *The Times* City Article stating that Dow and Co.'s suspension had preceded that of Scott, Bell, and Co., and implying that it had been in some measure the cause of the latter, was quite incorrect. It was resolved that Messrs. Scott, Bell, and Co.'s business should be wound up under inspection.

The directors of the Delhi and London Bank (Limited) have declared an interim dividend of 9 per cent. per annum for the half-year ending the 30th June last.

The Royal Bank of Saxony has been founded at Dresden, with a provisional capital of £7,000,000, of which £1,500,000 has been offered to the public, the subscription list having been opened for the purpose on the 28th ult. The houses of Bleidwoeder and Magnus of Berlin, Oppenheim of Cologne, and Rothschild at Frankfort, are represented in the direction. The bank is entitled to commence operations as soon as 20 per cent. of its capital is paid up.

At the half-yearly meeting, on the 28th August, of the Bank of Australasia, the directors' report, announcing the proposed payment in October next of a dividend and bonus at the rate of 14 per cent. per annum, free of income-tax, was adopted. This allows £2. 16s. on each old, and £2. 2s. on each new share. In future the old and new shares will stand on the same footing.

It is announced that a call of £4 per share has been made on the shares of Overend, Gurney, and Co. (Limited), payable by the 22nd September, at the banking house of Messrs. Barclay, Bevan, Tritton, Twells, and Co.

Insurances are being effected at Lloyd's upon the steamship *Great Eastern* at 5 guineas premium, to cover her stay in the Medway, and her next voyage to Newfoundland and back.

The announcement made by the directors of the Atlantic Telegraph Company, that it is not their intention to renew the attempt to recover the cable this year, has been considered by the underwriters interested as equivalent to a total loss, and they have settled with the insurers.

The Board of Trade Returns for the month and seven months ended the 31st July, are of a more favourable character than those presented for the past few months. Although the value of the exports is rather below that of the corresponding month last year, still the difference is but slight, and tends to show that the trade of the country is increasing, and that commerce is in a sound condition. The total declared value of exports for the month of the present year was £14,113,410, against £14,394,364 in 1864, and £13,648,840 in 1863, which is a decline as compared with the former period of £280,954, but an increase over the latter of £464,570. For the seven months of the present year the total declared value was £88,242,048, against £92,441,950 in 1864, and £75,663,037 in 1863, which shows a decrease of £4,199,902, compared with 1864, and an increase of £12,579,011 contrasted with 1863. The chief changes have been an increase in the exportation of alkali, gunpowder, beer and ale, coals and culm, cotton yarn, cotton manufactures, haberdashery and millinery, hardware and cutlery, linen manufactures, metals, seed oil, silk manufactures, and woollen and worsted manufactures. But there has been a decrease in linen yarn, machinery, thrown silk, wool, and woollen and worsted yarn. In imported articles the increase has been in raw cotton, flax, and hemp, guano, flaxseed and linseed, tallow, cocoa, coffee, spirits, unrefined sugar, tea, and tobacco. And the falling off in leather manufactures, paper, raw silk, wool, woollen manufactures, and wine. Our trade with the Far East is represented in these returns, as far as distinctively classed, by the figures following:—

EXPORTS TO CHINA AND HONG KONG.

For the Month ended 31st July.

	1863.	1864.	1865.
Cotton yarn	—	322,610	3,840 lbs.
Cotton manufactures	3,371,697	5,192,717	12,910,816 yds.
Worsted stuffs	708,262	1,371,718	1,767,961 ,,
Woollen and worsted cloths	141,145	214,455	221,105 ,,
Lead	1,274	567	107 tons

Value for the Seven Months ended 31st July.

Cotton yarn	£70,893	£153,266	£82,925
Cotton manufactures	585,045	1,172,415	1,516,497
Worsted stuffs	327,654	513,791	758,534
Woollen and worsted cloths	197,851	175,084	172,670
Lead	210,644	93,962	22,647

The Cotton Manufactures exported to other ports and countries of the Far East were, in quantity for the month, and in value for the seven months, as under:—

Quantity for the Month ended 31st July.

	1863.	1864.	1865.
Ceylon	2,491,274	957,232	391,165 yds.
Singapore	1,908,294	940,280	1,736,058 ,,
Java	1,911,423	1,078,044	2,191,206 ,,
Philippine Islands	1,188,218	80,922	2,694,983 ,,

Value for the Seven Months ended 31st July.

Ceylon	£200,901	£268,937	£151,057
Singapore	271,826	505,971	595,216
Java	174,323	418,898	394,569
Philippine Islands	151,655	334,646	436,237

Of Cotton Yarn, the quantity forwarded to Singapore was for the month 80,000 lbs.. and for the seven months, 933,390 lbs., against 69,000 lbs., and 581,308lbs. in 1864, and 236,600 lbs., and 865,576 lbs. in 1863. The value for the seven months was £86,867 in the present year, £70,133 in 1864; and £91,051 in 1863. To Ceylon 18,200 lbs. was forwarded in July last, and 116,392 lbs. during the seven months. The value of the export to that island for the seven months of the respective years was £9,818 in the present year, £20,200 in 1864, and £26,946 in 1863.

IMPORTS.

Raw Cotton exhibits a considerable increase if compared with the preceding months of the year, and the total import is far more than in 1863, and is gradually mounting up to that of 1864. The figures are as follows:—

Quantity for the month ended 31st July.

	1863.	1864.	1865.
British India	348,547	281,224	275,454 cwts.
China	27,724	71,959	46,043 ,,
All parts	569,245	577,656	585,209 ,,

Quantity for the Seven Months ended 31st July.

British India	1,554,345	1,889,997	1,411,296 cwts.
China	138,193	483,328	256,298 ,,
All parts	2,703,475	4,124,624	3,694,062 ,,

Value for the Six Months ended 30th June.

British India	£9,193,049	£15,023,536	£5,880,043
China	793,888	3,570,152	957,866
All parts	17,811,281	37,858,292	20,478,572

Of Unrefined Sugar, the quantity imported from Java and the Philippine Islands during the month of July was 26,628 cwt., of the 3rd quality (not equal to Brown Clayed), and 4,060 cwt. of 4th quality. The quantity for the seven months, and value for the six months, is returned as follows:—

Quantity for the Seven Months ended 31st July.

	1863.	1864.	1865.
Of all qualities (cwts.)	599,794	95,526	453,525

Digitized by Google

	Value for the Six Months ended 30th June.		
Of all qualities	£463,268	£105,735	£415,318

Of Hemp the import from the Philippine Islands during the month of July was 41,231 cwt., the general result being represented as follows:—

	1863.	1864.	1865.
Quantity to 31st July (cwts.) ..	195,917	98,076	145,562
Value to 30th June	£204,129	£130,783	£149,177

Ceylon delivered to us 8,350,253 lbs. of Raw Coffee in the month of July, and the following are the quantities and values for the three years:—

	1863.	1864.	1865.
Quantity to 31st July (lbs.) ..	37,324,272	36,972,517	38,259,126
Value to 30th June	£1,166,302	£1,081,163	£1,023,562

The present returns furnish the value of the British and Irish Produce and Manufactures Exported to, and also of the Merchandise Imported from, the various countries of the world, during the six months ended the 30th June in this and the two preceding years. The ports and countries of the Far East present the amounts following:—

To	Exports for the Six Months ended 30th June. 1863.	1864.	1865.
China (exclusive of Hong Kong).	£1,186,979	£1,435,531	£1,718,225
Hong Kong	591,598	873,027	791,932
Singapore and the Eastern Straits .	534,824	783,891	853,943
Ceylon	330,023	444,920	291,367
Netherlands India (Java, &c) ..	224,805	518,747	455,190
Philippine Islands	187,724	430,984	524,355
Siam	10,586	11,493	15,204
Japan	43,842	162,554	704,713

From	Imports for the Six Months ended 30th June. 1863.	1864.	1865.
China (exclusive of Hong Kong).	£7,400,054	£6,916,934	£5,108,789
Hong Kong	423,659	1,800,091	499,608
Singapore and Eastern Straits ..	785,278	913,506	863,088
Ceylon	1,475,198	1,420,099	1,255,170
Netherlands India (Java, &c.) ..	12,524	8,378	—
Philippine Islands	718,960	269,987	790,730
Borneo	23,435	6,634	19,842
Siam	16,778	14,522	9,372
Japan	671,586	791,389	415,510

LOADING.

At LONDON.—For Yokohama: Fusi Yama. For Yokohama and Nagasaki: Grenadier. For Shanghai: Maiden Queen, Antipedes, Sir W. F. Williams. For Hong Kong and Canton: Dilpussund, Sovereign of India, Taitsing. For Singapore: Couranto. For Penang: Devonvale. For Bangkok and Siam, Fairy. For Manila: Loyola. For Batavia and Sourabaya: Kaap Hoorn. For Colombo: Teviot, Jane Symons, Granville. For Colombo and Cochin: Blanch. For Colombo and Trincomalee: Charlotte Ann.

At LIVERPOOL.—For Yokohama: Eclipse. For Shanghai: Lockett. For Hong Kong: Her Majesty, Stuart Wortley, Sumatra. For Hong Kong and Canton: Ariel, Sir Lancelot. For Singapore: Albert Victor. For Batavia and Singapore: Braganza. For Batavia and Sourabaya: Harkaway. For Manila: Aureliana, San Luis, Alavesa. For Colombo: Meg Merrilies.

At GLASGOW.—For Manila: Adolphe. Bella Gallega. For Singapore: Taymouth Castle.

SPOKEN.

MATHILDA, Cardiff to Shanghai, June 22, off Palembang Point.
VIRGILIA, Sunderland to H. Kong, June 24, in the Java Sea.
FINZEL, Liverpool to Shanghai, July 7, off Macclesfield Bank.
QUEEN OF THE AVON, Sund. to H. Kong, June 24, in the Java Sea.
OSCAR (barq.), for Shanghai, off Peshan Island.
HELENA AND ANNA, Nieuwe Diep to Bat., Aug. 3, 37 N., 14 W.
ZEEPAARD, Middelburg to Batavia, Aug 4, 38 N., 14 W.
JAS. RUSSELL (ship), London H. Kong, July 22, 13 N., 26 W.
BONI, Rotterdam to Batavia, Aug. 19, 49 N., 6 W.
FELICIA, Singapore to Falmouth, May 18, in Straits of Sunda.
MARGARITA, Java to Amsterdam, Aug. 4, 32 N., 37 W.
COM. DES KON. V. DER HEIM, Cardiff to Manila, July 6, 1 N., 23 W.
CROMWELL, Boston to Batavia, July 6, 8 N., 28 W.
FIERY CROSS, Foo-chow to London, Aug. 1.
GLENCAPLE, Sourabaya to Amsterdam, July 16, 34 S., 23 E.
ALERT, Sourabaya to Amsterdam, July 16, 35 S., 23 E.
CORSA (ship), Liverpool to Hong Kong, June 5, 37 N., 17 W.

FREIGHTS AND CHARTERS.

In outward freights we have no change to note, and in homeward charter the same stagnation prevails.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 35s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £44 and £43 and £2. For Shanghai: £53 and £2. 10s. For Manila: £1. 17s. 6d. For Batavia: 24s. to 26s. For Singapore: £29 and £1. 8s. For Galle: £28 and £29 and £1. 7s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have invited tenders for the conveyance of 209 tons naval stores, including a few combustibles from the river Thames to Hong Kong.

CASUALTIES.

The Marinus Willem, Bursser, from Banjoewanjie for Amsterdam with a cargo of sugar, tin and arrack, put into Nieuwe Diep, September 1st, very leaky and much damaged, having struck in the west channel of Texel. On the night of the 2nd the pumps had much difficulty in keeping the second deck above water, and much damage to the cargo is expected.

The Nederland (Dutch ship), 706 tons burden, from Batavia for Amsterdam, put into Simon's Bay, 22nd July, leaky and with loss of foremast, and will probably discharge part of her cargo.

MISCELLANEOUS.

At ST. HELENA.—July 23, from Batavia, Juno, Nuss, and sailed 24 for Amsterdam; 24, from Java, Pieter, Hoogerwerf, and sailed for Rotterdam; from Macao, Richard, Hochreuter, and sailed 25 for Falmouth; 28, from Padang, Alcyone, Kruisinga, and sailed 29 for Amsterdam; 31, from Batavia, Holland, Auffmann, and sailed Aug. 1 for Rotterdam; Aug. 1, from Manila, Albis, Wohlers, and sailed for London; from Penang, Ironsides, Tapley, and sailed for Bangor; 4, from Canton, Bucton Castle, Ridley, and sailed for Demerara; 5, from Colombo, Palmerston, Seagrove, and sailed for London; 6, from Sarawak, Malabar, Godje, and sailed for Falmouth; July 22, Liberator, Robertson, sailed for Ceylon.

At TABLE BAY.—July 17, from Clyde, Japan (s.), Bell, and left 23 for Japan.

SHIP LAUNCHES.

On the 24th ult. there was launched from the yard of Messrs. Pile, Hay, and Co., at Sunderland, an iron ship named the Star of the North, 667 tons register, intended for the East India trade, will be commanded by Lieut. Rowle, R.N.R., and is the property of Messrs. A. Pendew and Co., Plymouth. This being the first ship that will sail from the port commanded by a Naval Reserve officer, the event was celebrated by a large attendance of gentry and naval officers, amongst whom were Captain Heard, R.N., Captain Hall, R.N., Lieut. Lambton, R.N.R., and C. G. Yealland, R.N. The band of H.M.S. Active was in attendance, and dancing was kept up on board until about 9 P.M.

There was recently launched from the building-yard of Mr. John Smith, at Aberdeen, a clipper vessel of 420 tons, named Owari. The vessel has been built to the order of Messrs. Glover, of Aberdeen. She is to be commanded by Captain Wright, and is intended for the Japan trade.

ASIATIC BANKING CORPORATION.—

Incorporated by Royal Charter. Authorised Capital, £2,000,000. Paid-up Capital, £500,000.

Head Office—No. 4, Lombard-street.

Agencies and Branches are established at Bombay, Calcutta, Singapore, Ceylon, Hong Kong, Shanghai, and Melbourne.

The Corporation grant drafts and negotiate bills of exchange payable at the above places, issue letters of credit, and conduct every description of banking business connected with the East. They effect the purchase and sale of Indian securities, the receipt of dividends, &c. and undertake the safe custody of securities. They also receive deposits, bearing interest, for fixed periods. Rates of interest and exchange may be ascertained at the Head Office.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 266 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

FIRST PRIZE STEAM FIRE ENGINES.

SHAND & MASON,

75, UPPER GROUND-STREET, BLACKFRIARS-ROAD,

LONDON.

FIRST PRIZE GOLD MEDAL

FOR THE LARGEST AND MOST POWERFUL

STEAM FIRE ENGINE,

AT THE

INTERNATIONAL COMPETITION,

HELD AT COLOGNE, ON THE 6TH JUNE, 1865.

ONLY GOLD MEDAL AND FIRST MONEY PRIZE, JULY, 1864.

FIRST AND SECOND MONEY PRIZES, CRYSTAL PALACE, LONDON, JULY, 1863.

LONDON INTERNATIONAL EXHIBITION, 1862.—The Report of the Jury states that the Competing Engine by Merryweather and Son was twice disabled, and ultimately withdrawn, and that the Engines of Shand and Mason were severely tested and worked without accident throughout the day.

SHAND, MASON, and CO.'S STEAM FIRE ENGINES, besides carrying off the above honours at all the European International Competitions, have stood the severest practical test that can be had in this or any other country; that being the daily working of the London, Dublin, and other Fire Brigades.

These Engines, with all the recent improvements, are fitted not only as Portable Steam Pumps, but as complete Brigade Fire Engines, and are produced at prices varying from £300 and upwards, weighing from 24 cwt. and upwards, and, considering the amount of work done, are much less in cost than Hand-worked Fire Engines. Steam and Hand-worked Fire Engines and Pumps of all descriptions, and for all Climates.

HOSE AND SUCTION PIPES OF LEATHER, WOVEN CANVAS, AND INDIA-RUBBER.

FIRE BUCKETS OF EVERY DESCRIPTION.

Fire Escapes, Fire Cocks, and Hydrants, Firemen's Equipments, and every article connected with the Extinction of Fire.

Perfumer by Appointment to H.R.H. the Princess of Wales, 96, Strand; 128, Regent-street; and 24, Cornhill, London.

Sold by all Perfumery Dealers.

MONUMENTS, TOMBS, CHIMNEY-PIECES,

THE largest STOCK of MANUFACTURED MARBLE, STONE, and GRANITE in Europe on view at the BRITISH AND FOREIGN MARBLE GALLERIES, WARWICK HOUSE, 142 AND 144, REGENT-STREET.

Manufactories—Carrara, Brussels, Peterhead, and 17, Newman-street, London.

W. H. BURKE and CO., Proprietors.

SOLE AGENTS FOR THE INVERNETTIE GRANITE COMPANY.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

TOZER'S BOOTS AND SHOES,

For Ladies, Gentlemen, and Children, are FIRST CLASS in QUALITY and STYLE, and most ECONOMICAL IN PRICE.

161, NORTH STREET, BRIGHTON,

AND 40, GRACECHURCH STREET, LONDON,

Patentee of the Improved Cork Sole Clumped Boots, for Ladies or Gentlemen, for lightness unequalled.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, in all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot of 12, RUE RICHER, PARIS.

Sold Retail.—London: Joxeau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danflowich Malta: Dr. Pirotti, Bugeja, Magri, and Rolando, Esperanza. Alexandria: Bellamore, Galette, Perinie, Bombay; Framjee Nesserwanjee and Co. Singapore: Martin and Little Batavia: L. Platon and Co. Macao J. D. Freati.

R. L. SOUTHERN AND Co.,

MERCHANTS AND AGENTS,

6, MINCING-LANE, LONDON, E.C.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS.

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

COWASJEE DINSHAW,

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists, Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste greatly superior to any tooth powder, gives the teeth pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S OINTMENT AND PILLS.—All persons afflicted with Bad Legs, Sores, Ulcers, and Skin Diseases, who from want of means or other reasons, cannot avail themselves of surgical treatment, may release themselves of their complaints by using Holloway's purifying, soothing, and healing remedies. In every outward ailment this wonderful Ointment brings about the most beneficial results by checking inflammation, cleansing ulcerations, and restoring soundness. Internal pains, rheumatic and gouty tortures, enlarged joints, scrofulus swellings, and contracted sinews may be overcome by diligently rubbing this cooling unguent into the skin. In all maladies of unusual severity for excessive duration the Pills should be taken internally to root out the last seeds of the disorder and to hasten the desired cure.

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,

METALLIC PEN MAKER TO THE QUEEN

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York, and at 37, Gracechurch-street London

List of Passengers.

PASSENGERS OUTWARD.

Per French steamer **Mocris**, from Marseilles, Sept. 19.—To Singapore: Miss Ladd, Mr. and Mrs. A. Fraser, Mrs. Van Citteu. To Hong Kong: Mr. T. Hesse. To Ceylon Mr. Henry Dias, Mr. and Mrs. H. F. Mutukisna, Capt. and Mrs. Staples, and one 2nd class passenger.

Per P. and O. steamer **Mongolia**, from Southampton, Sept. 20.—To Shanghai: Mr. Henderson, Mrs. John. To Hong Kong: Mrs Ivor Murray, Mr. Noble, Mr. R. Starkey, Mr. Withers, Mr. Lister, Mr. Starkey, Mr. Russell, Captain Barry. To Ceylon: Mrs. Claughton, Rev. A. and Mrs. Young, Mrs. Ross, Miss Gibson, Mr. W. Prentice. From Marseilles, Sept. 28.—To Hong Kong: Mr. and Mrs. Brackenbury. To Ceylon: Mr. C. Domerville.

Per P. and O. steamer, from Southampton, Sept. 27.—To Hong Kong via Bombay: Mr. and Mrs. Lambert and two children. To Shanghai, via Bombay: Mr. Lloyd Palin. From Marseilles, Oct. 5.—To Singapore via Bombay: Mr. J. Meldrum. To Hong Kong via Bombay: Mr. J. D. C. Nichols, Mr. W. H. Mitchell.

Per P. and O. steamer, from Southampton, Oct. 4.—To Hong Kong: Mr. A. Brent, Lieut. Toller, R.E. To Shanghai: Mrs. Bayne. To Ceylon: Mr. B. H. Plumptre. From Marseilles, Oct. 12.—To Shanghai: Lady Parkes and friend, Mr. F. Myburgh. To Ceylon: Mr. D. B. Lindsay.

Per P. and O. steamer, from Southampton, Oct. 12.—To Shanghai via Bombay: Mrs. G. W. Bennett and child. To Hong Kong via Bombay: Mr. James Pope. From Marseilles, Oct. 20.—To Shanghai via Bombay: Mr. F. King, Mr. and Mrs. De Witt C. Brower. From Suez.—To Hong Kong via Bombay: Mr. and Mrs. Anderson.

Per P. and O. steamer, from Southampton, Oct. 20—To Shanghai: Miss M. A. Russell. To Singapore: Mrs. Cavenagh. To Hong Kong: Mr. and Mrs. Hermann and infant. To Ceylon: Mr. R. Massie, Lady Chichester, Mr. and Mrs. Wright and two children. From Marseilles, Oct. 28.—To Shanghai: Mrs. Herbert Hancock and three children, Mr. N. G. Howell. To Hong Kong: Mr. T. A. Lane and Mr. D. Lapraik.

Per P. and O. steamer, from Southampton, Oct. 27.—To Singapore via Bombay: Mr. and Mrs. J. E. Macdonald.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates hence are to the 13th July.

A meeting of the American residents was held at the American Consulate to express their deep feeling of sympathy and regret for the brutal assassination of President Lincoln.

The Prussian brig *Typhoon*, which left Hong Kong on the 7th June, was lost on the 30th by striking on a rock. The whole of the hands, consisting of captain, officers, and thirteen seamen, were saved, arriving in two of the ship's boats at Yokohama, on the 3rd July.

Sir Harry Parkes arrived per Her Majesty's steamer *Leop* on the 7th July, and met a cordial reception.

Mr. Harrison, a member of the firm of Glover and Co., w are the Nagasaki agents of Prince Satsuma, has addressed th following to the *Japan Herald* in correction of a statement re specting matters at Nagasaki, which statement was given in th *London and China Telegraph* of the 28th August:—

"Sir,—Permit me to correct an error which appears in t day's issue of the *Japan Herald Market Report and Price Curre* under the head of your Nagasaki intelligence.

"You state that the last advices from Nagasaki bring news of the presence in that harbour of no less than eighteen steamers belonging to Chosiu and Satsuma. In this your correspondent has doubly misinformed you. At the time I left Nagasaki per *Union* (I believe that vessel brings the latest dates), there were eight or nine steamers in port owning the flag of Satsuma, some of which were under charter to the Japanese Government for conveyance of troops, etc., in connection with the Inland Sea expedition. This rather precludes the idea that Satsuma and Chosiu are acting in concert, though perhaps the latter may have quite as many friends as enemies at Kagosima. The report as to the sales of the steamers *Australian* and *London* may, I trust, prove prophetic—whether the buyer be Satsuma or Chosiu.

"With regard to the feeling prevalent at Nagasaki, touching this crusade against Chosiu, there is no lack of sympathy felt and frequently expressed, both by natives and foreigners, towards that ill-used Daimio; and though it may be a present necessity on the part of our authorities to recognise and uphold the measures of the Tycoon, I am prepared to say, Sir, and there are many of my countrymen ready to endorse my sentiments, that the hostile expedition against Chosiu is, as far as Japan is concerned, no less a political blunder than a national wrong. Apologising for intruding expressions in your columns which are contrary to your own views,—I am, Sir, &c.,

"EDWARD HARRISON.

"Yokohama, June 27."

CHINA.

PEKING.

There is no positive news by this mail as to the reported attack of the rebels. The following is from the *North China Herald*:—"Either the vast increase made in the numbers of the Imperialist armies has had a purely mechanical effect on the fortunes of war, or, Chinamen-like, the rebels have been disheartened by some trifling calamity, and are now as eager to escape as they were before anxious to press onwards. The history of strategic operations in China is a history of alternate successes and reverses, not such in the sense wherein we as Europeans would use the terms, but arising from some unforeseen conjunction of circumstances which encourages one side while casting the other into a corresponding state of despondency. The miraculous interventions, so often dwelt on in the Peking Gazettes, in acknowledgment of which temples or votive tablets

Digitized by Google

are decreed to the favouring deity, are simply circumstances unimportant in themselves, whence comfort and support are derived by one side, disquiet and dejection by the other. Whatever be the cause, whether the local deities have declared for the sacred right of kings, or whether the overwhelming force brought to bear by the Imperialists is having its natural effect, the result is that the Nienfei bands are gradually retiring before the Government troops, and have already sent large bodies into Shansi in order to secure a footing in that province. This would appear to be the first step towards a return to Kansu, whence in the first instance they came. There, amid vast plains, surrounded by lofty and rugged mountains, the rebellion took its rise, and there it will in all probability be extinguished. However paradoxical it may appear, we are always astonished at either side succeeding in a purely Chinese struggle. The odds are so nicely balanced so far as disorganisation and want of discipline go, the likelihood of running away is so exactly divided between the two sides, the venality of the officers is so important an element in the constitution of both armies, that we are equally struck with amazement, no matter which side remains faithful to its colours. Whatever may be the cause, the Imperialists are now enjoying the smiles of fortune at the expense of their less fortunate opponents, nor does our experience of the Nienfei lead us to regret the reverses which have of late befallen them."

TIENTSIN.

Dates to the 8th July report the import market as still very dull, the only demand for cotton goods being for local consumption. Any inquiry for the interior had been checked by the usual report of rebels in the vicinity. 8¼ lb. Grey Shirtings were quoted Tls. 3.2.5. per piece.

SHANGHAI.

The steamer *Shaftesbury* arrived from England on the 18th July, *via* Bombay, and by her telegrams from London to the 15th June were received. The dates are now down to the morning of the 22d July. There is but little to record since the French mail left on 16th, the items by that opportunity being fully recorded in our issue of the 7th inst.

The following account of the wreck of the steamers *Fukien* and *Lalla Rookh* is from the *North China Herald*:—

Amongst the very few incidents which have varied the current of Shanghai life, the wreck of the steamers *Fukien* and *Lalla Rookh* claim the first place. Full particulars of the former catastrophe have already been published in the local papers. The *Fukien* left Shanghai on the 13th July at 2 P.M. for Hong Kong, and during the night of the same day, she being then in the centre of the "Fisherman's Group," ran stem on to an island with so much force as to raise her bow nearly twenty feet on the surface of the rock. She instantly commenced to fill, and as there were forty fathoms of water under her stern, the utmost expedition was necessary to secure the lives of the crew and passengers. In fact, within twenty-five minutes after striking she sank. Fortunately she had a large number of boats, and the weather though foggy was calm. No difficulty was therefore experienced in landing the people on board, but not a particle of cargo or personal property was saved. Much credit is due to the officers, who are reported to have worked like slaves, and to have utterly neglected their own safety while devoting themselves to the foreign and native passengers. The result was that no accident of any kind occurred, and the entire number of human beings on board was landed safe and sound, but in a most miserable plight, on the island. They were next day relieved by a junk and a foreign brig, by which they were carried to Chinhae, and thence to Ningpo by the *Fire Dart*. It is said that the wreck was occasioned by the captain having mistaken one of the Tripods for the island of Video. No particulars as to the wreck of the *Lalla Rookh* have yet reached us. She left Shanghai on the 18th July, and was seen by the *Fire Dart* at 9 P.M. on the same day. Up to the time of the *Fire Dart's* departure from Ningpo at 5 P.M. on the 19th nothing had been heard of her, and she must therefore have been wrecked during the night of the 18th or morning of the 10th. She was this day, 21st, reported wrecked on the North West Horn, but the time of the occurrence has not been specified.

H.M.'s troop ship *Adventure* left on the 19th July, for Hong Kong, with the 67th Regiment and wing of the 99th, which had been on service at Taku.

A public dinner was given at the Shanghai Club on the 17th to the officers. Among those present, in addition to Col. Yonge and the officers of the 67th Regiment, were Sir E. Hornby, Capt. Waddilove, Capt. Round, R.N., several members of the Consular body, Rev. C. H. Butcher, the representatives of the local press, and several members of the Shanghai Volunteer Corps, in uniform. About 70 sat down to table. Mr. H. Dent took the chair.

The weather had been continuously wet, much to the detriment of the crops in the neighbourhood. Indeed, the Shanghai Hien was so deeply moved by the consideration of the damage which the late heavy rains might do, that on the 6th inst. he issued a notification ordering an abstinence from animal food during the space of three days, viz., the 16th, 17th, and 18th of this moon (July 8th, 9th, and 10th). During these days no animals were to be killed for food, nor were the faithful and obedient to transgress the modest bounds of rice and fish. The object of this penance was to pacify the rain-god, but unfortunately the 11th inst. was wetter than any day which had preceded it. The Magistrate, however, persevered, and again directed that three days should be devoted to fasting, with, as it turned out, the like result. The attempt to cajole the offended deity may therefore be looked on as a notable failure.

The Chinese authorities have come to what we (*North China Herald*) consider an exceedingly wise conclusion with regard to the commandantship of the camp of instruction at Fungwang. We have already set forth the reasons which appeared to us to suggest the appointment of an officer unconnected with any of the regular armies, and these reasons have induced the local government to confer the post on Major Jebb's second in command, Mr. Winstanley. We are convinced that no better selection could have been made, as Mr. Winstanley has had long experience in the Queen's service, and is now fully acquainted with the working of the camp, while he has gained the confidence of the Chinese, and stands in no danger of being suddenly and arbitrarily removed from his post.

It is reported that Burgevine has been beheaded at Soochow. From Nanking it is reported that the Hunan and Hupeh troops stationed at Nanking refused to follow Tseng Kuo-fan on his expedition into the Shantung province. When Li Hung-chang arrived he found the garrison in a state bordering on mutiny, which was not appeased even by his presence, although he is said to possess considerable influence over the hardy warriors of the central provinces. After much ineffectual cajolery, he at length issued a notification giving the troops two days wherein to consider their decision, threatening that those who at the end of that period still persisted in their refusal should be deprived of all their property, and executed. On the day named, the men still holding out, two of the ringleaders were beheaded, whereupon the remainder signified their willingness to start. Since the capture of Nanking the troops have made themselves excessively comfortable, have seized or built houses, and amassed a fair share of money.

The *Moyune* has been purchased by the S.S.N. Co. for 74,500 Taels. Eleven 32nd shares in the *Poyang* were bought by Mr. Gilfillan for Taels 15,000. The *Emperor* was bought in at Taels 11,000. The *Spunkie* bought in at Taels 1,000, and a 32nd share in the *Bunker Hill* sold for Taels 300.

The following notice has appeared in the Shanghai papers:—

The co partnership hitherto existing at this port between F. G. White and Herbert Smith, of Shanghai, and James White and J. Mackrill Smith, of London, under the style or firm of White & Co., expires this day by effluxion of time. All outstanding accounts will be settled by F. G. White and Herbert Smith, who will sign the firm in liquidation.—White & Co., Shanghai, 30th June.

KIUKIANG.

A correspondent, writing under date of July 6th, states that, on the 2nd, a party of braves broke into Messrs. Turner and Co.'s hong at that port, occupied by Chinese only, and smashed nearly all the doors, windows, &c.; in fact, did as much injury as possible to the premises. The Volunteer Corps, under the command of Captain White, late S.V.C., was on duty the whole day, and succeeded in expelling all the braves, together with their boats, from within the limits of the foreign concession. Unfortunately, only three of the persons concerned in the affair have as yet been apprehended, and they had merely interfered with the sentries when in discharge of their duty. The Chinese authorities contributed valuable aid in the shape of eight soldiers armed with fans.

HONG KONG.

(FROM A CORRESPONDENT.)

Sir,—Macdonald Stephenson's China Railway Company has met with a less prosperous support than its very sanguine projectors appear to have hoped for. The committee, which was formed for the purpose of taking the opinion of the Canton authorities, have recently been called together to receive a decidedly unfavourable report; in fact, if rumour speaks truly, a refusal of any species of sanction on the part of the Provincial Government to any operation in the nature of that proposed. The fact is, that, as many people are beginning to see, China is as little ripe for railways to-day as Turkey was thirty years ago, and stands in infinitely less need of any such appliance than perhaps any other existing nation. The means of communication are so widely ramifying, so convenient, and

Digitized by Google

so cheap, that the population feels little inconvenience, comparatively, in the matter of either passenger traffic or of the transport of merchandize. For speed, as a benefit *per se*, it is very difficult to bring an Asiatic to express or feel any lively admiration; what the masses ask for, especially in a country like China, is, before all, freedom from disturbance, and in the next place, safety and moderation in price. The passage boats, which accomplish the journey of twelve miles between Canton and Fatshan in about three hours, charge a Chinese passenger with his baggage the sum of forty *cash*, or twopence, for the journey; and if the China Railway Company were to attempt to compete in price with such opponents, they would, apparently, have to issue tickets at a rate which would not contribute largely to swelling the annual balance. In fact, a more *mal-à-propos* selection of a route for inaugurating railways in China could probably not have been discovered by the most careful investigator. Apart from all consideration of the peculiar vigour of the Cantonese mind in opposing the spread of foreign influence in the interior, the most casual observer of the country to be traversed must be struck by the unusual amount of disturbance of private property and of public traffic which the construction of the proposed railway would entail. Perhaps the most thickly populated nook in all China is the flat and fertile tract of paddy land stretching between Canton and its offshoot, the great trading and manufacturing town of Fatshan. This district, in which the population is numbered by the hundred thousand, is known as the "Ninety-six Villages," the name adopted by the associated country people who have banded themselves for the last twenty years in opposition, first to foreigners and next to the rebel banditti. Only since the capture of Canton in 1857 has it been practicable for Europeans to visit any part of this district in safety, and even now the traditional spirit of Chinese conservatism is nowhere so strong as among these clannish villagers. The mere rumour of a railway through their ricefields has already sufficed to stir up a buzz of discontent among the far-famed "Ninety-six." When to popular opposition of this kind is added the formidable hostility of the vested interests, represented by the large Passage Boat Companies and the contractors for the transport of merchandise, with a powerful infusion of Governmental dislike of all innovation, it appears clear that a little local knowledge and discretion would not have been out of place in the concoction of the China Railway scheme. This, of course, is speaking locally only; in general, I believe, the Peking Government objects in principle to all railways, no matter where placed, on the broad and intelligible ground, that railways mean the extension of foreign influence into the interior, and that this means disorganisation, disorder and revolution. We must wait and see what Sir R. Alcock will do.

Canton has recently been disturbed by a gang of desperadoes from Macao, employed as crimps by the Peruvian Emigration House, set up recently at Canton, under the auspices of the French Consul. These amiable Portuguese half-castes, after living at free quarters on the timorous Chinese inhabitants for several months, signalized themselves at length by a desperate murder, and have finally, it is said, been seized by the Chinese magistrates, and sent to Macao for trial. These are the scoundrels who, all over China, contribute so powerfully to the keeping up of ancient animosities; and so long as Portugal is allowed by civilised Powers to retain Macao as a hotbed for piracy, smuggling, and kidnapping, so long will the seaports of China be infested by ruffians of this class, acknowledging no nationality or authority, and slipping through the fingers of justice whenever she tardily attempts to clutch them.

The rebels, who, until within the last ten or fifteen days, have been occupying a strong position on the head waters of the East River in this province, suddenly decamped on the 18th inst., after a defeat they suffered in an attack on the Imperial forces, and are now said to be moving towards the province of Kiangsi. These constitute the last remaining fragments of the Taiping rebellion. Of two hundred thousand rebels supposed to have been under arms when Nanking fell, this band, to the numbers of about 50,000, is all that is left; and their recent retreat is probably another step on their downward course towards dissolution, into their original elements as predatory bands among the mountains of the Western Provinces.

The following report of the loss of the *Hankow* steamer is from the *Daily Press*:—

On Friday night, the 21st July, at half-past eleven the *Hankow* (being at her moorings at Canton—having made the trip from Hong Kong as usual that day, and being in readiness to return on the next) was discovered to be on fire, Captain Bennett, was not on board at the time, but was at his post a few minutes after the alarm was given, which was done by ringing the bell. All the officers and engineers were on board; no smell of fire whatever was experienced and the first indication of the danger was the appearance of smoke issuing from a part of the fore hatch which was open. Hoses were instantly applied both from the engine and from the deck pumps, but the fire was so deep seated that it gained rapid headway, emitting so much smoke that the men were driven away from the pumps. It was then determined to scuttle her. The engineers opened the connections to let the water into the hold, and an axe was set to work to make a hole in the starboard quarter.

By this time Capt. Haskell of the *Kinshan*, with his officers and engineers, had come to render all the assistance they possibly could. After the smoke had driven the men from the pumps, the Asiatic portion of the crew and of the engine staff deserted. The hole being cut in the quarter, it became necessary to list the *Hankow* over, so that she might fill. Capt. Bennett and Capt. Haskell, with their engineers, contemplated to effect this by shifting over the chain boxes, and they actually went forward to carry out the intention; they did move the chain boxes, but were compelled by the heat and smoke to abandon the design ere it could be sufficiently carried out to be effective. The joiner work near the steam chest was then in flames; within five minutes the saloon and hurricane deck were a mass of fire fore and aft. The last of the flood tide was making, and it was clear the steamer getting adrift with the ebb would be attended with the utmost peril to the numerous boats on the river, whilst if she sank at her moorings dangerous obstruction would be formed in the passage, it was determined to hawl her on shore. A hawser was made fast to the rudder, the mooring chain was unshackled from the buoy, and the steamer was hauled close to the Shameen wall where she was made fast. This was about half-past one, when the steamer was a complete mass of flame. The two engines were produced, but the only good they effected was to keep the hawser from being burnt. At two o'clock the club began to make. The main deck was then all gone and the upper part of the hull was burning. About three o'clock, the fire having got to the water's edge, the wreck filled and sank in about twelve feet water forward and ten feet aft.

The port wheel and shaft fell out with a crash—the starboard wheel was against the wall. The cylinder burst.

The officers and engineers of the unfortunate *Hankow*, Captain Haskell and his officers and engineers, and the tide waiters stationed on board, worked like true and gallant men. Captain Bennett did all that man could do, but to no effect. It was the first night he has ever been out of the vessel this year. He was spending the evening at Messrs. James Purdon and Co.'s, which being hard by, enabled him to get on board almost instantaneously.

The origin of the fire is a perfect mystery. It could not be spontaneous combustion of the coals, because they were only taken on board the day previously. Yet when Captain Bennett looked down the engine-room, he says the coals were in a red heat! They were Labuan coals, too, which emit a dense smoke. The origin of the fire and the absence of indication are simply inexplicable.

The following shipping items are taken from daily papers:—

The British brig *Una*, which arrived in harbour on the 12th July, reports that on the 2nd July, in Lat. 82·47 and Long. 116·07, passed large quantities of wreck, consisting of spars and heavy timber, resembling portions of the hull of a ship, also saw a large junk floating and a quantity of teak planks; came to the conclusion it was the wreck of a Siamese ship. July 3rd saw more wreck, also a junk bottom up. July 4th, in Lat. 22·37, Long 115·59 E., saw several dead bodies, Chinese to all appearance. Experienced light S.W. winds, and strong current setting to the N.E.

The British steamer *Otentosama* reports that on the 27th May, while running in a gale of wind, shipped a heavy sea, washing one man overboard. Through the passage experienced very good weather in general. In Lat. 39 47 N., Long. E., on the 28th June, spoke the British barque *Vince*, from Cardiff bound to Yokohama, 107 days out, in the Java sea.

The British brig *Minerva*, A. Fox master, reports that on the 27th June, off the North end of Formosa, three piratical junks hove in sight, the leading one of which gave chase, but was not able to get within range.

We have to report the probable loss of the *Coniston*, British barque, W. Hobson master. She sailed from this port on the 28th June, bound to Swatow, with a cargo of rice and with 10 Chinese passengers. During the night of the 29th and morning of the 30th she was in company with

Digitized by Google

the *Zephyr*, but was lost sight of during the typhoon of the 30th. No tidings from the Coast have reached us, and from the captain of the *Zephyr's* report there is little doubt but that the *Coniston* foundered shortly after parting company.

The Prussian brig *Typhoon*, which left Hong Kong on the 7th June for Yokohama, was lost on the 30th ulto. by striking on a rock.—All hands saved, reaching Yokohama in the boats on the 3rd July.

JAVA.

We have Batavia papers to the 25th July.

An attempt to create a disturbance at Solo, by a Javanese who had managed to gather together about 500 followers, was promptly repressed, and the ringleader and some of his dupes were arrested. No importance is attached to the affair by these papers.

On the 16th and 17th July very heavy shocks of earthquake took place at Ambarawa, Salatiga and Banjoe Biroe. The hospital at Ambarawa and the artillery and infantry barracks were much damaged. At Banjoe Biroe two wings of the infantry barracks fell down, while the walls of the artillery barracks were so much shaken that the building is uninhabitable, as are also the officers' quarters. The large powder magazine was so much injured that it was necessary to remove the gunpowder. The only person hurt was a sergeant of sappers, who has since died of his wounds.

The crop of sugar cane in most parts of Java promises well.

STRAITS OF MALACCA.

SINGAPORE.

Dates hence to the 7th August. The Governor and suite embarked on the 31st July for Malacca and Penang under the usual salute. Colonel Cavenagh will now have an opportunity (remarks the *Free Press*) of inquiring personally into the wrongs inflicted upon our subjects by the Larut authorities. If half the statements we receive from Penang be true, it is quite clear that the treaties between us and Perak have been completely set aside, and we are in honor bound to demand a reparation for the breach of faith. Our subjects it is said are robbed of the large sums they have invested in the Peninsula, and despoiled of the produce of their industry; they are plundered, and their property is openly sold in Penang before the eyes of the robbed. Should such insults be borne any longer? If the rulers of Perak are unable to controul their subjects, it is incumbent on us to step in and relieve them of the responsibility. If such a state of affairs is allowed to exist much longer, we shall lose our prestige in the Peninsula, and be disgraced in the eyes of our native population.

One day last week a Kling, named Ninamsaw, one of the heads of the Red Flag Kongsi, made some disclosures relative to the internal economy of the society in the Supreme Court, during the trial of a civil cause in which he was defendant, and at the same time handed in one of the books of the Kongsi. The Recorder ordered the book to be impounded. On Saturday Ninamsaw appeared before Magistrate of Police, and laid an information on oath against seven other Klings who with himself are connected with the above-mentioned secret society or Hoey. He fully revealed the manner in which the business of the society was conducted; how disputes between the members of the Kongsi are inquired into, and delinquents punished by the head men; how persons were maintained and employed by them to fight with members of the White Flag Kongsi, and beat those who refuse to pay up their subscriptions to the society; and how the head men bribe the police to favour them. The informant stated that besides the book he had handed in to the Court, there were three others kept by the clerk to the Kongsi in which all the proceedings of the society were entered. The magistrate issued a warrant to arrest all the persons accused of being the heads of the society, and to search their houses for the books referred to. The prisoners were arrained on a charge of conspiracy, and the inquiry was going forward.

A Chinaman was arrested on the night of the 26th July, excavating a quantity of earth, under which the gas-pipes were embedded, in New Bridge Road, evidently with the intention of stealing some of them. He was pursued, and arrested not far from the spot, and, when brought before the magistrate, was sentenced to six months' imprisonment with hard labour.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

MINTO—On 28th July, at Hong Kong, the wife of G. N. Minto, of a son.

HART—At Ningpo, on the 9th July, the wife of Mr. Geo. M. Hart, of a daughter, still-born.

MARRIAGES.

POWER—YATES—On the 9th Sept., at Holy Trinity Church, Lee, Kent, by the Rev. Benjamin Walter Bucke, M.A., incumbent, Julius Charles Power, Esq., of Her Majesty's Civil Service, Hong Kong, to Frances Sarah Jane, second daughter of John Yates, Esq., of Gloucester-terrace, Hyde Park, Hill-side, Lee, and Wouldham Manor, in the county of Kent. No cards.

DEATHS.

HART—At Ningpo, on the 15th July, Caroline Susanna Dixon, the wife of Mr. Geo. M. Hart, aged 29 years.

COLLIER—Drowned at Woosung, on the 18th July, H. W. Collier, Master, Upper Lightship.

DAVIES—At the Civil Hospital, on the 18th July, William W. Davies, compositor in the "Daily Press" Office, formerly Government Printer at Sydney, aged 60 years.

LOPES—At Macao, on the 16th July, Maria Quiteria Lopes, aged 96 years.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—The transactions of the fortnight in Black Teas have been very large, the markets having a tendency to advance. A peculiar feature in the Kiukiang market is the circumstance of new Congous being shipped thence to Hankow for sale; the result of these shipments is reported to be satisfactory. The new Greens have not come to market, but are expected in about one month.

CANTON.—A steady business has been doing during the fortnight in Scented Teas at rates about equal to those last quoted. The chief feature to notice being the opening of the market for Country Congous. Country Congous: Three chops have been taken at Tls. 32½ to 33½, showing a fair margin on home rates. The present stock consists of teas of a commoner class, and buyers are unwilling to submit to the demands of the teamen.

FOOCHOW.—The loss of two steamers has interrupted communications, and the mail from the South ports has not arrived. The latest dates from Foochow come down to the 12th July. A steady business continued to be transacted in tea. Medium and common Congous were a little cheaper, although the demand for Australia had caused them to attain a standard too high for the London rates. In Souchongs very little was doing. Middling Oolongs were being settled at 17 to 19 taels.

SHANGHAI.—Black Teas: The market continued quiet until the arrival of the London Mail, with improved advices for Congous. A good demand then sprang up for teas with quality, and all desirable parcels were readily taken at an advance of about two taels per picul on last mail's purchases, and in some few instances even higher rates were paid. Several chops of common and medium grades have also found buyers at correspondingly high prices, and our quotations are now nearly on a par with Hankow rates. The best chops of Ningchow are decidedly superior to those of last year, being stronger and of full flavour. Second Crop Oopacks are beginning to arrive, but no settlements have yet taken place; these, however, are wanting in strength, and are no better than those of last season. The business of the fortnight comprises 34 chops, or 16,200 chests at Taels 22½ to 37 for common Oonam to fine Ningchow and Oopack tea, and Taels 15 to 18¾ for fair Black Leaf (Old Tea). Re-shipments of Hankow settlements amount to 13,400 chests, and the stock consists of 24 chops, or 10,400 chests.

HANKOW.—Our dates extend to the 15th July. A steady business had been done in teas throughout the fortnight; at first the second crop Oopacks being considered wanting in strength had been generally neglected, but the news brought by the 26th May mail soon caused a good demand. A few chops mixed first and second crop Oopacks of fair quality and strength were bought at 25 to 27 tls. For the second crop teas, whose quality is decidedly objectionable, we consider that the rates paid are much too high, when the outturn of such teas last year in England is remembered; 78 chops had been settled during the fortnight, leaving a stock of 50 on the market. Quotations were—Oopacks, good to fine, 24 to 30 tls.; fair to good (second crop), 23 to 25 tls.; Oonams, fair to good, 22 to 24 tls.; common to fair, 17 to 20 and 20½ tls.

KIUKIANG.—From this port we have dates to the 16th instant. Black Teas: Arrivals had continued till they amounted in the whole to 25 chops Ningchow and 10 chops Hohow. Settlements had kept pace with the arrivals, and the last purchases showed a rise of 1½ to 2 taels. The quality of the finest teas is decidedly superior to last season's, but they will probably be in short supply. Quotations were—Ningchows fine to finest, 29½ to 30½ tls.; medium to fair, 23½ to 28½ tls. Hohows, fine to finest, 24½ to 26½.

YOKOHAMA.—Since the departure of last mail there has been rather more activity displayed on our Tea market; a very fair business has been transacted, both for the American and home markets, the more favourable news of the state of the latter, received by the mail of the 10th May, inducing several houses to become purchasers. Settlements for the fortnight amount to about 2,750 piculs, comprising about 1,300 piculs New Tea, at a rising price of 50c. to $1 per picul. Stock at present consists of about 850 piculs Old, and 1,200 piculs New.

RAW SILK.—The present mail steamer has about 4,500 bales, whereof 550 bales are Japan.

SHANGHAI.—This market has been very active for the past fortnight, and the settlements may be estimated at 8,000 to 8,500 bales. The higher classes of Tsatlees have found ready buyers at advanced rates, as they arrived from the interior; though for the past few days, owing to the late heavy rains, the arrivals have been moderate. Prices have further advanced 30 taels, and the dealers at the close of the mail are firm for higher quotations. For best Mybash $685 to 700 had been paid. Tsatlee, chops No 1, 530 taels per picul; do. No. 2, 510 taels do.; do. No. 3, 485 to 495 taels do. Taysaam, chops No. 1, 450 to 460 taels per picul; do. No. 2, 425 to 440 taels do.

DRUGS, &c. (CANTON).—Cassia Lignea: 1,500 piculs have been taken for the Continent at still advancing rates. The present stock is computed at 2,500 piculs, and holders require $16.75 for it, which is an advance of 50 cents on the previous quotation. Cassia Buds: $49, nominal, nothing doing. China Galls: 400 piculs are reported sold at $12.25, at which rate further contracts could be placed. Vermilion: $37.50 per box of 50 catties—small sales only. Musk: The report spread last mail to the effect that large supplies of inferior quality were expected, had no foundation whatever in truth, and the article here in the South remains as scarce

Digitized by Google

during the fortnight, was immediately taken at a high rate. Rhubarb: No arrivals, and no stock. Galangal: $2.20, in no demand. Essential Oils: No arrivals, and no settlements reported.

CHINA IMPORTS.

(HONG KONG REPORT.)

COTTON YARN.—The business transacted in this article during the pas fortnight is in marked contrast with the advices of many months past, and although we must quote 16 to 24 at a decline of fully $15 per picul, shipments to Japan will no doubt by decreasing our stocks lead to more firmness on the part of importers. The sales of the fortnight are put at 686 bales. Grey Shirtings: Holders of these goods have met the market somewhat freely, and the settlements effected during the fortnight have been upon a larger scale than for some time past; prices, however, show a further decline of about 10 to 15 cents per piece. Sales are estimated at 19,000 pieces, in addition to which about 1,200 pieces of damaged goods have been moved off at auction. White Shirtings have met with a moderate amount of inquiry during the fortnight at a decline in value correspon ding with that established on unbleached goods, and the transactions of the ortnight amount to 6,500 pieces. T-Cloths: These goods again show a d lin as compared with the prices current under date of last circular equal to about 15 cents, per piece, and have also been largely dealt in, the sales of the past fortnight being estimated at 14,050 pieces, exclusive of 4,400 pieces of damaged goods sold by public auction. American Drills: The market continues bare of these manuafctures, but sales of 800 pieces of English Drills are reported at $5 per piece. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: The nominal value of these goods shows a decline, as compared with the quotations given under date of last report, equal to about 25 cents per piece. Transactions during the fortnight have been confined entirely to the last named, of which a comparatively large amount of purchases has been reported, estimated at about 2,000 pieces. There are not now any of these goods in stock. Damasks: There are not any sales of these goods to report. Chintzes: Have found buyers to the extent of 1,500 pieces. Handkerchiefs: 300 dozen have been sold.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: Without alteration to notice in value have found buyers to the extent of 828 pieces of Spanish Stripes, and 148 pieces of Medium Cloths. Long Ells: These goods show an improvement in value equal to about 50 cents per piece, when compared with the quotations under date of last circular. There are not, however, any sales to report in the article, and the stocks are at present extremely limited. Camlets: Have been in moderate request at the quotations given under date of last circular, and the sales advised amount to 740 pieces. Lastings: 200 pieces have found buyers. Blankets: 610 pairs have been sold.

METALS.—Iron, Flat, &c.: A moderate amount of business has been transacted in Iron since the date of last circular at slightly lower prices than were then current. Sales are estimated at 4,100 piculs of Nail Rod, 1,500 piculs of Bar, and 420 piculs of Hoop. In the Canton market 260 piculs of Wire have found buyers at $7 to 8 per picul. Lead: 750 piculs purchased in this market, and 900 piculs placed in Canton, constitute the transactions of the fortnight. Tin: 730 slabs have been sold. Tin Plates: Sales amount to 500 boxes. Steel: 400 tubs have found buyers.

COALS.—At Hong Kong, best Cardiff, $10; English, $9 to 10; Sydney, $6; Labuan, $6; supplies are full. At Shanghai, English steam have been placed at 8 taels; Japan, 6½. Sydney, 6¼ to 7.

COTTON.—Imports from Calcutta of 2,000 bales sold in Hong Kong at $24 to 26.

VESSELS LOADING.

At YOKOHAMA.—For London: Eleanor.

At HANKOW.—For London: Weymouth, Neville, Iron Crown, Hoang Ho, Philip Nelson, Fychow.

At SHANGHAI.—For London: Garrawalt, Ethiopian (full), Norwood, Eliza Nicholson (full), Art Union, Ellen Rodger, Golden Spur, John Lidgett, Dunkeld, Star of China, Helen Nicholson, Glenaros, Statesman, W. W. Smith. For Liverpool: Woosung. For New York: Surprise.

At FOOCHOW.—For London: Japanese, Dunmail, W. Mitchell, I. M. Joshua, Devana, Berwickshire, Coral Nymph.

At HONG KONG and CANTON.—For London: Scawfell, Heroes of Alma, Chrysolite, Arab Steed, Layard, Constance, Allendale. For New York: Panama, Nordstern.

At MANILA.—For London: Nelson. For Queenstown: Eduard. For Liverpool: Peerless. For New York: Memmon, Tetuan. For Boston: Fearless, Ocean Rover.

At SINGAPORE.—For London: Carldew, Ernest Merck, Hastings. For Liverpool: Early Dawn, Vigil.

At PENANG.—For London: Peter Rohland, Napier, Shantung.

FREIGHTS AND CHARTERS.

YOKOHAMA.—To London: Cotton and tea, £3; silk, £4. 10s. per ton of 50 cubit feet.

SHANGHAI.—The market continues extremely dull, and it is difficult to find profitable employment for the large amount of tonnage in harbour. To London and Liverpool the rate is £2 per ton, and for Coast excessively low.

FOOCHOW.—To London: £2 per ton.

HONG KONG and CANTON.—The demand for shipping is very slight, while the available tonnage is much in excess of the requirements, and for home the vessels on the berth have reduced their rate to £1 per ton; to New York, $8.

MANILA.—No settlements have been made, and the nominal rate may be quoted at £1 for clayed sugar, £1. 10s. for unclayed, and £2 for Hemp.

SINGAPORE.—There is no improvement to notice, and vessels are offering at very low rates. To London, sugar, £1; light freight, £1. 10s. per ton.

PENANG.—For U.K. cargo is rather scarce, the vessels on the berth are loading slowly at £1. 2s. 6d. for dead weight, and £1. 10s. light freight.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—July 10, Adeline, Marseilles to Saigon; 12, Veronica, Liverpool to Hong Kong; 12, Ephrem, Bordeaux to Saigon; 13, Lord Clyde, London to Shanghai; 17, Nordlap, Cardiff to Manila; 20, Albertine, Cardiff to Hong Kong; Napoleon III., Newport to Shanghai; 22, Avondhu, London to Hong Kong; 24, Smyrna, Liverpool, order; 26, Ladrador, Cardiff to Manila; 27, Walchern, Newcasle to Batavia; 28, Jaqueline and Elise, Amsterdam to Japan.

From UNITED STATES of AMERICA to CHINA, &c.—July 13, Amaranth, New York to Hong Kong.

From CHINA to ENGLAND and CONTINENT, &c.—July 13, Fortitude, Singapore to London; 13, Bencleuch, ditto; 15, Hippolyta, ditto; 16, Christopher Newton, Singapore to Liverpool; 20, Pak Wan, Macao to London; 24, H.I.M.S. Entrecasteant, Batavia to Bourbon; 25, Paul Johan, Batavia to Rotterdam.

From CHINA, &c., to UNITED STATES of AMERICA.—July 10, Pudel, Hong Kong to New York; 12, Sea Ranger, Singapore to New York; Conquest, Manila to Boston; 13, Energic, Singapore to New York; 19, Sumatra, Manila to New York.

COMMERCIAL POSTSCRIPT.

TEA.—The chief and almost only business done since our last has been in the "New Crop" Congous, ex Fiery Cross and Serica. Some considerable excitement took place on their being first offered, and large sales of the best chops were made immediately, at full prices. Slightly easier rates have since ruled in some instances, and it is understood that nearly the whole of both cargoes has found buyers. The cargo of the Fiery Cross was put upon the market on the morning of the 11th, and considerable excitement was caused; the result being large sales at full prices. The Serica was also reported in dock, but few musters were ready until next day, when large sales of her cargo were made, but not all at equally good rates. The prices of the first sales were 2s. 5d. to 2s. 10d., but some few chests and half-chests sold up to 2s. 11½d. and 3s., and some boxet of Packling at 3s. 2d. per lb. Subsequently, a good business has been done, but in some cases at reduced prices; and it is understood that now only a very small portion of both cargoes remains undisposed of. We hear of no sales under 2s. 2d. per lb. Of Oolong, some of "New Crop" brought 2s. 2d. and 2s. 4d. per lb. Of old season, some considerable purchases have been made for export, of fair up to good quality. Uncoloured Japans have also been in demand for export, at higher rates; and the market is almost cleared of desirable parcels. A few Scented Orange Pekoes have been sold at 3s. 1d. per lb. Of Greens there has been no further supply. The United Kingdom Stock was on the 31st ultimo, 85,000,000 lbs., against 88,000,000 lbs. on the 31st August, 1864.

COTTON.—The market opened dull this week, and prices gave way ¼d. to ½d. per lb., but on Wednesday there was an improved demand, and in some cases the decline has been recovered. Of China, 350 bales have been sold in the London market during the week at 11½d. to 12d. for fair. The stock of China and Japan in London on the 14th inst. was 2,726 bales, against 25,262 last year. The total stock in London on that date was 53,411 bales, against 87,544 last year. Of cotton afloat to Europe on the 15th, there were 5,954 bales of China, against 81,692 last year, and 294 bales Japan, against 8,736. The stock of cotton in Liverpool on the 15th was 427,600 bales, against 499,980 last year. The demand for China and Japan in the Liverpool market during the past week has, in consequence of their great scarcity, been chiefly of a retail character, at an occasional decline of ¼d. per lb.

SUGAR.—An upward tendency was manifest during the whole of the week, and yesterday (the 15th) transactions were readily concluded again at stiffer rates, establishing a pretty general advance of 3d. to 6d. per cwt. on those of the 8th instant, and in some cases a greater rise is shown. During the week 1,752 bags Penang were sold at, brown to low yellow, 30s. to 32s., middling to good yellow 32s. 6d. to 34s. 6d. At public sale on the 15th, 1,900 bags Penang went off with spirit at the full improvement, viz.—low to good middling strong grey 32s. 6d. to 35s., fine and fine fine brown 31s. 6d. to 32s. Privately 100 bags clayed Manila went at 32s.

COFFEE.—The public sales of Plantation Ceylon, amounting to 3,550 casks, 2,100 barrels and bags, have gone off readily at an average advance of 6d. per cwt.; fine ordinary to low middling, 76s. to 80s. 6d.; middling to good middling, 81s. 6d. to 85s.; fine middling to superior, 86s. to 95s. Native has not participated in this improvement, but 70 casks, 3,210 bags, mostly found buyers at about last week's rates. Good ordinary, 65s. to 66s.; fine ordinary, 67s. to 69s. Of 3,767 bags Manila, only a trifling proportion was realised, fine ordinary even pale, 72s. At the Dutch Trading Company's sale of 87,000 bags on the 13th inst., all clean qualities went off at full rates an advance of ½ cent on the valuations, good ordinary Java bringing 45 to 54½ cents.

RICE.—The demand has been of a partial character since our last; the business done having been confined to small parcels on the spot at about previous rates. A floating cargo of Nakrenzie, 350 tons, has been sold at 10s. 7½d. for the Continent only.

THE CURRENCY OF JAPAN.

WHATEVER tendency the Japanese Government may have towards the adoption of a more liberal foreign policy, it is certain that the full requirements of foreign trade for further facilities will never be adequately met so long as the present artificial ratio between their gold and silver coinage, and, again, between Japanese and foreign silver coin, is authoritatively maintained. Until the precious metals of that country are suffered to find their level with the world's common stock, we shall continue to suffer in our transactions, as the produce exported so far exceeds in value the quantity of imports consumed as to show a large balance in favour of Japan, which has to be paid in dollars at an immensely depreciated value; while all the profit accruing from the exchange is absorbed by the Japanese Government. In 1862 the excess in value of exports over imports was, at the port of Yokohama alone, $3,728,200; in 1863, it was $3,539,000; and in 1864, $3,553,900. At the other ports the proportions are similar, although the totals are of course considerably less; and nearly the whole of this amount is imported into the country in the shape of Mexican dollars. Now the just proportion which these should bear to the native coin (always supposing the latter to be of equal purity) is about 311 *Ichibous* to 100 dols.; and at this rate a certain sum is allowed, per month, to be exchanged at the treasury by Foreign Ministers and Consuls, in accordance with a well known provision in the treaties. But in the open market these same dollars are current only at a much lower rate, fluctuating, according to circumstances, between 190 and 250 Ichibous per $100. This, as compared with the above-quoted standard of 311 per $100, shows a depreciation in the value of the dollar of from 16 to 38 per cent., supposing the coin received in exchange for it to be of equal purity; but when we state that, so far from this being the case, the silver coinage is so debased as to be of a very inferior standard, while that purporting to be gold consists only of silver, covered with a mere coating of the more precious metal, it will at once be seen what an enormous profit accrues to the Treasury. Consul Euslie, in a lately published report on the trade of Hakodadi, estimates it at no less than 60 or 80 per cent. To the uninitiated it may appear strange that we should take it for granted that this profit is absorbed by the Imperial Treasury; yet such is undoubtedly the fact. Besides the large amount paid in Mexican dollars for silk and other produce, considerable sums go direct to the Government, in the shape of duties, tonnage dues, and ground-rents; and yet these dollars circulate nowhere in the interior of the country, being current at the three treaty ports only. The reason of this is, that the circulation of foreign coin being prohibited in the interior, merchants who have brought their produce to a treaty port for sale, and received its proceeds in dollars, find them useless to take back with them, and are therefore compelled to exchange them for Ichibous, which can only be got from the treasury through native banks, at whatever rate they choose to fix; these banks being of course under Government control. So, for every hundred dollars the merchant gets, on the average, about 230 Ichibous; the dollars, purchased by the treasury for this sum, are forthwith coined into upwards of 300; and so on, *ad infinitum*. The perpetual repetition of so unprecedentedly profitable an exchange as this is undoubtedly a valuable source of revenue to the Government;

Digitized by Google

but the idea that the maintenance of such a fictitious premium on native coin tends to enhance the national wealth is quite illusory, and it is to be hoped that ere long the Gorogio will awake to the necessity of abandoning a system so injurious to the real interests of the country. A far richer and more lasting source of prosperity would be found in the removal of all those vexatious restrictions by which foreign trade is now encompassed, and in encouraging, instead of prohibiting, the introduction of foreign coin, which, if it were once admitted into free circulation, instead of remaining at a ruinous discount, would soon find its natural level, or perhaps even rise to a premium, as it did under similar circumstances in China. As the Japanese Government openly avows its inability to coin Ichibous rapidly enough to keep pace with the constantly increasing influx of foreign silver, we have certainly a right to demand the removal of all restrictive regulations affecting the circulation of certain descriptions of our coin—say, for instance, the Mexican dollar, already so largely imported, and the newly-issued Hong Kong dollar; this done, the vexatious "currency question" will soon cease to be an incubus on our trade.

THE NEW GOVERNOR FOR HONG KONG.—The newly-appointed Governor to Hong Kong, Sir R. McDonnell, is expected to leave Halifax for England in the present month.

THE CHINA SQUADRON.—It will be seen by our list of naval appointments (says the *Army and Navy Gazette*), that the Admiralty have adopted the sensible plan of paying off several of Her Majesty's ships stationed at Hong Kong, and recommissioning them on the spot. This step is decidedly an improvement on the old plan of ordering ships home at the expiration of their ordinary term of commission, and pulling them to pieces even when they were in a state of thorough efficiency.—[The appointments appeared in the *London and China Express* of the 11th inst.]

Orontes, steam troop ship, Captain W. H. Hire, is expected at Plymouth in the course of the coming week, to embark supernumeraries for China.

THE P. AND O. COMPANY'S SERVICE.

La Finance remarks:—The Peninsular and Oriental Company having decided to cease the postal service between Suez and the Mauritius, and *vice versa*, at the end of June, 1866, the Mauritius Chamber of Commerce, at the request of the local Government, has recommended that a contract be entered into with the Messageries Imperiales for a monthly service from Mauritius to Suez, and from Suez to Mauritius, for a sum not exceeding £12,000 (300,000f.). In the event of this proposition being accepted by the Messageries Imperiales, the Chambers proposes to offer for two lines, one with Galle and the other with Aden. If the Messageries Imperiales will accept the offer for the establishment of a service with Suez, the Chamber is in favour of an arrangement for another with Ceylon, provided that the public do not have to pay more than £36,000 (900,000f.) for the two lines.

THE LONDON JUTE WORKS.

It is a matter of surprise, looking to the importance of the jute business that the various operations involved in the production of fabrics from the raw article should not before this have been efficiently and economically combined. To the large profits obtainable in the manufacture must be attributed the maintenance of that system of decentralisation under which jute, imported into London, is re-exported to France to be spun for the Dundee and other manufacturers. The London Jute Works Company (Limited), the board of which possesses every practical element that can secure success, in addition to great local and individual influence, designs establishing the manufacture in this city. The saving of the cost of transhipment and present insurance charges themselves afford a wide margin for profit, whilst the conducting of the spinning, weaving, and calendering on the same premises, and the mercantile and financial facilities afforded by a metropolitan location, both with reference to purchases of the raw material and advantageous distribution of the manufactured goods, render this a most desirable investment. The jute business is annually augmenting in an enormous ratio, and this carefully considered organisation, with a board of directors holding in their hands the thread of the extensive ramifications of this business, commends itself to capitalists seeking at once safe and large returns. Applications for shares must be sent in by the 26th inst.

TEA.

(From *Travers' Circular*, Sept. 9.)

The public sales of China tea this week were of moderate magnitude: about 21,000 packages only being offered "without reserve," out of about 28,000 packages printed; fair rates were obtained for nearly every lot offered, and in some instances prices went rather higher than general valuations. Dusty and common broken-leaf Congou sold at from 7¾d. to 8½d., and about 3,000 boxes of common Canton green tea of good appearance, "with all faults," sold at 8¾d. to 9d. per lb.; on other kinds, which were rather more numerous than usual, no change in value can be noted, the small quantity offered in each break being too insignificant to admit of much competition. The private market is decidedly firmer, and there is a good demand for all kinds of Congou and scented teas. Exporters eagerly take up all the Moyune teas of good make for American account, and as yet their requirements are far from being supplied. There is also a good demand for black Congou from 1s. 4d. to 1s. 8d., for shipment to Russia. An unusually large sale of Indian tea is advertised for Tuesday next; catalogues have been issued for about 3,500 packages, and the largeness of the quantity offered, together with the near approach of the time for the arrival of the new season's shipments, may perhaps prevent prices from ruling too high to enable the trade to buy these teas with advantage. The market price of common Congou is from 11¼d. to 11½d. per lb. Sound broken-leaf cannot be bought under 7¾d. per lb.

A private telegram, bringing advices from Shanghai to the 4th, from Foochow to the 7th, and from Hong Kong to the 12th Aug., was received in London on Saturday night by Messrs. Sillar and Bateman. It reports the export of tea for the fortnight to be 10,000,000 lbs., and that there was a fair demand. The last advices brought by the mail state that considerable shipments had been made from Foochow for England and Australia, but none for the United States and the Continent of Europe. The decline in the value of the lower and medium kinds, which took place after the departure of the last mail, had since been partially recovered, while the lowest and finest descriptions had maintained their value. Considerable quantities of second crop Congous had come forward, but the quality was inferior, and the offers made were far below market quotations. Advices from Amoy, dated 10th July, stated that the market still remained unopened, and that the stock of tea at that port had steadily increased, no shipments having been made this season.

The Shanghai correspondent of the *Englishman*, writing on the 21st June, draws a gloomy picture of the state of trade in China, and attributes its unsatisfactory condition to rashness and want of foresight on the part of foreign merchants. It would appear that low prices and overstocked markets in England, and the failure of the Russian demand, circumstances patent to them as well as to the Chinese traders who had made their own contracts in the interior accordingly, had been insufficient to check the eagerness of shippers, who, instead of agreeing to abstain from purchasing till prices had, by the absence of demand, been forced low enough to allow of a reasonable hope of profit, seem to have rushed into the market, and "a competition as keen as though there were not a million pounds in stock in London immediately sprang up." High prices and excessive shipments are certainly evils, but not the greatest, that have resulted from this excessive competition. "Native traders were encouraged to force leaf down from the producing districts before it was fit for packing;' in other words, tea, which, if properly cured, would have commanded a high price in this country, where fine quality is much wanted will arrive in no better condition than the mass of the surplus stock which has so long lain neglected in our warehouses, and, when it is sold, can, on arrival, hardly fail to cause loss to the importer. The news of the reduction of the duty in England appears to have caused even greater recklessness, and a fine opportunity for retrieving past errors was allowed to pass away unimproved. It appears hardly credible to those who have watched the transient effect which the late and former reductions exercised on prices, but we are told that "foreign purchasers agreed to consider the reduction in duty as equivalent to an advance of 6d. per lb. in home rates," and that, in consequence, settlements were rapidly made, in one port at least, at an advance of three or four taels per picul. Such eagerness to ship at any cost could scarcely have been anticipated by those persons in this country who predicted that the present season would be characterised by small exports and late arrivals.

Unless the writer of the remarks quoted above has overstated the case, it is tolerably evident that the teaching of the last two years has been thrown away, and yet it would have been difficult to imagine anything more apparent and more forcible. The only deduction that could reasonably be drawn from the history of the tea trade during the last two years was, that every single condition likely to conduce to making it a remunerative one had been for the most part lost sight of. The quantity exported was very large, but had this been the only error committed, its consequences would have been comparatively harmless; theteas, however, were not selected with due regard to the requirements of the market. Although the demand for the better qualities has long been on the increase, little fine tea was shipped, and a considerable proportion of that sent was improperly cured, and arrived in a condition hardly merchantable, while the majority of the shipments consisted of the lower and medium qualities, of which we had already an over supply. There was thus a heavy and badly assorted stock, and prices in consequence fell considerably, but even then the loss to importers would have been comparatively slight, had not the first cost of these teas in China been unusually high. Foreign competition had raised the demands of the teamen, and these had been acceded to apparently under the impression that the prices realised under exceptional circumstances by a few exceptional parcels formed the standard of market value in this country, and that this standard was likely to be maintained in spite of heavy shipments and inferior quality. If this line of policy is to govern the shipments of the present season—and appearances certainly point in that direction—even heavier losses are likely to result. The foreign merchant will in future have to contend with a formidable competitor for the profits of the export trade. The imitative qualities of the Chinese have been directed to this object, and we shall probably find that they have profited by the lessons for which we have paid so dearly, and have learned to copy all the good parts of our system while they avoid its errors. At all events they will carry on the trade under more favourable conditions than we can hope to do. They will not only be able to deal more advantageously with their own countrymen, and by their superior local knowledge and influence to evade many of the exactions to which we are obliged to submit, but they will also, by buying direct from the growers, escape the profits which foreigners have to pay to middlemen. These are advantages which will go far to neutralise the influence which capital and organisation have hitherto thrown into the opposite scale; and great forethought, together with judicious combination, must be resorted to if foreign merchants wish to retain their hold on the export trade.

The following relates to tea cultivation in Behar:—"We learn that the Ranchee Tea Plantation of Messrs. Thompson, Shaw, and Co. is doing well. The plants are generally looking well, both in size and condition, and the company expect to make a little tea from them this season. The company hope to plant out 140 acres this season, if all goes well. They are of opinion that the soil, though deficient in organic deposit, is as well suited to tea as that of Assam. The climate is rather against a very favourable development of the plant, but the results always obtained are

Digitized by Google

they think, sufficient to warrant a fair hope of success. They have also commenced the cultivation of coffee. Mr. H. Stainforth has also opened out nurseries for tea and coffee, which he proposes to plant out on land in the vicinity of Ranchee. In the Hazareebaugh district, the Ramgur Tea Company have extended their tea cultivation at Setagurrah by 208 acres, all planted out. The yield has averaged 300 lbs. of tea per acre from full-grown plants, and the quality, which has been tested by competent judges, is considered excellent. There is another tea concern called Jhoomra, in the Hazareebaugh district, which has about 100 acres of tea planted out; but, though the plants are very promising, they are too young as yet to yield any return. A new company have taken 20,000 acres of land from the Ramgurh Rajah, with the view of opening out a fresh tea plantation on the old road between Hazareebaugh and Ranchee.

Messrs. Rusden, Phipps, and Co. give the total sales and contracts of Congous since 8th May, 1865, and stock on 8th July, 1865, as under:—

	Total Sales & Contracts.	Stock.
Dust and broken-leaf	6 936 ..	2,000
Common to good common ..	9,001 ..	9,800
Flavoury to good flavoury ..	52,367 ..	16,200
Second-class Kaisow	69,737 ..	1,900
Good to fine	45,342 ..	210
Finest	7,708 ..	—
	191,091	30,110

Messrs. John Forster and Co. give the export of tea from Foo-Chow to the United Kingdom and to Australia from 1st June to 8th July for the last four seasons as follows:—

	London.	Liverpool.	Australia.	Total lbs.
Total from 1st June to 8th July (season) 1865-66	11,318,300	392,000	809,400	12,519,700
Ditto ditto ditto ... 1864-65	10,324,000	676,700	—	11,000,700
Ditto ditto ditto ... 1863-64	12,418,200	660,800	590,000	13,669,000
Ditto ditto ditto ... 1862-63	8,968,000	—	1,584,000	10,552,000

Messrs. Fussell and Co. state that the amount exported from Foo-Chow from 1st June to 8th July is composed of—

	lbs.
Congou	10,595,338
Souchong	194,591
Oolong	502,906
Scented Orange Pekoe	349,186
Scented Caper	46,624
Flowery Pekoe	14,374
Sorts	8,934
	11,711,953

THE ASIATIC BANK.

The following letter from the Bank has been published in *The Times*:—

"Asiatic Banking Corporation, 4, Lombard Street, London, Sept. 15.

"Sir,—The attention of the board of directors of the Asiatic Banking Corporation has been directed to the observations contained in your City Article to-day, in which you advert to what you state to be a 'practice adopted by two Indian banks—the Asiatic and Central of Western India—of seizing and retaining collateral securities attached to bills accepted by London houses, although the acceptors punctually tender the amount, and demand their surrender, on the plea that the banks have a right to realize these securities and apply any surplus to the discharge of bad debts which they may have incurred in their own separate and private transactions with the drawers.'

"If the practice of the Asiatic Bank had been such as you describe, there is no doubt it would be open to the observations with which you characterise it, but the corporation have given no rise to the charge thus imputed to them.

"The facts of the case out of which your observations arise are simply these.

"The company's agent in Bombay in April last negotiated for a house at Bombay a number of bills for a large amount, some of which were specifically drawn against cotton shipped to London, on the sole account of the drawer, by various vessels, and some of which were what is called 'clean' bills.

"In entering into this transaction the house at Bombay made an agreement with the bank, by which it was specifically agreed as follows:—

"'And we authorise the corporation to hold and retain the goods while unsold, and the balance of the net proceeds when sold as security for and towards the payment of any other bill or bills which any of the managers or agents of the said bank may have purchased from us, or towards the liquidation of any claim the bank may have upon us, or otherwise to be at our disposal.'

"On the arrival of one of the vessels containing part of the cotton in question, Messrs. Dadabhai, Naoroji and Co. called upon the bank and offered to pay a portion of the bills which was drawn against this cargo. The Bombay house having in the meantime stopped payment, the Asiatic Bank were not prepared to give up the security they held on payment of any part of the bills—it would have been contrary to the agreement that they should have done so; but upon Messrs. Dadabhai and Co. stating the cargo had been consigned to them for sale and sold, they offered them (Messrs. Dadabhai and Co.) to confirm the sale, and to hand over the goods to them on an arrangement that the proceeds should be applied, first in payment of the bills drawn against them, and the balance be deposited in the names of Messrs. Dadabhai and Co. and the bank, to abide the decision of the question, if any, whether the bank or Messrs. Dadabhai and Co. were entitled to the surplus. I subjoin a letter from myself to Messrs. Dadabhai and Co. embodying this offer.

"The question between Messrs. Dadabhai and Co. and the Asiatic Bank has since been settled on the principle of that letter. The point between the parties in substance was whether the Asiatic Bank was bound to give up the security they held by specific agreement upon tender of payment of part of the bills which they held, or whether they were entitled, under the agreement, to hold the whole of their security as cover against all the liabilities of the Bombay firm, as stipulated by the bank in their agreement.

"This was a question of law, depending on an agreement, and not on any usage.

"On this explanation I think you will agree that the conduct of the Asiatic Bank has been in all respects fair and even liberal, and that they are not justly obnoxious to the observations contained in your article.

"It would have been more satisfactory to the bank in the first instance to answer Messrs. Dadabhai and Co.'s letter and your observations, but they were advised by their solicitors, Messrs. Freshfield and Newman, that it might give rise to inconvenience, and form a bad precedent, to make a question of pure legal right a subject of discussion in a daily journal.—I am, Sir, your obedient servant,

"F. W. LAWRENCE, Acting General Manager."

NORTH CHINA ROYAL ASIATIC SOCIETY.

(Continued from our Issue of 7th Sept.)

Dr. Lamprey was then called on to read his paper on "The water we drink in Shanghai."

He commenced by alluding to the difference between Europeans and Chinese as regards their notions of water applicable for drinking, cooking, and ablution purposes, and the utter disregard of the latter as to sources or supply, and impurity, so long as it was tolerably clear. The difficulties some portions of the population of China labour under in regard to drinking water, and the necessity for boiling water previous to use, thus render the practice of drinking water hot general throughout the country. The well water of the city and settlement of Shanghai is, generally speaking, unfit for use. It contains a large amount of impurities, consisting chiefly of nitrate of lime, derived from sewers and surface drainage, the soil being found to contain a large amount of lime. This nitrate of lime is found exuding above the surface of the tiles of damp floors and of old buildings, where it effloresces. A small quantity put into good water gives it the unpleasant taste noticed in the river water. The muddy water of the Wongpoo contains from 25 to 29 grains per gallon of alluvial matter suspended in it, it also contains much impurity and organic matter; but on being filtered through animal charcoal it loses a large amount of impurity and becomes sufficiently wholesome for use. It still retains a taste, which most river waters have. The amount of the impurities of the Wongpoo water was compared with those of the water supplied to other large communities, and the advantage the rivers of China possessed over those of Bengal and other places were pointed out, viz.: The rivers of China are not made the receptacle of the dead and the sewage of the towns, &c. The chemical constituents of the sewage of towns though largely thrown over the land in China are immediately appropriated by the growing vegetation and otherwise become modified by contact with the soil. The absence of waste uncultivated jungles in China shows that the source of vegetable organic matter is less than in India. The lake water came next under observation. This, though shown to be a bright sparkling water, was found to contain a large amount of impurities, which were greatly reduced by the filtering process. Compared with the river water it has less organic matter in suspension, and was found to keep better than it. The filtered lake water has a decided advantage over all the waters supplied to Shanghai. The filtering process of Messrs. Farr Brothers was next described, and a sample of the charcoal cylinders they use was shown to the meeting. The important results of this process were shown by reference to the following table, exhibiting the impurities of one gallon of the several waters treated of:—

	Sld. Mat. Grs.	Org. Mat. Grs.
Lake water not filtered	40 ...	4
Lake water filtered through carbon cylinders	28 ...	2
River water filtered through filtering paper, by which 25 grains of alluvial matter was taken from it ...	60 ...	10
River water filtered through carbon cylinders... ...	28 ...	4
Well water not filtered	88 ...	16

In a climate like this, where so many circumstances favour the prevalence of illness, such as fever, dysentery, and at times cholera, it becomes a very important matter that this great necessary of life—the water we use—should not be in any way injurious to us. A perusal of sanitary reports shows how much the health of a community depends on good water, especially during the prevalence of any epidemic such as cholera, consequently we are bound to use every effort to deprive the water we are supplied with of all the impurities we can at the cost of whatever labour and expense. The general neglect of the rain water throughout Shanghai was alluded to. Were this water collected, filtered, preserved in proper jars, and filtered again before use, it would be far better than lake or river water. The living animal and vegetable organisms found in the waters of Shanghai were stated to bear a general resemblance to those found in Europe—and while the presence of the former indicated a very impure condition of the water, the latter were generally admitted to possess a purifying effect. These investigations with a microscope afforded an interesting subject for research. But the more important subject for investigation was the nature of the chemical impurities of the water. It was shown that without being much of a chemist a great deal of useful chemical facts would be ascertained by carefully evaporating a given quantity of water. Weighing the residue, and submitting this residue to greater heat and again weighing it, showed the amount of solid matter and of organic impurities. This has been done, and the result was that given in the foregoing table.

The speaker concluded by stating that he had engaged in these pursuits with the object of ascertaining whether the water supply of Shanghai had anything to do with the sickness of the troops in garrison under his care, and the subject being one of general interest to the European residents of Shanghai, he thought the results of his investigations would be an acceptable subject to lay before the society.

Mr. Kingsmill complimented Dr. Lamprey on the interesting results of his analysis. The occurrence of nitrate of lime in quantity was a very remarkable circumstance, and could only be explained by the peculiar geological character of the valley of the Yang-tsze, where limestone rocks existed almost to

Digitized by Google

the exclusion of those containing potash and other alkalies. There were some discrepancies in the analysis of the water from the river Thames, but the highest taken at Westminster showed, he believed, a less amount of impurity than that of the Wong-pu at Shanghai. He did not know what the effect of nitrate of lime on the system would be, but thought there was little doubt of the unwholesome nature of the river water here. Much of this was doubtless owing to the flux and reflux of the tide, which constantly carried back the already impure water to the same spot, the amount of actual drainage from the basin of the river not being sufficient to produce a downward current strong enough to carry these impurities out to sea. Above the reach of the tide the water was much purer, and the analysis of the water from the Tai-hu lake showed, he thought, a satisfactory result. He did not agree with Dr. Lamprey in his recommendation of rain-water, as in Shanghai he had found it very impure, it quickly putrified and emitted a fetid smell. He (Mr. Kingsmill) quoted a passage from Professor Anstead, showing that rain-water was apt to be tainted with various impurities, especially in the neighbourhood of large towns, where many human beings were collected together. He thought that Shanghai was similarly circumstanced.

After a vote of thanks to Dr. Lamprey for his interesting paper, proposed by the Rev. Mr. Mitchel, and seconded by Mr. Probst, the proceedings terminated.

OUR TRADE WITH CHINA.

In our last we gave insertion to the Consular Returns for Canton and Swatow for the year 1863; we now publish the returns for the same ports for 1864, and also Consul Fittock's brief abstract of the trade at Ningpo, of which no regular report is given.

REPORT ON THE FOREIGN TRADE AT THE PORT OF CANTON IN CHINA FOR THE YEAR 1864.

The Returns annexed to this Report are as follows:—

1. A Return of British shipping showing the direct trade in British vessels to and from Great Britain and British Colonies.
2. A Return of British and foreign shipping.
3. A Return of foreign shipping (other than British).
4. A Synoptical Return of the Import Trade.
5. A Synoptical Return of the Export Trade.
6. Summary showing the difference in value of the Import Trade between the years 1863 and 1864.
7. Summary showing the difference in value of the Export Trade between the years 1863 and 1864.

These Returns, like those of the preceding year, have been compiled from the foreign Custom-house Reports, but they by no means represent the actual trade of the port, inasmuch as considerable quantities of foreign goods do not pass through the foreign Custom-house, being imported and exported in native craft. Moreover, as observed in the Trade Report of 1863, a very large trade is carried on between the British Colony of Hong Kong and the neighbouring coast of China in native bottoms, and as it is impossible to obtain returns from the Chinese Custom-houses, or from Hong Kong, which is a free port, so is it impossible to form any correct estimate of what is the amount or value of the foreign trade with this part of China.

Imports.—The value of the import trade of Canton for 1864 may be estimated at about £2,053,539 sterling against that of 1863, £2,281,354 sterling, showing a decrease of £227,815, apparently a large falling off on one year's transactions, and for this several reasons may be assigned.

In the first place the exchange is rated at a farthing higher, no very great difference, but still adding somewhat to the deficiency.

Then the immense drain on the Imperial Treasuries from the rebellion has compelled the levy of additional imposts on articles of merchandise in the hands of Chinese merchants, and therefore the foreign goods trade, like that in Chines produce, has suffered considerably.

Again the import trade of the port is changing hands. Formerly goods were imported by the foreign merchant and sold at this place; but now the Chinese merchant goes to Hong Kong and purchases what he requires, sending it up or down the coast or to Canton in foreign or native bottoms as may suit his convenience. The result is, that most of the business of the port is done at Hong Kong.

A comparison of three years' entries in the foreign Custom-house show a gradual decadence in reported cotton goods It will be observed, however, that the falling-off is chiefly in American goods and raw Bombay cotton; the cause for this being, in both cases, the civil war in America, needs no comment.

The decrease in wollens is not so great in the average as that of other articles. Nevertheless, taking into consideration a population of nearly 1,000,000 in this city alone, with one of at least 30,000,000 in the province, the import trade in foreign fabrics is small enough, and indeed would be of no account at all if that which passes through the foreign Custom-house represented the requirements of the people. But the fact is that the principal portion of the shops in Canton are supplied from goods bought of foreigners in Hong Kong.

Now as stocks under present circumstances are not held by foreigners, it is evident, from the difference between the sales made by foreigners and the Customs entries, that the greater part of the goods imported are brought from Hong Kong on Chinese account; and when it is considered that these are but a very small portion indeed of what finds its way into the city or province by other routes, it may be fairly assumed that the import trade for 1864 has not only not decreased, but, in all probability, has very largely increased, only it has changed hands, the Chinese doing that for themselves now which formerly the foreign merchant did for them, viz., import the goods. In fact, by becoming themselves purchasers at first hand, and breaking the bales up into small parcels, and dispersing them over the province, and avoiding the Canton Custom-houses, they do a very large and profitable business, of which little is or can be known, but affording sufficient evidence to show that the trade in foreign manufactures is quite as large as ever it was, only it has assumed a different shape.

In opium the falling off is also large, the value in dollars being in 1864 1,322,866, against 2,290,234 dollars in 1863, showing a decrease of 967,368 dollars. This deficiency may be attributed to the same causes as those which affect the trade in foreign manufactures, and the great facilities for smuggling which exist. For instance, the import of opium into Canton yearly ought to average 10,000 chests, in value say 6,644,000 dollars, whereas the Custom-house Returns show but 1,322,866 dols., showing a difference of 4,317,130 dollars. Now there is every reason to believe that this latter is not caused by a falling off in imports of the drug, but simply by some portions being smuggled in, and others sent by various routes, and thus avoiding the Custom-house at Canton, thus affording another proof of the difficulty that exists of obtaining a correct estimate of the import trade of this port.

Exports.—In this portion of the trade there also appears a falling off; 9,813,711 dollars in 1864, against 16,083,062 in 1863, showing a deficiency of 6,269,351 dollars in last year's export trade.

This difference extends over almost all the articles of export, as the following Table will show:—

	1863.	1864.
Tea	65,662,268	3,344,678
Silk	2,766,567	1,571,670
Cotton ..	25,339	22,088
Chinese produce	7,628,888	4,875,275

As regards tea, the falling off in that article may be attributed to the fact that during the past year the teas have gone to the Portuguese settlement of Macao, where they can be shipped duty free, and although efforts have been made by the Canton Customs authorities to prevent their being carried there from the interior, still by some means or other they evaded the restrictions, and a considerable business has been done in them at Macao. Those in the Canton market were chiefly a few well-known chops, for which high prices were asked. Doubtless, the depressed state of the market at home had its effect on the trade out here, but the truth is that the day for Canton as a tea-mart is past and gone; Foochow and Hankow absorbing all that used to come down before those ports were opened.

In silk the business done during the past year has been but small. The export to Europe was 1,169 bales, inclusive of 755 bales of waste, and to Bombay and America 5,577 cases; but the crop generally has been short, probably 20 per cent. below the average of years, and prices excessively high. The principal portion has been bought by Indian firms, next by native shops and by American and English houses, but very little has been done by the two latter. Prices have rated from 400 to 550 dollars per picul of 133⅓ lbs., being quite 50 dollars higher than the average of former years.

A good crop from the Canton districts may be taken at 15,000 bales or cases, each 100 lbs. English weight.

From the foregoing remarks on the trade of the port at Canton it will be seen that, as regards foreign merchants, local business has been far from satisfactory, and, indeed, there is but little prospect of its improvement. Should the interior become more settled the communication with the provinces of Yunan—rich in mineral products, Kweichow, and Kwangsi, be opened through the West and North Rivers, then there might perhaps be some hopes for a better state of things; but under any circumstances a new element has developed itself, which is likely to cause a revolution in mercantile affairs. The Chinese have at last learned they can transact their own business without the aid of foreign firms, and are fast adopting that mode. During the past year some of the finest steamers on the coast have been chartered and loaded by Chinese firms without European intervention, and the day is not far distant when the whole of the coast-carrying trade will be in their hands alone. It has been mentioned above that the import trade at Canton is being gradually absorbed by the Chinese merchants, and such is the case also at the ports of Hankow, Tientsin, and other places, nor is it at all improbable that the export trade may, to a great extent, follow the same course. Already at Foochow and elsewhere large shipments of teas have been made by Chinese firms on consignment to England, and the fact has appeared, that whilst foreign merchants have been heavy losers on last year's transactions in the home-market, the Chinese have come out well and even with a profit; the reason being, that as Chinese they can buy and sell with much more advantage than foreigners can, for they are dealing with their own interests and not those of employers—they can work their establishments at less expense, and are content with small returns. It is hopeless, therefore under such circumstances, to compete with them except at a loss: and when the time comes, as it will come, when they will feel their way with greater certainty and open credit with foreign banking establishments, that revolution above referred to will have been completed, and foreigners will find a very different state of things than that which formerly prevailed. In fact, it requires only a more settled state of public affairs and an enlightened policy and encouragement on the part of the Chinese Government to hasten the change now pending, for the people are ready and willing enough, and are fast seeing their way to adopt it.

From whence, indeed, originates the now constant complaint that business is dull, and there is nothing doing? Markets at home may perhaps have something to do with it, but it does not require to go so far from China to obtain a reply. Ask into whose hands the carrying trade on the coast, and the import trade into the ports are falling, and an answer to the question will be found. Foreign merchants must look to this if they have regard for their future prospects.

(Signed) D. B. ROBERTSON, Consul.

SWATOW.

REPORT OF THE FOREIGN TRADE AT THE PORT OF SWATOW FOR THE YEAR 1864.

British Shipping.—There has been an increase during 1864 in the number of vessels entering the port, as compared with the previous year, as per following table, viz.:—

	ENTRIES.					
	With Cargo.		In Ballast.		Tonnage.	
1863.	1864.	1863.	1864.	1863.	1864.
215 ..	206 ..	23 ..	50 ..	93,085 ..	100,760

Or, arrivals 256 against 238 of 1863, an increase of 18 vessels, and a tonnage of 7,675.

Digitized by Google

CLEARANCES.

With Cargo.		In Ballast.		Tonnage.	
1863.	1864.	1863.	1864.	1863.	1864.
184 ..	200 ..	52 ..	52 ..	92,382 ..	100,943

And by a further comparison between the entries in 1861 and last year it will be seen that the number of vessels which entered the port in 1861 was 160, with a tonnage of 59,142 against 256 in 1864, and a tonnage of 100,760, or an increase in three years of 96 vessels and 41,618 tons.

Foreign Shipping.—208 vessels, under flags other than British, entered the port during 1864, being an increase of 52 vessels over the previous year. This excess is perceptible under the following flags:—

Hamburg	54 in 1863	against 78 in 1864.
French	2 „	11 „
Siamese	4 „	8 „
Sundry flags	14 „	34 „

Comparing the entries in 1864 under the English flag with those under flags of other nations, it will be seen, excluding the steamers employed in the coasting trade, which are exclusively British, that the latter exceed the former by 51 vessels, with a tonnage of 7,075; but, by the addition of steamers to the list, the entries under the British flag exceed others by 48 vessels and tons 35,428, thus evincing a marked improvement in the employment of British vessels during 1864.

Imports.—The total value of the import trade for 1864 amounts to £1,961,740, or an increase over the previous year of £191,105, and this too, without taking into account the foreign goods imported in native bottoms, of which I have been unable to obtain any return. This excess is observable under the following heads, viz.:—Bean-cake, beans and peas, opium, medicine, native cotton, hemp, oil, and rice.

There has been a considerable falling off in the following articles, viz.:—Grey shirtings, white do., T-cloths, cottons (dyed), American drills, lastings, long ells, cotton yarn, ground-nut cake, and silk piece-goods.

The increase in the amount of rice imported is due to the destruction of the crops by the heavy rains which visited the South of China in the middle of the year, whereby immense embankments were broken down, and fields and villages inundated in all directions. The decrease in cotton goods is attributable to the warfare now raging between the Northern and Southern States of the American Union.

To illustrate the steady development of the trade at Swatow, I have drawn up the following table, giving the value of the import trade for each year since the establishment of the Consulate:—

1861.	1862.	1863.	1864.
£1,106,590 ..	£1,264,444 ..	£1,770,635 ..	£1,961,740

or an advance in 1864 over 1861 of £855,150.

Exports.—The value of the export trade for 1864 amounts to £1,167,907, or an increase of £359,838 over 1863. In sugar alone there is an excess of £416,950, thus verifying to the correctness of the statement made in my report for 1863 that a much larger quantity of land had been set apart for the cultivation of the sugar-cane. There is also an increase under the following heads, viz.:—Alum, cassia, paper fans, hemp, and indigo.

There has been a decrease in tobacco, coarse chinaware, paper, fish, dried and salted, maccaroni, medicine, potatoe flour, preserves, and rice.

The following Table shows the value of the export trade for the last four years:—

1861.	1862.	1863.	1864.
£525,931 ..	£746,640 ..	£808,069 ..	£1,167,907

or an increase in 1864 over 1861 of £641,976.

The total value of the trade of Swatow for 1864 amounts therefore to £3,129,647, whilst that for 1863 came to £2,578,704, being an increase during the twelve months of £550,943.

This port still labours under the disadvantages referred to in my Report of 1863; and I believe that a much larger trade would be carried on here could merchants have access to the city of Chao-chou-foo, as there most of the wealthy Chinese merchants reside, a few of whom only engage in trade through agents at Swatow, but who, I have every reason to believe, would embark more extensively in commercial transactions could greater security be obtained for the conduct of goods from hence to the interior, and *vice versa*, but which are subjected at present to the heavy mulcts levied by the villages near which the produce has to pass. The desire to possess the power of levying black mail at Swatow itself rose to such a height during 1864 that the surrounding villages engaged in warfare to obtain this end during the whole year. On the arrival of steamers or ships with Chinese passengers, these, on leaving their vessels, have been fought for in the harbour among the shipping, and fire-arms discharged most indiscriminately. At present the village of Swaboe has obtained the mastery, and holds the monopoly to levy these demands.

Until Chao-chou-foo becomes accessible to foreign merchants, not much more than the present business can be done on the river running to the north-west of Swatow; but it appears to me that a small tug-steamer of light draught would answer well to tow down from the sugar district, on the branch of the river running to the west of Swatow, boats loaded with sugar; and such an arrangement, I presume, the Chinese authorities would make no objection to, especially as such steamer would not have to pass Chao-chou, the city opened to trade, but would ply between it and Swatow. The distance is about thirty miles, and boats at present cannot manage this under two days, as the river is narrow and tortuous, though deep; and if it be blowing from the north-east, these boats are often detained for two or three days longer. A steamer of this class would also be useful in towing both in and out of the port vessels in calm weather. This service could be performed, I fancy, for a very little over the pilotage charged, viz., 3 dollars per foot.

A considerable trade has sprung up during the year 1864 with Saigon, the French port in Cochin-China. The demand for rice has principally caused this.

There are but few foreign merchants at this port, the Chinese preferring in most instances to manage their own affairs; many of whom, on chartering foreign vessels, employ as supercargoes Chinamen brought up in Singapore, and understanding the English language, by which measure the necessity of employing a foreign firm is avoided.

Swatow, March 1, 1865. (Signed) G. W. CAINE, Consul.

NINGPO.

Consul FITTOCK to Mr. WADE.

Ningpo, Nov. 29, 1864.

SIR,—I had the honour to receive your circular despatch of the 28th of October, in which Her Majesty's Consul is informed that discredit necessarily attached to those Consular officers who have neglected to forward the Trade Returns. Yet it was clearly impossible to prepare them in an office so short-handed as this has been; and, so far as I can ascertain, no commercial reports or returns have been prepared at Ningpo during the past three or four years, notwithstanding that the trade has increased enormously, as the following figures will show:—According to the Returns of 1859, the latest on record in the office, the number of vessels of all nations that entered the port was 203, representing a tonnage of 45,305 tons, while in the year 1863 the number had increased to 1,554 of 252,587 tons. In like manner the imports and exports, which in 1859 did not exceed together 1,500,000 dollars at the outside, in 1863 amounted to 23,000,000 dollars in round numbers; and there is reason to believe these figures, large as they are, will be exceeded when the results of the present year's trade are published.

Consul KNOX to Earl RUSSELL.—(Received May 19.)

Bangkok, March 31, 1865.

MY LORD,—I have the honour to forward the Returns of trade of this port for the year ended December 31st, 1864.—I have, &c.

(Signed) THOMAS GEORGE KNOX.

Inclosure in No. 15.

COMMERCIAL REPORT FOR THE PORT OF BANGKOK FOR 1864.

During the last three years the tonnage cleared at this port has been as follows:—

	Total Tonnage.	British Tonnage.
1862 ..	132,138 ..	26,817
1863 ..	115,914 ..	28,603
1864 ..	171,335 ..	54,771

Thus 1864 shows a large increase in the amount of tonnage cleared at this port. British shipping has fully availed itself of this advantage, the amount employed being very nearly double the average of the last five years.

The large demand for rice in China, together with the almost total disappearance of United States shipping from these waters, account in a great measure for the extended employment of British vessels.

There has also been a considerable augmentation in the tonnage of Hanseatic vessels employed at this port.

In 1863 the total tonnage was 8,948, which in 1864 has risen to 21,124. These vessels are peculiarly well adapted for this trade, as, having been built with a flat floor and good amount of beam, they are able to carry their cargoes on a light draught of water. Thus vessels of a considerable carrying capacity are able to load inside the river, and the cargoes are saved the extra expense incurred when conveyed in lighters to those vessels that have to load outside the bar.

The average depth of water on the bar at spring tides is 12 feet 6 inches. The charge for lighterage to vessels loading outside is 7 cents of the dollar per picul of 133 lbs.

The Siamese shipping employed during the last three years has been as follows:—

	1862.	1863.	1864.
Vessels	126 ..	104 ..	134
Tonnage	47,078 ..	37,981 ..	51,431

Many of these vessels have been constructed in Bangkok by native carpenters. Those built during the last four or five years are fully equal to the average of European vessels.

They are built of teak and well coated with chunam under the copper; although their planking is only fastened to the timber by spike nails, yet there are very few instances, even where they have met with typhoons, that they have damaged their cargoes.

The remainder of the vessels owned by Siamese have been purchased from foreigners.

The principal qualities looked for are a good carrying capacity, with a light draft. During the past year the following vessels have been at this port:—

Name.	Flag.	Foreign Name.	Tons.
Hera	American ..	Fairy	572
Kum Rye ..	Do. ..	Jas. Lawrence ..	251
Maria	British	Maria Gambrill .	852
Pengum ..	Do.	Penguin ..	197
Star of Peace ..	American ..	Star of Peace ..	—

There are now five steam-tugs and lighters employed in towing vessels to and from the bar. Three of them belong to an American firm, one to a Siamese, and the other is a British vessel, lately built at Liverpool, and the property of the captain.

Imports.

The Imports for the last three years have been:—

	1862.	1863.	1864.
Goods imported ..	360,601 ..	614,142 ..	793,999
Gold	99,972 ..	56,118 ..	100,496
Silver	127,085 ..	116,335 ..	273,202
Total	587,658	786,595	1,167,597

This Table shows that in 1864 the imports have exceeded those of the two preceding, as, indeed, they have of all former years. There is, however, nothing further remarkable in the increase, as all the articles usually imported into Siam have fairly shared in it. As most of the goods have been imported from Singapore, it is impossible to state exactly their nationality, but from a glance at the Table it can easily be inferred that by far the greater and more valuable part are of British origin.

Exports.

Rice.—The export of rice during the year 1864 amounted to 125,507 tons.

The increased demand for this grain in China has already led to an extension of its cultivation, and will doubtless lead to more. The price at which it sells is ruled entirely by the demand in China, and the growers, who usually bring their own produce to market, must have realised very large profits during the last few years.

The average price during the last year has been 300 per cent. higher

Digitized by Google

than it was before the Treaty of 1855. The land on which the seed is sown belongs to the King, and the rent charged is £2. 10s. per acre. In good seasons the return from the seed is ninety-fold.

There is no system of irrigation, the natives trusting entirely to the rains or the overflowing of the rivers for the necessary moisture.

Manure is not used, and the fields are seldom left fallow. The ground is, therefore, not so productive as it could be made, nor is new land brought into cultivation at the rate which might be expected.

The extended cultivation has been merely on the land which was formerly allowed to remain fallow. Thus, a person having, say ten acres, used formerly to cultivate five, and leave the rest fallow for that year; now he cultivates the whole ten yearly. The land in the vicinity of the rivers and canals is now mostly taken up; but there can be little doubt, that owing to the increased fertility of the new land, it will be found profitable to cultivate it. The constant employment of the same ground, as above alluded to, will also necessitate new land being brought into cultivation.

Only one crop is sown in the year.

Teak.—The Siamese Government have now withdrawn all obstacles placed in the way of foreigners who wished to engage in the inland teak trade. They have also allowed foreigners to rent and work the jungles in which the teak trees grow.

I have, therefore, no doubt but that a very large trade in this timber will spring up during the next two or three years.

Bangkok possesses some considerable advantages over Maulmain as regards the facility with which the timber can be brought down to it. I have also been informed by those who have visited the forests from which Maulmain is supplied, as also the forests from whence the timber is brought to Bangkok, that in the latter the trees are both more abundant and of a larger size. This last fact is one of considerable importance, as, I believe, good lengths of teak plank, say 60 to 70 feet, are much required in England. There is here no difficulty in finding trees of large girth of even greater lengths that that above stated.

Their transport from the spot where the trees are felled to the water, by which they are brought down to Bangkok, is the great difficulty. At present the sole means used for dragging timber in the forests is by elephants. These animals are not even assisted by blocks or pulleys, which, it appears to me, would much facilitate their work at a heavy pull, as would rollers, and, doubtless, many other expedients hitherto unemployed. Whether steam power could be profitably used is a question which will doubtless be solved before long, but the great inequalities of the ground will, I fear, militate much against it. Those foreigners who have obtained leave to work a jungle have a certain tract made over to them, and the payment agreed upon is two rupees for each tree felled.

In order to work a jungle properly an outlay of about £4,000 would be requisite for the purchase of elephants, hire of labour, &c.

Those that have not so large a capital at their disposal could enter into contracts with the chiefs of the different districts, who, having much manual and elephant labour at their disposal, will, I am sure, be found willing to bring the logs to the water and hand them over to the purchaser at the rates agreed on. In Siam proper the jungles are under the superintendence of the Governors of the districts; in the Laos provinces they are the private property of the chiefs, of whom there are five or six in each province.

There are numerous other descriptions of wood in Siam applicable to shipbuilding, but with the exception of "mai takien," the prices are as high as that given for teak, and the great ease with which the latter is worked, together with its well known character for durability, will always give it the preference.

The "mai takien" above alluded to can be had in lengths up to ninety feet. It is a very durable wood, particularly under water, is easily worked, and its elasticity is such that 2-inch planks can be fastened on to the timbers of vessels without the necessity of steaming it. It is to be had in great abundance all along the coast. The present price is high, as the business of bringing it to Bangkok is entirely in the hands of Chinese. The profit which they reap from the transaction must be great, as they charge exactly 100 per cent. more for it in Bangkok than it can be bought at even forty miles distant down the coast.

Sugar.—For many years past the production of sugar has been gradually decreasing in Siam, The heavy taxation to which, in all stages of its production, this article was subjected, is undoubtedly the main cause of its decrease.

This can be easily understood when it is known that the land on which it was grown, the cane itself, the mills and boilers used in its manufacture, and the boats in which it was brought to Bangkok, all and each were taxed, and that not lightly. These taxes, after repeated applications from this Consulate and other quarters, have at last been taken off, with the exception of that on the land, which is 2s. 10d. per acre, and that on the boats is collected on all boats, however employed.

Within the last three months a large steam sugar mill has been erected in the Na chon-chaise district. The native sugar manufacturers are, I believe, now aware of the great advantage it possesses over their own mills, therefore others will probably be ordered. I am informed by those who ought to be well capable of giving an opinion that the land in the Na-chon-chaise district is peculiarly well adapted for the growth of the cane, and, as the same soil prevails over a very large surface, there is no valid reason why Siam should not take high rank amongst the sugar-producing countries of the world. The cane is that known as the Salangore cane.

Cotton.—It is very difficult to obtain any reliable information as regards the extent of the cultivation of cotton in Siam.

This country, like most others in the East, is doubtless capable of producing large quantities of the plant, and it is merely a question as to whether its cultivation will give a higher profit to the growers than many other articles which the soil is also able to produce. Under the present high prices it probably does, and the fact that the amount brought down to Bangkok in 1864 was 13,000 piculs of clean and 7,000 unclean, against 7,200 of the former and 4,550 of the latter in 1863, may be taken as evidence thereof. This cotton was grown at a considerable distance from Bangkok, in the northern part of Siam, and Chinese emigrants from the Island of Hainan are the principal, if not the sole, cultivators.

From the information I have been able to obtain (for I have never visited the district myself), both the cultivation of the plant itself and the means employed in picking and cleaning the cotton are of the rudest description. A patch of jungle is cleared, generally a new one every year, whereby much good timber is destroyed. The ground is lightly hoed, and the seed sown broadcast at the time that rain is expected.

Nothing further seems to be done until the plant has grown up. There is a small quantity of cotton, about 3,000 piculs, grown in Samui, an island in the Gulf of Siam, but so quiet has this been kept by the Chinese that it was unknown to any European in the place until one month since, when it was discovered by a person whom I had sent there to get information. It has hitherto been exported to Hainan.

As it is hardly probable that the present high price of cotton will long continue, as the article grown in this country is of an inferior description, and could not be improved without a considerable expenditure of capital and labour, neither of which requisites are likely to be available in this country, at least for some time to come, I think it may be safely concluded that the supply of cotton from Siam will not be for many years of any importance.

Siam has many other productions, but, with the exception of sapan wood, of which the supply is large, the amount produced has hitherto been small, which may in some measure be taken as a proof that to supply them is not found sufficiently profitable to induce much labour to be employed in the business. I therefore think that for some time to come the principal productions of Siam will be found to be rice, sugar, and teak.

The production of the rice, as I have before stated, has much increased, and the export trade in this article has become one of considerable importance.

I believe this in a great measure arises from the fact that when the Treaty of 1855 was made, it was agreed that the duty on this article should be paid by the exporters. The tax-gatherers have thus had to deal with Europeans who would not be imposed upon, and the native producers were freed from these harpies.

It is otherwise with sugar, which was subjected to an inland duty levied on the manufacturers, who, doubtless, are often imposed upon.

With regard to teak no provision was made, and it therefore became a monopoly in the hands of one of the King's brothers, who so dealt with the matter that during the last three years the supply has been very far short of the demand. I have prevailed on the Siamese Government to allow foreigners to embark in the business of bringing timber to Bangkok, paying a duty of 20 per cent. of its value on arrival at Bangkok, and I have great hopes of seeing a very flourishing trade spring up. Until the present any large logs were seized for the King, and the Governors of the towns on the river by which the timber passed were also in the habit of taking a log or two from each raft for their own use.

Population.—The population of Siam Proper can only be guessed at; but I imagine it must be about 4,000,000. It consists of native Siamese, Chinese, Cochin Chinese, Laos, Pequans, Burmese, and Malays.

With the exception of the Siamese and Chinese, the others are descendants of the prisoners taken by the Siamese armies in former times. Of these various peoples the Chinese seem to me to be the only one at present on the increase. Far more industrious than the rest, the women prefer them as husbands, and as they do not exact the same amount of work from their wives that a Siamese husband would do, the mother has more time to attend to her offspring.

The consequence is, that more of their children arrive at the age of maturity than those of the Siamese and other inhabitants of this country.

The female descendants of this race are in dress and appearance similar to the Siamese; the males, growing the Chinese tail and dressing similar to their fathers, are not easily distinguished from the native Chinaman. From this breed have sprung the native merchants of Siam, who are also for the most part the farmers of the revenue.

The European and American residents in this place are in number about 200 persons.

There are eight mercantile houses, two ship chandlers, three steam rice-mills, and two steam-tug proprietors. Besides these there are twenty-two firms managed by natives of Surat and Bombay, some of which have considerable capital at their disposal; and also a large number of Madrassers, principally from the neighbourhood of Pulicat and Nagore, engaged as shopkeepers in Bangkok and some of the large towns of Siam, as well as doing a pedlar business throughout the country.

I had hoped to have had a table of the different taxes levied in Siam ready for this report. They are, however, so numerous, and I may say in a measure so undefined, though not unfelt, that I have as yet been unable to thoroughly complete it. I will, therefore, content myself with stating that the natives of Siam are, I am certain, more heavily taxed than any other people in the world.

There is a carpenter working in the room in which I am now writing, and this is his story, which I know to be true. He is the descendant of parents who were taken prisoners in a raid made by the Siamese into Saooy about forty years ago. He is therefore what is called the King's slave. He receives from the Royal Treasury the sum of sixteen ticals (£2) a year. For this he owes four months' service in the year.

The right to employ this man's service has been given to one of the King's officers, and to this officer the carpenter pays twenty-four ticals (£3) a year. He therefore pays a personal tax of £1 sterling a year. He has a small garden in which there are five durian trees; on each of these trees he pays a yearly tax of one tical, besides taxes on other trees, amounting to two ticals and a-half a year. He therefore pays on the produce of a garden not an acre in extent the sum of 19s. 3d. a year. He keeps a boat in which his wife takes the produce of this garden to market. This boat is 18 feet long, and he therefore has to pay a tax of 7s. 6d. a year on the boat. When his wife gets to market and has sold her fruit, &c., she finds that everything in the way of eatables which she has to purchase for her husband is also taxed, in some cases 30 per cent.

The greatest evil of all, however, is the Government gambling shops, which are planted all over the place, and where nine-tenths of the people lose the little savings their rulers have left them.

LONDON, SATURDAY, SEPTEMBER 16, 1865.

THE JAPANESE AT THE COPPER MINES AT ALDERLEY.

IN compliance with an invitation given some time ago by CHARLES E. PROCTER, Esq., of Macclesfield, the chairman of the Alderley Copper Mining Company, to Mr. RYLE HOLME and the Japanese gentlemen under his care, as well as to Mr. EDWARD CLARKE, the Portuguese Consul for Kanagawa, Japan, a numerous party assembled on Saturday last to view these extensive mines. During the time occupied in lighting up the subterranean galleries and caves—which for this occasion were illuminated "algiorno"—the Japanese guests made a minute inspection of the works above ground, which comprise a powerful apparatus for crushing the sand stone into powder, which being cast into cisterns filled with muriatic acid in solution, soon yields to this powerful agent what is called liquid muriate of copper. During the drying process which succeeds, there results a fine granular powder, dark purple in colour, pungent to the smell, and in appearance very much like common brown emery powder; this is the muriate of copper, and contains about eighty per cent. of metal, which is then put up into casks ready for sale. The inspection above ground having, in the meantime, been satisfactorily accomplished, a general move was made towards the inclined plane leading to the mouth of the mine. At this time the company in waiting to enter the mine numbered about one hundred persons, all of whom were gratified to learn that Lady STANLEY of Alderley, Lady AMBERLEY, and other members of this much esteemed and noble family, had signified their pleasure to witness the illuminations of the inner works and galleries. Her ladyship, escorted by the chairman and other officers of the works, led the way into the mine, and were followed at a short distance by the guests and a strong muster of the fair sex and other residents of Alderley and Chorley. Shortly after entering the first gallery a general halt was called by Mr. OSBORNE, the experienced captain of the mine, who wisely recommended a little delay until all should be accustomed to the partial obscurity which prevailed, notwithstanding the glimmering lights from numerous candles which were affixed over head and on either side. A sensation of satisfaction pervaded all the spectators on finding that the galleries and passages were so spacious and high as to admit of pedestrianising with complete facility, in many places the paths being sufficiently wide for walking three persons abreast. After this the party emerged into a large chamber, the dimensions of which could not be seen at first; but this was from time to time accomplished by the miners perched aloft, burning magnesium wire, which lit up the cavity and its ramifications with surpassing effect and brilliancy. From this point the works appeared to make a sudden dip downwards; still the path was never impracticable, and walking was continued with pleasing facility for perhaps a quarter of a mile further, which led to the largest cavity of the mine, prettily lit up with innumerable candles and impromptu chandeliers. This spacious cavern, which is about half a mile underground, was very brilliantly illuminated with blue lights, magnesium wire, as well as rose, yellow, and white port fires; and at this, the culminating point of interest, the Japanese could be seen gliding with alacrity into the different lodes or subsidiary galleries from which the copper stone is daily being extracted in large quantities. The spectators were here entertained for a full quarter of an hour with such a variety of illuminating effects as elicited frequent exclamations of gratification, and gradually as light after light disappeared in a blaze of brilliancy the company retraced their steps back to the cheerful light of day. Subsequently the invited guests of the chairman assembled at the Queen's Hotel in Chorley, where a sumptuous repast was provided, to which ample justice was done by all, including the Japanese visitors, who handled their knives and forks and ate and drank like men who had never in their lives done otherwise. After the cloth was drawn the Chairman, C. E. PROCTER, Esq., in feeling and appropriate language, proposed the health of her Majesty the QUEEN, and the Lady of the Manor of Macclesfield, which having been most loyally responded to, was immediately followed by that of his Majesty the TYCOON of Japan. Only a short interval had elapsed when the Chairman again called upon the company to fill their glasses, and after expatiating at some length on the gratification he had experienced in having had it in his power to show some attention to the representatives of the Prince SATSUMA during their short stay in this neighbourhood, begged to propose the health of his Highness the puissant Prince of SATSUMA, and also that of his representatives then present. This was briefly replied to in the Japanese language by Mr. SHEKKI, and was then rendered into good English by Mr. TAKAKI. Mr. HOLME, of Yokohama, Japan, in responding to the kind manner in which his health had been drunk, took occasion to express to all concerned his high appreciation of the very cordial reception which had been accorded to the mission of which he was in charge, and the only manner in which he could mark his estimation of the chivalrous conduct of Mr. PROCTER, the Chairman of the Alderley Copper Mining Company, was by calling upon all around to drink his health with all the honours.

The Chairman, having once more requested a hearing, proceeded to mention his regret that the moment was rapidly approaching when his Japanese guests would have to depart. As the train which had to take them away would arrive in a few minutes, he was necessarily compelled to be brief, and would therefore at once propose the health of one present, which he was sure would be well received. He begged to propose the health of Mr. EDWARD CLARKE, the Portuguese Consul for Japan. Mr. CLARKE in reply would not refrain from referring to the generous manner in which his friends in this locality had responded to his earnest desire that the heads of the important mission sent by Prince SATSUMA to this country should be shown everything of interest connected with this his native country, and he had no doubt whatever but that the cordiality and goodwill which had been exhibited by everybody to these illustrious visitors would bear good fruit in due season. Thus concluded the proceedings of a day of more than ordinary interest to the inhabitants of Alderley, Chorley, and the neighbourhood.

THE SINGAPORE SCREW PILE PIER.

WE have had the pleasure of inspecting the drawings for the Screw Pile Pier about to be constructed at Singapore by Mr. George Wells of Westminster; Mr. George P. Bidder past President of the Institution of Civil Engineers, being the consulting engineer. When the work is completed it will be the finest construction of iron in the Far East, and will supply a want that has been felt since the foundation of the settlement. At present, as is well known, the shipping anchor at a distance of about a mile from the town. The beach is long and shallow, and the object of this work is to enable vessels to load and discharge their cargoes with expedition, and without risk of damage in lighters, by means of four lines of rails carried out to the end of the pier—a distance of 6,590 feet, or upwards of a mile and a quarter from the commercial centre of the town. The construction is to be of the same material as the Madras Pier, which has been so successfully carried out under the management of the contractor for this new work. There are no engineering difficulties to contend with at Singapore, and the work will, therefore, be finished in much less time than would otherwise be the case. The screw piles are of iron, 20 to 48 feet in length and 4 to 6 inches in diameter; all to be formed of solid malleable iron, braced with T iron in such

Digitized by Google

a manner as to form a structure of singular grace, fulness, and strength, with no element of decay about it, such as would in the tropics appertain to a structure of wood or any other material than solid iron. The present slow and old-fashioned process of loading and discharging the numerous vessels that frequent the port will be entirely changed by the appliance of numerous steam cranes along the lines of rail; and ships will be enabled to moor alongside the pier at berths more or less remote from the town, according to the draft of water. There will be not less than 24 feet at low water along the end of the pier, where an iron-roofed store, a thousand feet in length, is to be erected. So amazing has been the increase of trade at this most important Eastern mart, that by the last official returns the tonnage of square-rigged vessels arriving and departing reached the gross amount of above two million tons. It is easy therefore to form an estimate of the probable traffic and consequent profits likely to accrue to the company, now registered under highly respectable auspices to carry out this urgently needed undertaking, which will have to obtain from the local Government in the first instance a fitting space for their warehouses and depots. The provisional list of directors is formed of names that are a sufficient guarantee for the interests of the proprietary being carefully attended to, and when the company has so far progressed with the works as to be in a position to receive dues, we have no doubt those who invest in this undertaking will be amply satisfied with the yearly dividends. The contractor guarantees interest for two years at five per cent., by which time the company will be in the receipt of a regular and handsome income. It is most gratifying to record the progress of our Eastern possessions at all times, but this enterprise stands forward as the best proof that could be desired of the value and importance of the Straits Settlements now about to be transferred from the Indian Office to our Home Government. We shall expect to find the people of Singapore readily availing themselves of so good an opportunity for investment, and taking good care that only a fair proportion of the shares are left to residents in England. The ground necessary for the undertaking has been applied for by a committee of four of the most respectable merchants in Singapore, who have authority from the Pier Company to take the steps needful for promoting its interests. We hear it is intended to reclaim all the waste beach between Tanjong Mallang and the Fish Market by means of a sea-wall filled in behind with earth. This will certainly be a very great improvement to the town, besides rendering of high value that which is now worse than useless being positively an eyesore at low water. There will thus be ample space provided for warehouses and other purposes of trade; and when the iron pier stretches its graceful structure out into the centre of the shipping, Singapore will have added another to its many claims for being considered the grand emporium of the commerce of the Far East.

FRANCE AND THE FAR EAST.

(FROM A CORRESPONDENT.)

PARIS, Sept. 1.

The Paris papers have spoken of the new Ambassadors who have just arrived from Japan, and for a few days the terms of the announcement remained uncontradicted. An application made to the Government has resulted in the information that the new comers have no ambassadorial character; they are simply agents charged to visit France and England and to study Western civilisation and industry, and recommend such improvements as may suggest themselves to their minds as applicable to their own country. The mission consists of:—Shibata-Huigano-kami, Government commissioner; Midzousina Rakutaro, chief secretary; Shioda Saburo, secretary interpreter; Fomita Tatsudo, attache; Obana Sokunoske, commissioner; Foukutchy-genutchy, interpreter, making, with their suite, nine persons in all. Shibata-Huigano-kami is said to be a man of position and intelligence, whose visit is likely to afford useful results. Such a mission is calculated to be of more use in the state of affairs between Japan and the Western Governments than political embassies, which are naturally limited in the extent of their observation and fettered by ceremonious regulations.

The *Moniteur* contains some remarks on the closing of the gambling houses in the French concession at Shanghai, an act which, says the writer, will call forth nothing but applause, but which may give rise to serious difficulties. It raises in fact a fiscal question which must be solved without loss of time, or the resources of the concession will be placed in jeopardy and the municipal services interrupted, which would be a still greater evil than that which has been put down. The income from the tax on the gambling houses is stated to have amounted to three hundred thousand francs, or twelve thousand pounds. No monetary difficulty, says the writer in question, could possibly outweigh the high morality which dictated the suppression of these houses to the Consul-General; and the new budget drawn out by M. Bremer de Montmorand will, it is confidently anticipated, meet all the urgencies of the case.

The French complain terribly of the irresistible love of appropriation inherent in the Annamite mind, and, if the following be not an exceptional case, the complaint is well founded. Rear-Admiral Baron d'Arricau brought a young Annamite home in his ship, and found the boy an admirable servant, full of intelligence and activity. Scham, as the lad is named (says the Admiral), could attend a dinner of fifteen or twenty persons without any assistance, and perform the service with more facility than two Frenchmen or three Englishmen. All Scham's good qualities were however negatived by his extreme love for what did not belong to him; in the space of three months he stole the Admiral's shirt-studs, a gold eye-glass and chain, a watch, a gold medal, and five hundred francs in gold—his taste was evidently auriferous. Some of the coin was found upon him, but the jewellery could not be traced, and in spite of entreaties and threats, nothing could be got out of Scham either by the Admiral or the Abbé Pernon, who acted as interpreter; so, much against the wish of the former, the lad was taken before a magistrate. There was considerable difficulty in ascertaining Scham's age; he said he was nineteen, but he looked like a boy of fifteen; the Abbé thought he might be eighteen or nineteen, but the Court gave the young scamp the benefit of the doubt, declared him to have acted without discretion, and sent him to a house of correction for a twelvemonth.

A battalion, consisting of six hundred men of the first regiment of Infantry of Marine, has just been despatched to reinforce the French troops in Cochin China.

SILK IN FRANCE.

(FROM OUR PARIS CORRESPONDENT.)

The scarcity of silk continues to cause great inconvenience and uneasiness, the stock of plain manufactured silks at Lyons is said to be small, and fancy goods do not find a ready market. The smallness of the sales arises principally from the high prices asked, and the same applies to raw silk, which manufacturers object to take at the rates fixed by the holders. The dearness is attributed to the Japanese and Chinese, who are supposed to be thoroughly well-informed as to the condition of Europe in this matter, and to be speculating on the disastrous condition of French, Italian and other silk growers; and hence the firmness of the markets and the rise in prices at Yokohama and Shanghai. So much for the opinion of the French economists, who, unfortunately, rarely look an economic question fairly in the face, and too often disregard the simple law of supply and demand in their difficulties. What demand there has been at Lyons of late has been chiefly for Japanese silk; of Chinese there is a very small supply. Generally, the amount of business at Lyons is estimated at not more than half of what it was at the same time last year.

The double meaning of the French word *carton* has given rise to an error with respect to the fraud which has been perpetrated in connection with Japanese eggs. Carton signifies a paper or pasteboard box as well as a piece of pasteboard or cardboard, and it should be explained that it is not the boxes of the Acclimatization Society which have been bought up filled with worthless European eggs and then sold as Japanese, but the pieces of cardboard themselves, upon which the Japanese eggs are fixed, and which are marked previously to the deposit of the eggs with large Japanese characters. Of course such a fraud was likely to be successful, as few would suspect the deposit of French eggs on these old Japanese cards. The announcement that the French authorities in Japan will, in future, affix a special stamp or mark, with the date of the year, on all sheets of silkworms' eggs to be sent from Japan, by persons of all nations, without any charge, and, further, that instructions as to the precautions to be taken in the arrangement and transport of the precious seed will be given to all who apply for them, has given great satisfaction.

An exhibition of insects useful and injurious to man is now

Digitized by Google

open in the *Palace de l'Industrie* in the *Champs Elysees*, and in it there are some interesting collections of the thousand-and-one industriously mischievous creatures that feed on our trees, vines, cereals, plants, and other things—not forgetting our own precious bodies—and of the means employed for their destruction; but the two heroes of the exhibition are bees and silkworms. With the former we have nothing to do here, but the apiarist will doubtless find much to interest him. Those who wish to see the *Bombyx cynthia* or Ailanthus silkworm in almost every stage of development will find it worth while to visit the exhibition, where hundreds of these beautiful creatures are feeding and spinning, while hosts of the great moths are busy laying eggs for another generation; there are also large quantities of cocoons and specimens of the silk, raw and dyed. Some of the results exhibited are those produced directly from the Japanese eggs, while others are those of insects of the third and fourth generation in Europe. In addition to the Ailanthus worms may also be seen, feeding on the same kind of tree, other worms produced by crossing the former with the *Bombyx Arrindia*. We were present the other day when M. H. Givelet, who has bred the Ailanthus silkworm for four or five years at the Chateau of Flamboin, delivered a lecture on the subject, and the deep interest it excited proves the importance that is attached to this new and hardy worm. In the exhibition may be seen the apparatus used by the breeders of these worms in France, the methods of arranging the cocoons so as to allow sufficient air for the development of the chrysalis, and of keeping the moths while depositing their eggs, all in positive use, and therefore supplying more information at a glance than could be obtained from a dozen volumes of description. In a postscript to a printed report on the culture of the Ailanthus worm, M. Givelet says that he has already 20,000 cocoons of this year's production in his stores, and that he estimates those still on the trees in his plantation at about three times that number. M. Givelet promises to publish a full account of his experiments, with hints for the cultivation of Ailanthus silk on a large scale, during the coming winter.

Literature.

The French press has of late been more prolific than our own in the production of works having special reference to the Far East. We select for notice the following:—

Revue Orientale: Paris. 8vo.—The ninth volume of this publication has recently appeared and contains a large amount of matter relating to the Far East. It includes, amongst other papers, the address delivered by Professor Leon de Rosny, the editor of the *Revue*, at the opening of the Imperial School of living Eastern tongues, on the study of the Japanese language. M. Leon de Rosny tells in simple language all that is known respecting the origin of the Japanese people and of their language, dwells with gusto upon the attention which these people have given to the study of the exact sciences, pays a high tribute to their ability, and shows how prominently they stand forth amongst all the nations of the East in energy and the desire for progress, quoting, amongst other things in support of his views, the saying of one of the Japanese Ambassadors in Europe:—"I cannot sleep now when I think what liberties are at present denied to my country;" and urging the study of the Japanese language, of which he is one of the most accomplished masters, as one of the surest means of furthering the true political and commercial interests of the European world in relation to the Far East. M. J. Umery gives a succinct account of the Cochin Chinese money of the dynasty of Ngouyen, with cuts of six different coins. M. Stanislaus Julien supplies a note on the inscription of Teng-Koung, which he thus translates:—"This tomb, overshadowed by tufted trees, has existed for 3,000 years. Alas! the Prince Teng will one day inhabit this residence." The last paper in the volume consists of the annual report of the *Société d'Ethonographie*, which is growing rapidly in importance, and gives much of its attention to the East. In addition, the volume in question contains a considerable amount of miscellaneous matter, illustrated by well-executed plates, *fac similes* of ancient documents. Appended to the review is a useful list of works on Oriental subjects published in France, England, Germany, Holland, Scandinavia, and India.

Tableau de la Cochin Chine, by E. Cortambert and Leon de Rosny: Paris. R. 8vo. This is another work published under the patronage of the Ethonographical Society and not so recently as the above, but it is scarcely known in England, and contains a large amount of interesting and useful information, and a large number of well executed cuts illustrated of Cochin-Chinese manners and customs.

Collection Ethnographique: Paris. Quarto.—This is a serial publication of photographs, from the life, of examples of the various races of the human family, published, under the auspices of the Ethonographical Society of Paris, by its President, the Marquis d'Hervey-Saint-Denys. The figures are entirely nude, and taken in three positions—front, back, and side views; the photographs are six or seven inches high, and are executed with great care. The four numbers issued represent a Chinese, a negro, a half-caste woman born of Indian and negro parents, and a Portuguese Jewess.

Continental Intelligence.

HOLLAND.

ROTTERDAM, Sept. 8.

(FROM OUR OWN CORRESPONDENT.)

There is no political news of any importance; the dead season prevails still, and the journals can find nothing to interest their readers but the cattle plague, which made its appearance here after some cattle were returned from the London market, because they could not be sold at the price fixed. Rigorous measures are taken by our Government, and, as the plague prevails only in two of our provinces, we flatter ourselves with the hope that it will spread no further. You will remember that Mr. Thorbecke, the premier, was in Dresden, when the plague broke out. The Opposition are earnest in telling the public that this plague reached this country because the Minister neglected his duties. This may show you of what nature are our Tories.

All the members of the Royal family have returned to the Hague. It is said that the Prince of Orange will make a trip to Paris within a few weeks—perhaps after the Princess Anna Murat has thoroughly recovered from her late accident.

If I am well-informed, the Minister of the Colonial department is discussing with the Governor General the question of augmenting the staff of functionaries in India. As the States General will be opened within a few days (on the 18th) the truth or falsehood of this *on dit* will soon be proved, because most important colonial questions will be debated immediately Parliament has re-assembled. I hear that the Bill about the cultures will be discussed among the earliest.

A very interesting *brochure* was published to-day by Mr. Nosse, who was banished from the East Indies because he issued some mutinous articles. In my next I will give you some extracts of this important publication.

The Dutch Indian Steam Company was brought forward at the Hague on the 27th August. The aim of this company is to establish a steam-packet line between Europe and our East Indian possessions. The capital is fixed at 3,600,000fl., with power to increase it to 7,200,000fl., in shares of 1,200fl. The managers are Messrs. William Patrick Andrew, of Montague-square, London; David Begg, of Canons-park; George Ponton Gunnis, of Glasgow; William Mackinnon, of Glasgow; John William May, Netherlands Consul in London; Henry Oliver Robinson, Civil Engineer, of London; and Robert Salmond, banker, of Glasgow. Offices will be opened at the Hague, London, and in Netherlands India.

A series of decrees, rendered necessary by the Treaty of Commerce and Navigation between Holland and France, were issued some days ago. The most important enacts that Dutch vessels arriving in France from British Possessions in Europe shall be treated like French, English, Belgian, Swedish, Norwegian, Bremen, Hamburg, Lubeck, and the Grand Duchy of Mecklenburg-Schwerin, arriving from the same possessions. The other decrees enact that the French flag has the same rights as the Dutch, in reference to the trade with Java and Sumatra; that goods of Dutch origin or manufacture, imported into France otherwise than by land, or under the Dutch or French flag, shall pay 25c. the 100 kilogrammes, when they are free from import duty in France or have to pay less than 3f. the 100 kilogrammes; and the surcharges set forth in the law of 28th April, 1816, when they have to pay mare than 3f. The decrees further enact, that the stipulations in the treaties of commerce between France and England, Italy, Belgium, the Hanse Towns, Sweden and Norway, Switzerland, the Zollverein, Spain, and Mecklenburg-Schwerin are applicable to Holland, and that the stipulations in the treaty with France are applicable to the said States.

COMMERCIAL.

COFFEE.—The market was in a calm condition, but somewhat firmer after the quantity which will be offered by the Trading Company was known, and it was stated that there were many impure sorts amongst the parcels. 45c. is willingly paid for good ord. Java. 287 b. Padang ex Solid were sold at 40½c., and 1,000 b. Java ex Luconia at prices that did not transpire. The unsold stock of the Trading Company amounts to 372,200 b., of which 87,000 will be offered in the forthcoming sale, while the stock on ceduls amounts to 62,877 b. The total stock in Holland consists of 512,77000 b., against 462.600 b. in 1864.

SUGAR.—The market has been more animated during the last week. Here, as at Amsterdam, about 8,000 kr. were sold. The quotation now is ¾f. to 1f. above the July prices, while for the higher numbers 1¼f. is willingly paid. Refined is also quoted ½f. higher.

TEA.—Nothing was transacted in the Chinese sorts after the public action, at which 99 ¼-chests superfine Congou were sold at 125c.; 92 ¼-chests fine Congou at 120c.; 101 ¼-chests finest Oopack Congou at 95c.; 400 1-16th chests fine new season's Congou at 115c.; 217 ¼-chests extra super. new season's Soochow at 100c.; 200 ¼-chests finest new season's Oopack Congou, at 108c. to 109c.; 12 ¼-chests superfine flowery Pekoe at 130c., and 236 ¼-chests superfine Soochow at 90c. For Java tea there is much demand at full prices.

RICE.—There is some inquiry, but holders decline to sell without an advance, so that some parcels are sold only for consumption. All that was offered at former prices was willingly taken.

SPICES.—The prices paid at the auction of the Trading Company were above the valuation, as there was much demand, but nothing could be bought at the auction prices. For Nutmegs an advance is willingly paid; for Cloves and Mace there is also much inquiry. Cinnamon: the 1231 fard. Cassia Vera offered yesterday at auction, were paid with 26c. to 26½c. The quotation now is: Nutmegs, No. 1, 71c.; No. 2, 59 to 60c.; No. 3, 35 to 36c.; No. 4, 27 to 28c. Mace, D, 64c.; E, 60 to 61c. Cloves, Nos. 2 and 3, 23 to 24c. Cinnamon, 110c. to 112c. Stock of the Trading Company:—Nutmegs, 165 casks; Mace, 95 casks; Cinnamon, 625 fard.; and Pepper, 893 b. For the last-named article there is more inquiry and 417 b. ex Anderkirk a.d. Amstel were sold at 19c. entrepot.

TOBACCO.—The trade is calm, being occupied inspecting the large parcels, which will be offered in public sale on the 22nd. The stock now amounts to 15,187 b. Java, 2,769 p. Manila and 168 p. Japan.

COTTON.—The market was dull; there was only some demand for export.

HEMP (MANILA).—In much demand at 66f.; nothing can be had under 68f.

HIDES.—The Trading Company offered at inscription 2,428 p. E.I., ex Joseph Willem; 3,388 p. ditto. ex Noach; 1,695 p. Buffalo, ex Silentidun, which were all sold at prices that were kept secret. Also 221 p. Buffalo, ex Hollandia were sold by inscription. Stock on the 31st, 25,547. East Indian, 15,165 p. Buffalo; 20,301, Buenos Ayres; 5,276 West Indian, and 3,628 Austria.

INDIGO.—The demand for Java Indigo is very animated; of the private parcels imported in the last week, 150 chests were brought into the market and sold at 25 to 30 cents advance. 42 chests Java and 123 Bengal will be offered at private auction on the 26th, the other private parcels, without doubt, will be taken before they are offered on sale.

SAPANWOOD.—800 pieces were sold at very high prices.

BANCA TIN.—Several ceduls were sold at 54½f. to 54¾f., but nothing can be bought now under 55f., in consequence of the higher quotation of Straits Tin in England. Billiton with some demand; 400 sl. were sold at prices that did not transpire, and 1,500 sl. at 53½f.

COCOA NUT OIL—With much demand at full prices.

MONEY.—As the Bank returns were less favourable, there was some fear in our monetary circles that the Bank should rise its discount, but till now it was not yet confirmed. In the open market, however, the money is firmer and less disposable at 4 per cent.; at the Bank the rate of discount is unaltered, viz., discount for bills, 3 per cent.; acceptances, 3½.

STOCK.—Dutch Two-and-a-Half per Cents., 62 5-16ths; Three per Cents., 73 1-16th; Four per Cents., 97; Trading Company, 146; Dutch Railway Co.'s shares, 130; Four per Cent. Loan, 90; Rhenish Railway shares, 112½; Loan 1865, 93; Central Railway Co.'s shares, 123; Society for Exploration of the State Railway, 123½; E.I. Railway, 91; Netherlands Credit and Deposit Bank, 107; East Indian Bank, 80¾.

CHANGE.—London, 3 mo., f.11 80; 2 mo., f.11.83½; short, f.11.92; Paris, 3 mo., f.46.95; 2 mo., f.47.05; short, f.47.40; Hambro', 3 mo., f.35; 2 mo., f.35.11; 3 mo., f.35.35; St. Petersburg, 3 mo., f.152.

SHIPPING.—ARRIVALS.—Aug. 29, at Brouwershaven, from Batavia, Otto; Sept. 1, at Brouwershaven, from Sourabaya, Van der Palm; at Texel, from Banjoewangie, Marinus Willem; 3, at Texel, from Batavia, Margaretha.

DEPARTURES.—Aug. 25, from Texel, for Batavia, Jan van Brakel; 30, from Brouwershaven, for Batavia, Koffyboom; 29, from Texel, for Japan, Zwaan; Sept. 3, from Texel, for Batavia, Johanna; 7, from Brouwershaven, for Batavia, Ary Scheffer; from Texel, for Padang, Padang Packet; for Batavia, Willemina and Clara; for Sourabaya, Henriette Geertruida.

LOADING AT ROTTERDAM.—For Sourabaya, Jeannette and Cornelia, Jannetje, Van der Palm; for Batavia and Samarang, d'Elmina, Eva Johanna, Wilhelmina Johanna, Jupiter; for Batavia, Argo, Ouderkerk van den Amstel, Dordrecht; for Batavia and Sourabaya, Medea; for Kanagawa and Nagasaki, Maria; for Decima, Pantalon; for Singapore and Hong Kong, Mary Goddard.

At AMSTERDAM.—For Batavia, Electra; for Kanagawa and Nagasaki, Gloria, for Decima, China; for Padang, Excelsior; for Sourabaya and Macassar, Henderika; for Sourabaya, Vertrouwen, Presto.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

SEPTEMBER 7.

Dr. Petermann, of Gotha, a well-known German geographer, having lately offered a reward of 1,000 to 2,000 dollars to any German who would sail from a German port before the end of August to reconnoitre the whereabouts of the pack-ice to the north of Spitzbergen, and between the meridian of that island and Nova Zembla, preparatory to a great German exploration of the Arctic Seas, to be sent out in the spring, to endeavour to reach the North Pole, Capt. Werner, a scientific officer of the Prussian Navy, offered to take the command in person, provided he could obtain from his Government permission to do so, with two months' leave of absence from his ship, which is stationed at Kiel. He further offered to pay all the expenses of the expedition out of his own pocket, in case the sum could not be raised in any other way. But this latter sacrifice on his part was not required, as an appeal to the German public has been so successful,—the Senate of this city heading the list of donations with the munificent contribution of 2,000 dols.—that the subscriptions amount to more than the sum required. The Prussian Naval Minister, however, thought proper to refuse Capt. Werner's request, and the expedition was then confided to two Hamburg merchants, captains of experience in Arctic navigation, and an iron screw steamer of 150 tons and 40-horse power was chartered for the voyage. Some delay having been caused by her preparation it was not till the 30th of August that she arrived in this port; but such was the energy displayed by the gentlemen of the committee formed here, that she was provisioned, coaled, and supplied with the needful stores and instruments so quickly that she was able to sail the next day—being the latest period available to claim the reward offered by Dr. Petermann. The expedition was accompanied by three naturalists, to make different scientific researches. The vessel was to sail direct for Hammerfest, in Norway, near the North Cape, and within the Arctic Circle, where it was proposed to reinforce the expedition by some of the hardy fishermen of that port, who frequently, in the exercise of their daily calling, sail up to Spitzbergen, sometimes even in open boats.

I regret to add that the expedition has suddenly come to grief. Whilst the officers of the steamer were sitting at dinner, and before they were out of the Elbe, three severe bumps were felt, and it was found that the shaft was broken. Signals of distress being made to the first steamer passing in from sea, the captain bore down and took off the commander of the expedition, bringing him up to Hamburg, whence he despatched a steam-tug to tow up the disabled steamer that had anchored near Cuxhaven. As the vessel must be docked to have a new shaft put in, a delay of at least a week or ten days must take place before she is in a condition to go to sea, and then it will be too late to do any good, as in those high latitudes their six months' night sets in on the 23rd of September, and it would be useless and dangerous to be groping about in the dark amongst icebergs in unknown waters; the expedition is postponed till the spring.

The accounts of the Fair at Nijni-Novgorod are anything but favourable. Complaints are made that the wholesale trade is dull and the retail trade still more so. Of dried and

Digitized by Google

preserved fruits but little is to be had, in consequence of the small number of Persians who have arrived, and who usually bring considerable quantities of those commodities. From Bokhara, too, but few people have come, probably owing to the unsettled state of affairs in that country. If they don'tarrive soon it will be bad for the Russian dealers, as last year they were unable to liquidate all their claims and credit wasgiven them till the present fair, as the prices of cotton were so unremunerative. Moreover, in former years, the landowners of the surrounding country used to make purchases of many articles and lay in stocks to last them from fair to fair, but now their pecuniary affairs are in such a poor condition that they are unable to buy at all. A good deal of Persian cotton has arrived, but it is in the hands of commission houses. The silk trade, too, is dull, though it may improve towards the end of the fair, as the Asiatics before returning home usually buy silk articles to take home with them as presents to their relatives and friends. The prices are from 25 to 30 per cent. dearer than last year, and the manufacturers assure their customers that the wholesale prices of raw silk have risen 60 per cent. On the other hand, there is a brisk demand for cotton piece goods, and fair prices are realised. The tea trade is quiet, but it may also improve, as the principal buyers had not yet arrived.

The Zoological Gardens in this city have just received a beautiful leopard and some jelarangs, a present from Mr. Mooyer, of Singapore.

COMMERCIAL.

COFFEE.—There is more demand for consumption, and abetter feeling prevails, considerably improved by the telegram from Rio Janeiro. Market closes firm. Sales, 18,000 bags.

SUGAR also rather better. Among the sales were 3.000 bags of East India. Refined unequal: common mills in great demand at full prices, middling and fine neglected, and might be had a trifle cheaper. Sold, 18,000 loaves.

RICE very firm, but without much activity. Arrived since last mail, 11,000 bags of Bassein (sold) per India, 6,200 bags Necransie, per Carl, and 14,500 bags per Edward Albert (the two last not yet sold).

SPICES.—Of Cassia Lignea 4,000 chests have been sold by importers at 9 sch. bco. Flores lower. Cardamoms have improved, and are likely to go higher. No alteration in pepper or ginger.

SPELTER.—Prices rather in favour of buyers, but the only transaction known is 3,000 centners at 14 8 sch. for arrival. Loco scarce and held higher. Imports from Jan. 1 to Aug. 31, 187,000 centners, against 373,400 during the same period of last year. Present stock 6,000 centners, against 15,000 in 1864.

SHIPPING.—ARRIVED.—Aug. 30, Edward Albert, from Rangoon.

SAILED.—Sept. 5, Madura, and Cary and Jane, for Hong Kong.

LOADING.—Melissa and Fromm for Singapore, Colima for Macassar and Hong Kong.

STEAM SERVICE BETWEEN SAN FRANCISCO AND HONG KONG.—The United States Postmaster-General has accepted the tender made by the Pacific Mail Steam-ship Company for the mail steamship service between San Francisco and Hong Kong, touching at Honolulu, Sandwich Islands, and Kanagawa, in Japan, as authorised by Act of Congress. The compensation for the twelve round trips out and back is 500,000 dols. The company is to build four first-class side-wheel steamships, of from 3,500 to 4,000 tons burthen each, and the first steamship of the company is to leave San Francisco for China on or before the 1st January, 1867. The term for the contract is ten years from the date of the commencement of the service. The distance from San Francisco to Hong Kong is 7, 050 miles, and from San Francisco to Kanagawa, the nearest coal depot, is 5,475 miles. The average rate of speed of the steamships is not to be less than 200 miles a day.

APPOINTMENTS TO THE CHINA SQUADRON.

Commanders.—George D. Broad, late Inspector of the Weymouth Coast Guard Division, to the Cormorant, 4, screw gun-vessel, when re-commissioned in China, vice C. M. Buckle; Henry L. Round, to the Argus, 6, paddle sloop, reappointed when ships are re-commissioned in China; John W. Webb, to the Rattler, 17, screw sloop, reappointed when ships are re-commissioned in China; Charles E. Stevens, to the Perseus, 17, screw sloop, reappointed when ships are re-commissioned in China; Richard H. Harington, who was promoted in November last from the Euryalus, to be Inspecting Commander in the Coast Guard Service at Ramsgate, vice George Palmer.

Lieutenants.—Frederick P. Doughty, of the Victory, to the command of the Weazel, gunboat, at China, when re-commissioned, vice H. G. Hale; Howard Kerr, to command the Cockchafer, gunboat, when re-commissioned in China, vice E. M. Dayrell; Uvedale C. Singleton, late of the Devastation, and Robert S. Hunt, late of the Harrier, to the Princess Royal, 73, flag-ship, at China.

Masters.—Frederick W. Rea, late of the Challenger, to the command of the Manila, iron screw vessel, when re-commissioned in China, vice H. W. Burnett; Haben B. Hunt, late of the Phaeton, Francis B. Christian, late of the Firefly, and William H. James, promoted from the Dee, to be additional to the Princess Royal.

Second Master: Robert Towers of the Dromedary at Woolwich, to be additional to the Princess Royal.

Surgeons: George F. Elliott, M.B., B.A., promoted from the Lion, and Raymond H. Carroll, promoted from the Salamis, to be additional to the Princess Royal.

Assistant Surgeons: Frederick A. P. Hains, M.D., and John N. Stone (acting), to be additional to the Princess Royal.

Midshipmen: Ernest R. Rolfe, John R. Prickett, John D. Deane, Edward Goldney, William Henry Monckton, William H. Bristow, Charles Edward Huggins, Philip E. Creswell, and Herbert S. Taylor, to the Princess Royal, for disposal.

Naval Cadets: Richard B. Sayce and Richard Keown, to the Princess Royal, for disposal.

THE PENINSULAR AND ORIENTAL STEAMER "COREA."

On the 28th ultimo the following communication was received from China, relative to the missing company's steamer *Corea* which, it is feared foundered, with all on board, during a fearful typhoon:—

"Peninsular and Oriental Steam Navigation Company's Office, Hong Kong, July 11, 1865.

"To the Managing Directors, London.

"Gentlemen,—It is with the utmost sorrow that I have to inform you that the company's steamer *Corea* is missing, and that the greatest fears are entertained of her having perished in a typhoon which she is known to have encountered on the night of the 29th ult. She was despatched from this port on the evening of the 29th at 6 o'clock, on the usual east coast voyage to Swatow, Amoy, and Foochow. For some days previous the heat had been very intense, the barometer inclined to be low, and the weather had the unsettled appearance it has so common here at this season of the year. Still there was no striking indication of immediate bad weather, and at the moment of leaving Captain Bird expressed his belief that if it should blow at all, it would be nothing more than a monsoon breeze. This was at 6 o'clock, and the suddenness with which the storm burst on the coast may be gathered from the report of a steamer called *Oriflamme*, which left this only two hours before the *Corea*, and narrowly escaped foundering, having been more than once on her beam ends, and with her fires extinguished, and several feet of water in her hold and engine-room. This has been verified by reference to the officers of the *Oriflamme*, so there is no doubt of its correctness.

"The intelligence of her not having reached Swatow was first brought to me very early on the morning of the 8th by the *Azoff*. On hearing that the *Corea* was missing, Captain Baker very properly obtained immediate despatch from Swatow, and came down as close along the coast as it was safe for the ship to do, but without obtaining any tidings of the missing steamer.

"I then applied to the Admiral for a gunboat to visit the various bays between this and Swatow, and made inquiries of the Chinese authorities whether any seamen had been wrecked on the coast. But there happened at the moment to be no vessel of this class ready for sea. I at once despatched the *Azoff* again on this errand, sending in her an armed party of sailors and marines, with a lieutenant in command, whom the Admiral placed at my disposal, as on many parts of this piratical coast it would be dangerous to land without due protection.

"My instructions to Captain Baker were to visit all parts of the coast as high as Swatow, and on arriving there, if no intelligence had been obtained to induce him to proceed elsewhere, he is to return to this port in a more easterly direction, and on his way to examine Pratas Shoal, if by any emote possibility the *Corea* might have been driven there.

"Besides the *Corea*, there is also another steamer missing, which left this port four hours before her on the same voyage—the *Chanticleer*, belonging to Mr. Douglas Lapraik. No traces of this has been heard of either. In estimating the chances of the *Corea* having escaped, the fact of another steamer being missing is not favourable, for where either of them safe the probability is that in the 12 days which have elapsed since the gale she must have been heard of. The direction of the wind and current has been continually from the south, and this fact is also ominous, as had the steamer run off in the only safe direction, viz., south to east, the prevailing wind, even had she been disabled, would have driven her towards the coast again. The only ground of hope then appears to be that she may have been dismasted, or her machinery also disabled, so that progress of any kind is for the time impossible. I cannot hold out this as a strong hope, but I deeply regret to say it seems the only one which professional men entertain, taking all the circumstances into consideration.

"The *Corea* had on board a very small cargo, and only three European passengers besides the Commander's wife, Mrs. Bird. That lady had only been there a few months, but she was in delicate health, and Captain Bird asked to be allowed to take her to Swatow on a visit to some friends. Of the other passengers one was Mr. Noble, manager of the Agra Bank, one was a Portuguese, and one a German.

"I communicate these details with much pain, and would gladly smother the fears I have been compelled to express were the hopes of safety greater; but it is my duty to narrate the plain truth, however painful. It is the common dread, and one which I cannot but share, that an awful catastrophe has befallen these two steamers within a few hours of their leaving this port. I have the honour to remain, gentlemen, your most obedient servant,

"THOMAS SUTHERLAND,

* "Superintendent of the Company's Works, Hong Kong."

LOSS OF THE "COREA" AND "CHANTICLEER."

(From Mitchell's *Maritime Register.*)

Our readers will see in our impression of to-day a notice of the supposed loss of the steamer *Corea*, one of the Peninsular and Oriental Company's fleet, and of another vessel named the *Chanticleer*, on the coast of China;

* [Mr. Pember, tea taster to Messrs. Silverlock and Co., was also on board.—ED.]

Digitized by Google

but, brief as the account is, it contains all that is known respecting these vessels up to the receipt of the latest advices. It has been furnished by Mr. Sutherland, the company's agent at Hong Kong, and is fully corroborated so far by all the telegrams received by the managing directors up to the close of the last month. The *Corea* was employed on the coasting line between Hong Kong, Swatow, Amoy, and Foo-chow, and at 6 in the evening on the 29th of June, left Hong Kong on her ordinary voyage. Four hours earlier the *Chanticleer*, belonging to a house in Hong Kong, left also for Swatow. Neither ship has since been heard of. From a report furnished by the *Oriflamme*, we collect that a vessel, supposed to be the *Corea*, was seen about 11 P.M. It was then blowing a gale from the northward, with a rising sea. It would appear that about fourteen or fifteen hours after the *Corea* had left Hong Kong—that is, between 8 and 9 on the morning of the 30th June—a terrific cyclone burst upon the town and harbour of Hong Kong, carrying everything before it, and driving vessels ashore and foul of each other in all directions. The gale raged at its height for about six hours, and we fear the list of casualties we have received is by no means complete. Business at Hong Kong, we are told, was, during this visitation, and indeed during the whole of the 30th, entirely suspended; and, up to the time the last mail left, vessels were arriving reporting casualties which had befallen themselves, or which they had witnessed.

The occurrence of a typhoon in the China Seas, at certain seasons of the year, is not an event which is likely to take any one by surprise accustomed to the navigation of those seas. There is, however, this peculiarity about the tempest in which the *Corea* is reported to have perished—it appears to have come on with little or no warning. The asmospheric disturbance which commonly precedes a typhoon is well marked, and the barometer falls rapidly many hours before the cyclone sets fairly in. In this case, however, up to 6 o'clock in the afternoon of the 29th of June, there appears to have been no premonition of the approaching storm. "For some days previously [writes Mr. Sutherland] the heat had been very intense, the barometer inclined to be low, and the weather had the unsettled appearance it has so commonly here at this season of the year. Still there was no immediate indication of bad weather, and at the moment of leaving, Captain Bird, of the *Corea*, expressed his belief that, if it should blow at all, it would be nothing more than a monsoon breeze." Our own report from Hong Kong of the same date is quite reconcilable with this statement. It says that the barometer had been gradually falling on the evening of the 29th, and that during the night the sky assumed a lurid aspect, with frequent discharges of vivid lightning. These, unquestionably, were all indications of an approaching storm, but they probably presented themselves after the *Corea* and the *Chanticleer* had left the harbour of Hong Kong, and had passed out to sea. According to the log of the *Oriflamme*, the weather outside at 6 P.M.—the hour at which the *Corea* left Hong Kong—gave no indication whatever of a cyclone. There was a gentle breeze from the westward, with a long rolling swell from the S.E. According to this account, the typhoon commenced at 11 P.M. with a gale from the N. The barometer then stood at 29 60. Three hours afterwards the barometer had fallen to 29 30, and at 4.40 A.M. on the 30th of June the wind flew suddenly round to S., blowing a hurricane. From this point the cyclone drew away towards the westward, and so passed off—the barometer showing 28 50. Another report gives the barometer 28 15, the lowest reading which we find in any of the accounts yet received of this remarkable storm. It would seem that the indications of the approach of these typhoons differ considerably in different localities. A number of vessels left the harbour of Hong Kong on the same evening as the *Corea* and the *Chanticleer*—some earlier and some later—but none of them appear to have had any premonition of the approaching hurricane. If they had, there can be little doubt that they would not have ventured out to sea. The facts connected with this typhoon seem to be sufficiently peculiar to be made the subject of scientific investigation. It has been witnessed by so many vessels, all of whom appear to have kept very accurate logs of its characteristics, that little difficulty would be experienced in the collection of the necessary data, on which to found conclusions which might add materially to the knowledge already possessed respecting these sudden and terrible atmospheric disturbances, and which appear to acquire their greatest intensity in the Eastern Seas.

TEA.

(*Travers' Circular*, Sept. 2.)

There have been no public sales this week of either Chinese or Indian Teas. Privately there is more doing business at rather firmer prices; the home trade demand is much stronger, and export requirements for good green teas and uncoloured Japans still increase. If it were not for the near approach of the arrivals of the new season's tea, the market for the finest kinds would probably wear a stronger aspect than it does, but, as in previous years, many are waiting for the new teas. Fine Monings and Kaisows are now becoming extremely scarce; broken leaf is in request for the home and export trades. Green Teas have been freely placed upon the market, but as yet little business has been done, the high price asked preventing large sales. The Board of Trade Returns just published show an increase in our exports during the seven months ending July 31st of 1,382,330 lbs. over the corresponding period last year; but the increase in the quantities entered for home consumption during the same period is still more considerable, amounting to 5,285,772 lbs. This contemporaneous increase in the exports and home consumption of tea presents a marked contrast to coffee, where one ascends as the other descends, with all the regularity of a well-assorted balance.

By the last advices from China we learn that the exports of tea to England up to the present date have been 20,352,600 lbs., against 20,813,100 lbs. at the corresponding period last year, showing a decrease of 460,500 lbs. This trifling falling off is, however, only temporary, as very large supplies are expected this season, and it would appear that political affairs could alone interfere with shipments. Some little alarm, therefore, has been caused by the rumoured capture of Peking by a new set of rebels, the Nyen-fei. Should the report, which seems destitute of foundation, be eventually confirmed, it may have the effect of producing a temporary advance in the price of teas; but all previous experience of Chinese civil wars warrants us in believing that there will be no cessation of commercial intercourse on that account, and that, whatever party may be in actual possession of Peking, the Chinese will continue to bring forward their supplies of tea as usual. To the natives, however, a revival of the evils of the late civil war must be most disastrous, by the impediments offered to the cultivation of the tea lands, and by the exactions alternately levied by the contending parties. We may form some idea of what the native trading community are likely to suffer in war, from their sufferings in peace. The report of the English Consul at Swatow gives some particulars which show to what extent extortion must have been carried:—"The desire to possess the power of levying black mail at Swatow itself rose to such a height during 1864, that the surrounding villages engaged in warfare to obtain this end during the whole year. On the arrival of steamers or ships with Chinese passengers, these, on leaving their vessels, have been fought for in the harbour among the shipping, and fire-arms discharged most indiscriminately. At present the village of Swabŏe has attained the mastery, and holds the monopoly to levy these demands" (p. 201). On the other hand, the foreign merchant loses all idea of security for his merchandise, inasmuch as he knows it to be liable to seizure by the rebels in the one case, and in the other, subject to a partial forfeiture, in the shape of illegal duties, even at the hands of the legitimate Chinese rulers. For, in the discussion of Chinese affairs, it must always be borne in mind, how despotic and irresponsible is the rule which the mandarins are permitted to hold over the provinces committed to their charge; provided only they are able to remit their apportioned amount of revenue to the Court to which they profess allegiance, it matters little from what sources it may have been derived. Thus the Mandarins are often called upon to meet the pecuniary exigencies of a government which finds it difficult to make its ordinary revenue keep pace with an increased war expenditure; and what method so easy and expeditious as an additional tax levied upon the European merchant? In this way we may account for the seeming inefficiency and supineness of the Chinese Government in affording redress where the interests of foreigners were concerned, a fact more than once alluded to in the Consular Reports from China. But another circumstance, of even more moment to the British merchant in China than the success or discomfiture of Imperialists, Nyen-fei, or Taipings, is the gradual encroachment of the Chinese upon the trade carried on, hitherto, almost uninterruptedly by the Europeans. Not only have they succeeded in partly wresting from us the coal-carrying trade and the import trade into many of the ports, such as those of Hankow, Tien-tsin, Kiu-kiang, and other places, but they have even commenced a rivalry with European merchants in the export trade. Availing themselves of the superior facilities which they must, as natives, necessarily enjoy, and emulating the enterprise of the British merchant, they have already made large shipments of tea from Foochow and elsewhere to England, without English intervention. It is, of course, immaterial to English buyers whether the shippers in China are their own countrymen or Chinese; in fact, it might, to some extent, be an advantage that the goods should be forwarded by the Chinese; as if sent by them, it would tend, in the long run, to reduce the price of tea by saving the profits of middlemen.

Turning from our own trade to that of America, we see that the exports of tea from China have been this season 1,468,500 lbs., against 186,700 lbs. at the same time last year, an increase of 1,281,800 lbs., which may be accounted for on the supposition that during the continuance of the civil war, shippers in China were reluctant to risk their goods in the American market, and, consequently, the greater part of the carrying trade fell into our hands, the Americans obtaining their supplies from England instead of direct from China. Now, however, that peace is re-established, trade will flow into its former channel, and America will once more obtain her supplies direct from China. From Japan the exports from the 1st of June have been 13,590 lbs., against 43,626 lbs. last year; a decrease sufficiently accounted for by the interruption to trade caused by the disputes between the Tycoon and Prince Satsuma.

With regard to the quality of the black-leaf, the reports from China are far from favourable, as fine teas are very scarce; the samples of the second crop, too, are said to be inferior to those of last year. The explanation of this is to be sought in the fact that the teamen, in their anxiety to participate in the benefits of the reduction of duty, have exercised undue haste in pressing their teas forward; so, though the arrivals from the river-ports are tolerably numerous, buyers decline to purchase at present prices, expecting to see a fall. The quality of the Green Tea has been so very unsatisfactory, that no purchases have taken place for the English market. A small quantity has been shipped for America at former prices; but in all probability these will be the last until the arrival of the new crop.

Broken-leaf Congous cannot be bought here under 7¾d. per lb., and the price of common Congou is from 11¼d. to 11½d. per lb.

Monetary and Commercial.

The small quantity of fine bar silver brought by the West India steamer has been disposed of for the Continent at 60⅞d. per ounce, showing a decline of ⅛d. since the previous arrival. In the interval the market has been flat, and there have been but few transactions. The Mexican dollars have not yet been disposed of.

The biddings for bills on India took place on the 6th at the Bank of England. The proportions allotted were—to Calcutta, £134,600; to Madras, £9,000; and to Bombay, £100,000. The *minimum* price was, as before, 1s. 10⅛d. on Calcutta and Madras, and 1s. 10⅜d. on Bombay. Tenders on Calcutta and Madras at 1s. 11⅛d. will receive in full, and on Bombay at 1s. 11⅛d. about 72 per cent.; above these prices in full. These terms show a slight increase in the demand for means of remittance to the East.

The amount of bullion by the P. and O. Company's steamer

Digitized by Google

Ripon, from Southampton on the 4th inst., was:—In gold, to Alexandria, £3,500; to Madras, £1,706. In silver, to Penang, £11,500; to Yokohama, £220; to Shanghai, £2,926; to Singapore, £25,000. Total, in gold, £5,206; in silver, £39,646.

ARTICLES OF IMPORT.

TEA.—The market during the past fortnight has partially recovered from the depression that previously existed, and the market shows a strengthening tendency. The Fiery Cross and Serica had arrived, and their teas realised 2s. 2d. to 3s. 2d., leaving a profit of 4d. to 9d. It is anticipated that the other vessels to follow will meet an active demand. Telegrams from China to 12th August give the export at 36,000,000 lbs., against same time last year 41,000,000 lbs., with nothing doing in Tea at Shanghai, whereas last year an active trade was being carried on. For export a considerable business has been done for Canada and New York, chiefly in uncol oured Japan kinds, and there are now none to be bought from importers; medium to fine Young Hysons have also been largely dealt in. To Russia and other parts the demand has been limited. The Deliveries for the month are satisfactory, reaching 12,000,000 lbs. Congou.—The demand for red and black leaf from 11d. per lb. and upwards has continued, a fair business has been done both by the trade and shippers, and prices have remained firm. Better kinds up to 1s. 8d. have also been dealt in to a fair extent. In fine and finest kinds business has been restricted, owing to the small quantity on offer. The samples of new Kaisows received by overland mail are exceedingly fine, and the arrivals of the first clippers are looked forward to with interest; the Oopack do not appear to turn out so well, but the samples generally have been too small to form an accurate opinion upon. Souchong.—No change to notice in this description. Oolong.—Common must be quoted lower; fine continues scarce and wanted. Flowery Pekoe.—Nothing doing. Scented Teas.—Common kinds not inquired for; fine and finest maintain their prices. Greens and Uncoloured Japans.—Fine and finest kinds of Greens continue to command extreme prices; common are very difficult to place at a further reduction. Uncoloured Japans again in great demand for export, and full prices have been paid. The deliveries of this class for last month were considerably above the average, being 315,590 lbs., and the stock has run down to 794,000 lbs. Public sales: The China Tea sales commenced on the 5th inst., and terminated on the 8th; 27,879 packages were put up, of which 20,529 packages were printed "without reserve"; of the above only 9,970 packages were Congou; the remainder consisted chiefly of low Greens, Scented Teas, Souchongs, and Oolongs. The auctions have proceeded with fair spirit, and prices, on the whole, may be considered full. Dust and common red-leaf sold from 7¼d. to 8¼d., clean blackish-leaf realised 1s. 0¼d. to 1s. 0½d. Inferior greens sold as low as 2¼d. per lb. 3,904 packages of Assam and Indian Teas are advertised for the 12th inst.

SILK.—We have had a comparatively quiet fortnight in Silk. The expected importations of China Silk come forward so slowly that we have been almost without fresh material for business—all that reached London between the 12th to 15th August, about 5,000 bales, were sold for arrival or taken eagerly upon landing, and for a full fortnight we were left without fresh supply. In the meantime the deliveries are not so satisfactory as could be wished. Comparatively small proportion of the large quantity sold here has been taken out of the warehouses. It must not, however, be forgotten that some 2,500 bales were imported direct in Marseilles, and the bulk of these are said to have been taken into consumption. Our prices generally are scarcely up to the highest moment. 29s. was paid for rather a large parcel of No. 3 Tsatlee, but that is no longer obtainable. In Japan Silk we continue without any arrivals of new Silk, and our remaining stock is not of a tempting character. In the almost entire absence of European Silk the first arrivals will no doubt be taken at full rates. In Canton Silk several large parcels were sold either for arrival or immediately upon landing, at comparatively moderate prices; but in subsequent sales 24s. 6d. to 25s. was realised for No. 1. In Bengal Silk some little business is doing, but nothing of importance.

COTTON.—There was a very active demand throughout last week, and as compared with the quotations of the week preceding most descriptions on the spot show an advance of ¼d. to ½d. per lb. For arrival a large business was also done, the latest transactions showing an advance of ¼d. per lb. on the prices paid last week. 220 bales of China, fair to fully fair, went off at 11½d. to 12d. No Japan sold in London during the week. The total stock of China and Japan in London on the 7th was 2,931 bales, against 26,410 last year. Of China afloat to Europe, on the 8th, there were of China, 4,954 bales, against 69,871 last year, and of Japan 294 bales, against 8 736 last year. The total stock in London on the 7th was 58,141 bales, against 90,262 last year. The stock in Liverpool on the 8th was 361,200 bales, against 452,990 bales last year.

The Liverpool report of the week's business is, that China has improved ¼d. to ½d. per lb., the limited supply placing that description in a relatively strong position.

SUGAR.—A strong demand from the home trade last week, with some inquiry from speculators, produced considerable briskness in the market, and extensive sales resulted, further advancing prices 6d. to 1s. per cwt. On the 8th, 2,249 bags Penang were taken, good brown to low yellow and grey, 30s. to 32s. 6d. By private contract, sales are reported of 36,000 bags Clayed Manila at 31s. to 31s. 6d., and 44,000 bags Unclayed at 27s. 9d. to 28s. 9d.

COFFEE.—187 casks, 90 barrels and bags Plantation Ceylon, at public sale, went off on the 8th at fully previous rates; 31 casks, 1,783 bags Native were chiefly sold, good ordinary 65s. 6d. to 66s.

RICE.—General quietness prevailed in the market last week, particularly for landed parcels, of which only trifling sales have been concluded. The floating cargoes reported sold are, two Rangoon, together 1,600 tons, at 12s., and one, 1,600 tons Nakrenzie, at 11s., all for the United Kingdom.

CAMPHOR.—Remains very flat: some small transactions in China are reported within our quotations of £4. 10s. to £4. 15s.

CASSIA LIGNEA.—Has further improved quite 2s. per cwt., and moderate business done privately: 402 cases at auction sold at 87s. to 89s. per cwt., 2nd to 1st pile. Buds: Quiet, and of 61 boxes at auction, a few only found buyers at £10. 15s. per cwt.

CINNAMON (CEYLON)—We quote 1st sort, 1s. 7d. to 2s. 9d. per lb.; 2nd, 1s. 5d. to 2s. 4d.; 3rd, 1s. 4d. to 1s. 10d.; 4th and Jungle, 1s. ¼d. to 1s. 5d. 66 bales sold well at auction at quite the par of the last quarterly sales.

COCOA-NUT OIL.—This market has again been firm, with limited business in both Cochin and Ceylon up to our higher quotations of £45 for the former, and £43 for the latter; fine quality becoming scarce; 28 casks Cochin, and 252 casks Sydney at auction.

DRUGS.—Cubebs: Rather cheaper, and 68 bags at auction sold at 80s. per cwt. Dragon's Blood: quiet; only two cases at auction sold at £6 per cwt. for fair lump. Galangal Root: is cheaper; but 1,084 bags, of recent arrival, offered at auction, all sold at 12s. 6d. to 14s. 6d. per cwt. Rhubarb: in increased demand, and again 3d. to 4d. per lb. dearer; good business done privately, and of 37 boxes at auction, one third sold at 5s. 8d. to 5s. 10d. per lb for fair round, and 4s. 7d. middling flat.

GUMS.—Benjamin: Remains steady; and of 90 cases Sumatra at auction, two-thirds sold at £12 to £12. 12s. 6d. per cwt. for fair to good second quality; and £6. to £6. 17s. 6d. middling to fair third. Damar: Steady; of 60 boxes at auction, two-thirds sold at 49s. to 49s. 6d. per cwt. for good picked. Gamboge: Nothing doing.

GUTTA PERCHA.—Quiet; 14 tons and 22 baskets at auction all retired.

HEMP (MANILA).—This market has relapsed into a condition of great quietness: transactions very trifling. 1,764 bales at auction all retired.

HIDES.—There was a good demand for East India Hides at the sales on the 31st ult., both for consumption and export, and nearly all the moderate quantity offered found buyers at from last sale prices to ¼d. per lb. advance on the better descriptions. 620 Penang Ox and Cow hides offered and sold.—Light, 5½d. to 6½d. per lb.; heavy 4½d. to 5½d. per lb. 1,560 Singapore and Penang Buffalo hides offered and sold at from 5¼d. to 6d.

Digitized by Google

HORNS.—Buffalo: Steady; but 4 tons Penang at auction were returned. Deer: Remain firm; 1¼ tons Ceylon sold at auction at 61s. per cwt. for 1½ lb. average.

INDIA RUBBER.—Good quality remains very scarce; auctions confined to 140 baskets Penang, retired at 1s. 4d. per lb.; and 133 baskets common Assam ball retired at 9d., since sold at 8¾d.

JAPAN WAX.—Fine saucers dearer; ordinary cheaper; 261 boxes at auction, mostly sold at 71s. to 75s. per cwt. for good to fine, and 51s. to 54s. 6d. inferior.

OILS.—Anniseed: Small sales effected privately at 7s. 2d. to 7s. 3d. per lb. Cajaputa: Dearer: and of 5 cases at auction, two sold at 3d. per oz. Cassia: Again rather lower, and dull: very little business. Cinnamon: Of 8 cases at auction, three cases sold at 3s. 4d. to 3s. 6d. per oz. for very fine heavy, being dearer. Mace and Nutmegs: Rather dearer: 7 cases sold at auction at 3¼d. to 4¼d. per lb. for fair to good.

PEPPER.—Black is again the turn easier. Of 6,658 bags Singapore at auction, two-thirds sold at 2⅞d. to 3¼d. per lb. Of 4,812 bags Penang, about half sold at 2¾d. to 3d.; with Trang at 3d. to 3⅛d.; and 160 bags Tellicherry sold at 4½d. White had shown some little signs of improvement, which, however, disappeared at recent sales; when of 719 bags Singapore, two-thirds sold at 5⅜d. to 5½d. per lb., against 5¼d. to 5⅝d. just before obtained privately.

SAGO steady, with very little business privately, and none at auction Flour very quiet: 630 bags at auction all retired. Tapioca: 78 bag. middling white Penang went at 3d. to 3¼d.

SHELLAC.—Button continues to recover, and other kinds are firm, with a little more appearance of demand. Of 1,850 chests and bags at auction rather more than half sold. Orange, 75s. to 92s. 6d. per cwt.; Garnet, 61s. to 73s.; Liver, 60s. to 61s.; Button, 45s. to 84s.; and block and blocky, 61s. to 85s.

SPICES.—Cloves: Penang rather cheaper; but 94 cases at auction mostly sold at 1s. 0½d. to 1s. 2½d. per lb. for fair to very good. Zanzibar steady, and 592 bags sold at 3⅛d. to 3⅜d. per lb. Mace: All sorts dearer, and 12 cases Penang, 15 cases Singapore, and 35 casks Batavia at auction mostly sold at 2s. 2d. per lb. for middling palish, and 11d. to 1s. 8d. inferior red to fair reedish. Nutmegs: The small sizes are 1d. per lb. dearer, and all sorts firm; 66 cases Penang and 10 cases Batavia at auction sold at 2s. 6d. to 3s. 8d. per lb. for middling to good bold, and 11d. to 1s. 10d. ordinary small to fine medium.

TERRA JAPONICA.—Cutch, Pegue: Very quiet, with little doing; but some inquiry for good quality. Of 1,055 bags and cases at auction, a few only sold at 23s. to 23s. 6d. per cwt. for mixed. Gambier: In fair demand for immediate requirements, and tolerable business done at 19s. to 20s. per cwt., as in quality; only 200 bales at auction, partly sold at 20s. for good block. During the last day or two the market has become heavy on the receipt of increased supplies.

TIN.—This market has become firmer, with extended demand, and good business done in Straits, mainly at £88. 10s. to £89 per ton cash.

MISCELLANEOUS.—Galls: Firm; auctions confined to 50 cases China, of which 10 sold at 65s. per cwt., and 112 cases Japan retired. Musk: Quiet; 16 caddies Tonquin at auction all retired. Rattans: Auctions confined to 1,710 bundles Penang, retired and subsequently sold at very moderate value. Sapanwood: Firm; only 5 tons Ceylon at auction, sold at £11. 7s. 6d. per ton. There is a good deal of inquiry. Mother-o'-Pearl Shells: Firm; 37 cases Manila at auction retired; privately 100 cases, recent arrival, sold at £5. 10s. per cwt. Soy: Continues very quiet; nothing doing. Star Anniseed: Continues very scarce, and is much wanted. Sticklac (Siam): Meets with somewhat brisk demand, at the recent reduction, and of 662 boxes at auction, nearly all sold at 40s. to 42s. 6d. per cwt. for good to fine; 29s. 6d. to 30s. small and broken; and 27s. 6d. to 28s. 6d. block. Tortoise-shell: Nothing of any consequence doing. Turmeric: No China offering: nothing doing in Java. Vermillion: Continues scarce; 4 boxes sold at auction at 2s. 10d. per lb.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7 to £7. 5s.; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10.; sheets, single, £10. 10s. to £10. 15s.; Staffordshire bars, £8. 10s. to £9. 10s.; rails, £7 to £7. 5s.

STEEL.—Swedish keg, £15.

COPPER.—Sheet and Sheathing, £91 to £93 per ton; yellow metal, 7¼d. to 7⅜d. per lb.

TIN.—92s. to 94s. for block; 93s. to 95s for common bars. Tin plates, best charcoal, I.C. 29s. to 30s. 6d.

LEAD, &c.—English pig, W.B., £22. 10s.; shot, patent, £22. 10s.; sheet, £20 to £20. 5s.; spelter, £21. 15s.; zinc, English sheet, £27. 10s.; quicksilver, £7. 18s. 6d. to £8.

The following is from the Circular of Messrs. French and Smith:—During the first part of the past month, August, this market was extraordinarily stagnant; the last week or two however has shown some slight improvement. Iron is unchanged in price, with the exception of Scotch Pig, which is rather higher. Both Welsh and Staffordshire are in good demand. Copper: The price continues steady, but the demand is very moderate. Ores and Regulus are cheaper. For Chilian there has been a fair enquiry. Australian is not much asked for. Tin: English is without animation and may be bought under Smelters' official quotations. It was thought the low prices would have checked the Cornish production, at present, however, there is no sign of any falling off. Banca and Straits have been bought more freely for consumption, especially for Tin Plate purposes, this manufacture being now very active; but, notwithstanding, the Tin Stocks show no diminution. Tin Plates are in very great demand, many of the works having orders in hand for three or four months in advance. Price is about 1s. per box dearer than a month since. The quantity shipped last month was 95,000 boxes, against 60,000 boxes in August, 1864. Lead continues dull in the extreme, and price is depressed. The falling off in the exports to America and China during the year have been very considerable. Spelter was quiet during the month, but without much affecting the price, until the last few days, when it has fallen about 10s. per ton. The Stock here is 7,389 tons, against 11,431 tons, 1st September, 1864. Quicksilver remains unchanged.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton rom the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

We have no alteration to report in outward berth freights since our last issue, and coal freights remain without animation. In homeward charters no business has been transacted of any account.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 35s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £40 and £1. 16s. For Shanghai: £50 and £2. 6s. For Manila: £1. 17s. 6d. For Batavia: 24s. to 26s. For Singapore: £29 and £1. 8s. For Galle: £1. 7s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have accepted the Charlotte Ann for the conveyance of stores from the River Thames to Trincomalee, and have ordered the Taitsing to be surveyed for the conveyance of 109 tons porter from the Thames to Hong Kong.

CASUALTIES.

Advices from Mauritius, under date August 7, state that the Johanna Maria (Dutch ship), from Banjoewangie for Rotterdam, which put in there June 9, for repairs, had been condemned and sold with part cargo; the rest of the cargo would be transhipped into the Kensington (ship), which would probably sail about August 20.

The Mountain Ash, from London for Hong Kong, arrived at Port Elizabeth with loss of jibboom and foretopmast.

LAUNCH OF A NEW SCREW CLIPPER FOR THE CHINA TRADE.—On the 9th inst. Messrs. A. and J. Inglis launched from their building yard, at Point House, Glasgow, a vessel of the screw and sailing class, destined for the Australian and China trade. She measures in length of keel and fore-rake, 245 feet; breadth moulded, 34¼ feet; depth ditto, 22¾ feet; tonnage, 1,400. She is fitted up with all Messrs. A. and J. Inglis's latest improvements, and will accommodate 40 first-class and 400 second and third-class passengers. She is also fitted with a screw propeller, which may be taken up and let down as circumstances require, the engine power for driving which is 250-horse power nominal. As she glided into her element she was named the Erl King by Mrs. Capt. Ware, wife of one of the owners. This vessel has been built to replace the Sea King, and is under the management of Messrs. Robertson and Co., London. She is to load for Melbourne and Sydney, and thence proceed to China.

ARRIVAL OF THE FIRST TEA CLIPPERS.—The Fiery Cross and Serica arrived together off the Isle of Wight on the 10th inst., having left Foo chow together on the 28th May, being 105 days. By a stroke of good fortune, however, a tug steamer ran alongside the Fiery Cross, and, having taken her in tow, reached Gravesend at the same tide. No other tug being in the vicinity, the Serica stood out to mid-channel in order to catch the flood tide, but did not get or see a steamer again till she got to the Foreland, and, in consequence, lost the tide. Had the Serica been fortunate enough to have fallen in with the tug sent out to bring her in from off the Isle of Wight all would have been well, as both ships would have gone up the Thames together. As it was, however, the Fiery Cross got into dock twelve hours in advance, and thus secured the premium, which, we believe, is £1 per ton.

THE LONDON JUTE WORKS

(LIMITED).

Secretary—Mr. J. A. SIMPSON.

Temporary Offices—Langbourn Chambers, 16½, Fenchurch-street, E.C.

ABRIDGED PROSPECTUS.

This Company is established to spin and weave Jute by steam power in London.

The fabrics produced from it are sackings, baggings, hop-pocketings, woolpacks, carpetings, hessians, packing canvas, tarpaulings, paddings, sacks, and bags for all kinds of produce, seeds, &c.

Dundee owes its high position and prosperity almost entirely to this branch of trade, and draws its supplies principally from London. The carriage to and from, insurances, and incidental expenses, amounting to about 13 per cent. on the value of raw material and manufactured goods, will be saved to the Company.

It is well known that the present Jute mills are altogether inadequate to meet the growing demand for goods, and that London offers many advantages for Jute spinning and weaving over any other place in Great Britain. It is the great emporium for Jute imports, and the chief mart for Jute manufactured goods. An abundant supply of labours can be at all times secured in London.

It will be observed that the Board of Direction is composed of gentlemen who possess a thorough knowledge of the different branches of the Jute trade; and the Directors, therefore, in confidently anticipating an average dividend of from 20 to 25 per cent. upon the Company's operations, invite shippers, Manchester warehousemen, hop-planters, millers corn and coal merchants, and all other purchasers of Jute goods, to become interested in the company, it being desirable that the customers of the Company should also be shareholders.

Full copies of the prospectus may had on application to the Bankers, Broker, and Offices of the Company, where also (and at the Solicitors) its articles of association may be seen.

THE LONDON JUTE WORKS (LIMITED).

NOTICE IS HEREBY GIVEN, that the LIST of APPLICATIONS for SHARES in this Company will be CLOSED on the 26th inst.

By order,
J. A. SIMPSON, Secretary.

Sept. 12, 1865.

THE CAPE, INDIA, AND CHINA AGENCY.

ORDERS for GOODS of all descriptions executed, and Shipped by the Overland Route or by Clipper Sailing Vessels. Consignments of Produce realised. The Goods are selected by parties who have had personal experience of the requirements of the markets at the

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne (see "The Times" of July 13, 1864), and all others must be spurious.*

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery—"So strongly are we convinced of the efficacy of this remedy that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in neuralgia, asthma, and dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an anti-spasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words "DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor.

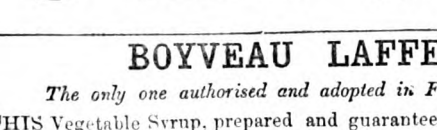
CAUTION.

By Special Appointment TO HER MAJESTY QUEEN VICTORIA.

BRANDS ON CASES AND CASKS.

Seal on Corks. Brand on side of Corks. Brand on end of Corks.



WHEREAS Persons are shipping Wines to India marked with a Crown in imitation of CHILLINGWORTH and SON'S WINES, which are branded with a Crown, they having the appointment of WINE MERCHANTS to HER MAJESTY QUEEN VICTORIA, it is deemed expedient for the protection of dealers and consumers of their superior Wines selected from their extensive and valuable stock expressly for the Indian market, which have been so well known and approved by connoisseurs for the last thirty years for their extreme quality and purity, combining flavour and softness, together with great age, body, delicacy, and bouquet, being more free from acidity or alcohol that any other Wines, to caution all purchasers to ask for

CHILLINGWORTH & SON'S
CROWN SHERRIES AND OTHER WINES,

And to be particular in observing that the Cases and Cask-heads are branded with their names at full length; also, on the side of the Corks, inside the bottles, as well as the Crown; and also on the seals, in accordance with the heading of this notice, as a necessary precaution, to ascertain that they are CHILLINGWORTH and SON'S CROWN WINES, in order to prevent a common low class of Wines being improperly foisted on the public, and which are in no way to be compared with those of CHILLINGWORTH and SON'S.

Wholesale Agents:—Bombay, Messrs. Hormarjee Bomanjee and Co.; Madras, Messrs. Parry and Co.; Calcutta, Messrs. Gordon, Stuart, and Co.; Kurrachee, Messrs. Hormarjee Bomanjee and Co.; Colombo, Messrs. JOHN GOSNELL and Co.'s Stereodesmic or Dentists, Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co's Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S OINTMENT and PILLS.—UNERRING PRECISION.—When the health is breaking down from the continuance of some weakening discharge, when ulcers refuse to heal, and extending mischief is threatened, then is the time to try the potency of Holloway's healing Ointment and purifying Pills. No treatment for giving ease and safely leading to a cure can be compared to this. The Ointment cleans and cools the foulest and most angry sores, diminishes the inflammation, reduces the swelling, prevents the growth of proud flesh, and spares both pain and danger. Thousands testify from their own personal experience to the unvarying success attending the use of Holloway's medicaments in cases of ulcerated legs, enlarged veins, scurfy skin, and swelled ankles.

For Freight or Passage apply to KILLICK, MARTIN and Co., 28, Nicholas-lane, Lombard-street, E.C.

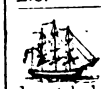
FOR SINGAPORE, with immediate despatch, having the bulk of her cargo engaged and on board, the magnificent Clyde-built clipper ship ALBERT VICTOR, 858 tons register, A 1 at Lloyd's for thirteen years, coppered and thoroughly copper-fastened; built last year for the China trade by Messrs. R. Steele and Co., Greenock, and has proved herself one of the finest and fastest ships afloat. Loading in Prince's Dock.

Apply to NUTTALL and Co., 18, Chapel-street.

Has splendid accommodation for two cabin passengers.

FOR SINGAPORE Direct.—The new clipper barque BELLE OF SOUTHESK, A 1 nine years, 559 tons register, Capt. J. McKENZIE (late of the Dewa Gungadhur); will load in the London early in September, and having a large portion of her cargo engaged, will meet with quick despatch. Has excellent accommodation for passengers.

For Freight or Passage apply to the owners, Messrs. MACTAGGART, TIDMAN, and Co., 5, Lime street, E.C.; or to R. VAUGHAN, TIDMAN, and Co., 2, Great St. Helen's, E.C.



LINE of PACKETS for YOKOHAMA, JAPAN.—In lieu of the "Eclipse," which is to follow.—Has nearly the whole of her cargo engaged, and will be despatched about the 28th inst. All goods to be specially arranged for. Loading east side Prince's Dock. The magnificent Cumberland-built clipper barque CASTLEHOW, EDWARD TRUMBLE, Commander (who is well acquainted with the trade), 260 tons, A 1 at Lloyd's for fourteen years, and is in every respect an unrivalled conveyance for fine goods.

For Freight, &c., apply to Messrs. WAKEFIELD, NASH, and Co.; Messrs. C. SAUNDERS and Co.; or to E. C. FRIEND and Co., Brokers.

To sail September 20.

COLOMBO Direct, the beautiful clipper JANE SYMONS, A 1 12 years, 335 tons register; now, loading in the West India Docks.

Apply to JOHN C. CAMPBELL, 22, Great St. Helen's; or HENRY RODRICK, and Co., 22, Leadenhall-street.

To follow the Jane Symons, sailing Oct. 20.

DIRECT FOR COLOMBO.—The well-known and favourite Trader, FRANCIS, A 1 13 Years, 810 tons register, J. HIGGS, Commander; West India Docks. This beautiful vessel, noted for her very rapid passages, and the good order in which she invariably delivers her cargoes, offers a first-rate opportunity to shippers of fine goods.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

THE UNDERSIGNED LICENSED PILOTS

FOR THE

PORT OF SHANGHAI, CHINA,

BEG to inform SHIPMASTERS that their Schooners DANIEL WEBSTER and A. J. WESTERWELT will be found at the OUTSIDE PILOT STATION on the YANG-TZE-KEANG, with thoroughly qualified PILOTS on board. The schooners distinguishable by being painted white, and having the word Pilot on the mainsail.

To regular traders the undersigned are known to be among the oldest and best Pilots on the River:—

THE INCOMING MAILS.

The mails due in London this day, did not reach Suez until the 21st, and will not arrive in London until the 2nd or 3rd Oct. The French mail, with ten days' later news, will probably arrive about the 4th or 5th. We therefore give in to-day's issue the events in this country and the Continent in reference to the Far East.

Telegrams from Shanghai, 21st August, announce that Sir Harry Parkes was re-establishing the Legation at Yedo. Export of silk stated at 29,750 bales. Exchange, 6s. 2¾d. At Canton, 4s. 5¼d. Total export of tea, 45,375,000lbs. to 28th August.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Mongolia, from Southampton, Sept. 20.—To Shanghai: Mr. Henderson, Mrs. John and native servant, and one 2nd class passenger. To Hong Kong: Mrs. Ivor Murray, Mr. Noble, Mr. R. Starkey, Mr. Withers, Mr. Lister, Mr. Russell, Captain Barry. To Ceylon: Mrs. Claughton and European servant, Rev. A. and Mrs. Young, Mrs. Ross, Miss Gibson, Mr. W. Prentice, and one 2nd class passenger. To Calcutta: Mr. and Mrs. L. R. Tottenham and ayah, Maj. and Mrs. Drew, Miss Wilson, Capt. and Mrs. Prendergast, two children and European servant, Capt. E. L. Earle, Dr. Dalziel, Mr. and Mrs. F. A. Tilton, infant, and European female servant, Mr. Gay, Rev. J. and Mrs. Robinson, Miss Robinson, and native servant, Mr. E. Rule, Mr. E. Lockwood, Maj. and Mrs. G. R. Brown, Lieut. S. S. Smith, Capt. Wellington, Dr. and Mrs. Baillie, Col. and Mrs. Middleton, three infants, and European and native servant, Mr. C. Wood, Mrs. Poole and daughter, Miss Mackeson, Messrs. P. Cooper, J. Wellborne. Taplin, and Galbraith, Ensign A. K. Abbott, Cornet Loyd, Mrs. J. J. Oliver, Mr. A. Winchester, Mr. Saché, Lieut. W. Cotton, Mr. H. P. Mulock, Capt. Cadell, Mrs. J. Phillips, Mr. and Mrs. Macfarlane, Mr. Bleanerhassett, Mr. Lydiard, Mr. Luard, Assistant Surgeon Thorburn, Mrs. D. A. Pinto, Mrs. Cunninghame, ten 2nd class passengers, and one child. To Madras: Lieut. Plunkett, Mr. Le Faun, Lady Pitcairn, Mr. J. Palmer, Staff Surgeon S. Bayfield, and Staff Assistant Surgeon K. Macaw, and eight 2nd class passengers. To Suez: Mr. H. Belford, Mr. Curling. To Alexandria: Mr. T. B. Pyesmith and female servant, Mr. A. McKean, Mr. A. Peake, Mr. Coyle, Mrs. Airs, child, and two female servants, and seven 2nd class passengers.

From Marseilles, Sept. 28.—To Hong Kong: Mr. and Mrs. Brackenbury, and European servant. To Ceylon: Mr. C. Somerville. To Calcutta: Mr. R. White, Captain Duncan, Mr. E. Grigg, Mr. T. Teil, Captain and Mrs. Graham, Mr. W. Garben, Mr. R. J. Shaw, Mr. J. Anderson, Captain and Mrs. Paske, and European servant, Mrs. G. Dove, Major T. C. Merrick, Mr. S. Whitney, Mr. G. Henderson, Mr. G. Morrison, Mr. W. H. Taylor, Mr. Lord, Lieutenants F. Medhurst and Biscol, Mr. B. C. Boevey, Miss Lake, Mr. Torkington, Lieut. A. B. Davis, Lieutenant and Mrs. Whitmore, Mr. W. Butler, Mr. A. P. McDonald, Mr. Petersen, Miss Jervois. To Madras: Mr. D. Williams, Mr. and Mrs. T. H. Allan and infant, Miss Hill, and European servant, Lieutenant Beaver, Mr. B. Anderson, Rev. J. Hall, Major Puckle, Lieutenant Churchward.

From Suez.—To Calcutta: Mr. Beattie, Colonel and Mrs. Goodwin, Mr. A. Y. Caridia.

Per P. and O. steamer, from Southampton, Sept. 27.—To Hong Kong via Bombay: Mr. and Mrs. Lambert and two children. To Shanghai, via Bombay: Mr. Lloyd Paton. From Marseilles, Oct. 5.—To Singapore via Bombay: Mr. J. Meldrum, Mr. Morel. To Hong Kong via Bombay: Mr. J. D. C. Nichols, Mr. W. H. Mitchell, Mr. F. B. Nicholls. To Shanghai via Bombay: Mr. W. Hart.

Per P. and O. steamer, from Southampton, Oct. 4.—To Hong Kong: Mr. A. Brent, Lieut. Toller, R.E. To Shanghai: Mrs. Bayne. To Ceylon: Mr. B. H. Plumptre, Mr. W. L. Kisch. From Marseilles, Oct. 12.—To Shanghai: Lady Parkes and friend, Mr. F. Myburgh. To Ceylon: Mr. D. B. Lindsay.

Per P. and O. steamer, from Southampton, Oct. 12.—To Shanghai via Bombay: Mrs. G. W. Bennett and child. To Hong Kong via Bombay: Mr. James Pope. From Marseilles, Oct. 90.—To Shanghai via Bombay: Mr. F. King, Mr. and Mrs. De Witt C. Brower., Mrs. Muirhead and infant. From Suez.—To Hong Kong via Bombay: Mr. and Mrs. Anderson.

Per P. and O. steamer, from Southampton, Oct. 20—To Shanghai: Miss M. A. Russell. To Singapore: Mrs. Cavenagh. To Hong Kong: Mr. and Mrs. Hermann and infant. To Ceylon: Mr. R. Massie, Lady Chichester, Mr. and Mrs. Wright and two children. From Marseilles, Oct. 28.—To Shanghai: Mrs. Herbert Hancock and three children, Mr. N. G. Howell. To Hong Kong: Mr. T. A. Lane and Mr. D. Lapraik.

Per P. and O. steamer, from Southampton, Oct. 27.—To Singapore via Bombay: Mr. and Mrs. J. E. Macdonald Mr. and Mrs. F. D. Barnes. To Hong Kong via Bombay: Mr. J. B. Leslie.

Per P. and O. steamer, from Southampton, 4th Nov.—To Singapore: Mr. and Mrs. Lipscombe. From Marseilles, 12th Nov.—To Singapore: Mr. W. Alten, Mr. W. Paterson. To Hong Kong: Mr. R. C. Lambert and friend.

THE ASIATIC AND CENTRAL BANKS.

We have published in previous numbers, a portion of the correspondence relating to the refusal on the part of the Asiatic Bank, and the Central Bank of Western India, to surrender shipping documents to the acceptors, on receipt of the amount of the specific bills drawn against such shipment. This allegation is a serious one, calculated to subvert all confidence, and, indeed, to cause a revolution in the whole system upon which this description of business has been conducted ever since the establishment of Banks in India and China. We are glad to find, however, that such is not likely to be the case. It appears that the transactions alluded to were not of the ordinary nature, but were mixed up with other bills upon which the banks held no security at all, and the drawers of the bills having failed, the banks sought to hold on to the *whole* of the value of the shipping documents, which, under ordinary circumstances, they had certainly no right to do. If that question is disputed, there will be no end of trouble and costly law suits. In fact, the drawees of a bill will, when granting acceptance, have to obtain from the holders an undertaking that they will on the payment of the said bills surrender the shipping documents. Indeed, we would urge all acceptors to adopt this course, to prevent disappointment and litigation, as in some cases the banks may be justified by virtue of their agreement with the drawers to claim the whole proceeds of the goods represented by the shipping documents. In that case it is of course the duty of the drawers to advise the drawees of such an agreement, but that cannot be relied on, and the course we suggest will lay bare at once the real position of the drawee. We give below the letters published since our last issue, but seeing that Messrs. Dadabhai Naoroji and Co. deny the truth of the statements made by Mr. Lawrence, the Manager of the Asiatic, it is fruitless to attempt a solution of the matter by this correspondence. In all such cases charges are made of *suppressio veri*, and this case forms no exception :—

"Asiatic Banking Corporation, 4, Lombard Street, London, Sept. 15.

"Sir,—The attention of the board of directors of the Asiatic Banking Corporation has been directed to the observations contained in your City Article to-day, in which you advert to what you state to be a 'practice adopted by two Indian banks—the Asiatic and Central of Western India

Digitized by Google

—of seizing and retaining collateral securities attached to bills accepted by London houses, although the acceptors punctually tender the amount, and demand their surrender, on the plea that the banks have a right to realize these securities and apply any surplus to the discharge of bad debts which they may have incurred in their own separate and private transactions with the drawers.'

"If the practice of the Asiatic Bank had been such as you describe, there is no doubt it would be open to the observations with which you characterise it, but the corporation have given no rise to the charge thus imputed to them.

"The facts of the case out of which your observations arise are simply these.

"The company's agent in Bombay in April last negotiated for a house at Bombay a number of bills for a large amount, some of which were specifically drawn against cotton shipped to London, on the sole account of the drawer, by various vessels, and some of which were what is called 'clean' bills.

"In entering into this transaction the house at Bombay made an agreement with the bank, by which it was specifically agreed as follows :—

"'And we authorise the corporation to hold and retain the goods while unsold, and the balance of the net proceeds when sold as security for and towards the payment of any other bill or bills which any of the managers or agents of the said bank may have purchased from us, or towards the liquidation of any claim the bank may have upon us, or otherwise to be at our disposal.'

"On the arrival of one of the vessels containing part of the cotton in question, Messrs. Dadabhai, Naoroji and Co. called upon the bank and offered to pay a portion of the bills which was drawn against this cargo. The Bombay house having in the meantime stopped payment, the Asiatic Bank were not prepared to give up the security they held on payment of any part of the bills—it would have been contrary to the agreement that they should have done so; but upon Messrs. Dadabhai and Co. stating the cargo had been consigned to them for sale and sold, they offered them (Messrs. Dadabhai and Co.) to confirm the sale, and to hand over the goods to them on an arrangement that the proceeds should be applied, first in payment of the bills drawn against them, and the balance be deposited in the names of Messrs. Dadabhai and Co. and the bank, to abide the decision of the question, if any, whether the bank or Messrs. Dadabhai and Co. were entitled to the surplus. I subjoin a letter from myself to Messrs. Dadabhai and Co. embodying this offer.

"The question between Messrs. Dadabhai and Co. and the Asiatic Bank has since been settled on the principle of that letter. The point between the parties in substance was whether the Asiatic Bank was bound to give up the security they held by specific agreement upon tender of payment of part of the bills which they held, or whether they were entitled, under the agreement, to hold the whole of their security as cover against all the liabilities of the Bombay firm, as stipulated by the bank in their agreement.

"This was a question of law, depending on an agreement, and not on any usage.

"On this explanation I think you will agree that the conduct of the Asiatic Bank has been in all respects fair and even liberal, and that they are not justly obnoxious to the observations contained in your article.

"It would have been more satisfactory to the bank in the first instance to answer Messrs. Dadabhai and Co.'s letter and your observations, but they were advised by their solicitors, Messrs. Freshfield and Newman, that it might give rise to inconvenience, and form a bad precedent, to make a question of pure legal right a subject of discussion in a daily journal.—I am, Sir, your obedient servant,

"F. W. LAWRENCE, Acting General Manager."

"London, Sept. 16.

"SIR,—Mr. Lawrence has given his version of our case. We give below a few facts, and leave them to speak for themselves.

"1. Mr. Lawrence gives an extract from the letter of hypothecation, signed by the drawer, and endeavours to make the public understand as if in that letter a specific agreement had been entered into with the drawer.

"We herewith send you a printed form of the usual letter of hypothecation used by the head office of the Asiatic Bank in London, and also a copy of the Bombay letter of hypothecation from which Mr. Lawrence has given the extract. You will see by comparing them that, instead of there being any unusual alteration in the Bombay letter, it is word for word the same with the printed form usually used in London by the head office itself.

"The forms used by all the Indian banks at their different branches are generally similar to those used by their respective head offices, and the Bombay agent of the Asiatic Bank has, it appears, simply made his form similar to that adopted and printed by his head office itself.

"Mr. Lawrence has thought proper to give an extract of the clause only, instead of giving the whole paragraph of which the clause itself forms a part, or the public would have seen that the whole paragraph refers to the case of dishonoured bills only He should also have given an extract of the very first paragraph of the letter of hypothecation, which would have shown that the documents are collateral securities for the payment of the bills in question only.

"2. The news of the failure of the drawer was communicated to Mr. Lawrence by us on the 19th of June last. Seven weeks after, on the 12th of August, on the arrival of some of the vessels, the Bank itself sent us their usual letters asking us to retire our acceptances as usual, and it is only when, and in reply to the Bank's own invitation, we applied on the 14th of August to retire our acceptances, that the Bank first set up their present claim.

"3. As to 'the liberal and fair' treatment given to us, we need simply give an extract of our solicitor's letter of the 31st of August to the solicitors of the Bank :—'I regret to find that your present letter does not fully accord with the offer of fairness and liberality given in your last, inasmuch as that you insist upon the arrangement being based entirely upon the one sided view you take of your clients' alleged rights, ignoring altogether the view of my clients of their rights. I should have expected that pending the decision of the rights in question you would have shown impartial consideration to both views, and left the whole matter of the rights of both parties in equal abeyance by including the question of the clean bills in the present arrangement, as proposed by me, to be paid immediately on the question of rights being decided. But if, from the circumstances of your clients' advantageous position of being in the possession of the bills and documents, their taking the advantage of exacting terms from my clients which in common fairness they ought not to insist upon, be what you mean as fair and liberal dealing with my clients' position, it is very clear that we entertain widely different views on that subject.'

"In addition to this the Bank has forced the stipulation upon us that we must include our conditional acceptances also in the arrangement of which Mr. Lawrence has sent you a copy, but which promised letter we have not till this evening received.

"Mr. Lawrence is mistaken in stating that we had already sold any portion of the cotton, and he has been already informed of this mistake in our letter to him on the 22nd of August last.

"Mr. Lawrence is also mistaken in saying as if the Bombay house had failed after our application to retire on the arrival of one of the vessels. The fact is that we made known to Mr. Lawrence the failure of the Bombay house on the 19th of June, while the very first shipment which the Bank refused to deliver arrived only on the 10th of August.

"The Central Bank, we hope, will yet justify their conduct, which we are sorry to say is more high-handed than even that of the Asiatic Bank, inasmuch as that they have not only no justification of their conduct, but that they would not even come to some reasonable arrangement about the sale of the cotton till the question of the rights is decided.—We remain, your obedient servants, "DADABHAI NAOROJI and Co."

THE RUSSIANS IN CENTRAL ASIA.

Such is the title which has been for some time flitting about, until a decided handling has resulted on the part of the press and writers generally. We have before us a pamphlet on Russia, Central Asia, and British India, by a British subject, in which the writer very unhesitatingly condemns our fears (if we have any) as to Russia, by her operations in Turkistan, really threatening our supremacy in India, in which we most heartily agree. We append some extracts from the pamphlet, and also a leader from *The Times* on the subject :—

The way to throw light on this question is by entering upon what is, but ought not to be, a *terra incognita* to most of the English and Indian reading public—the position of Russia in Central Asia. Much new information is given on this subject by the circular despatch of Prince Gortchakoff issued in St. Petersburg last November, which, as Vice-Chancellor of the Empire, he forwarded to the embassies and legations of the Russian Empire located in foreign countries. The following is a summary :—

"The position of Russia in Central Asia is analogous to that of all civilised States who, finding themselves in contact with half-savage and nomadic tribes, are compelled—as much in the interest of their frontiers as in that of their commercial relations—to take measures for imposing respect upon inconvenient and turbulent neighbours. Such has been the task of the United States in America, of Holland in her colonies, of England in India. All have been forced to follow this course, in which ambition has very little part, and wherein the great difficulty consists in knowing where to stop.

"Such, also, is the reason which has actuated Russia in establishing herself upon the one side at Syr-Daria, and upon the other at Lake Issyk-Koul, and in consolidating those two lines by advanced forts, which have gradually been pushed forward into the heart of those distant regions, without, however, securing the permanent tranquillity of the frontiers of the empire. For, first, between the extreme points of this double line there is an immense unoccupied space, in which the forays of pillaging tribes continue to paralyse colonisation and hamper trade through caravans. Further, the constant fluctuations of politics in those countries must be considered. Turkestan and Kokhand, now united, now separated, always at war either with each other, or with Bokhara, render fixed relations and regular intercourse utterly impossible. The Cabinet of St. Petersburg is nevertheless unwilling to adopt the line of policy England has followed in India, by subjugating in detail by force of arms the small adjoining States which had rendered themselves obnoxious to their neighbours. Russia desires not to aggrandise herself beyond measure in Central Asia, but to consolidate the organisation of the provinces she possesses. Taking up this point of view, the Russian Government has determined upon three principal measures. First, it has ordered that the two fortified lines, the one reaching from the Chinese frontier to Lake Issyk-Koul, the other extending from the Sea of Aral to Syr-Daria, should be united by fortified points, so as to place all the posts in a position mutually to support each other, and not to leave any gap through which the invasions of the nomadic tribes can be carried out with impunity. It has been further decided that when the line is thus completed, advanced forts shall be established in sufficiently fertile places, not only to secure their provisionment, but also to facilitate regular colonisation—an essential condition to the future prosperity of the country and of the civilisation of the neighbouring tribes. Lastly, this fortified line must be fixed in a definitive manner, in order that the Russian Government may escape dangerous encroachments, which, from reprisal to reprisal, would culminate in a policy of unlimited extension.

"The mission is often attributed to Russia, viz., to carry civilisation into the Asiatic countries adjoining the empire. Civilisation possesses no more efficacious agent than commercial relations, and these, which everywhere require order and stability, render a radical transformation of manners in Asia essential. Above all, it is important to make Asiatics understand that it will be more to their advantage to favour and protect trade through caravans than to plunder the traders."

While the advance of Russian troops in Central Asia is regarded by military men simply as a black cloud, others amid the darkness can see a silver lining to it, and that while Russia is opening military roads, she is at the same time constituting a settled Government and forming routes by which the commerce of all nations will be ultimately facilitated and advanced. Even in Russia the principles of free trade are making progress, and the tendency of legislation there of late years has been to favour the

Digitized by Google

settlement of foreigners and to remove those restrictions on commerce and strangers which operated so injuriously during the abitrary reign of Nicholas. The *Russian roads will serve for the transport of English manufactures*, of Indian tea, coffee, quinine, &c. to the shores of the Caspian, from thence to be forwarded to Nijni Novogorod and Moscow by rail. As far back as 1849, English calico reached Yarkand and Kokhand, the latter place was visited by agents of English houses. The looms of Kashmir contribute to swell the bazaars of Yarkand which are three and a half miles in length.

It is only when one steams down the magnificent Volga, 3,000 miles in length, through populous and industrious districts, that the facility of access from Russia to Central Asia becomes so obvious. With 300 steamers on the Volga, railways soon to connect Moscow with Astrachan, and a steam fleet on the Caspian, Bokhara and Khiva are within easy reach of Russia, the demand for cotton and tea has impelled her merchants along this line, ever since the days of Peter the Great, who wished to develope the trade between Siberia and Central Asia.

Her policy of internal improvement and her disgust with the treatment she has received from the Western Powers in connection with Poland, are directing the attention of Russia to Asia as her natural home, the seat of the old Sclaves—where she is away from European complications. The Oxus will bring Russia in contact with Western China, which is Mussulman, bitterly disaffected towards the Chinese Government, and urged on by the Taipings, so that ere long Thibet and Southern China are likely to be independent of the Chinese Government.

To those who have seen the good working of a *peasant proprietary* in Europe, and value the principle in its effects in elevating the social, moral, and religious condition of a people, the accession of such a power as Russia to the cause of a free peasantry must prove a powerful auxiliary in Asia. Serf emancipation in Russia is based on peasant proprietorship, and, what would surprise many in England, each Russian village is constituted into a little municipality, a *mir* or world of its own, in which the rustic mayor may be seen sitting with a noble dignity on the bench to administer justice in village disputes—an admirable training for self-government. The Russian peasants, with their roving propensities, are sure to scatter the seeds of this improvement wherever they go, and to encourage the Asiatic peasant in his resistance to that bane of Asia, feudalism, and to recall to the Indian peasantry their remembrances of their own beautiful village system, which was so long a blessing to the ryot of India; and in no country is it more necessary than in Asia, where feudalism and landlordism have desolated the fairest regions. The news of Russian serf emancipation has spread to India, and has excited joy and thankfulness in the breasts of millions of natives there; the native papers of India cordially hailed serf emancipation in Russia, and, like the great American Republic, which has just shaken off the incubus of slavery, welcome Russia as a coadjutor on the side of the masses.

The history of the Anglo-French alliance is an encouragement, for though French influence is extending all through the East; though Egypt is almost tributary to France; though the empire of Algeria has made the Mediterranean almost a French lake; though Cochin China is her feudatory, and her flag waves in numerous parts of the Pacific, yet little jealousy is now expressed by England, and very properly: yet sixty years ago nothing was so rife as rumours of a French invasion of India with the aid of Persia; and so serious was the danger considered that an Anglo-Indian expedition was sent up the Persian Gulf to meet it; but England and France act in harmony in the Eastern and Chinese seas, and the old notion that they are natural enemies is now nigh well exploded, fifty years' peace having shown the fallacy of it. England considers there is room enough for both; and disputes like those regarding the Canal of Suez and Tahiti are settled by mutual accommodations and concessions. Why should not a similar feeling be manifested towards Russia? particularly as Russia was for 300 years the ally of England, while France was for 500 years her bitter and perpetual rival—the Russian character assimilates more with the English than the French does in its commercial and colonising propensities, in its love of domestic life, of home, &c. The Sclavonic race has always succeeded better in colonising and developing the resources of distant countries than the Latin race—as is shown in the failure of the French in Algiers and other countries.

The changes in Russia since the death of Nicholas are more favourable to a better understanding. The leaden despotism of the reign of the Emperor Nicholas was well characterised by Mr. Cobden as "expending its surplus energies in the affairs of other countries, after having interfered with the management of every great thing and small at home." The prophecy of Monsieur Thiers that "the Russian colossus, with one foot on the Bosphorus and the other on the Sound, would enslave Europe and drive liberty to seek her retreat in America," might have been in some points applicable to the reign of Nicholas, but there is a *wide gulf* between the Russia of Nicholas and that of Alexander; the former incubus on the country has been happily removed, and the acts of the present Emperor now show a different state of things. Serf emancipation a success, Provincial Assemblies and open Courts now in action, will cause Russia soon to cease having the epithet applied to her of an *empire des facades*, and ought to alter the feeling of England towards her; while detesting the bureaucratic and anti-progressive party in Russia, ought we not to extend our sympathy to the liberal and progressive party in Russia?

Tilly, in his valuable work, "Eastern Europe and Western Asia," among many interesting particulars regarding the recent change of policy in Russia, mentions an anecdote of a Russian gentleman who had just returned from a forced visit to the Caucasus, and asked M. Tilley how long the Emperor Nicholas had been dead. M. Tilley replied, "Five years." "Nonsense," said the Russian, "it is five hundred years, if you calculate by the change which has already taken place in the country in free action and boldness of sentiment." Herzen, who has laid bare the wounds of Russia with no tender hand, is in this respect an impartial witness. He writes:—

"The morrow after the death of Nicholas the *debâcle* (thaw) has commenced; the Government, *nolens volens*, is carried away by the torrent. Literature, the first to awake, has vigorously commenced informing the public on the venal and corrupt official administration. All the people begin to speak of reforms. The administrative incapacity of Nicholas, the sterility of his labours, the uselessness of his cruelties, had been too evident during the Crimean war. Public opinion has pronounced a unanimous verdict on the tomb of this crowned sergeant. The retrograde despotism of Nicholas has had its day; Russia enters into a new historic phase, which will have neither the aggressive character of the time of Peter the Great nor the counter-revolutionary one which has signalised the gloomy reign of Nicholas; the grand problem to be solved by Russia is the development of the national element by the organic assimilation of the social science elaborated by the West."

The autocracy in Russia cannot long stand before the swelling tide coming up from the masses; nor does the present Emperor wish for it—he is preparing a safe way for a liberal Government by the establishment of provincial assemblies, now in actual and successful operation. Carlyle years ago remarked, in his Latter Day Pamphlets, "Democracy sure enough is here; one knows not how long it will keep hidden under ground even in Russia." It has come up and with a mighty tide, and as a modern writer remarks, "he will be able to form but a poor guess as to the future of Russia who does not allow a large share in moulding the future to the democratic element." Though little known to Englishmen, there are certain reforms in action now in Russia which must modify the policy and position of Russia in Asia;—by occupying her attention with domestic affairs, render Russia less ambitious of extensive dominion—more eager after intension than extension—more anxious to improve and develop what she has, than to stretch after distant things, as she feels her first wants are population and railroads. The Germanised Russian of Petersburg is passing away, and the new Sclavonic Russian is coming forward. Russia has now, and will for many years have, her hands full of social reorganisation and domestic politics, *which cannot be carried out without a policy of moderation and conciliation in foreign affairs*. These reforms, though slow, are sure; they are not like French reforms, "sudden flashes in the depth of the general night, which the darkness, by contrast doubly dark, swallows up everlastingly again."

Among the chief reforms now in operation are the following:—

The *passport system* is administered very mildly. A Russian noble now has only to pay 5s. for a passport, instead of £50 under Nicholas. More than 100,000 Russians were in consequence travelling on the Continent last year, and are brought more in contact with liberal ideas.

Decentralisation of the local administration, by the institution of local elective committees will enfeeble the power of that incubus on Russia—the bureaucracy—and will give the initiative of a number of economical and administrative measures to persons who are most interested in them. By lessening the centralising power of the Government, it will diminish the military mania.

Provincial assemblies have been this year instituted throughout the empire for local legislation. Finland, two years ago, obtained complete autonomy, the Diet now regulates its own finances. Five classes elect:—Nobles, merchants, citizens, clergy, and peasants. At elections a practical spirit very different from the French has been shown, the members directing their attention to roads, postal communication, land settlement, manufactures, statistics of revenue, etc.

Russia is *opening up a way for Anglo-Indian trade in Bokhara*; her roads, steamers, and subjugation of wild tribes are preparing for this, and will enable the pressing demands for English broad cloth to be supplied at Bokhara; already a considerable quantity of English articles is introduced by way of India, and they are preferred to those of Russia when the two come in competition. There are from 2,000 to 3,000 natives of Hindostan in Bokhara engaged in various trades; even the rude tribes of the Tartar steppes know the value of English articles but cannot get them. Atkinson in his Amour informs us, "*English* merchandise will sooner or later find its way into the northern provinces of China, through the Tartar merchants engaged in trade among the Kirghis hordes. It is a well known fact that the caravans that travel from Kulja into some of the interior provinces of China encounter greater dangers than will be met with between Yarkand, Kashgar, and the Indus." Iron and copper, sulphur and saltpetre are found near Kulja. Semipolatinsk, the great central Russian mart for trade in Siberia, is but little more than half the distance from the Indus that it is from Nijni Novogorod. A good deal of indigo is sent from the Punjab through the Affghan passes, and even the Cossacks of the Amour have entered into contracts to supply wood for Shanghai in China.

(THE TIMES.)

It is only about twenty-five years ago that a remarkable map was published under the title of "Acquisitions of Russia," and the whole world was invited to view with alarm, and if possible resist with effect, the aggrandizement of so menacing a power. We ourselves had already acted on the principles thus illustrated, and by way of interposing some political barrier between Russia and Hindostan had undertaken an expedition into Central Asia, which cost us an army, and almost an empire too. Somebody or other had been besieging Herat, not a striking fact in itself, for Herat was always besieged by somebody, but this was the wrong person, and if he took it it would be tantamount to giving the Russians a key to British India. That was the doctrine strenuously maintained, and so popular was the belief, that when it was observed that the key seemed a long distance from the door, the remark was censured as heterodox, sceptical, and unpatriotic. Nothing, in fact, could rid us of the conviction that Russia was advancing towards our Indian Empire with a view of devouring it, and so we rushed to meet half-way a phantom of our own creation, and paid a penalty which ought not to be soon forgotten. We recall these events at this moment for the sake of contrasting them with the wiser opinions now happily prevailing. The premisses of our former reasoning were sound enough, but the conclusion was wrong. Russia was advancing in the East, and advancing in the direction of India—not so rapidly, it is true, as we were advancing in the direction of Russia, but still with some pertinacity, if not success. Our annexation of the Punjaub carried us right up to the frontier of Independent Tartary—the single country now interposed between the Russian territories and our own. Russia, even up to the present hour, has made no conquest equivalent to that, but she is busy in Tartary, and some of her doings in that mysterious region have just been obscurely reported. A quarter of a century since, such intelligence would have been considered

Digitized by Google

alarming; we can now receive it not only without apprehension, but positively with some degree of satisfaction.

"Turkistan" is the scene of the new Russian "encroachments." We are not sure that we can exactly identify the spot, but we can get near enough for the purpose. The region lying to the east of the Caspian Sea, bounded on the north by Asiatic Russia, on the south by Affghanistan and the Punjaub, and on the east by China, is the single remnant of the ancient land of the Tartars still preserving their name. It is called "Tartary," or "Independent" Tartary, because it has not yet been absorbed in the empire of Russia or China. It is the original country of the Turks, and not only the Turks, but the Huns; indeed, it was to investigate the ancient home of his race that an enterprising Hungarian recently penetrated into these unknown territories. It may, therefore, be very properly called "Turkistan," but it is by no means certain what particular portion of its enormous deserts is now designated by that name. In the north-western region of the Tartar territory lies a vast inland lake, called the Aral Sea, and into that sea, from the frontiers of China and Affghanistan respectively, flow two large rivers, the Sir and the Amoo. These famous streams, known in ancient history as the Jaxartes and the Oxus, divide Tartary into three equal portions or belts. On the Amoo, or a branch of it, lies the capital of Khiva; on the Sir, that of Kokan. A little below Kokan lies a district called actually "Turkistan," with a town of the same name, and this is, probably, the seat of Russian operations, but the country of the present Turcomans lies far away to the west, and on the very borders of the Caspian Sea. That is as much as we can say for the geography of the story.

RUSSIA.

(FROM A CORRESPONDENT.)

The Emperor and his Court have been at Moscow. But you must not expect me to give my impressions of Moscow as a city. I am no painter of scenery, and would rather portray the people and their rulers. Suffice it to say that this picturesque capital is one of the most striking sights in Europe, and that no one can pretend to have seen Russia without spending at least a few days in it. And here I may say it is surprising to me how few of my countrymen avail themselves of the facilities offered for such a visit. "Murray" affirms that there is no country on the continent where people meet with less official annoyance; you are free to come and go on condition of exhibiting your national passport. A railway brings you to St. Petersburg in three and a half days from London, and the four hundred miles to Moscow may be performed with the greatest ease, in the most comfortable railway carriages; and, as for the *cuisine*, commend me to the refreshment-rooms of the principal stations on the Moscow line. Travelling appears to agree with the good Russians, for I have never elsewhere beheld such a continuous and wholesale consumption of massive aliments. The train takes twenty hours to do the distance, and I should say that four to five hours out of them are spent at the stations in eating and drinking. It seemed as if no opportunity was ever allowed to escape either of eating huge portions of various roasts, or of coaxing the appetite with a raw cucumber or a herring. Sundry also were the small glasses of corn brandy with which the whole was washed down. Beer, too, appeared to be a favourite beverage, nor was I surprised at it after tasting the contents of a cool bottle stampedjwith an eagle, and the name of the English brewer—"Danielson." It was certainly most luxurious travelling. Most of the passengers were provided with pillows, and many had packages very much like luncheon baskets, which contained, as I soon discovered, sundry delicacies in the way of fruit, cake, bottles of milk (for the babies, of course), and invariably bonbons. There was much smoking, too, of those cigarettes which we now purchase so largely from the Russians. But enough of the manners and customs of the natives in travelling. We must away to the Kremlin, were the people are gathering in masses so dense as soon to fill the large square in front of the palace, and the cathedrals. It was with much difficulty that your correspondent secured a good point of observation. The police held the people rigorously back, employing a device which I would not recommend to the authorities in Scotland-yard. It consisted in their seizing the caps of the most prominent or pushing individuals, and flinging them over the heads of the crowd behind. Of course, the poor Mujik cannot afford to lose his cap, even in cheering his sovereign, and he is, consequently, obliged to fight his way back in search of his property. The trade of the Moscow hatters is, however, thereby made considerably brisker, and, after all, is not the promotion and protection of trade the chief care of the Imperial Government?

The sight with which I was rewarded for my perseverance and squeezing was certainly one of the most impressive that could possibly be imagined. It was the feast day at the Cathedral of the Assumption, where the Tsars are crowned, and the Emperor (who generally visits Moscow at this period) on this occasion came to show his new heir to the people. The pageant at the Winter Palace, described in one of my letters, was but mere form and ceremony; on this day the people welcomed and recognised their future ruler in their old city of Moscow, under the shadow of its holiest habitations, hallowed as they are by miracle-working relics, by the shrines of departed saints, and by the tombs of a long line of princes, dukes, and tsars.

I cannot pretend to give a description of the ceremony, or levée, that took place within the palace on the morning of the festival, and my personal narrative must needs begin with the appearance of the Emperor and his suite at the top of the "Red Stairs," where the old Tsars of Muscovy were wont to let the people see the "light of their eyes," and where several important and even bloody scenes of Russian history were enacted. I may mention that those steps trodden by Dukes, Tsars, and Emperors, were also ascended in 1812 by Napoleon and his marshals. But before the Emperor appears to his subjects outside the palace, let us at all events ask the court chronicler whether any striking incidents have occurred inside. First we learn that the deputy-mayor of the city presented bread and salt to His Majesty as a token of welcome. The Emperor thanked the town council for "associating each of his visits to Moscow with some good deed." They had established seventy free scholarships in the gymnasia, and had commuted some heavy debts owed by certain guilds of the town. Then His Imperial Majesty was presented with some more bread and salt by a deputation from the freed peasants of Moscow. "Is our mother, the Empress, well?" asked the head of the deputation. "Yes," replied the Emperor, with a smile, "and sends you greeting." The clergy from the eight churches of the palace next met the Emperor at the door of the banqueting-room, the ancient part of the Kremlin Palace. Receiving their salutations the Emperor passed on, and issuing out at the top of the "Red Stairs" made an inclination of the head, and taking the Tsesarevitch by the hand showed him to the people as the heir to the crown of all the Russias. The cheers that followed were, to say the least, deafening. There is something peculiar in a Russian cheer—it is like a buzz kept up at the pitch of booming artillery—there is nothing elastic in the sound, but still it is an honest expression of loyalty, and not to be compared with the trained vocal demonstrations of the Russian army. The buzzing seemed as if it would never cease, and the huge bells of John the Great's tower vied with the human throats in making an all-pervading tumult of sound. In ancient days these bells were destined to produce by their simultaneous ringing, whenever the Tsar addressed the people, a tremulous motion in the air, which the Muscovites were taught to ascribe to the all-mighty voice of their potentate. There was one bell, too, that was rung specially at night to invoke the Divine gift of an heir-apparent to a newly-wedded Tsar. All those bells now combined in proclaiming the glad tidings of the Tsesarevitch's arrival at Moscow. This almost indescribable commotion of the air only subsided when the Emperor, followed by his two sons, Alexander and Wladimir, and by his brother the Grand Duke Michael of the Caucasus, entered the old Cathedral of the Assumption, at the door of which he was met by Leonidas, the Suffragan Bishop of Moscow, who officiated in the absence of Philaret, the venerable Metropolitan. I was disappointed at not seeing the old prelate, for he is held in great repute by the people, and is, I am told, far more enlightened than his other colleagues "on the Bench." His appearance too is said to be very striking, bowed as he is with the age of more than eighty winters, yet fulfilling the high duties of his office with the utmost energy of mind. The coming of the Emperor to the Cathedral of the Assumption has of late years been marked by the political speeches of Philaret, but this time the Metropolitan was unequal to the task. Confined to his bed, or, I believe, to his cell in the garden of Gethsemane, near the monastery of the Trinity, where he has caused a grave to be dug for the reception of his body, his Holiness wrote to the Emperor a letter which was delivered to His Majesty before the commencement of service. "Most gracious Sovereign," wrote the Metropolitan, "thou hast this day again been pleased to remember thy old capital. It shines with the light of thy countenance. Amidst the peaceful waves of thy faithful people, amidst the loud exclamation of its light, thou goest to the temple of thy coronation. Enjoying the light of thy countenance thy people will at the same time gaze with eager eyes on thy newly appointed successor. The church in its rejoicing opens wide its gates to thee in all grace. The consolation has not been granted to me as formerly of meeting thee, most gracious sovereign, at the threshold of the temple, and of uniting with thy imperial (literally, Tsarish, prayer my humble petition—May my soul be humbled unto God. However, by the grace of God, I have still the consolation of sending thee from the depths of my seclusion a message of true sympathy, and of raising from the bottom of my heart the voice of prayer to the Almighty. May He receive with favour thy good desires, and make thy people and thy reign happy in them. May they be, in the words of the prophet, the working of truth, peace, beneficence, and the source of welfare. May the All-good Providence preserve thee and thy successor, in true surety of the unity, the solidity, the good government and the well-being of Russia for all ages." The Emperor replied to the Metropolitan, in a rescript, to the following effect:—"When visiting my ancient capital I have been accustomed to hear from you the pastor's words of Christian love, and to receive through you the blessing of the orthodox church, our mother. And this day, before entering the holy cathedral with the heir to my throne, I received your written greeting, so full of good wishes towards myself and towards Russia, which is so dear to me. I regret that the state of your health should not have permitted you to meet with that sympathy in person, and I pray God that your strength be restored and that your days may be long lengthened, to the advantage of the Russian orthodox church, of which, for half a century, you have been the support and the ornament.—Commending myself to your prayers, I remain ever your well-disposed—ALEXANDER."

My excuse for quoting this correspondence is that it throws much light on the relations between sovereign, priest, and people. Since the days of the great Patriarch Nicon, the crown has been very jealous of the power of the church, and has restricted it accordingly. The Emperor is as omnipotent over the church as he is over the army and navy, but I do not see that there is much need for the exercise of any autocratic power—the clergy seem deferential enough (notwithstanding the little episode about the archangel Michael and the book-burning sword), and I am sure there is humility enough in the Metropolitan's letter.

The cathedral was so full that it was quite impossible to follow the Emperor into it. Like many thousands of others, your correspondent was forced to be content with a view of the proceedings in the open air. In the cathedral the Emperor and his family no doubt went through the usual service of the Russian church, kissing towards the end of it, with much reverence, the forehead of the Metropolitan martyred by the terrible John. I cannot move a step without hearing of that tyrant. He is evidently to Moscow what Peter the Great is to St. Petersburg, with this great point of similarity, that they both killed their eldest sons. It is difficult to say which was the worse tyrant, for even as regards cruelty, Peter's treatment of the Streltsi was equal to John IV.'s devastations at the head of the Opritchna.

But see that meek people, so tyrant-ridden, flocking to the review which the Emperor is about to hold. They have not yet forgotten their days of bondage, and hail with loud delight their liberator. Everything, even enthusiasm, is on an enormous scale in this country. It was not a small crowd of idle apprentices and truant boys that went to see the soldiers put through their evolutions, but a vast proportion of the whole population of Moscow, which numbers about 400,000.

The behaviour of the mob was wonderfully good, and there was really very little use for the mounted policemen who pranced about and backed their chargers just like in other countries. It was a capital opportunity of viewing the raw material of the nation, and I could not avoid coming to

Digitized by Google

the conclusion that the stuff was good enough, and only wanted a little better handling. But somehow or other a Russian crowd gives one a feeling of insecurity. The masses of rough morijiks, whom you know to be ignorant and somewhat fanatical, outnumber so palpably the representatives of modern civilisation, that you feel painfully helpless in such a minority. Here was Russia on a reduced scale—a plain boundless to the view on which the people formed but a small living oasis; there was the chief of the State surrounded by a parasitic staff, testing the efficiency of the troops which represented and supported his authority over the country; and there were the dark masses of freed serfs, inoffensive enough, apparently, in face of that large trained force, but wonderfully powerful in combination with it against the lilliputian body of educated and reasoning citizens. My eye took in at a glance all that the malcontents in Russia complain of. How dim must be the prospect of liberty to such a helpless minority! Those masses had only to be kept in good humour; it was only necessary to give them privileges, more land, and as much immunity as possible from state charges, and where would be the party for constitutional government? The lifting of a finger by the Tsar would be a sufficient signal for their utter extinction; not that Alexander II. would ever do it, but there unmistakably is his warrant of office. He derives his authority from the great bulk of the nation, and what can make him relinquish it? Certainly not a fear of insurrection on the part of a comparative handful of men spread over an enormous surface, and therefore incapable of any practical co-operation; the nobles may make speeches and write addresses, the press may grumble in disguised accents, but as long as the Emperor is upheld by 59,000,000 out of 60,000,000 it is difficult to say what argument could be found forcible enough to cause him to divest himself of any portion of his prerogatives. It is only His Majesty's own good judgment, and a pressing want of cash, that can be looked to for the introduction of a less absolute form of government.

PAYING OFF H.M.S. "EURYALUS."

The Euryalus, 35, wooden screw frigate, 2,371 tons, 400-horse power, Capt. William M. Dowell, C.B., was paid off on Saturday, the 23rd inst., after a commission of three years and eight months as the flagship of Sir Augustus L. Kuper, K.C.B., in China and Japan. The Euryalus was commissioned at Portsmouth on the 23rd January, 1862, by Capt. Josling, for the flag of Rear-Admiral Kuper, and sailed from England in the following March. After calling at Madeira, the Cape of Good Hope, and Singapore, she arrived at Hong Kong on the 12th of August, and on the 29th sailed thence for Yokohama, Japan. After visiting Yedo and Nagasaki, she proceeded to Shanghai where Admiral Kuper relieved Rear-Admiral Hope, in the Impérieuse, in command of the station. The seamen and marines of the ship were shortly afterwards landed from the Euryalus and marched to Kahding to oppose the rebels, who were then advancing towards the town. While engaged on this duty two officers and a large number of the men died from cholera, and many others were invalided. The Euraylus afterwards proceeded to Hong Kong, where she remained until February, 1863, when she said for Yokohama. Afterwards, in August of the same year she sailed with the fleet for Kagosima, the stronghold of Prince Satsuma, and engaged the batteries there on the 15th and 16th of August. On that occasion Captain Josling, the commander of the ship, and eight seamen were killed. On the 17th August the Euryalus returned to Yokohama, and remained there until September, 1864, when she sailed with the combined allied fleets, representing the English, French, Dutch, and American flags, for Simonoseki, where an attack was made on the batteries, a force landed, and the acts of bravery performed by a midshipman and two seamen of the Uryalus which led to their being each invested with the Victoria Cross at Portsmouth on Friday last. In this second day's action Captain Alexander was wounded severely, and several of the men were also killed and wounded. The officers and crews of the other ships were not wanting in bravery on the occasion, as an instance of which we may mention that the commander and gunner of one of Her Majesty's ships, with the commander of his Dutch Majesty's ship Medusa, landed from a boat during the night, after the first day's action, and spiked the guns of a powerful battery on the right of the Japanese works, at a time when it was known that the woods which reached down to and surrounded the battery on sides but its sea face were swarming with Japanese. In the action of the following day this battery was powerless. From Simonoseki the Uryalus returned to Yokohama, Nagasaki, and from the latter port to Chusan, whence the Admiral proceeded to Shanghai and Ningpo in the Coromandel screw gunboat, tender to the flagship. The Euryalus, on the return of Admiral Kuper in the Coromandel, proceeded to Amoy, Hong Kong, and Singapore, giving up the command of the station on the 22nd of May last, at the last-named port, to Vice-Admiral King, who had just arrived from England in the Princess Royal. On the 27th of May the Euryalus sailed from Singapore for England, called at Batavsa, the Cape of Good Hope, St. Helena, and Ascension, on her way home, and arrived in Plymouth Sound on the 4th, where she afterwards disembarked Rear-Admiral Sir A. Kuper and his suite, and then sailed for Portsmouth. Of the crew of the Euryalus, John Richards, Admiral's coxswain, and William Hewett, sailmaker, are recommended to the Admiralty for medals and gratuities for long service and good conduct.

Naval and Military.

On Saturday a detachment of the Woolwich division of Royal Marine Light Infantry, in command of Lieut. Rutherford, and comprising three sergeants, four corporals, two drummers, and fifty privates, left head-quarters for Portsmouth, there to join detachments from other divisions, ordered to embark on board the *Orontes*, for China, to relieve detachments of the corps now serving on board gunboats at that station, which are about to be paid off. The Basilisk has also to be commissioned for China.

The officers of the late ship Bombay, who now belong to Her Majesty's ship Narcissus, presented, on the 15th August, a sword to the French Admiral Chaigneaux, in recognition of the assistance and kindness rendered to the survivors of the destruction by fire of the Bombay near Montevideo, by the Admiral and the officers and crew of his flagship Astrée. The presentation had been delayed for the usual formal permission to accept which the rules of the service require, and advantage was taken of the celebration of the anniversary of the birthday of Napoleon, and a dinner given on board the Astrée in honour of the occasion to deliver the sword to Admiral Chaigneaux.

The Bellerophon, 16, 1,000-horse power, iron-clad frigate, built under the plans of Mr. Reed, was again taken to the Maplin Sands on the 22nd, for the purpose of resuming her speed at the measured mile, Maplin Sands. The vessel was in charge of Captain Randolph, of the Steam Reserve; Mr. Matthews representing the firm of Messrs. Penn and Son, the makers of the engines. Six runs were taken over the measured mile, when the average speed was found to be 13·645 knots; mean number of revolutions 57; pressure of steam 22lbs.; vacuum 26; pitch of screw 21 feet 8 inches; and mean draught of water 20 feet. At the close of the trials the Bellerophon was moored off the dockyard, in readiness for being docked the next day.

Decorations of the Victoria Cross have been bestowed on Mr. Duncan Gordon Boyes, midshipman; Thomas Pride, captain of the afterguard; and William Seeley, ordinary seaman, of Her Majesty's ship Euryalus, in compliance with a general order promulgated from the flag-ship, of which the following is an extract:—

"The Lords Commissioners of the Admiralty having transmitted to Admiral Sir Michael Seymour, G.C.B., Commander-in-Chief, decorations of the Victoria Cross, which the Queen has been pleased to confer on Mr. Duncan Gordon Boyes, midshipman; Thomas Pride, captain of the afterguard; and William Seeley, ordinary seaman,, of Her Majesty's ship Euryalus, to commemorate acts of bravery performed by them during the operations in the Straits of Simonoseki, Japan, as recorded in the *London Gazette* of the 21st of April last; and Her Majesty having signified her commands that these decorations should be presented in such a public and formal manner as may be considered best adapted to evince Her Majesty's sense of the noble daring displayed by them before the enemy, and to testify her wish that a decoration which officers and men equally share may be highly prized and eagerly sought after by all, of whatever rank or degree, in Her Majesty's naval and military services—their lordships have specially commanded that in the discharge of this duty nothing is to be omitted which may tend to redound to the honour of this officer and these men, and enhance the value of the decoration."

Capt. Cowper Phipps Coles, R.N., has been presented by the Grand Duke Constantine of Russia, Lord High Admiral of the Imperial Navy, with a massive gold snuff-box, set with diamonds, and bearing the initials of the Grand Duke in diamonds on the centre of the lid. Such an acknowledgment of the worth of the turret principle, which has been so long and persistently advocated by Capt. Coles, must be highly gratifying to him now that the turret is already fitted to about a dozen vessels of the Imperial Russian Navy in the Baltic, and has been tested under all possible conditions of wind and weather.

The 3-gun paddlewheel sloop Alecto, 800 tons burden, recently paid off at Woolwich by Commander Blake, from the south-east coast of America, has been taken into the river to be broken up, having been condemned and stripped as unfit for further service. The iron paddle sloop Trident, having been stripped to her outer hull, now lies off the dockyard at Woolwich, in readiness to be sold by public auction. Her engines and a portion of her fittings will be disposed of separately.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Sept. 24.

As usual, the Prime Minister closed the session of the States General in the name of his Majesty the King. Mr. Thorbecke congratulated the Legislature on the result of the session, as it had been one of progress and activity, which was shown by the principal measures passed, viz., the Bill for regulating the international sugar duties, the new tariff for the Netherlands East Indies, the repeal of the Communal Excises, &c. One day after the sitting was closed, the new one was opened by his Majesty with the following Speech from the Throne:—

Gentlemen,—It gives me pleasure to be able to announce to you that our relations with foreign Powers continue to be most friendly. My Government has given every possible attention to the interests of commerce and navigation with foreign States.

At home, as well as in our colonial possessions, our land and sea troops honourably fulfil their mission. The expedition which our navy, united with those of other Powers, has gloriously terminated in Japan against the Prince of Nagato, has greatly contributed to establish our relations with that country on a better footing.

The condition of our colonies is generally favourable. I regret that in the interior Java has suffered from earthquakes. The new administrative regulations tend to increase the prosperity and welfare of Surinam and Curacca.

In the course of the present session Bills will be laid before you to regulate the press in the East Indies, and other questions touching agriculture and industry.

We may congratulate ourselves that not only the Government, but the provinces and communes, and private societies, rival each other in zeal in the construction of works of public utility; the works undertaken to procure for the capital a more easy communication with the sea are progressing rapidly; the corps of engineers of the Waterstaat continue honourably to fulfil their mission; the construction of state railways continues uninterrupted; various new sections will be thrown open to traffic during the course of the year; other lines of international interest will also be completed. The returns of the lines already open are satisfactory. Private enterprise co-operates powerfully in the extension of our railway lines. The opening of an international line, which recently took place, will soon be followed by the opening of other lines, by which the network of our railways will be connected with the railways of other countries.

Digitized by Google

I hope that the liberal terms of the convention settling the question of telegraphs, concluded at Paris with the co-operation of the Netherlands, will contribute to give more extension to our international telegraphic relations.

The result of the harvest are better than the severe winter and the extraordinary drought which prevailed during the spring had led us to expect.

I have learned with sorrow that a malignant disease prevails among the horned cattle in one of our provinces. Measures have been taken to prevent its propagation. Should further measures be required, I shall solicit your co-operation.

The produce of the fisheries, both by sea and river, is most satisfactory.

Our industry continues to make marked progress. Peace, which has happily been re-established in another part of the world, and the treaties which I have recently concluded, will exercise a favourable influence upon commerce.

The various institutions for public instruction are worthily fulfilling the task entrusted to them; considering the increasing want of them, their development becomes an imperious duty. Since the law on instruction has been in practice the attendance at the schools becomes more and more general.

The projects of law on the organisation of the National Guard, on military barracks, and other Bills which were not passed last session, will be again laid before you.

Projects of law for completing our civil code will soon follow those already laid before you. The draft of the Bill to regulate the state police is ready, and will be laid before you during the course of the session.

The financial condition of the State is favourable, and will suffice to provide for all the wants of the service and to continue the sinking of the public debt. The abolition of the communal custom-houses will not entail any new expenses.

I sincerely hope, gentlemen, that the mutual good-feeling between the Government and Parliament, with the blessing of the Almighty, may tend to the development of the prosperity of the country.

I declare the ordinary session of the States-General to be opened.

Like every Speech from the Throne, this also tells us nothing at all with many words. Every party finds something to praise or to blame the Government for. The indignation, however, is general, that not one word is said about the Bill to repeal the newspaper stamp duty, which, as you will remember, was withdrawn. It is not likely that it will be brought in again during this session. Our legislative Solons seem to shrink from repealing a law which is superlatively illiberal.

The cattle plague has now prevailed here some weeks, and occupies all the public attention. Measures have been taken by the Government to oblige every municipality to do all that is possible for preventing its spreading. Cattle markets are suspended, surveyors appointed, and the expropriation law is carried out in full, so that the authorities are empowered to seize and kill all cattle with suspicious symptoms. In spite of these measures, however, this plague has spread more and more, and has now attacked three provinces.

I told you that the Opposition reproached Mr. Thorbecke that he caused this plague, by not forbidding the importation of cattle and preferring to remain in Dresden. Nothing could have been more natural than that this charge should be brought forward at the opening of Parliament. In both Chambers the Opposition at once reproached the Premier that he had been careless, and as a proof that this was so, an amendment was proposed to augment the sum of 100,000f. asked by the Minister of the Home Department for the expropriation of cattle and necessary expenses to 500,000f. This and a similar motion, however, were rejected by a large majority.

The Finance Minister will deliver his annual statement today, when he lays the Budget before the Chamber. Nothing is known of its provisions. The reply to the Speech from the Throne will come on for discussion in the Second Chamber on Monday next. The debates on the reply are already finished in the First Chamber.

The Queen has started again for Germany.

H.M.'s steamers *Cycloop*, *Maas* and *Waal* will depart on the 1st of October for the East Indies.

The Trading Company chartered the *Argo* for Rotterdam, the *Vertrouwen*, *Clio* and *Zoeloph* for Amsterdam, to convey produce from Java to those ports.

COMMERCIAL.

COFFEE.—The market was very firm. Since the last auction of the Trading Company there is much demand, and several numbers of that auction find buyers at an advance, with the exception of the Malang sorts. The private lots sold consist of 2,400b., ex Medea, at 44½c.; 753b., ex Catharina Maria, at 45c; and 986b., ex Hollandia, at 43½c. Besides, were sold by inscription, 369b. Coro, ex Santa Rosa, at different prices; and 228 casks and 77b. Plantation Ceylon, at 47 to 49½c.

SUGAR (RAW).—The 28,761kr. Java offered at auction by the Trading Company were all sold. The result was very favourable, as the prices were 1½f. to 1¾f. above those of July; the greatest quantity was bought by our refiners. The disposition to buy is still strong, and further large business has been done at still firmer prices.

RICE.—12,500 Neeransie were sold at 7¼f. For fine qualities Java there is much enquiry, but there is no stock.

SPICES.—Continue in active demand, and prices improved importantly. Nutmegs, No. 1, are sold now at 74c., No. 2, at 66c., No. 3, 43c., No. 4, 31c., but holders decline to sell further without an advance. Mace cannot be bought under 69c. for D, and 65c. for E; some of the holders decline to operate without a further advance of 1 to 2c. The quotation of cloves is for No. 2, 25 to 26c.

TEA.—The Trading Company will sell at auction, on the 25th of October, the teas imported during 1865; but the quantity is very trifling when compared with those offered in 1864, which amounted to 14,489, chests. The market is now inactive, in consequence of this auction being announced.

TOBACCO.—Java Leaves: Several auctions took place on the 20th and the Trading Company sold at public sale 790 p. Java *Kotta* at 28½ to 128 c., in average 88 c., and 168 p. Japan at 22½ to 38 c. On the 27th of this month will again be offered, 4,371 p. Java, and on the 4th October 8,586 p. do. of different marks.

RATTANS.—The Trading Company will sell at auction on the 15th of October 59,100 bndl.; the market is steady, but not in active demand, only 3,300 b. Banjermassing, ex Codan, were sold at prices that did not transpire. The general opinion, however, is that firmer prices will be paid at auction, because the Company's stock only amounts to 60,000 b.

JAVA INDIGO.—The market is still very active, but the private stock being very unimportant only a trifling business was done at an advance of 30 cts. on the last sale's prices. On the 26th and 28th of this month will be offered at public sale 119 ¼-chests and 775 ½-chests Java and 663 chests Bengal.

CUTCH.—With a lively demand, and for very large parcels 16¾f. was paid; nothing can be bought now without a considerable advance, the stock being unimportant.

COTTON.—For East Indian and Japan sorts there was no demand, and no transactions took place.

HIDES.—At inscription were sold 500 p. Sourabaya Buffalo, 217 p. do. Ox, ex County of Renfrew; the prices did not transpire.

BANCA TIN dull; the nominal quotation is 55f., but buyers decline to operate.

ARRACK.—20 ¼-casks and 10 ½-casks Sourabaya, ex May Queen, and 125 casks Batavia, ex Ouderkerk a. d. Amstel, were sold at prices that did not transpire.

JAVA COCHINEAL.—The market was animated; on the 26th Sept. 69 ch. will be offered at auction.

MONEY.—The market, whilst apparently tending to further strength, remains with very little animation, though it is clear that throughout the Stock Exchange stocks of all descriptions are not very large for delivery; perhaps a few good purchases would cause an advance in prices. The New Brazilian Loan met with a great demand, and a considerable quantity was bought here. The discount market remains still unaltered. Dutch Two-a-Half per Cents., 62¾; Three per Cents., 72½; Four per Cents., 95¼; Trading Company, 146½; Dutch Rhenish Railway, Four-and-a-Half per Cents., 112; shares, 287½. 'Change on London, 3 mo., f.11.80; 2 mo., f.11.84; short, f.11.93½; Paris, 3 mo., f.46.87½; 2 mo., f.47; short, f.47.35; Hambro', 3 mo., f.35; 2 mo., f.35.11; short, f.35.45; St. Petersburg, 3 mo., f.152., Vienna, 3 mo., f.104.75.

SHIPPING—ARRIVALS.—September 16, at Texel, from Banjoewangie, Cornelia Hendrika.

DEPARTURES.—September 18, from Brouwershaven to Batavia, d'Elmina; to Kanagawa, Pantalon.

FREIGHTS.—Quotations of Messrs. Sauchey and de Fletter, shipbrokers, Rotterdam:—For Batavia: Ouderkerk, a.d. Amstel, 725 tons; Dordrecht, 754 tons; Argo, 537 tons; Mary and Hillegonda, 754 tons. Batavia and Samarang: Eva Johanna, 979 tons; Wilhelmina Johanna, 647 tons; Jupiter, 756 tons; Johannes Anthonius, 720 tons. Batavia and Sourabaya: Medea, 753 tons; Otto, 706 tons; Van der Palm, 487 tons. Sourabaya: Jeannette and Cornelia, 492 tons; Jannetje, 654 tons. Kanagawa and Decima: Duocimina, 246 tons.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

SEPT. 14.

The Swiss Consul at Yokohama writes home to his Government that great events are on the eve of taking place in Japan, and that a war between the Tycoon and Prince Nagato is unavoidable. The former, who enjoys the sympathies of the European Powers, is going to take the command of his army in person, and lead them to battle. On the other hand, Prince Nagato is making the most formidable preparations, and has engaged in his service several European officers to drill and discipline his troops.

Some further particulars of the progress of the fair at Nijni Novgorod have been published in the Russian journals. The prices of tea have been fixed at 106 roubles for the better descriptions, which is somewhat higher than last year, when 100 rs. was paid for the same qualities. The quantity of tea brought to the fair is less than last year, though more than 40,000 chests have arrived, and the dealers assert the quality to be very superior. Concerning the absence of the Bokharians, different reports are in circulation. Some people assert that they will still turn up, whilst others maintain they will not arrive at all. The latter presumption is the most probable, for more than half the period of the fair has already elapsed, and they are known to be generally very punctual. It is reported that the Bokhara cotton — at least a great part of it — has been stopped at Orenburg, where a committee of six or eight dealers has been formed for the purpose of settling the affairs of the Bokharians, and liquidating the debts they left behind them at the last fair. Two or three members of this committee are to

Digitized by Google

send the cotton to the fair for sale and superintend the liquidation of the debts out of the proceeds of the sale. But in the meanwhile some merchants have arrived from Khiva with the intelligence that the Bokharians had protested against the formation of a committee of Russian dealers and their proceedings, that they were able and willing to settle their own affairs without any extraneous interference, and were going to send a deputation to St. Petersburg to make a representation on the subject to the Russian Government. However that may be, the merchants at Nijni Novgorod are placed in a dilemma by the state of uncertainty, for they are now obliged to hold the goods they have sold to the Bokharians, who, perhaps, will not come at all, instead of disposing of them to other purchasers. With regard to the fur trade, which is chiefly carried on by Moscow houses, it is stated to be very satisfactory. It may be considered surprising that Moscow people and not Siberians should have monopolised this branch of trade, as most of the furs and skins come originally from Siberia; but it must be remembered they arrive in a raw state and are carefully dressed by the furriers at Moscow, who have a peculiar manner of doing it, and their superiority in this branch of industry is so great that no foreigners can successfully compete with them.

Field-Marshal von Gablenz, who commanded the Austrian contingent in the war against Denmark last year, is appointed by the Emperor to the chief civil and military command in Holstein under the title of "Imperial Statthalter." This office is spelled *stadtholder* in Johnson's Dictionary, but the learned Doctor is here wrong in his etymology, for the word is not derived from *stadt*, a town, but from *statt*, instead, literally *locum tenens* or lieutenant. The field-marshal will have his head-quarters in the neighbouring town of Altona, where Mr. W. Pustau's splendid house on the Palmaille has been taken as his residence, and is now being fitted up for him against his arrival next week. The house was used last year as the military hospital for the wounded from the seat of war, under the management of the Knights Hospitallers of St. John of Jerusalem, at whose disposal it was placed by its proprietor.

The Board of Trade of this city gives public notice that after the lapse of eight months there will be a competition to fill the vacancy in the Hamburg Consulate at Canton. Candidates for the appointment are requested to send in their applications, accompanied by the needful certificates, to the secretary of the above-named Board.

COMMERCIAL.

COFFEE.—A good demand has sprung up from different quarters, which has tended to enliven the market. Though there is no noticeable alteration in prices, many holders expect a rise very soon, and have in consequence withdrawn their samples for the present. Sales of the week 12,000 bags.

SUGAR.—Raw is from 4 to 8 Sch. Bco., higher with a fair amount of business doing. Refined steady. Sales 18,000 loaves. Ordinary qualities scarce and much inquired for.

RICE.—The only sale reported is 7,000 bags of Rangoon lately arrived per *Edward Albert*.

Nothing to say about Spices.

TEA.—Market very firm and common sorts looking up. Among the the sales by importers were 468 packages Kaisow Congou, 301 ditto Congou, and 299 ditto Pecco, all ex *Persia*; besides which were 500 chests common Congou, and several parcels middling Congou, as well as a few lots of Souchong, Tonkay, and Imperial.

SPELTER.—Prices have rather improved as the stock continues low, 2,000 centners ex warehouse having fetched 14 Marks 14 Sch. Bco. Contracts for later delivery may be made at a lower figure, but buyers are scarce.

SEPTEMBER 23.

The fair at Nijni Novgorod is over, the Bokharians having turned up after all. The following particulars are translated from an article in the St. Petersburg *Russian Gazette*:—At length the Bokharians, so long expected, have arrived at the eleventh hour; but they have brought with them only money, having left their merchandise partly at Orenburg and partly in the Steppes. Their arrival has given general satisfaction, as they are considered honest people and good customers. The merchants are now tranquillised, for there is no doubt that many of them would have become bankrupts if the Bokharians had not come to receive and pay for the goods sold them, as well as settle their outstanding accounts from last year's fair. Unfortunately, the cotton from Bokhara will be too late, as the navigation will soon be closed for the winter; its absence will raise the price of Persian cotton, and have an unfavourable influence on the cotton trade in Russia generally. The book trade during the fair has been very insignificant, the whole value sold being only 40,000 roubles, of which sum 25,000 r. are for church missals and prayer-books. Of iron 400,000 poods were brought to the fair, but not all sold, and prices ruled rather lower than last year. The greatest part of this metal was produced in the Ural mountains. A meeting of the Fair Committee was about to be held, to take into consideration several proposals for the improvement of the fair in future, and facilitating the carriage of goods.

The *Voice* contains a letter from Nijni Novgorod of the 4th inst., from which I translate the following extract: "The fair may be considered as over, for the merchants are taking their departure, being driven away by the wretched weather, and not even waiting for the official closing by the hauling down the flags. At the end of last week many of the shops were closed, and there remain here now but the wholesale dealers in tea, iron, and manufactured goods. The tea trade is bad; 35,000 chests of Kiachta were sold, but more than 20,000 remain on hand, which will probably be sent to Moscow for disposal. All the best teas were sold, and the remainder is of inferior quality. The prices obtained were moderate, and towards the end of the fair underwent a further reduction to find purchasers. There was a fair demand for refined sugar. The drug trade was dull, and no higher prices could be realised than current at St. Petersburg. This week madder was sold at 7½ roubles, and Bokhara cotton fetched 14 to 16 roubles per pood. Of Kislyar wine not much was sold; the price obtained was 2 roubles 60 copeks per eimer. Made wines were not in request, and their imitations are superseded by the local fruit wines. The business done in leather was extensive, and the greater part of the *yuchten*, or "Russian leather," was disposed of. Cotton manufactured goods were in great demand at the end of the fair, the common descriptions being all sold. On the whole iron was dull. No complaints are heard of the settlement of accounts, and at the Bank there are no protested bills. The demand for gold is not large and the price therefore moderate. The new premium loan sold readily at 110½ per cent., including the current interest. Gold stands at 6 r. 20 cop., and for silver the Persians readily pay 21 to 21½ per cent. agio, and for silver roubles 16 per cent. agio."

The captain of the Hamburg barque *Atalanta*, now in the China Seas, writes home to his owners here that he fell in with and saved the crew of the Oldenburg barque *Nubia*, under the following circumstances:—It appears that the *Nubia* was on her voyage from Singapore to Hong Kong, with a cargo of coals, and after leaving Hainan, where she had put in to land some passengers, she was attacked on the 28th of June last by a number of piratical junks. On their approach the captain, being convinced of the uselessness of offering resistance to such overwhelming numbers, took to his boats with the crew, and landed on the coast of Hainan, and after wandering along the beach for three days reached Hai-kow, where they fell in with the *Atalanta*, receiving every kindness and attention from the captain, who took them down to Saigon, for which port he was bound. They subsequently were informed that the *Nubia*, after being plundered by the pirates, was burned by them on the 29th June.

The Zoological Gardens of this city have just received some valuable additions by a present from Mr. J. N. Hulss, the Hamburg Consul at Manila, consisting of a dwarf musk (*Tragulus Kantschil*), and two very rare pigeons (*Phlegoenas cruenta*). The society are already indebted to that gentleman for several other animals, especially a couple of Kerabau oxen. He had collected quite a little menagerie at Manila, among which were some rare and valuable monkeys. During the voyage home Mr. Hulss tended these animals himself, but they unfortunately all died except those above-mentioned.

Mr. Waldemar Nissen has been appointed by the Senate of this city to be Consul for Hamburg at Hong Kong.

COMMERCIAL.

COFFEE.—No alteration in values, but a lively business has been done at previous rates, and market closes remarkably firm. Sales of the week 15,000 bags.

SUGAR.—The late advance in raw is fully supported with sales of considerable extent, among which were 8,300 bags of Brown Manila. Refined firm; sales 18,000 loaves.

RICE.—Business of limited extent, but prices well supported, and some descriptions even 4 sch. banco dearer.

SPICES.—No alteration in prices, and nothing done by importers in the way of sales.

SPELTER.—Some orders for the United States have been executed at 14 mks. 8 sch. bco., but on the whole the market is inactive. The quotations are 14.9 for slabs, ex. warehouse, and £14.6 to 14.7 for forward delivery.

SHIPPING—Sailed: From Cuxhaven, Sept. 19, Fromm, to Singapore. Loading: at Hamburg, Melissa, for Singapore; Garland, for Singapore and Hong Kong; Fidelio, for Hong Kong; Colima, Macassar and Hong Kong; Catharina, for Shanghai.

LONDON, WEDNESDAY, SEPT. 27, 1865.

THE NIENFEI REBELS.

DISTRACTED China no sooner feels relief from the suppression of rebellion in her southern and central provinces, when the hydra-headed monster rears itself in the northern dominions of that vast empire, threatening the capital itself. As the last embers of the Taiping insurrection became extinguished in the ashes of Chang-chow, near Amoy, so the Nienfei Rebels had invested the provincial city of Chi-nan or Tsi-nan, in Shantung, attaining a formidable position with strengthened forces. As a *point d'appui* on the route to Peking, it was at once evident to the Imperial Government that unless a powerful army be sent to drive the enemy from that base of operations, he might soon capture the city and march into the province of Pechelee. With an alacrity unusual in Chinese warfare, the famous General SAN-KO-LIN-SIN took the field and encountered the enemy, with whom he fought several successful engagements, but unfortunately at the cost of his own life. This event, while it disheartened his army, roused the energy of the Nienfei, and they gained further successes, until at one time grave thoughts were entertained of the probable capture of Peking. Indeed, the news of this having been accomplished was telegraphed to Europe by way of Russia, and for a time there was no data to refute the report. The intelligence by the last mail from China puts us in possession of the facts, which show that there was apprehension of an important victory over the Imperialists, but no foundation in the rumour. It appears that TSENG-KWO-FAN, the General who materially aided in suppressing the Taiping rebellion, left Nanking with a considerable force of infantry, armed chiefly with rifles, and made a bold assault on the rebels at the departmental city of Haichow, from whence they were driven, and retreated in great confusion to a position some twenty-five miles north of that which they previously occupied. Meanwhile a body of twenty-three thousand Tartar troops was despatched from Peking to the relief of Chi-nan, under the command of PO-WANG, a son of SAN-KO-LIN-SIN, who is desirous of emulating the skill and courage of his father, and, in conjunction with the Imperial Commissioner of Tien-tsin, is vigorously carrying out his operations against the enemy. In consequence of these active measures, it is reported that the tide of success has turned against the insurgents, who are retiring before the Government forces into the province of Shan-si, on their way back to that of Kan-soo from whence they came.

As to the origin of the rebellion, we have no reliable data to ascertain that. At the same time all accounts go to prove that it is perfectly distinct from the late Taiping movement. There is no religious element in it, so that it differs also from the Mahometan rebellion, which every now and then breaks out in the Shansee province. From their bold advance in the direction of Peking, doubtless with the design of upsetting the Imperial Government, it has been supposed to have a purely political origin. No doubt that element prevails in the movement, in consequence of its success, but we are of opinion that the Nienfei were simply banditti who issued from their rocky fastnesses in the mountain region of Kan-soo, to commit depredations on the industrious inhabitants of the plains; just as the brigands of the Abruzzi used to plunder the inhabitants of the campagnas of Italy. Such, indeed, is the chief element in all these Chinese insurrections. The Taiping rebellion originated certainly as a religious movement, but as it grew its ranks were augmented by bands of marauders for the sake of *loot*. What the meaning of the name of Nienfei—or, as it is pronounced, Nyen-fee—signifies, we have not ascertained, nor do our contemporaries in China seem to know. But there is evidence to conclude that it is a *sobriquet* given to them by the peaceful inhabitants, as "Chang-maou," signifying "long-hair," was given to the Taipings in consequence of their allowing their hair to grow, without shaving the head as the Imperialists do. Be that as it may, these people seem to be a bold and daring race, who may yet cause considerable trouble to the Imperial Government unless they follow up their successes with unusual vigour, and crush out the organization of the movement before the leaders and the main body reach their native fastnesses, which are almost impregnable. In their incursions the Nienfei are on a par with the Taipings in devastating the country and ruining the peaceful and industrious inhabitants. Consequently there is no sympathy between these marauders and the people, in their crusade against the Government. Were it otherwise it would soon assume a formidable aspect. If, for example, the Nienfei were to respect private life and property, and thereby enlist the sympathies or obtain the co-operation of the people in Shantung and Pechelee, in all probability they might succeed in a *coup d'etat* at Peking, where the corrupt Mandarin rule is obnoxious and grinding on industry. As it is, the people, of the two evils, choose the least, and silently or sullenly prefer the existing system to what might be worse in its stead. It was the respect for private property paid by the English and French allied forces during the Peking campaign that raised them so high in the opinion of the inhabitants, which has left behind much good feeling towards the foreigner in China; while the destruction of the Imperial palaces and forts, conveyed the fact that this immunity from depredation was not for want of power. Moreover, the independent position of our troops who remained after the war, and their aid in suppressing the Taiping rebellion, has not only raised the *prestige* of our name amongst the people, but the most prejudiced mandarin is now forced to admit the benefits his country derived from our co-operation. Fain would the Government secure our aid in the suppression of this new rebellion, but their solicitations are in vain, when they see the last of the British regiments leaving China this year, and the neutrality regulations rigidly enforced. It is clearly our duty now to leave the Government to its own resources in crushing out these insurrections. By doing so we not only save our blood and treasure, but force the cunning and astute Chinese to bear the brunt of war in their distracted country, which they so well know how to "squeeze" in time of peace.

POSTAL CHARGES BY THE FRENCH MAIL.

WHEN the French Government subsidized the *Messageries Imperiales* to convey a monthly mail to China and other localities in the Far East, the British and other foreign communities having interests there accepted the postal communication as a boon in addition to the bi-monthly English mails transmitted by the Peninsular and Oriental Company. At the time of its initiation, it was understood that its rates of postage for newspapers, as well as letters, would not materially differ from the English rates *via* Marseilles. Having full faith in the arrangement, we published a separate issue of the *London and China Express*, to meet the requirements of our subscribers; and so far, have no cause to complain of the French postal authorities, in conveying that issue to its destination. In forwarding copies of our journal to China, we deal with the English Post-office, and have always understood that if a newspaper is insufficiently stamped it is liable only to *double the newspaper charge*. It would appear, however, that in this we are mistaken, and the French *charge letter rates* in that case; which very materially alters the advantages of sending printed matter by their mails. This anomaly in postal arrangements has transpired through a correspondence between Mr. MOSSMAN, late of Shanghai, and the Secretary of the General Post-office, which will be found in another column. From that it will be seen the French Mail leaving Shanghai on the 16th June, and delivered in London 8th August, brought copies of the *North China Herald* and *North China Daily News*, which were charged letter rates, as they were insufficiently stamped. The rate levied is "20 centimes for every weight of 40 grammes, or fraction of 40 grammes," equivalent in English computation to twopence

Digitized by Google

for one ounce and a-third. Be it so. It is a fair enough rate, but the condition mentioned in the letter of Mr. PARKHURST that, "if insufficiently prepaid they (the newspapers) are treated as letters," is monstrous, and against all the laws regulating newspaper postage throughout the world. We have endeavoured to find the Imperial Decree under which this rate is imposed, but have failed in doing so. In our search, however, we came across a decree issued by the Empress EUGENIE, acting as Regent in the absence of the EMPEROR in Algeria, wherein similar restrictions attend the transmission of samples of merchandise from France to Shanghai. The rate on such packets is 13 centimes for every 40 grammes, or fraction of 40 grammes, with this condition—"*Les échantillons de marchane* "*dises qui ne rempliraient pas ces conditions seront taxés comm-* "*lettres.*" With this we have no fault to find, but when the same restriction applies to newspapers we think it is time that it should be altered. Meanwhile it will put our contemporaries in China and other places in the East upon their guard how they affix stamps to their issues by the French Mail, for it may throw the whole into the waste basket of the French Post-office, when rejected by their subscribers, as it did in the above case with the *North China Herald* of the 12th June—a copy of which is not to be found perhaps in England. However, as we are not aware the subject transpired before, we have a strong notion that there is some blunder lying with the French officials, who may have applied the new decree of the 10th May, 1865, regulating the transmission of samples of merchandise, erroneously to newspapers. We are supported in this belief by having received two copies of the *North China Herald* under a 40-centime stamp. According to the statement in Mr. PARKHURST's letter this must have been insufficient, inasmuch as the single paper addressed to Mr. MOSSMAN had 20 centimes only, and should have had 30 centimes. On this head the French postal authorities should set us right, by publishing the regulations in the English journals connected with China, otherwise it will damage their receipts, as well as the circulation of the newspapers.

Correspondence.

POSTAL CHARGES BY THE FRENCH MAIL.

(To the Editor of the *London and China Telegraph.*)

SIR,—Perhaps you will deem the following correspondence of sufficient importance to publish in your journal, as it affects the transmission of newspapers and other printed matter by the French Mails. Absence from London has prevented my forwarding it sooner.—Your obedient servant,

SAMUEL MOSSMAN.

23, Charlotte-street, Bedford-square, September 18, 1865.

TO THE SECRETARY OF THE GENERAL POST-OFFICE.

SIR,—By the French Mail of the 16th June from Shanghai, a copy of the *North China Herald*, a newspaper published there, was presented at my residence by the postman, for which he made a demand of five shillings and fourpence (5s. 4d.), although it had the usual stamp of 30 centimes to frank it. On inquiry at the office of the *London and China Express*, and of several friends who receive that journal, I found that the same charge was demanded of them, also that a packet of the *North China Daily News* was marked £2. 12s. 6d., all of which, of course, were refused.

As I am connected with the journals in question, and this extraordinary demand is calculated to damage their circulation, I have to request that some information be given so as to remedy any defect in their transmission through the French Post-office, and ask that you would point out what is the cause of this extraordinary charge—whether it lies within the jurisdiction of the French or English Post-office authorities, and upon what grounds it is made?—I remain your obedient servant,

August 10, 1865. SAMUEL MOSSMAN.

TO SAMUEL MOSSMAN, ESQ.

SIR,—In reply to your letter of the 10th ultimo, I beg leave to inform you that the newspaper to which you refer was received from France with the unpaid letters from Shanghai, and that it was correctly charged, so far as this office is concerned.

Inquiry has been made of the French Post-office upon the subject, and it appears that newspapers sent from Shanghai to this country *via* France, are liable to pre-paid postage at the rate of 20 centimes for every weight of 40 grammes or fraction of 40 grammes, and that, if insufficiently prepaid they are treated as letters. The weight of the newspaper in question exceeds 40 grammes, and the value of the stamp affixed to it is only 20 centimes.

Under these circumstances, no reduction can be made in the charge of which you complain, and the newspaper will be disposed of as refused.—I am, Sir, your obedient servant, W. PARKHURST.

General Post-office, September 6th, 1865.

SIDNEY LOCOCK, Esq., lately Secretary of Legation at the Hague, has been appointed Secretary to the Legation in Japan.

THE Bombay and Bengal Steam Company despatch a steamer once a month from Liverpool to Alexandria, corresponding with another from Suez for Bombay. Passengers for the Straits and China may be glad to avail of this line, which is of course much cheaper than the P. and O. Company's scale. Rates of passage and freight may be ascertained from the agents in London, Messrs. Reynolds, Mann, and Co.

MR. BRACKENBURY, the Consul for the Philippines, left by the mail of 26th inst.

The biddings for 20,00,000 rupees (£200,000) in bills on India took place at the Bank of England. The proportions allotted were:—To Calcutta, 10,51,000 rs.; to Madras, 1,49,000 rs.; and to Bombay 8,00,000 rs. The minimum price was as before, viz., 1s. 10½d. on Calcutta and Madras, and 1s. 10¾d. on Bombay. Tenders on Calcutta and Madras at 1s. 11¾d. will receive about 47 per cent., and on Bombay at 1s. 11⅞d., about 49 per cent.; above these prices in full.

A general meeting of the Oriental Bank Corporation will take place on the 19th October, when an interim dividend for the past half-year will be declared.

The amount of bullion by the P. and O. Company's steamer *Mongolia*, from Southampton on the 20th inst., was:—In gold, to Alexandria, £10,000; to Madras, £1,692. In silver, to Hong Kong, £5,109; to Yokohama, £2,160; to Shanghai, £9,630. Total, in gold, £11,692; in silver, £16,899.

HEALTH OF THE NAVY.

The report just issued on the Health of the Navy in the year 1862 shows that the number daily sick was 3,370, or 57 per 1,000 of the force in the service afloat corrected for time, which was 58,870. There were almost exactly three entries on the sick list for every two men, and a mean of about 18 days' sickness to each man of the force. But a very large proportion indeed of the sick rate in the Royal Navy is from boils, simple catarrh, and injuries of a more or less trivial nature, the duties of the man-of-war's man involving such constant exertion that it is necessary to pay much more attention to trifling ailments than their immediate importance would seem to call for, in order to avoid the risk of their aggravation. The ratio of sickness from disease, properly so called, is in reality very small. The Cape station showed the highest rate in 1862, owing to duties in the Mozambique Channel and in the Zambesi river. The number of men invalided from the navy in the year was 1,944, or 32 per 1,000; and the number of deaths 902, or 15·3 per 1,000. But eliminating disturbing elements arising from accidental duties, that is to say, excluding deaths from casualties by wounds and injuries and deaths from outbreaks of cholera and yellow fever, the death rate in the service as a service is reduced to 9.6 per 1,000, which is very little higher than the death rate among the healthiest class of outdoor labourers in England. It may be said that the death rate in the navy is reduced by invaliding, but the vast majority of invalided men labour under diseases of by no means a fatal nature, and very many of them re-enter the service. The rate of mortality no the Cape station was as high as 23·7 per 1,000; but the station had to sustain the loss of two boats' crews massacred at Bareda in the Arabian Gulf, by Somalis, to whom they had applied for goats and water. Excluding death by violence the ratio of mortality at this station was only 4·3. On the India and China station the mortality rose to no less than 66·3 per 1,000, the great majority of deaths being from dysentery and cholera contracted in river service against the Taipings. The surgeon of the *Euryalus* sketches incidentally a fearful picture of the state of Shanghai, to which his ship returned after the capture of Kahding. He says he learnt that the mortality among the Chinese who had crowded into Shanghai for refuge was at one time so great that there was no burial-ground for about 2,000 of the daily deaths, and the corpses were enclosed in boxes of deal boards, loosely put together, or packed up in straw or matting, and left to rot in the sun. Mortality on the American coast has to bear a certain number of deaths caused by the Mexican expedition. Vera Cruz is a city of open sewers, and is situated on a level surface, the fall towards the sea being so trifling that the courses for foul water, &c., require repeated sweeping during the day. The Mexicans are very particular as regards this act of cleanliness, but under the conjoint rule of France, Spain, and England it became neglected, and the neglect was avenged. The accumulation of offal is kept down by the turkey buzzards, everything being placed on the outside of the houses for removal by these, the scavengers of the place. But besides the perils abroad from foes to health and life, Dr. Mackay has the old tale to tell in this report of foes in our own household. On the very threshold of the seaman's entry into the service, and in the seaport towns of his own country, he has been left exposed to such a mass of disease as renders these localities more destructive to health than the most pestilential rivers of Africa. It is considered that from Portsmouth and Plymouth more syphilitic disease has been sown broadcast over the globe than from any other cities on the face of the earth. Partial measures have at length been devised to mitigate this evil, but it is hoped the day is not far distant when effectual steps shall be taken to remove to the utmost this foul scandal from the nation. The surgeon of the *Euryalus* has reason to believe that most of the 48 cases of syphilis in his return for the first quarter of the year were caught in the same house at Portsmouth; therefore, he adds, "the sanitary precautions necessary for preventing such a common source of immense loss of labour to the service are simple enough." "I have now," he says, "a man under treatment who has had successively the primary, secondary, and tertiary forms of the disease; a strong, hale young man when he joined the ship, he has now become useless to the service. It is one example among many. The disease was almost unknown in Malta until 1860, owing to a system of surveillance established by custom, but whether derived from the knights or from the French it is not easy to say. In 1860 the Maltese women discovering

Digitized by Google

that there was no law upon the subject, refused to submit to the rules of custom. The results of this suspension of surveillance were unhappily so marked that it was found necessary to pass an ordinance in 1861 reviving it. "The beneficial consequences of this law," writes the Deputy Inspector-General, "have far exceeded my best expectations." Facts like these are unmistakable. The bane and antidote are both before us.

THE TAHITI COTTON AND COFFEE PLANTATION COMPANY.

The third ordinary general meeting of the shareholders of this company was held at the London Tavern; G. S. Tower, Esq., in the chair.

The report of the directors stated—"They have at last the gratification of announcing the arrival of cotton from your plantations. Eight bales came forward last month, and were sold at 42d. per lb., and 100 bales have just arrived at Liverpool. Mr. Stewart states he will ship from 16,000 to 18,000lb. by each packet, monthly, *via* Panama, and estimates the crop he was picking at 30 tons weight. He has ordered bagging for 1,000,000lb. weight to meet his anticipated necessities for next year, and calculates by March next his crops will have produced £80,000. The first batch of Chinese emigrants arrived on the 27th February. Further credits have been opened for fresh shipments, and the advices just received from the company's agent at HongKong justify the belief that before the end of the year Mr. Stewart will have a thousand coolies at work on the plantation, independent of the native labour he may be able to command. The distance at which the estates are situated, and the delay in drying the cotton when picked, preparatory to ginning, have been the principal causes which have prevented the earlier arrival of the whole of the March crop. This alone prevents the declaration of a dividend, which your directors confidently hope to be in a position to announce at the next meeting. To meet the disbursements for the shipment of the Chinese, and working expenses which will have to be defrayed before the next crop is available, your directors recommend issuing the remaining shares as may be required, but in accordance with the wish expressed by you at a former meeting, will only issue them, in the first instance, to the shareholders at par, rateably in proportion to their present holding."

The Chairman, in moving the adoption of the report, said he could not help referring to the report, and congratulated them on the great success which they had achieved. Original statements of the prices appeared to him exaggerated. The estimated price of cotton was 2s. per lb., but the samples sold realised 3s. 6d. per lb. The manager believed the value of the cotton was £80,000. At the last meeting a statement was made as to the expenses of getting coolies and labourers. They could not pay those expenses, and they did not wish to make a call, and it would be necessary to issue new shares at par. He begged to move the adoption of the report.

In reply to questions as to the produce of the estates at Tahiti,

Mr. Swarries, the manager, said he had received a letter from Mr. Stewart, their manager at Tahiti. If they wished he would read extracts. "When there is much rain the flowers fall off, but they are immediately succeeded by others. The plants now have as many flowers and more cotton than they had two months ago. I think I cannot be very far wrong in estimating the present crop, with what has been already sent, at 500 bales, or 75,000lb. of cotton. To meet the current expenses, and to enable us to continue the planting and carry on our operations until we can get the crop of 1866, I would strongly recommend the issue of the remaining 2,888 shares. I will have 700 acres planted in September, which will yield a crop of from 60,000lb. to 90,000lb. But to save this crop it is absolutely necessary that 700 Chinese should arrive here in January, 1866. In March I calculated having 1,000 acres planted with cotton, and 100 acres with coffee. I recommend that we should remain content with 1,000 acres of cotton for the present, and then throw our most valuable resources to it, considering of all things it is the most certain and profitable crop. This season has been exceedingly backward and wet, but the plants are loaded with flowers and capsules, and a month's dry weather would enable us to pick out at least 300 bales. Heavy rains are usual in May, so we have reason to believe we will soon have fine weather." As regarded coffee, he wrote:—"The coffee I received from Ceylon has been planted, but I am not certain that it will do well. I have, however, planted the Tahiti seed, from which we can have as many plants as we possibly require. The Tahiti is a superior coffee, and by the next mail I can send you a sample of some picked from bushes grown wild in forests of guava and breadfruits. The coffee-trees, for they cannot be called bushes, are fifteen feet high, and are in the stem as large as a man's arm. You asked me about the time required for planting coffee until it came into bearing. From the time the seed is sown in the nursery until the plants are ready to be sown, it takes a period of ten or twelve months. Sometimes in the second year, a part succeeds always, but in the third there is always a considerable crop. In the fourth year, after setting out the plants, the crop is heavy. I have a ton of coffee to the acre. This fourth year and the year in the nursery makes up the five years, as originall stated in the prospectus. There is no doubt about Tahiti being the finest estate for coffee planting in the world. I have one valley in particular, and to which I am now making a road at present. But before five years I feel certain that it will be of more value than the whole capital of the company. I am very anxious to get coffee planted, but hitherto it has been quite impossible with the aid I have at my disposal. To work this properly—to work it to the greatest extent—would require 2,000 labourers. With 1,000 acres of cotton, and with the advantages that the remainder offers to coffee planting, the result will be magnificent." I have culled, gentlemen, these extracts from the letters received to-day, assured they will convince you of the confidence entertained by our excellent managing director, Mr. Stewart, in the speedy fulfilment of his most sanguine expectations and as evidence of the forethought and judgment he brings to bear on the business he has in hand. To add words of mine would be to paint the butterfly's wing or to gild refined gold. The facts and data supplied to us are worth more than any fine speaking, as they presage dividends, and those of no ordinary kind, and it is the hope of such which has banded us together, and the belief in our realisation of large profits it is that must account for the pleasant faces before me and the gratulatory tone of the present meeting. The report was unanimously adopted and thanks voted to the chairman.

STEAM NAVIGATION ON THE PACIFIC.

(GLOBE.)

We shall very soon have to chronicle a new triumph of shipbuilding and engineering science in the inauguration of two mail routes across the Pacific. The comparatively narrow Atlantic is crossed already in manifold directions—from various English and French ports to numerous points on the American coast between the mouths of the River Plate and the St. Lawrence. The Indian Ocean is also traversed by the steamers from Suez to the Mauritius and Australia; but the enormous breadth of the Pacific has not yet been overcome. There are lines of mail steamers in its waters, but they only skirt the coasts. On the American coast there are the lines from Panama to San Francisco and Valparaiso. On the Asiatic coast there are the steamers of the Peninsular and Oriental Company and the Messageries Imperiales, plying between Galle and the ports of China and Japan; and we may include the inter-colonial lines of New Zealand and Australia. To these undertakings, involving, some of them, the passage of distances as great as on the Atlantic mail routes, there is now about to be added the transit of the Pacific itself, involving the passage without coaling of much greater distances than what have yet been accomplished on any oceanic mail route. One of the two enterprises we refer to—and perhaps the least remarkable—is the American project to cross the North Pacific between San Francisco and Hong Kong, but touching at Honolulu in the Sandwich Islands, and at Kanagawa in Japan. The service was authorised by an Act of Congress approved last February; and last week we were informed from Washington that the Postmaster-General had accepted the tender of the Pacific Mail Steamship Company for its execution. For a subsidy of half a million dollars the company undertake to build four first-class side-wheel steamers of from 3,500 to 4,000 tons burden each, and to make 12 round trips and back in the year, the speed to which they are bound being two hundred nautical miles per day. The term of contract is for ten years, to commence on or before the 1st of January, 1867. The distance from San Francisco to Hong Kong is 7,050 miles, and from San Francisco to Kanagawa, the nearest coal depot, 5,475 miles. This latter distance does not very much exceed that on some of our Atlantic lines, and, as we shall see, the enterprise is outstripped in this respect by the other Pacific route to be inaugurated. But in importance it will be second to no other route across the Pacific. The Americans are already calculating that when it is established and the Pacific Railway, "which will now become an absolute necessity," completed, New York must become the great commercial emporium of the world. Without expecting any such result as this, the line, if well managed, should prove a formidable competitor to the overland route from Europe to China and Japan, especially to the latter country. At Hong Kong the time of journeying to England by both routes will be about equally balanced, but at Kanagawa the American route will have the preference. The Americans, however, can surely calculate on sending all their own passengers, letters, and light goods to China in that way, at a great saving of time compared with the tedious roundabout by Europe. This will be a gain of money as well as time, but whether the prerogative of London as the world's emporium—the clearing-house, where international accounts are balanced and paid—will thereby be infringed, is by no means so certain. The inauguration of the second mail route from Panama to Wellington, New Zealand, appears to be much nearer execution, the ships being actually built or building. The Australian colonies, partly from dissatisfaction with the frequent break-downs and chronic slowness of the Peninsular and Oriental Company's service from Galle, and partly from a desire to have a fortnightly communication with home, have long been agitating for a monthly line to Panama, in addition to a monthly service by way of Galle. In the spring of the present year, accordingly, the colonies of New South Wales and New Zealand, the latter having the most direct interest, finally executed an agreement by which their objects will be effected. The Panama, New Zealand, and Australian Royal Mail Company, which had for some time established a profitable intercolonial service, have now agreed to place four steamers on the line from Wellington to Panama. The subsidy, which the two colonies have halved, is £110,000 per annum, and the speed to which the company are bound 10 knots per hour. One of the ships, called the *Ruahine*, is already built, a fine twin-screw of 1,640 tons; and at her trial trip in May last accomplished a speed of 15 knots with the tide, and nearly 13 against. She is fully rigged as a sailing vessel, so as to take advantage of the regular trade winds, which will practically be with the vessels in both directions. She may, therefore, economise fuel and yet attain the *minimum* speed; but she is able to carry 1,200 tons of fuel, which is more than would be necessary, steaming at full speed the whole distance. When it is considered that that distance is 7,200 miles, the fact is sufficiently striking. It is confidently expected that the *Ruahine* and her sister ships will make the passage between Panama and Wellington in 25 days, so that the entire passage between Wellington and Southampton may be only 45 days. This will be a clear gain of 15 days on the present postal time between England and New Zealand, which quite accounts for the colonial zeal in pressing on the matter. For our part we cannot but welcome the means which bring us into quicker and more frequent communication with our colonies; while we may congratulate them in the present case on their energy in helping themselves in a matter they believe so vital. In connection with this new route we may notice that the Australian colonies, especially Queensland, Victoria, and New South Wales, are favouring a project to connect themselves with Galle by steamers touching the north-eastern extremity of the island continent at Cape York, in Queensland, instead of, as at present, near the south-western extremity in King George's Sound. The Dutch have already a line connecting their various colonies in the islands of the Indian Ocean between Singapore and the island of Timor, and it is proposed to continue it from Singapore to Galle, and from Timor to Cape York. This project, if carried out, as seems likely, will abridge the period of communicating with Queensland and Victoria, while new South Wales and South Australia will have the advantage by the Panama route. It is not likely that the opening of the two great mail routes we have described will be more than the beginning of a series by which the Pacific, like the Atlantic, will be covered with these steam highways. Looking at the mutual commerce already existing among the new-born States on the sea-

Digitized by Google

board and the old empires newly opened to commerce, mail services must spring up to conduct that commerce with efficiency. It is not looking very far forward to imagine lines of steamers connecting Australia with China, with San Francisco, and with Valparaiso. We may expect, besides, additions to the routes which have more direct connection with the European lines. Already a line from Australia to Valparaiso has been spoken of in connection with Mr. Wheelright's project for a railway over the Andes and across the South American continent; and this line, it is expected, will furnish, in conjunction with the River Plate lines to England, a new route to the Antipodes as quick as any of the existing routes. The Panama route may again be chosen for China as well as Australia, while there is some prospect of an intercolonial railway through our own possessions across the North American continent, which would enable us to establish a competing mail line with the American one to Japan and China. Without mentioning other ideas which have been formed, these probabilities are enough to show that their beginning, the opening of the two routes we have described, will be an event of no small consequence in the commercial history of our time.

THE FYCHOW GIANT.

The following description of the "Giant" is from the *Standard*. We cannot profess to eclipse it by any account of our own. Indeed, we might spoil it by "knowing too much."

Chang-woo-Yow, the Chinaman of gigantic proportions who has travelled from the land of the Celestials to these western regions of barbarism for the purpose of exhibiting his manly proportions to the gaze of the British public, held the first of his levees on Monday evening at the Egyptian Hall. Chang, very shortly after his arrival among the pale faces, was permitted to pay his respects at Marlborough House, and having thus chin-chinned the rulers of the land, he now purposes to satisfy the curiosity of all classes of the barbarians among whom he is temporarily sojourning. He is most undeniably a mighty man, if not a man of valour, and enjoys, at the present moment, the honourable distinction of being, not only one of the greatest, but, beyond all dispute, the greatest personage in the three kingdoms. To look at him, as he sits in state, surrounded by other members of the party, whom he dwarfs into insignificance, one is inclined to fancy that the force or freak of nature could no further go in the development, in one human framework, of bone and muscle. But the visitor who supposes this is in error. If we may trust what we are told of Chang in the autobiography which is distributed in the hall, he comes of a race of giants, of whom he modestly confesses that he is the least. No man is a prophet in his own country, or in his own family, and we are given to understand that the giant of the Egyptian Hall is looked down upon literally, as well as perhaps metaphorically, by his immediate relatives.

His father and his grandfather overtopped him considerably. Of those children of Anak he is hardly a worthy descendant. A brother of his, now in the ranks of the Imperial army, though a few inches shorter than Chang, is in all other respects a bigger and stouter man than our hero. Nor are the ladies of his family unworthy of their lofty descent. Chang once had a sister who, when in the flesh, was some ten inches nearer to heaven than he is; but this charming maiden, who stood a trifle over eight feet and a half out of her shoes, was lost by death to the family circle, of which she was, Chang tells us, the consolation and the pride. The premature decease of this young lady, still in the bloom of her hopeful youth, struck Chang to the heart. All the maxims of the ancient philosophers, with which he is well adquainted—for Chang is a scholar as well as a "phenomenon"—failed to aleviate his affliction; and, as a last resource, the unfortunate youth (who is said to have not yet reached his twentieth year) resolved to go upon his travels.

At Shanghai, he tells us, he first looked upon the face of the white man, and what was more to the purpose, one of the white faces looked upon him with other eyes than those of idle curiosity. Chang found, to quote his narrative in the touching simplicity of the original, that the "face was kind." In a little time he further learned, "with great joy"—we quite believe it—"that his hand was open and his heart was good." Here was the balm in Gilead to bind up the broken heart of poor Chang. What all the philosophy of Confucius had failed to accomplish was effected *instanter*, as soon as he discovered that the white faces promised not only good hearts but open hands. Stripped of the beautiful allegory in which Chang has enveloped the transaction, the plain English of it is that a bargain was concluded between Chang and the English agent, and the former consented for a consideration to be made a show of. But Chang would not come alone. He stipulated that a wife meet for him should be found. In his autobiography he opens an uncommonly long yarn about this lady of his affections, who possesses, he tells us, "the five cardinal virtues, benevolence, righteousness, propriety, wisdom, and truth." Thrice fortunate giant to have acquired such a domestic treasure. The possessor of this unheard-of combination of feminine virtues is a pleasing-looking Chinese women, without, however, anything remarkable about her, except that her feet are as small and as distorted as the feet of Chinese ladies usually are.

Chang also brings with him a wretched little dwarf, Chang-Mow, and three so-called other dwarfs. The party altogether consists of four men and two women. Chang, himself, is well worth seeing. It is not merely that he is so very big, though even on that scorce the opportunity of looking at some old-fashioned unmistakable giant is one that does not often occur in these days. But there is an air of intelligence and mildness about his countenance which propitiates the good wishes of the visitor. Chang is none of your fee-fo-fum giants, delighting in deeds of violence and cruelty. Assuredly, there is nothing low, mean, or vulgar in that statuesque countenance, upon which, as Chang sits in his chair of state, you gaze with something of the feelings suggested by the Egyptian statuary in the British Museum or at the Crystal Palace. And when Chang walks down the room, shaking hands on each side with most genuine ease and grace, the impression gains ground on all sides that he is the most amiable, best behaved, and accomplished giant that ever breathed.

The serene affability of his countenance is in strong relief to the sharp-featured visage of Chang-Mow. In the case of that unfortunate little mannikin there is nothing whatever to attract. Mere personal deformity, in itself, is, to our thinking, never a fit thing for exhibition. The dwarf, however, answers the purpose for which, we suppose, he was included in the establishment—that of bringing out, in the highest degree possible, the greatness of Chang. Kwang, the compradore, has an intelligent countenance, and addressed the audience in very tolerable English, which would have been better still, we fancy, if he had not been suffering under great, yet not unnatural nervousness. The giant made a speech in his own tongue, as also did the dwarf. To the fairer part of the audience Chang's wife displayed, with considerable bashfulness, her feet, a privilege in which the members of the sterner sex were, very rightly, not supposed to participate. Both the lady and her attendant seemed highly amused at the ungovernable curiosity shown by their English friends, and were several times compelled to hide their faces behind their fans during a fit of uncontrollable laughter. Mr. Siddons acted as a medium between the Chinese and the audience, and performed his duty with sufficient and commendable briefness. The room in which the levee takes place is appropriately decorated in the Chinese style. The audience was large, in fact larger than the place could conveniently accommodate.

SWINHOE'S PHEASANT.—The *Illustrated London News* has the following notice of Swinhoe's pheasant:—"Ouri Illustration represents one of the most beautiful of the fine collection of pheasants now living in the gardens of the Zoological Society of London. It is a newly-discovered species, which has been worthily named after its discoverer, Mr. Robert Swinhoe, F.Z.S., Her Majesty's Consul in Formosa. 'Few of Her Majesty's consuls,' says Mr. Gould, in his great work on the birds of Asia, 'have more assidiously availed themselves of the opportunities afforded them of collecting the birds of the distant regions in which they have been located than Mr. Swinhoe, and fewer still have shown greater acumen in discriminating and pointing out the distinctions which separate nearly allied species. It is but a just tribute, then, to the merits of this gentleman that so remarkable and beautiful a bird should be named in his honour.' To the same gentleman the Zoological Society are likewise indebted for the male specimen of this bird now in their collection, from which this present figure is taken, and which is the only example of this species which has as yet been imported into Europe. In its native state, Swinhoe's pheasant inhabits the high jungles of the interior of the little-known island of Formosa, rarely descending into the lower hills. In size it is somewhat smaller than the common silver pheasant, which it also resembles in its red wattles and in the form of its tail. The Zoological Society are shortly expecting the arrival of a fresh batch of specimens of this pheasant, which have been shipped to them by Mr. Swinhoe, so that next spring we may hope to witness the reproduction of this species in the Society's gardens; and before many years are passed we have little doubt that a new and brilliant addition will thus be introduced to the pheasantries of this country.

THE BISHOPRIC OF VICTORIA (HONG KONG).—We are enabled to state, on what we deem undoubted authority, that the recent announcement respecting the suppression of the Victoria bishopric is altogether erroneous; and that the nomination of a successor to Bishop Smith is only delayed for a time, in the early expectation of a legislative enactment defining the legal status of the Colonial Church and Episcopate. The following letter from Bishop Smith appeared in *The Times* of the 22nd inst.:—"Sir,—My attention having been called to a paragraph in *The Times* announcing the 'suppression' of the colonial see of Victoria, vacated eight months ago by my resignation, I am happy to inform your readers that, although I am aware of such an impression having been conveyed by remarks made some time ago in conversation by a member of the Government to more than one person with whom I am acquainted, more recent personal inquiries of my own at the Colonial-office have convinced me that no intention of suppressing the bishopric is entertained by the Government.—I remain, Sir, your obedient servant, GEORGE SMITH, D.D., late Bishop of Victoria.—5, Church-terrace, Lee, S.E., Sept. 20."

NEW LINE OF STEAMERS.—We are glad to find that a line of steamers (which has been very much needed for the past twenty years) has been established between Manila and Singapore. It has been a constant source of complaint that mails and passengers should have been so often delayed on the old route between Hong Kong and Manila. We understand that the *Reyna*, under the Spanish flag, has already opened the service, and that she will be followed shortly by another vessel. As soon as these vessels have shown their efficiency, we trust that our postal authorities will be willing to alter the route for our correspondence, and make a fair, if not a handsome allowance for the service. The agents in Singapore are Messrs. Paterson, Simon, and Co., and in Manila Messrs. Philipps, Moore, and Co.

THE Emperor and Empress of Russia have been graciously pleased to receive Judge Monockjee Cursetjee (of Bombay) and his daughter, at the Palace of Tsarsko Selo, near St. Petersburgh.

THE Rev. J. T. Smith, M.A., late consular chaplain in China, has been appointed chaplain of the Refuge for the Destitute, Dalston, N.E.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

ALLARDICE—On the 17th Sept., at 23, Lansdowne-road, Kensington-park, the wife of D. Allardice, Esq., of a son

EVANS—On the 21th Sept., at The Cedars, Colchester, the wife of J. H. Evans, Esq., of Hankow, China, of a son.

MARTEN—On the 21st Sept., at 26, Sandford-place, Glasgow, Mrs. W. T. Marten, of Batavia, of a daughter.

MARRIAGES.

ANNESLEY—ROCHFORT.—On the 19th Sept., at St. Mark's Church, Bath, Francis Charles Annesley, first cousin of the present Earl Annesley, and son of James Annesley, H.M.'s British Consul-General at Amsterdam, and Clementine, Baroness Blockhausen, to Matilda Caroline, fourth and twin daughter of Brevet-Colonel Cowper Rochfort, Madras Army

DEATHS.

BIRD—On the 30th June last, supposed to have been lost, with every soul on board, on his passage from Hong Kong to Swatow, in the P. and O. Co.'s S.S. Corea, caught in a typhoon off the Coast of China, James W. D. Bird, the Commander, second son of John Jackson and Elizabeth Bird, of Boughton Monchelsea, Kent, in the 35th year of his age; also Isabella Jane, his wife, a passenger, aged 25.

DENCE—On the 3rd Aug., at Hankow, China, of dysentery, Robert Dence, Esq., aged 27, while preparing to return to England by the October mail, after an absence of five years from his native land.

EARL—On the 9th July, at sea, George Windsor Earl, of Penang and Wildwood, Hampstead, Magistrate of Province Wellesley.

GORDON—On the 19th Sept., at Southampton, in his 80th year, Lieutenant-General Henry William Gordon, Colonel-Commandant 3rd Brigade Royal Artillery (father of Colonel Gordon).

HARBOUR—On the 29th-30th June, in a typhoon in the China Seas, Edward Henry Harbour, Esq., passenger on board the Chanticleer, only son of James and Jane Harbour, 3, Upton Villas, Kilburn, aged 31.

HARPER—On the 25th Sept., in London, Patrick Rose Harper, Esq., of Banff, N.B., late of Hong Kong, China, aged 40.

LITCHFIELD—On the 18th July, at the Glebe, Sydney, New South Wales, Marian Jackson, the wife of Edwin Litchfield, Esq., of H.M.'s Commissariat, and elder daughter of the Hon. John Smale, Esq., H.M.'s Attorney-General for Hong Kong.

NOBLE—On the 29th-30th June, on his passage from Hong Kong to Foo-chow, in the P. and O. Co.'s s.s. Corea (caught in the fearful typhoon in the China Seas on the above date, and is supposed to have foundered with all on board), Henry Noble, Esq., Manager of the Agra Bank, eldest son of John Noble, Esq., of Gower-street, Bedford-square.

PEMBER—On the 29th-30th June, lost, in a typhoon in the China Seas, Howard Pember, passenger on board the P. and O. Co.'s steamship Corea, fourth son of J. E. Pember, Esq., of the Stock Exchange, and Streatham, Surrey, aged 23.

PIGNATEL—On the 14th Sept., at Bayswater, Victorine Josephine Marie Pignatel, third daughter of Eugene Pignatel, of Lyons, aged 21.

RANGEL—On the 20th Sept., at Edinburgh, Georgey Strachan, eldest son of Rufino Rangel, Esq., aged 10 years.

RICHARDSON—On the 30th June last, lost, with all on board, in a typhoon off the Coast of China, in the P. and O. screw steamer Corea, of which ship he was third officer, Montague Charles, the second son of the Rev. H. K. Richardson, rector of Leire, Leicestershire, aged 27.

COMMERCIAL POSTSCRIPT.

The Cotton Market has further improved ½d. to ⅝d. for American, and ¼d. to ½d. on all other kinds. China quoted 14d. to 14½d., and Japan 15d.

MANCHESTER MARKETS.—The circular of Sam Mendel, dated Manchester Sept. 26th, says:—Sales at daily advancing prices have enabled spinners and manufacturers to establish a very considerable advance. There is a strong market to-day, but with less excitement than over the past few days; buyers are evidently checked by the rapid rise in the value of both yarns and goods, and less inclined to operate further on a large scale. 7 lb. Grey Shirtings quoted at 14s. 3d., 9 lb., 18s. 9d. Cotton Yarn, Nos. 16-24, at 2s. to 2s. 1d.

ARRIVALS NOT INCLUDED IN THE TABLES.—Sept. 25, Burdwan, from Canton; 20, off Dungeness, from Padang, Alcyone; 25, at Falmouth, from Rangoon, Peder Aneus; 24, at Liverpool, from Singapore, William Dixon; 26, at Falmouth from Singapore, Singapore.

DEPARTURES.—Sept. 18, from Brouwershaven for Japan, Pantalon; from Rotterdam for Sourabaya, Jannetjee; 23, from Cardiff for Shanghai, Betty Perlbach; from Swansea for Shanghai, Fort Regent; 20, from Lisbon for Batavia, Konig Willem III. (s.s.).

SPOKEN.—Tricolor, from Hong Kong, July 12, 35 S., 28 E. Woodville, Nagasaki to London, July 17, 35 S., 20 E. Sir James, Bristol to Galle, Aug. 16, 2 S., 21 W. Olive Branch, Columbo to London; Aug. 6, 19 S., 3 W.; Eaglet, London to Colombo, 13 N., 24 W.: Susanna Johanna, Rotterdam to Batavia, 50 N., 7 W.; Louise, Amsterdam to Batavia, Aug. 23, 41 N., 12 W.; Pudel, Hong Kong to New York, July 18, off Frederik Hendrik Rocks, working up the Straits of Banka.

ARTICLES OF IMPORT.

TEA.—There have been no arrivals since those of the Fiery Cross and Serica, reported in our last. Opinions are divided as to the quality of this season's yield, some judges noticing a larger proportion of second class than usual, but the teas are more free from old leaf, and therefore more appreciated. There has been a limited demand for the broken-leaf and dusty kinds of congou at previous prices; those with leaf up to good common have been inquired for from 10d. to 1s. per lb. Fair to good flavory kinds have been dull of sale at about former prices. Good to fine Kaisows, of old season, have been difficult to move, owing to the arrivals of new tea; and quotations are in a measure nominal. In common to fair blackish-leaf kinds transactions have been limited, at about previous rates; the few sales of medium kind show a gradual hardening of the market. In fine there has been but little done. A Chop of Sinest of old season has been taken for the Russian market at 2s. 6d. In new-make Canton kind there is no material alteration to notice. Common Oolongs have been heavy of sale; the fair qualities have found buyers to some extent at full prices for export to New York. Fine are in moderate demand for home consumption. There has been some demand for fair to medium Souchongs for export, and a few parcels have been sold at previous prices. Flowery Pekoes remain as before. In Scented Teas, of old season, there has not been much doing. Common to fair kinds fully maintain former value; but good qualities have been rather more difficult of sale. New Foochow Orange Pekoes have sold from 2s. 10d. to 3s. per lb. In Uncoloured Japans the limited quantity offering checks business; prices show a further small advance. The public sales of Indian teas comprised about 4,000 packages, nearly the whole of which found buyers at very full prices; the finer kinds of Pekoe dust and broken Pekoe selling 2d. to 3d. per lb. higher. In Green teas prices have been very firm, with a slight advance in some kinds suitable for export, the demand for America still continuing. The common qualities of all sorts remain difficult of sale, but all the good to fine kinds of Hyson, Young Hyson, Imperial, and Gunpowder have met with a ready sale. In Canton-made there is no change to notice, they being still very difficult of sale. The public sales of the 14th inst. comprised 3,900 packages Indian tea, of which nearly the whole found buyers. On the 19th inst. 17,033 packages China tea were brought forward, and 11,415 packages were sold, 11,215 packages being printed without reserve. The estimated stock in the United Kingdom on the 31st Aug. last is now returned at 89,500,000 lbs., against 88,500,000 lbs. at the same date of 1864.

SILK.—We have had a continuance of business in China Silk during the past fortnight, and prices of the best descriptions, owing to their comparative scarcity, are firmer, while ordinary and inferior qualities remain as before. In Japan Silk the few bales of new Mibash already arrived have been sold at 32s. 6d. to 33s.; the quality appears fairly good, but the size not so fine as could be desired. Deliveries from 1st to 23rd inclusive:—China, 2,558 bales; Japan, 816 bales; total, 3,374 bales. The quotations are:—Tsatlee, No. 1, 30s. 6d. to 31s.; Taysaam, No. 1, 26s. 6d. to 27s.; Mibash, No. 1, 32s. 6d. to 33s.; Idah "Bricks," No. 1, 29s. to 30s.

COTTON.—Since our last there has been a very large demand, at gradually advancing prices, and with the exception of Western Madras, which is only ¼d. to ½d. dearer, we raise our quotations ¾d. to 1d. per lb., the market closing firm, but not quite so excited as during the earlier part of the week. Owing to the small quantity on the spot, the principal business has been for arrival, the latest sales showing an advance of ⅜d. to 1d. per lb. on last week's prices. During the week there were sales on the London market of 160 bales China, fully fair to good, at 12½d. to 14d., and 30 bales Japan, fully fair, at 14d. The stock of China and Japan in London on the 21st was 2,630 bales, against 24,123 same time last year. The total stock in London was 47,421 bales, against 84,672 at the same date of 1864. Of Cotton afloat to Europe on the 22nd inst., the China consisted of 5,954 bales, against 74,756 at the similar period of 1864; and of Japan 294 bales, against 9,115 bales last year. The total stock of cotton in Liverpool on the 22nd inst. was 350,000 bales, against 497,180 bales last year. At that port the market was animated throughout the past week; sales were effected to an unusually large extent, and prices gradually advanced. Middling Orleans is quoted at 19½d., and fair Dhollerah at 14½d. per lb. There being a restricted supply of China and Japan only a moderate business was done in these kinds, but prices are 1d. per lb. higher than at the close of last week.

SUGAR.—An active demand has prevailed since our last; only a moderate supply has been offered by auction, but privately considerable business has been done at very full prices up to fully 6d. per cwt. advance, and at the close of the week business was checked by holders who did not appear as sellers except at higher prices. At auction 5,927 bags good Muscovade Manila were bought in, but sold afterwards at 28s. 6d. to 29s. 6d. By private contract of sales reported on the spot there are—Manila, clayed, 30,000 bags, 32s.; Muscovade, 8,000 bags, 28s. 9d. to 29s.; and on the 22nd inst., also privately, 6,000 bags Manila, at 32s. 3d. to 32s. 6d.

COFFEE.—The improved demand noticed in our last has continued for Colonial descriptions, and prices show some advance. Ceylon: 1,252 casks, 86 barrels, and 335 bags Plantation offered by auction, sold readily at a further advance of 6d. per cwt., fine fine ordinary to low middling 78s. to 81s. 6d.; middling to good middling colory, 82s. 6d. to 87s.; 762 bags Native sold freely at rather higher prices, good ordinary, 65s. 6d. to 66s. 6d.; fine ordinary, 67s. to 68s. Of other East India, the quantity offered has been mostly taken at fully the relative value; 234 bags Singapore from 72s. 6d. to 73s. 6d. for fine ordinary pale; and 772 bags Manila, partly taken, fine ordinary pale, 70s.; black, 20s.

RICE.—The market continues very firm. During the past and the preceding week about 30,000 bags new Nakrenzie have been sold at 11s. to 11s. 3d. On the 22nd, 2,950 bags Rangoon, paddy, were sold by auction at 10s. to 10s. 6d.

CAMPHOR.—In improved demand, with fair business in China at 92s. 6d. to 97s. 6d. per cwt., and Japan at 95s. to 97s. 6d.; sales of the latter for arrival recently effected at 100s.

CASSIA LIGNEA.—Is again about 3s. per cwt. dearer; and 560 boxes sold at auction at 87s. to 92s. per cwt. for 3rd to 1st pilo. Privately a large quantity has changed hands on more than corresponding terms.

Digitized by Google

Buds: Quiet; 39 boxes at auction retired at £11 per cwt. Cinnamon (Ceylon): We quote 1st sort 1s. 7d. to 2s. 9d. per lb.; 2nd, 1s. 5d. to 2s. 4d.; 3rd, 1s. to 1s. 10d.; 4th and Jungle, 1s. 1d. to 1s. 5d. Steady, with moderate business on former terms.

COCOANUT OIL.—This market has been very animated, with a large business at gradually advancing prices, closing £3 to £5 per ton higher than at the date of our last; fair sales have also been effected for arrival; 1,207 casks Cochin and 121 Ceylon at auction.

DRUGS.—Cubebs: flat; only 10 bags at auction, and those retired. Dragon's Blood and Galangal Root: nothing doing in either. Rhubarb: A recent arrival of 65 boxes was advertised for public sale, but 30 boxes having been sold privately the remainder only was offered, and sold at the extraordinary prices of 10s. 6d. to 10s. 7d. per lb. for fine flat, and 9s. 11d. to 10s. round; but 49 cases, various small parcels of inferior and ordinary quality, were all retired, there being, at present, no demand for these descriptions.

GUMS.—Benjamin: Continues steady; of 92 cases at auction, one-third sold at £10. 7s. 6d. to £11. 15s. per cwt. for false packed second quality and £6. 15s. fair third. Damar: Has brought about previous terms; and of 124 cases at auction, about three-fourths sold at 48s. to 49s. per cwt. for good picked. Gamboge: Firm; 29 cases sold at auction at £9. 2s. 6d. to £9. 15s. per cwt. for middling pipe.

GUTTA PERCHA.—Fine quality firm and scarce; of 44 baskets and 8 tons at auction, only 5 baskets sold at 2s. 2d. per lb. for fine.

HEMP (MANILA).—Demand has recently improved, and sales to some extent have been effected up to £35 per ton for good roping. Only 145 bales old at auction, sold at £33 to £33. 10s. per ton.

HIDES.—The quantity of East India offered at the sales on the 14th was moderate, and with a good demand for consumption and a moderate one for export, nearly the whole found buyers at prices generally showing an advance of ¼d. to ½d. per lb. upon those of the last sales. 727 Singapore Buffalo Hides offered and sold at from 5⅞d. to 6¾d. per lb. 992 Java Buffalo Hides offered and sold at 3¾d. to 5⅝d. per lb.

HORNS.—Buffalo: Firm; and 11 tons Penang, 4 tons Manila, and 2 tons Madras, sold at auction at 43s. 6d. to 44s. per cwt. for 3½ to 4 lbs. average; 39s. to 39s. 6d. for 2¾ lbs., 21s. 6d. for 1⅛ lb. Deer: Firm; and 4 tons Cochin, and 1 ton Ceylon sold at auction at 61s. per cwt. for 1½ lb. average, and 46s. to 49s. 6d. for 1⅜ to 2 lbs.

INDIA-RUBBER.—Good scarce, and wanted; 91 baskets Penang at auction retired; and of 98 packages Assam one-third sold at 7¾d. per lb. for ordinary ball.

JAPAN WAX.—Steady: of 30 boxes at auction, one-third sold at 73s. per cwt. for good saucers.

OILS.—Anniseed: has been dealt in to a large extent at advancing prices, and the considerably increased quotation of 7s. 9d. has recently been obtained: sales having also been effected for arrival at 7s. 6d. per lb. Cassia: firmer: of 27 cases at auction about half sold at 7s. 9d. per lb., and private business has also been done at that figure. Cinnamon, and Mace and Nutmegs: only two cases of each of these oils at auction, and all retired.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7 to £7. 5s.; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10.; sheets, single, £10. 10s. to £10. 15s.; Staffordshire bars, £8. 10s. to £9. 10s.; rails, £7 to £7. 5s.

STEEL.—Swedish keg, £15.

COPPER.—Sheet and Sheathing, £91 to £93 per ton; yellow metal, 7½d. to 7¾d. per lb.

TIN.—92s. to 94s. for block; 94s. to 95s. for common bars. Tin plates best charcoal, I.C. 29s. 6d. to 31s.

LEAD, &c.—English pig, W.B., £20. 10s.; shot, patent, £22. 10s.; sheet, £20 to £20. 5s.; spelter, £21. 10s. to £21. 15s; zinc, English sheet, £27. 10s.; quicksilver, £7. 18s. 6d. to £8.

The following is from the Circular of Messrs. French and Smith:—Since our Circular of the 5th inst. some slight improvement in the demand for metals has been apparent, but for the most part prices are no better. In Scotch Pig Iron there has been some speculative business, and the quotation is now about one shilling per ton dearer. For Copper there is rather more demand, but no advance in price. Tin: English is without change. Straits have been inquired for, but we cannot report any advance in price; several parcels have changed hands at 88s., at which more is offered. Tin Plates very firm. Lead dull. Spelter also dull.

EXPORT OF BULLION TO CHINA, &c.

FREIGHTS AND CHARTERS.

A fair amount of business has been done during the past week from London for the China ports, and a large quantity of freight is still offering. Coal freights to Shanghai are in brisk demand at £52 per keel from the Tyne, for other ports, however, they are somewhat heavier.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 35s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £40 and £1. 19s. For Shanghai: £50 and £2. 6s. For Manila: £1. 15s. to £1. 17s. 6d. For Batavia: 24s. to 26s. For Singapore: £29 and £1. 8s. For Galle: £28 to £30 and £1. 5s. 6d.

Digitized by Google

These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have invited tenders for the conveyance of 10 tons combustibles, and 10 tons naval stores from the River Thames to Hong Kong.

CASUALTIES.

The Numa Vidal, Roura, from Sumatra for Marseilles, put into Mauritius Aug. 7 for repairs, having sprung a leak July 21, in 33 S., 24 E., during a very severe gale, which lasted 24 hours.

The Japara, Zweede, from Batavia for Rotterdam, which was spoken Aug. 7, in lat. 35 S., long. 24 E., was leaky, and had broken one of her pump boxes. She was supplied with another by H.M.S. Rapid.

The following notices have been posted at Lloyd's:—The Johan Lange, Lampcke, sailed from Padang on the 10th Feb. for Holland, and has not since been heard of. The Chanticleer (s.s.), Sargant, left Hong Kong June 29 for Swatow, and has not since been heard of.

MISCELLANEOUS.

At ASCENSION.—Aug. 7, H.M.S. Serpent, sailed for Japan; 2, from Singapore, Clarendon, King, and sailed for London; 15, from Sourabaya, Alert, and sailed for Amsterdam.

At ST. HELENA.—Aug. 7, from Nagasaki, Woodville, Laurence, and sailed for London; 8, from Colombo, Palmyra, Richards, and sailed for London; 9, from Sourabaya, Glencaple, Crowder, and sailed 10 for Amsterdam; 11, from Hong Kong, Magdalena, Schmidt, and sailed for Monte Video; from Sourabaya, Prins Carl, Hartzell, and sailed for Rotterdam; 12, from Singapore, Silver Cloud, Carr, and sailed 14 for London; 14, from Colombo, Gulnare, Stevens, and sailed 15 for Gibraltar; 17, from Batavia, Fanny, Wulff, and sailed 21 for Amsterdam; from Singapore, West, Hawkins, and sailed 22 for London; 22, from Foo-chow-Foo, Black Prince, Inglis, and sailed for London.

At MAURITIUS.—Aug. 7, from Sumatra and Reunion, Numa Vidal, Roura (with damage).

THE NORTH-CHINA INSURANCE COMPANY.

(ESTABLISHED 1st JANUARY, 1863.)

CAPITAL, TAELS 1,250,000, IN 250 SHARES OF TAELS 5,000 EACH.

Paid up Capital, Taels 1,000 per Share.

DIRECTORS.

L. G. DUNLOP, Esq. (Messrs. Birley, Worthington, and Co.), Chairman.
E. H. Lavers, Esq. (Messrs. Gilman and Co.).
Sol. D. Sassoon, Esq. (Messrs. David Sassoon, Sons, and Co.).
H. Howe Wiggins, Esq. (Manager Commercial Bank Corporation of India and the East).
David Reid, Esq. (Messrs. Reid and Co.)

The Company being about to be reorganised for a further term of three years, from 1st January, 1866, application for Shares will be received by the undersigned until 31st October current.

A certain number of Shares have been allotted to London, but further applications from there will be received until 30th November.

Application for Shares, from persons not resident in Shanghai, must be accompanied by Power of Attorney to their Agents, to sign the Deed of Settlement on their behalf, and generally to represent them in all matters connected with the Company.

By order of the Directors,

J. S. MACKINTOSH, Secretary.

Shanghai, July 12, 1865.

FORM OF APPLICATION FOR SHARES.

No.

TO THE DIRECTORS OF THE NORTH-CHINA INSURANCE COMPANY.

Gentlemen,— hereby request you will allot to Shares in the above Company, and agree to accept such Shares, or any less number you may allot to ; and agree to pay the first call of Tls. 1,000 per Share, and all subsequent calls, and to subscribe the Deed of Settlement whenever required to do so.

Gentlemen,

Your obedient Servant.

Application for the Shares allotted to London must be made to—

ASHTON AND CO.,
AGENTS,
HATTON-COURT, THREADNEEDLE-STREET.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

THE BANK of HINDUSTAN, CHINA, and JAPAN (Limited).

NOTICE OF CALL OF £5 PER SHARE ON 20,000 NEW SHARES.—THIRD ISSUE.

Notice is hereby given, that the Directors have this day made a CALL of £5 per Share on the 20,000 New Shares in this Company, PAYABLE on the 12th day of October next, at the Banking-house of the Company, 1, Bank-buildings, Lothbury, London. Interest at the rate of 10 per cent. per annum will be charged on all calls not paid on the above date.

By order of the Board,

R. SWIRE TOMLIN, Secretary.

No. 1, Bank-buildings, Sept. 18, 1865.

THE BANK OF HINDUSTAN, CHINA and JAPAN (Limited).

1, Bank-buildings, Lothbury, London.

Capital, £4,000,000.

Paid and to be called up, £1,000,000.

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,
METALLIC PEN MAKER TO THE QUEEN

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York, and at 37, Gracechurch-street London

WHITWORTH RIFLES.

THE MANCHESTER ORDNANCE AND RIFLE COMPANY beg to give notice that WHITWORTH ORDNANCE RIFLES and AMMUNITION are manufactured by Mr. Whitworth's Patent Machinery only at their works in Sackville-street, Manchester.

Application may be made either at the above works, or at the Company's Office, 28, Pall Mall, London, S.W.

The Rifles and Ammunition may be also obtained through the agency of any respectable Gunmaker.

N.B.—In the International Match at Wimbledon in 1864 all the competitors used the Whitworth Rifles

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, in all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot of 12, RUE RICHER, PARIS.

THE "LONDON AND CHINA EXPRESS" ON SALE

UMBRELLAS and SUNSHADES suitable for all Foreign Markets and the Colonies are supplied to Shippers on the most favourable terms by JOHN MORLAND and SONS, Wholesale Manufacturers 50, Eastcheap, London-bridge, City. Silk, Alpaca, Gingham Steel Frames, Canes, Fittings and all kinds of Materia for the Trade. Oiled and japanned silks and cambrics.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists, Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co's Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S PILLS.—CONFIDENTIAL ADVICE.—To all persons who suffer from bilious headaches, disordered stomach, biliousness or flatulency, these Pills are most strongly recommended as the safest, best, and quickest mode of obtaining ease, without weakening or irritating the nervous system. Holloway's Pills are especially useful in clearing away any excess of bile, which usually produces fever, unless remedial measures be adopted without delay. In asthma, bronchitis, congestion of the lungs, &c., they may be relied upon for removing all danger, and by purifying and regulating the circulation they effectually prevent relapses. By rousing the liver to a fair secretion of bile, and quickly carrying it off from the system, these Pills ward off low spirits, listlessness, and those distressing feelings often called nervous.

Summary of News from the Far East.

"LONDON AND CHINA TELEGRAPH" OFFICE,
12, George-yard, Lombard-street,
Sept. 30, 1865.

The incoming mails alluded to in our issue of the 27th inst. were delivered this morning.

The dates from Yokohama are down to the 26th July, Shanghai 5th Aug., Hong Kong 12th, Manila 5th, and from Singapore 19th.

The following summary of news is from the *China Mail* of the 12th :—

The English mail of June 26th arrived on the 7th Aug.

There appears to be a lull in political matters at Peking, so far as concerns foreign countries, which may be attributed to the expected arrival of Sir Rutherford Alcock, our new Minister for China. Many questions, commercial and otherwise, are at present pending his arrival ; and some anxiety exists as to the success of his regime. It seems to be a question whether China is to get the better of us, or we the better of China ; the object to be attained will of course be that neither should get the better of each other. The loss of Sir Harry Parkes, by his removal from Shanghai, may eventually have an effect upon the progress of affairs in China. What we want is the most open intercourse—commercial, social, and religious—with this vast Empire. It would almost appear that we are making rapid strides in this direction. The growing prospects of a railway, or of several small lines of railway, lead us to believe that foreign intercourse with the country is likely to improve.

We are glad to notice that Imperial authority is again in the ascendant, the Northern Rebels having been successfully kept back. It was high time that something should have been done in this direction, as constant anxiety and annoyance was caused to the representatives of foreign Powers by the continual internal disturbances which prevailed in the Empire. There cannot be a doubt that, if those were ended, trade would prosper, and that the merchant, missionary, and traveller would have free access to every province of the Empire. This is precisely what we have been working for during the last twenty years, and the prospect of success cannot fail to be gratifying to the people of England. Such a prospect does not certainly seem to be much brightened by the appointment of Teseng Kwo-fan, before noted ; but this act on the part of the Imperial authorities at Peking must be looked upon as in some measure prompted by motives both prudent and politic.

An interesting project—and one not at all opposed to the views here hinted at—has been mooted in Shanghai, having for its object no less than direct telegraphic communication, *via* Tientsin and Peking, through Russia, to London. Mr. Grant, apparently well-informed on such matters, and favourably known as one who has carefully traversed the route proposed to be taken, has laid the subject before the mercantile community of Shanghai, offering to start the scheme for 10,000 taels, and keep it in motion with the expenditure of a like sum. The profits to accrue therefrom are calculated to exceed the outlay by something like 50 per cent. ; and, on the whole, the realisation of the idea bears the stamp of feasibility, and it is likely to be taken up by the enterprising merchants of the North. It would be, to say the least, curious were communication between England and the East opened up by way of Shanghai, Tientsin, Peking, and Russia before the completion of the less probable lines *via* India and the Straits.

From Shanghai we hear of great damage having been caused by late heavy rains, to the growing crops of paddy, cotton and other necessaries of life, in the vicinity, and in fact all over the hitherto rich province of Kiangsu. But the devastation appears to have spread far and wide ; and when we consider the inertion and indifference of the Mandarins and other officials, the prospect is not a very inviting one for the poor native population. As is too often the case, we fear that foreign assistance will have to be called forth, if the emergency prove as great as is now anticipated.

Some items we give below from Soochow and Ningpo, as we find them recorded by our contemporary of the *North China Market Report*. One of these is a characteristic native rumour regarding the fate of the notorious Burgevine ; who, along with other prisoners, is said—clumsily enough, it is true—to have been accidentally drowned in a boat. Though no one can much mourn even were such to prove correct, it is not to be expected that the American representatives will accept such a lame explanation of the fate of their roving countryman. Our contemporary has the following :—

SOOCHOW.—The usual routine of work at the Soochow arsenal is being prosecuted, guns and other munitions of war are being rapidly turned out for the use of the Imperialists, but nothing of any political importance has lately transpired. The Futai continues to hold the appointment of acting Governor-General of the two Kiang, his place being supplied at Soochow by the late Fantai of the province. A report has been brought down, to the effect that Burgevine, and the other prisoners captured at Changchow, were accidentally drowned on their way from Foochow to Soochow for trial by the governor. As a matter of course, while no one doubts the death of Burgevine and the others, no one believes the explanation officially offered.

NINGPO.—Our advices from this port continue satisfactory. The roving bands whose members did so much damage some nine months ago, have decreased in numbers, and are now easily held in check by small bodies of Anglo-Chinese troops sent from time to time to scour the creeks.

From Japan there is positively nothing of political interest to record. Now that the activity of our new Minister there has been thrown into the balance, things may be expected to move on somewhat more satisfactorily ; and, besides, Sir Harry Parkes is certain to be a popular representative, which is of considerable importance in a country such as Japan. Unfortunately, the rains, alluded to as so destructive in Kiangsu and elsewhere in China, have likewise proved disastrous to the crops in Japan. This has caused prices of provisions and vegetables to be doubled, and a famine amongst the poorer classes appears imminent. The Daimios, with the instinct peculiar to Eastern landholders, have determined to make the most of the occasion by withholding their stocks for higher prices.

From Foochow and the coast ports, nothing is reported worth noting. The tea trade in the former settlement continues brisk, while the heat is reported as unusually oppressive.

Macao is as quiet, politically speaking, as it has been for three centuries ; but the place is at present being besieged by pleasure-seekers, who proceed thence to escape the extreme heat and bustle of Hong Kong.

In Hong Kong, the weather has been felt more than for the past ten years, and the mortality in consequence has been unusually large. Twilight trips to the suburbs of the island, up the coast, to Macao, and elsewhere help to relieve the monotony of existence ; and many other species of enlivenment are practised by the residents. A sumptuous tiffin was given on board the steamer *Elgin*, to a large company, by the promoters of the China and Japan Steam Navigation and Labuan Coal Company. Mr. Spencer Price, secretary of the company, performed the duties of the chair, and with the aid of "toast and sentiment" an hour or two were very agreeably disposed of.

The five foreigners, who had been sentenced to death at the Supreme Court of this colony for piracy and murder, underwent the extreme penalty of the law, notwithstanding the influence of the Macao authorities having been exerted to save them. The case was carefully investigated by the Executive, able counsel being retained to urge all extenuating circumstances. Not a weak link could be discovered in the evidence, nor a doubt cast on the justice of the sentence. The men died protesting their innocence, and there is a strong feeling prevailing on the subject, under the idea that Government should have provided means of defence at the trial.

A correspondent has sent us the following brief notice of the state of affairs at Hankow :—The river now stands at a height of forty-four feet above its last winter's level, and much of the country is flooded. It has, in fact, risen to a level with the bund in front of the Custom House, and three feet further rise will completely inundate that venerable institution. The current proves at times dangerously strong. On the 21st ultimo two large rafts, one belonging to Messrs. Dent and Co., and the other to Messrs. Hogg Brothers, accompanied by a number of junks, drifted upon the steamer *Kiukiang*, causing her to break from her hulk and come into collision with the *Sze-Chuen*, which was moored at Messrs. Russell and Co.'s jetty. The *Kiukiang's* starboard paddle-box was broken, and her wheels considerably damaged. The *Sze-Chuen* lost her port cat-head, both accommodation steps, awning, stanchions, bowsprit shrouds, and bobstays, and started her bowsprit. The *Fire Queen*, which lay a little further down, might have fared as badly, but fortunately had steam enough to go ahead and get out of the way. Great risk attends a sailing vessel anchored in front of Hankow unless she has a steam-tug alongside. If she should get adrift, she would certainly fetch up on some covered bank and slide off when the river fell.

Two large towns in Sze-Chuen, Chichi-Hsien and Chen-Hsien have been swept away by the flood.

We are credibly informed that the fortifications of Macao are being strengthened to an enormous degree—to such a degree, in fact, as to render the place a second Gibraltar. We shall begin by reminding our readers that Governor Guimarens failed to get the Portuguese treaty ratified, when he went to Tientsin for that purpose, owing to the fact that his proposals could not be listened to so long as a certain clause (Art. 9th, we think) appeared in the treaty submitted for ratification. This article contained a very simple truth, which was to the effect that the Portuguese had held Macao for three centuries—a fact which it would not be easy to gainsay or dispute. Possession, as we all know, is nine-tenths of the law, but the Portuguese authorities have evidently determined to make it ten-tenths.

From Singapore the political news is *nil*. The mail of 10th July arrived on 11th August.

In general imports from Europe the market has been very inactive during the past fortnight. The recent heavy supplies of cotton goods caused considerable anxiety on the part of the holders to effect early sales, and on most descriptions lower rates have been accepted. In Grey Shirtings clearances have been made to a large extent, as well as in T-Cloths. Maddapollams and Drills have been in fair demand. For White Shirtings there has been an active inquiry, particularly for the finer qualities, and stocks are now small. Clearances in Spotted Shirtings have been very limited, at a further reduction in price. Cambrics have been in moderate request and prices supported. In dyed goods generally the transactions have been on a very limited scale, at about previous rates. In Grey Twist sales have been made to a moderate extent, without alteration in prices. Coloured Twist has received more attention. For Woollens generally the demand has been very dull, but some articles have moved more freely. Coals continue in request, and high rates still obtained. The demand for metals has been unprecedently dull. The clearance in marine stores have been on a very limited scale.

The present low rates of freight and exchange, as well as the paucity of supplies of exports suitable for Europe, have caused an improved demand and advance in price on most articles. Coffee has realised high rates in sales by auction. Hides and Horns command extreme prices. Gambier has slightly receded in value. Gutta Percha continues in active request. Black Pepper is rather scarce at former prices. Rice: Firm, and since the arrival of the China mail prices are advancing; Rattans are scarce and in great request. Pearl Sago and Flour are without change.

COMMERCIAL REPORT.

TEA.—CANTON.—Congou: 13 chops have arrived, 6 of which have been taken at rather irregular prices, those last purchased, however, are fully one tael over opening rates. Canton Congous are unaltered. Scented Teas: Teamen are anxious to clear out their stocks, and lower rates are looked for. The settlements during the fortnight have been at last quotations. Canton green teas much neglected. Country green teas have only been purchased to fill special orders. Settlements of the fortnight: Country Congou, 6 chops Oonams, at Tls. 28 to 32. Canton Congou 300 half-chests, and 1,500 boxes, at Tls. 20 to 28. Scented Orange Pekoe, 10,000 boxes, at Tls. 24 to 41. Scented Caper, 12,000 boxes at Tls. 12 to 35. Canton greens, Imperial, 500 boxes, Tls. 18 to 20; Gunpowder, 500 boxes, at Tls. 23 to 24. Country greens, 1,100 half-chests, Gunpowder at Tls. 36 to 52; Imperial at Tls. 33 to 49; Young Hyson at Tls. 25 to 26, and Skin at Tls. 15 to 20 per picul.

SHANGHAI.—Black: A moderate amount has been done, the demand being mostly for the finest grades, which are scarce; this has somewhat restricted operations. Good to fine, second crop Oopacks, have brought full value, while common to medium grades are slightly easier. The greater part of the first crop is now to hand, and advices from the country state that there will be a deficiency of about 60,000 chests compared with last season. The settlements are 29 chops, 14,060 chests. Oopacks, good to fine at tls. 28 to 33, Ningchows at tls. 28.5 to 35, and Hohows at tls. 21 to 25 per picul. Re-shipments, 6,500 chests; total, 20,560 chests. Stock 32 chops, 16,000 chests. Green Teas: There have been arrivals of 2 chops new Pinsueys, which have been settled at tls. 39 to 40: this is looked upon as extreme rates, which are not likely to be maintained. Heavy receipts were not expected for some time, the few contracts made by foreigners caused difficulty in obtaining advances among the teamen. The supplies are supposed to be far short of last year. The settlements amount to 2,485 half-chests. New Pingsuys at tls. 39 to 40, old Moyune at tls. 34, and Shanghai-packed at tls. 27 per picul. Stock, 5 chops, 2,600 half-chests.

FOOCHOW.—Congous have been very active, a considerable amount having been taken up for Britain and Australia, prices are Tls. 1 to 2 higher. The third crop is beginning to arrive in small lots. Souchongs are rather lower. Oolongs have brought a small advance. Scented Teas show a considerable reduction in prices. Settlements of the fortnight.—Congou 44,229 chests at the following quotations:—Dust and Broken leaf, at Tls. 6½ to 10 short; Ordinary Common, at Tls. 13 to 16 short; Good Common, at Tls. 17 to 20 short; Light Flavory, at Tls. 20 to 24 short; Good Flavory to Medium Kysow, at Tls. 25 to 30. Souchong 6,846 chests; Common to Medium, at Tls. 20 to 23; and Good to Fine, at Tls. 30 to 36½ short. Oolongs 8,081 half-chests; Common to Good cargo, at Tls. 15 to 18; and Fine to Finest, at Tls. 20 to 29 short. Flowery Pekoe 260 chests; Common to Medium, at Tls. 26 to 33 short. Scented Teas, 16,314 boxes; Common to Medium, at Tls. 9½ to 20; and Fine to Finest, at Tls. 24 to 34 short per picul. Stock, Congou 24,600 chests; Souchong 10,300 chests; Oolongs 45,400 half-chests; Flowery Pekoe 900 chests; and Scented Teas 8,500 boxes.

YOKOHAMA.—Teas of good quality fully support their value, there is also a good demand existing. The state of the weather keeps supplies from coming in, and consequently the amount of business done has been rather limited. The settlements for the past week are 760 piculs, mostly new. Stock, new 300 piculs; old 1,500 piculs. Quotations—good common $16 to $19, medium, $21 to $23.50, good medium to fine $25 to $28, finest, nominal per picul.

SILK.—SHANGHAI.—Encouraging reports from the home markets have kept up activity, and large settlements have taken place at Tls. 15 to 20 over those current at the close of last mail. Heavy rains during the interval have lessened receipts, the condition of the silk is also bad from the same causes, while the high prices offering induce silkmen to push their stock forward with all despatch. 4,500 bales, China and Japan, are the fortnight's settlements, making a total for the season of 28,000 bales, viz., 24,600 bales China, and 3,400 bales Japan. Stock, about 5,000 bales, most of which is inferior. Quotations: Tsatlee, No. 1, Tls. 535 to 545 per picul; No. 2, Tls. 515 to 525 per picul; No. 3, Tls. 490 to 510 per picul; No. 4, Tls. 465 to 485 per picul; No. 5, Tls. 440 to 455 per picul. Taysaam, No. 1, Tls. 460 to 470 per picul; No. 2, Tls. 440 to 450 per picul; No. 3, Tls. 410 to 425 per picul; No. 4, Tls. 380 to 395 per picul; No. 5, Tls. 365 to 375 per picul. Yuenfa and Haineen, Tls. 440 to 480 per picul; Hangchow Tsatlee, Tls. 460 to 485 per picul; Shaouhing, long reel, Tls. 380 to 415 per picul; Laeyang, Tls. 380 to 390 per picul.

YOKOHAMA.—After the arrival of the mail of 26th May, the market resumed its former activity. Prices of finer kinds are $40 higher than last quoted. There is but little stock left, bad weather hinders arrivals, but the crop is reported to be abundant and the quality good; the parcels as yet to hand, however, have not had much care in reeling, and are irregular in size and colour. Quotations.—Old Silk: Ida best, none; Ida medium, $650 to 670 per picul; Mybash, none; Oshio best, $650 to 660 per picul; Oshio medium, $600 to 630 per picul; Oshio inferior, $530 to 560 per picul; Mashta best, $580 to $590 per picul; Mashta medium, $550 to 570 per picul; Mashta inferior, 530 to 540 per picul; Etchesan best, $590 to 610 per picul; Etchesan medium, $560 to 680 per picul; Etchesan inferior, $530 to 550 per picul. New Silk: Mybash best, $710 to 720 per picul; Mybash medium, $690 to 700 per picul; Mybash inferior, $670 to 680 per picul; Coshu best, $610 to 630 per picul; Coshu medium, $590 to 600 per picul; Coshu inferior, $570 to 580 per picul.

RAW COTTON.—HONG KONG.—The demand has continued during the fortnight for the Canton market, at the quotations given in last report. About 1,800 bales Bengal have been imported during that period, the quality whereof being inferior to that of previous supplies, it has realised from 50 cents to one dollar less in consequence, having been sold at $25½; a better grade is readily saleable at $26½ to 27. Stocks continue small, and supplies from the North trifling, consequently holders are firm and rates are well maintained. There have been no imports of Bombay cotton as yet, a small quantity of rather middling quality is expected, but the advance of prices in India will tend to check supplies. The growing crops of cotton in the North are very unfavourably reported on, owing to heavy rains and floods. It is premature as yet to say they have failed. The quotations are:—Shanghai staple $29 to 31; Bengal $25 to 27. Shanghai: The late unfavourable weather has caused much damage to the crops, and Natives speak of the yield as likely to be very small. The old crop is all but exhausted, and the few parcels which come down from the interior are eagerly bought up at Tls. 17 to 17.5.0 per picul, for shipment to the South.

IMPORTS.

The demand for Cotton piece goods having increased, a rise in prices has been established. The stocks are very moderate. Cotton Yarn has moved off to a large extent, and at Canton the rate had sprung $5. Woollen Goods, including Long Ells, Spanish Stripes, Camlets, &c., were getting in demand for the approaching cold season. Lead dull, with a large stock. Coals at Hong Hong, best Cardiff, $9. At Shanghai large arrivals and prices taels 7.5.

EXCHANGE.—At Shanghai the rate has dropped to 6s. 2¼d., though the bulk of business was done for the mail at 6s. 3d. At Hong Kong Bank Bills, 4s. 5¼d. to 4s. 5½d. At Yokohama business has been done in Bank paper at 4s. 8¼d., private 4s. 9d. to 4s. 10d. At Manila 4s. 5¾d. The Hong Kong and Shanghai Bank Shares are quoted at $4 premium, the Hong Kong and Whampoa Docks, $2.15 prem., the Union Docks 6 prem., and the Gas Company at 3 prem.

FREIGHTS.—At Hong Kong and Canton, £1 to £1. 10s.; at Yokohama, £3 for cotton and tea, and £4 for silk nominal; at Shanghai £2 for tea; at Foo-Chow, £1. 10s. to £2.; at Manila, hemp, £1. 10s. No sugar freight offering. At Singapore 15s. to 30s. for general goods.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

DE SOUZA—On the 24th July, at Shanghai, the wife of D. A. De Souza, of a daughter.
LOVE—On the 23rd July, at Shanghai, the wife of Joseph Love, jun., of a son, still-born.

MARRIAGES.

RAPP—LEIGH.—On the 2nd July, at the British Consulate, Manila, Louis F. Rapp, of the firm of Tillson, Herrmann, and Co., to Eliza, second daughter of Philip Leigh, of Melbourne.
REMEDIOS—D'AZAVEDO.—On the 31st July, at the Roman Catholic Cathedral, Victoria, Hong Kong, by the Rev. Pe. Favini, vicar, Jose Antonio dos Remedios, of Messrs. Reynolds and Co., the second son of Maximiano Antonio dos Remedios, of Macao, to Miss Vicencia Christina, the second daughter of Felix Hilario d'Azavedo, of Macao.

DEATHS.

BRAND—On the 26th July, at Hong Kong, William Brand, of Messrs. Gilman and Co.
FYFFE—On the 4th Aug., at Hong Kong, R. J. Fyffe, engineer, aged 36 years.
GREEN—On the 4th Aug., at Hong Kong, James Green, farrier, aged 30 years.
KEMP—On the 5th Aug., on board the steamer Kinshan, on the passage from Whampoa to Hong Kong, James Kemp, foreman blacksmith, Aberdeen Docks.
THOMAS—On the 15th July, at Foo-chow, of dysentery, James Thomas, chief engineer of the steamer Maria, aged 36 years.

Per P. and O. steamer, from Southampton, Dec. 4.—To Shanghai: Miss M. A. Russell.

Summary of News from the Far East.

CHINA.

SHANGHAI.

Dates from this port are to the 16th August. The London mail of the 26th June arrived out on the 11th August. The affairs of the Municipal Council had engaged much attention. We give a report below, and extract the following from the *Friend of China*:—

"We learn from the minutes of our Municipal Council's proceedings of yesterday, that in view of the discouraging answers by residents to the proposition for assessing a lighting rate, the arrangement made by the Public Works Committee with the Gas Company, to give them $61¼ per lamp falls through, and that, for the present, there will be no gas in Shanghai streets. This has to be looked on as a death-blow to the Gas Company, for if people will not take their gas, there is no use in making it; and so the affairs will have to be wound up. Such a sorry conclusion as this could hardly have been anticipated by those who took shares in the expectation of a dividend of at least twenty-five per cent.; and in a spirit of warm sympathy for these victims of a misplaced confidence—confidence that the individuals to whom they confided their money and its management were the right men in the right places—we should suggest a demonstration—an ousting of their present directory and honorary 'inefficients,' (or better word 'obstructives') and the creation of a new board, prompt and determined to make a temporary sacrifice rather than that of a scheme so eminently calculated to benefit the public shall fall to the ground altogether.

"The thing is simple. Such new directory would have only to say to the Municipal Council: We repudiate the grasping acts of our predecessors—we are ready to give you five hundred street lamps for one year certain at the sum originally tacitly stipulated by our Provisional Committee, viz., £5, or say $25 per lamp per annum; and if at the end of the year we find our books balance on the wrong side, we shall trust to the liberality of the community to give us better terms in the year ensuing.'

"We think if the Gas Company would speak out in this way, there would be no necessity for our waiting until the state of

Digitized by Google

the public finances enable the Public Works Committee to recommend the lighting of the streets with gas."

On the death of Mr. Reddie, the same paper says :—In the person of Mr. Reddie, of the firm of Holliday, Wise, and Co., the Shanghai community lose a valuable member, and one who, on the Municipal Council, as next year we might have expected, could have given us much valuable assistance. As a Justice of the Peace in Hong Kong, Mr. Reddie was a model non-stipendiary, qualified to this by his once having held the office of Sheriff of Bombay. As stated in the obituary, he dies deeply regretted by all who knew him. The firm of Holliday, Wise, and Co., with which he was connected, is among the oldest and most respected in China, and he ably represented it.

The new local postage stamps are great curios, and should be bought up in quantity to send home for the illumination of postage stamp albums. There are four kinds, viz., two candareens in black—four candareens in yellow—eight in green, and sixteen in red. In size, the superfices, as compared with a Hong Kong stamp, is as 528 to 270—that is to say, they are almost as large again, and exhibit the following expression. In the centre a device intended to represent a dragon, though unmistakable as a caterpillar or glowworm. On the top, in English, Shanghai L.P.O., and the Chinese characters for Shanghai. On the bottom the value, say 16 candareens, and the Chinese characters for *Kungpoo*, and the local designation of the municipal council. On the dexter side the value in Chinese characters, as one mace and six fun, and on the sinister, *Shuisinkwan*, Post-office. In use, both scissors and paste are required, the one to clip, the other to effect adhesion. As we say, the local postage stamps are curious, figuratives of the times,

The steamer *Lalla Rookh*, as she lay aground on one of the Rugged Islands, has been the scene of a melancholy occurrence. Some twenty Chinamen went on board for the purpose of enriching themselves with such portions of the cargo as it was possible to lay hold of. While busily engaged in collecting the booty, the vessel shifted her position and sank with such rapidity as to prevent the escape of the pilferers from the hold. They were of course all drowned. The inhabitants of the surrounding islands celebrated the event by fearful howlings and lamentations.

The regular monthly meeting of the North China Branch of the Royal Asiatic Society was held at the society's rooms. In spite of the extreme heat of the weather, a large assemblage gathered to hear two papers on Mongolia and the Mongolians read. One was from the pen of the Rev. J. Edkins, of the London Missionary Society, a gentleman well versed in all appertaining to the tribes which frequent the vast plains to the northward of the Great Wall ; the other was written by Mr. C. Mitchell Grant, who has enjoyed many opportunities of obtaining information of the most reliable kind. The length of both these communications prevented any discussion.

The steamer *Viola* has been sold, through the Dutch Minister at Shanghai, to the Japanese for $95,000 ; her cargo has been transhipped to the *Glengyle*, which vessel will bring it on here.

MUNICIPAL REPORTS,

Presented and Approved at the Monthly Meeting of the Council held August 7th, 1865.

The Finance, Rate and Appeal Committee report that consequent on the new and revised assessment upon land and houses having to be made, it has been impossible to have the tax papers sent out for these at the usual time. The assessments are, however, now almost completed, and the taxes for the quarter beginning 1st July will be collected on the new assessments. The assessments are almost without exception at a much lower value than formerly, and it is to be presumed that the difficulty of former over-assessments having been thus met, these taxes will now be promptly paid.

Town Dues.—As H.E. the Taoutai refused to sanction this measure, although passed by the Land Renters in public meeting assembled, the matter has been referred to Peking by the representatives of the Treaty Powers. In the meantime the wharfage dues will be collected as before authorised, but the absence of this town due must have a very prejudicial effect upon the Municipal finances, and prevent the carrying out of many very desirable measures of urgent necessity.

Wharfage Dues.—H.E. the Taoutai refuses to make any further contribution than that he has paid for some years past, unless allowed to collect from Chinese resident in the settlement, a collection your Committee deem eminently undesirable.

Chinese Taxes.—To lessen the chances of malpractice in the collection of these, your Committee authorised the collections to be in future made in dollars and cash, instead of as before in taels and candareens, and that the assessment paper shall contain on its face in Chinese and English the sum in dollars and cash to be so collected.

Local Post-office.—Postage stamps have been issued, and can be obtained at the local post-office. They have been availed of to a fair extent, but it remains with the agents of steamers to make this office pay. If, on the arrival of steamers, the agents would as a rule send Chinese letters to the Post-office instead of allowing their compradores to distribute them, it would much assist in making the establishment self-supporting.

Mr. D. Campbell was prosecuted by your Committee for having his house open for the sale of liquors without a licence, and was duly convicted by H.B.M.'s Consul.

Boarding-house Tax.—An objection has been raised to the onerous nature of this tax, and your Committee have not forced the collection, pending further investigation.

Your Committee propose to draw up a complete statement of the financial state of the municipality as soon as the new assessment papers are completed. They will be circulated amongst the members of Council, together with a list of such taxes as have not been paid, with the names of the defaulters, and then your Committee will request your decision on the whole question.

PUBLIC WORKS COMMITTEE.

Gas.—Your Committee are glad to say that the Gas Company has shown great willingness to alter the draft contract in the points where it was considered one-sided, and an amended draft has been agreed upon.

The Finance Committee, however, have not considered it desirable to ask permission from the Land Renters to sign this contract before ascertaining whether residents generally will consent to meet the greatly increased expense of lighting. A circular, setting forth the expense to be incurred and showing the contributions that would be required to meet it, has me with very unfavourable responses, as shown in the tabular statement hereto appended. It is now for the Municipal Council to decide what further steps, if any, are to be taken in the matter.*

Tabular Statement showing answers returned by residents in the English Settlement to the Municipal Assessment scheme for obtaining funds to light the public streets with Gas.

Assent	51

Shanghai, 5th August, 1865.

Extension of Peking Road.—Active steps have been taken to carry out this improvement as far as Fokien Road, and the line will be opened up thus far at an early date at very trifling expense.

Extension of the Bund Line.—In front of Messrs. Siemssen and Co.'s new houses, this has been sanctioned to the extent of a few feet, to bring the line even with the wall of Messrs. Jardine, Matheson, and Co.'s compound, as also to form a better entrance to Peking Road. The improvement will be carried out at the expense of Messrs. Siemssen and Co., and others benefited.

Dangerous Structures.—Several of these exist in various parts of the settlement, and the late very heavy rains have tended to increase the risk. Your Committee have called the attention of H.B.M. Consul to the most pressing case, that of some houses belonging to Mr. Kennedy in Hankow Road. One had fallen into the road, and an order has been obtained to remove the rest that threaten the lives of the passers-by.

Survey of Hong-que.—The plan of Major Jebb has been handed to your Committee. It is not thoroughly finished off owing to Major Jebb leaving Shanghai. A liberal discount having been made for this, the account is recommended for payment.

WATCH COMMITTEE.

Your Committee report the strength of the police force at 105 men, 71 being Europeans and 34 Chinamen.

Your Committee again recommend a discussion with the Superintendent as to the best means of dealing with the securities of the Chinese police.

Your Committee beg to bring to the Council's notice the question as to private watchmen being brought under the control of the Superintendent of Police, so that a decision may be come to as to the terms on which such arrangements can be made, and also as to policemen doing duty at certain public places, Post-office, &c.

Your Committee have to report a serious attempt on the part of certain public chair-coolies to create a monopoly for carrying chairs in the settlement, which has been carried to such an extent that several cases have already been brought before the Mixed Court. The attempt is not yet put down and your Committee recommend that most vigorous measures be used by the superintendent to bring all cases at once before the proper authorities. It is hoped that with the assistance of the Consulate so serious a disturbance will soon be put down.

You Committee regret to report that a number of foreigners fully armed prowl about the settlements at night, evidently prepared for the most desperate attack or resistance, and it is recommended that special attention be drawn to the names of men thus known on the list of unemployed and vagabond foreigners, which is monthly sent to the Consulates. It will be satisfactory to the Council to learn that a notorious blacksmith's shop in the Maloo, the constant haunt of "rowdies," has been broken up.

* Apropos of this, it was subsequently resolved "That in view of the discouraging answers returned by residents to the proposition for assessing a lighting rate, the Municipal Council do continue the present system of oil lamps until such time as the state of the finances will permit them to recommend the lighting of the public streets by gas."

Letter relative to the sum of 1,000 *taels, outstanding during the time Mr. Pickwoad filled the post of Secretary.*

Shanghai, August 4th, 1865.

Dear Sir,—I observe in the published minutes of the last meeting of the Municipal Council, a notice that it had determined on retaining 1,000 taels due to Mr. Pickwoad, by way of covering a discrepancy in the Council's accounts during the time of his holding the post of Secretary. As this implies that Mr. Pickwoad has defaulted to that amount, I feel bound, as an intimate personal friend of that gentleman, to write and request that the affair may be put in its proper light before the public, and the slur, which some may consider at present attaching to Mr. Pickwoad's name, removed.

From several conversations with Mr. Pickwoad on the subject, I believe the discrepancy is accounted for as follows:—A Chinaman named Sankee was indebted to the Municipal Council in the sum of 1,000 tls., on behalf of the Chinese Defence Committee, which was subsequently declared by him to have been paid to the then treasurer. This gentleman denied receipt, but Sankee proving that a bank order for the amount had been cashed, declined, as he said, to pay again, and the matter has remained in suspense ever since, the claim being unsettled between Sankee and the then treasurer, whom alone the dispute concerns. Mr. Pichwoad was, I believe, and am fully borne out in saying, never even stated by Sankee to have received the money.

I trust that the Council will give this letter equal publicity with the notice of their determination.—I am, Sir, yours very truly,

Chaloner Alabaster.

A. Johnston, Esq., Clerk to the Municipal Council.

A case of importance, between Messrs. Gilfillan and Messrs. Glover and Co., is reported in the *North China Herald*.

(Before C. A. Winchester, Esq., H.B.M. Consul.) Sir E. Hornby, N. Latimer, Esq., and S. Breuell, Esq., Assessors.

The plaint in this case was to the following effect:—That the plaintiff employed the defendants as his brokers to sell the steamer *Chusan*, for the sum of $80,000 at Nagasaki. And the defendants received the vessel and were offered and could have obtained $80,000 for her. Yet they did not sell the steamer as they had undertaken to do, whereof the plaintiff has suffered great loss, and been put to divers outlays and expenses, for which he claims Tls. 28,000.

The defendants pleaded a general denial of the allegations of the plaint.

Previous to opening the case H.B.M.'s Consul remarked that when it was brought on for trial last year, Mr. E. J. Hogg was one of the Assessors. In consequence of his inability to attend on this occasion it became necessary to appoint a gentleman to act in his stead. Sir Edmund Hornby had consented at his request to act in that capacity, and he had also solicited the attendance of Mr. S. Breuell. It only remained for the parties concerned in the case to decide as to which person they would prefer to act as Assessor in the room of Mr. Hogg.

Mr. Myburgh suggested that both Sir Edmund Hornby and Mr. Breuell should sit as Assessors.

Mr. Eames agreed with Mr. Myburgh.

Mr. Eames said that he had come into the case at a late date, as when it was tried before, Mr. Pollard had appeared on behalf of his client. He could therefore only take the minutes as he found them. From them he discovered that at the former trial of the case the question of damages was reserved. This, he would remark, has been a very common though not universal practice in Shanghai.

Mr. Myburgh said he recollected one case in which he was engaged when the question of damages was considered separately. On that occasion he objected to, thus making two cases out of one.

Mr. Eames said that the question of damages had been left out in this case, and he therefore knew nothing about it. From the minutes it did not appear that any objection had been made to reserve the question of damages, and when the plaintiff's case was concluded, it closed with an exception of that question. He thought it strange how it became understood that the defendants were to adduce additional testimony at this the adjourned meeting.

Mr. Lawrance said that when the case was tried Mr. Pollard was not in a position to state the amount of damages, as he had not all the documents bearing upon the case in his possession. Mr. Pollard was aware that he (Mr. Lawrance) was going to apply for an adjournment.

Mr. Myburgh said that as Mr. Eames was not prepared just then to settle the question of damages, and had laboured under some misapprehension, it would be unreasonable for him to insist upon the case being tried as he had contemplated. He would consent that the liability of the defendants should first be considered and then the question of damages.

Sir Edmund Hornby said that there were two questions to be decided—the question of fact and the question of law. The case for the plaintiff might be considered concluded, but the question of damages still remained.

Mr. Myburgh regretted that the state of his health prevented him from doing his case justice, and hope the court would grant him indulgence on that account. The action now under consideration was commenced nearly a year ago, and did not in reality come under the jurisdiction of the Court at Shanghai, as all the circumstances which led to it occurred in Nagasaki. The plaintiff, who had all his witnesses in Shanghai, finding one of the defendants here, and regardless of the expense to which they would be put and the disadvantage under which they would labour, brought the action here. He thought the action thus taken by the plaintiff was harsh and vexatious, and that the case should by right have been tried in Nagasaki. Mr. Lawrance made an objection at the time to the jurisdiction of the court, which was over-ruled, and which should have been noted, but was not. The contract for the sale of the steamer made between the plaintiff and the defendants were alleged to have been broken. The plaintiff relied upon a private letter written by Mr. Glover to Mr. Maine, stating that their firm had been offered $80,000 for the *Chusan*, but had refused it. This letter, as he (Mr. M.) would show, was written under a mistaken impression as to facts. But he would assume, for the sake of argument that the facts were true, and he would show that the defendants were not liable in law. The plaintiff had not shown that in refusing this offer of $80,000, which was the lowest limit at which the defendants were authorised to sell, they had not acted bona-fide and for the interests of the plaintiff. The presumption in such cases as the present is strongly in favour of the agent, and he would submit as a point of law, that unless bad faith be proved, an agent could not be held liable in damages. Such a contract as that before the Court implied on the part of an agent reasonable skill and ordinary diligence; and while the plaintiff had failed to show that the defendants were wanting in either, the testimony adduced on the part of the defendants showed that they had carried out their duties and instructions with more than ordinary skill and perseverance. There was abundant proof that every exertion had been made, for, failing to sell the steamer to their customers, they had offered to divide commissions with two other merchants should they succeed in selling her. It should be borne in mind that in China and Japan the course of dealing in such matters is very different from that in European countries. From the evidence it appeared that in Japan steamers cannot be sold without considerable difficulty. It was evident that Mr. Gilfillan intended that his agents should endeavour to obtain a higher price than the price specified by him, and he (Mr. Maine) thought therefore that had the defendants sold the *Chusan* for the exact sum mentioned in their instructions, while at the same time there were reasonable grounds for hope that a better price could be obtained elsewhere, they would have displayed negligence, not care. Subsequently Messrs. Glover & Co. were upbraided for not selling the vessel at a lower price. There was another point which seemed very important. The limit made was a limit of $80,000, *hard cash*. Now, there was nothing to prove that the offer made to Messrs. Glover & Co. was for cash payment. In such cases credit was generally required, and frequently payment was made partly in produce. He thought he might fairly call attention to the usual course of dealing pursued by the Japanese. An offer of this kind was not considered by them binding until the contract was entered into and the bargain-money paid over. The natives employed to buy steamers by the Japanese Princes have not the power to ratify an agreement. Satzuma, for instance, did it himself upon all occasions. He would submit that if it were decided that Messrs. Glover and Co. exercised due or ordinary diligence, and had not been guilty of malfeasance, the plaintiff was out of court, and even if they had committed an error in judgment, they could not on that account be considered liable. But there was another important consideration. The letter from Mr. T. B. Glover to Mr. Maine was evidently written through a mistake made by his brother, a junior partner in the firm. In reality no such offer as stated in the letter had been made, and, in the official letter from the house written on the same day and sent by the same opportunity, by the express desire of Mr. Glover, nothing was said about the offer. He thought it right to communicate a fact imparted to him by Mr. Gilfillan's agent. There was nothing inconsistent or dishonourable in this. The mistake arose in this manner. In conversing upon the subject with Mr. Duret, one of Messrs. Glover and Co.'s agents, Mr. Glover used the Japanese language as the medium of communication, and it was thus the mistake arose. Another question was how far the firm were bound by a statement made by one partner in a private letter. He (Mr. Myburgh) submitted, therefore, that upon the evidence there would be no doubt as to the fact that a mistake was made, but assuming the statement made in this letter to be true, there was nothing to show that the defendants acted in any way but bona fide, and did the best they could as agents, and there was no proof in the evidence of any want of reasonable skill and reasonable diligence. (Mr. Myburgh quoted Chitty on Contracts, page 6, to prove that the letter was rendered nugatory by the explanation of the circumstances under which the mistake arose.) There might be cases in which, in consequence of a mistake made by an agent, through culpable negligence and carelessness, his principal suffered damage, but there was not a tittle of evidence to show that the plaintiff in this case had sustained any loss from such causes.

Mr. Lawrance said that after the observations made by his learned friend it would be unnecessary for him to speak. At this season of the year one speech was generally thought better than two.

Mr. Eames said that in this case the claim was based upon the culpable negligence of the defendants. With regard to the letter, if a person makes an admission the burden of proof rests upon him to contradict it. It was for the Court to decide whether the defendants should have made the statement they did without being sure of its accuracy. The plaintiff certainly intended that the defendants should get as much as possible for the vessel. They were, however, authorised to sell it for $80,000. The question of discretion advanced by his friend he considered correct as to general agents, but he held that when a simple agent is offered a sum up to the limit specified, he is bound to sell at that price. If Mr. Field's testimony was to be considered so particularly reliable as the de endants thought it, the code of morality on the coast of Japan must be different from that in vogue at home. Mr. Field was employed by the Japanese to buy the steamer, and by Messrs. Glover and Co. to sell it to the Japanese. The laws of agency are very clearly laid down, but the difficulty lies in their application. In this case, however, it was not difficult to apply them. He thought that the firm should be bound by the letter written by one partner. The defendants were guilty of negligence in sending the vessel away before the 22nd January, as they were distinctly authorised to keep her until that time; in fact, they seemed to act according to their own pleasure throughout. Although it did not appear that the Japanese had refused to buy, but had merely not come forward, the steamer was sent away on the 19th of January, and previous to the 22nd they received a letter from Mr. Gilfillan, authorizing them to sell the vessel for $75 000. If they had kept her until the 22nd, this letter would not have arrived too late. His view of the case was this, that Messrs. Glover and Co. must prove beyond a doubt that a mistake was made. They said that the Japanese agents have no power to settle in such matters, and again, subsequently, that they are not limited to a few thousand dollars. These statements seemed inconsistent. If it was true that the gentleman from Messrs. Glover and Co. did not speak French, and that Mr. Duret did not speak English, and that the conversation about the sale of the steamer was carried on through the means of signs and a few words of Japanese, all he could say was that it was a very unbusiness-like proceeding. It was a great pity that the system of symbols employed on the occasion had not been perpetuated. It is laid down that when an agent has misconducted himself, he must prove affirmatively that the loss entailed

Digitized by Google

on his principals has not resulted from such act. The letter, which was the basis of the plaintiff's case, required explanation; there was something mysterious about it. He (Mr. Eames) held that the defendants had been guilty of misconduct in not keeping their principals properly informed. Either Mr. Glover must have stated in his private letter what he knew to be untrue or concealed the truth in the official letter, nothing having been said in the latter about the offer. The question, then, was whether when a positive statement was thus made, the defendants were not liable for it. They seemed to go upon the principle of not letting the right hand know what the left hand doeth.

Judgment was entered for the defendants with costs.

The following is a copy of that part of the letter from Mr. T. B. Glover to Mr. Maine, which bears upon the case :—

"My dear Maine,—I am sorry to say the *Chusan* remains here still unsold. I have been waiting an answer from a prince who offered us 80,000 dols. for her. At this we were authorised to sell her, but I thought it was too little, and would not let her go for less than 85,000 dols.; so the man said he would ask his prince once more.

"We would not have kept her had we not had a positive offer. I have promised to wait for three days, and if a purchaser does not come forward, you shall have her up sharp."

As we go to press (says the *North China Herald*), we have received a few notes which should have been in the body of the report. The evidence on the part of the defendants taken before H.B.M.'s Consul at Nagasaki was put in as read, the Court having previously gone through the whole case. With regard to the private note written by Mr. T. B. Glover, it had been explained in evidence before the Court that the "positive offer" mentioned therein referred to the offer of $75,000, and not to that of $80,000.

It should also have been noted in the report that during Mr. Eames's speech, when he asserted that if the defendants had kept the *Chusan* until Jan. 22nd Mr. Gilfillan's letter would not have arrived too late, H.B.M.'s Consul remarked that it was clear from the evidence that Mr. Gilfillan's letter (L) of January 16th, authorising the detention of the *Chusan*, had not been received by Messrs. Glover and Co. until the steamer had left for Yokohama, Messrs. Glover and Co. in their letter (G) of January 22nd, saying—

We are just in possession of your favour of the 16th inst. reducing your limit for the *Chusan* to $75,000. This, however, we fear has come too late, as the *Chusan* was despatched from this on the 19th inst.

After this explanation on the part of H.B.M.'s Consul, Mr. Eames apologised for the mistake, which had arisen in consequence of the shortness of the time in which he had been obliged to get up the case.

HONG KONG.

Dates are down to the morning of the 23rd August. The London mail of the 10th July arrived out on the 19th August.

We take the following items from the file of the *Evening Mail*:—

We learn, by latest advices from the West Coast, that piracy is vastly on the increase in that quarter; and from the fearful devastation which the scoundrels cause, are the terror of the unfortunate inhabitants. We have reliable information that a certain steamer which took a junk in tow down to a port on the West Coast was offered by the inhabitants of that port no less a sum than $40,000 if she would go out and capture a pirate which was the terror of the neighbourhood; and if they went out at all even, whether they caught her or not, $10,000. Now this offer would no doubt have been readily accepted by the steamer in question, as she was well armed and manned, and could easily have subdued the buccaneer, and $40,000 is not to be sneezed at. But it seems that, had she accepted the offer, and accomplished her purpose, the steamer would be liable to seizure on her return here, her captain to imprisonment, and her owners mulcted in a heavy sum. A considerable number of gunboats are now lying in this harbour; some are ready for sea, and others could be made serviceable in a few days. Why, then, if our merchants themselves are not to permit their vessels to defend life and property, and capture these terrible banes of the China Sea, do not the Government send some of these most serviceable gunboats a little oftener, to cruise in the vicinity of the West Coast, and make the rascals render an account of their misdeeds?

Her Majesty's Ministers are evidently bent on reducing the payments from the Imperial exchequer on account of the military establishments maintained in the colonies to the smallest possible amount. This they have done or are endeavouring to do; first, by extracting from the colonial treasuries the largest possible contributions that can with any show of decency be demanded; and, secondly, by reducing the strength of the respective garrisons, consolidating their administrative staffs, and cutting down the pay, allowances, &c., of officers and soldiers to the lowest figure conceived admissible by the stay-at-home clerks of the Treasury and War-office.

We understand that thieves have been paying uncommon attentions to the district immediately in the vicinity of the Military Stores for some time back. From a police report we are glad to notice that one of the dishonest fraternity in question has received considerably more than he calculated upon. On Sunday evening last a Chinaman was observed, by the European sentry on duty, attempting to break into one of the stores. He immediately fired, and the shot took effect on the thief's side, passing through his body. Having been given over to the civil authorities, he is now lying in a doubtful state in the Civil Hospital.

The steamship *Oriflamme*, Captain Lane, reports having left Shanghai on the 17th August, and passed the Light Ship at 0.30 P.M., at which time it was blowing a strong gale from the south-east. In the river she passed the ships *Indus* and *Electra*, both of London and both bound in. Four miles outside the Light Ship, she saw a P. and O. steamer (paddle) bound in. When passing Napier Island, at four P.M., she saw a steamer at anchor there, with ensign set; proceeded towards her, and met a boat with the chief officer of the steamer *Wokee*, from Shanghai for Hong Kong *via* Amoy, who reported that that steamer had struck upon a rock off Bonham Island, and had got back to the anchorage at Napier (five miles) before the water put their fires out. Captain Lane sent his chief officer on board to see if any assistance could be rendered them; but the captain declined receiving any, saying he had just chartered a junk for $200 to take his chief officer and passengers back to Shanghai for assistance, as they had six feet of water in the hold.

H.M.'s ship *Hercules* was sold by Messrs. Bowra and Co., for the sum of $18,000.

The trials and changes of fortune of Europeans who have joined their lot with that of the Imperialists, or that of the rebels, may possibly supply the sensation element in the new history of China which has yet to be written. The vicissitudes of those Europeans—rowdies, may possibly be the more correct term—are pretty often cropping up now-a-days above the general current of events; and those of them who appear to be indifferent as to which side they serve seem now, according to all advices, to be gaining the smallest minimum of favour possible from either party. We have previously noticed the plausible account given by the Imperialists of the fate of the political will-o'-the-wisp called Burgevine; and only in our last issue we published from a Shanghai contemporary the details of another case of detention of Europeans, who were looked upon as having committed flagrant breaches of treaty regulations. These mysterious cases—around which the party offended appears to throw even more than the required amount of the mysterious—will give sufficient scope for the exercise of what latent skill in diplomacy there may be existing in our present representatives; and they may even add somewhat to the troubles which await the acknowledged ability and acumen of Sir R. Alcock. As the results present themselves at present, they may be simply taken as evidence of the end to which all that indiscriminate rowdy assistance lent to either of the belligerents must inevitably arrive.

We are in possession of private advices, to the effect that a like failure to that above-mentioned has attended others of a similar type, the scene of whose questionable labours have lain in the more southerly districts of disaffection. An American, named Baffey, we understand, who was formerly one of Gordon's force, was recently brought as a prisoner to Canton, by the Chinese authorities. He has, however, been handed over to the only authority legally empowered to judge the case—viz., the United States Consul. His account of himself and comrades is peculiarly suggestive both as to the character of the rowdy element, and as to the Chinese services which that element affects to serve. Baffey, it seems, joined the rebels at Chang-chow; having previously quarrelled with some of the Baron de Meritens' French rowdies at Amoy, at which place he had taken service on being discharged from the Imperial army when Gordon—the life and soul of the service—retired. After participating, with twelve other kindred European spirits, in the retreat from Chang-chow, he accompanied the Kan-Wang into the Canton province, where he took the earliest opportunity of deserting, and managed to give himself up to the civil authorities at Ka-ying-chow. According to his statements, nine out of the thirteen Europeans originally with the rebels have been much less fortunate than himself—having either perished from disease, or died at the hands of their rebel masters while attempting to desert. The three still remaining with the Kan-

Digitized by Google

Wang,—viz., Rhode (a German), Williams (an American), and an Irishman, whose name we have not learnt—were in a desperate plight. These simple details all go to prove that rebellion in the southern districts is now decidedly at a discount. Baffey will no doubt be duly dealt with according to law by the United States Consul at Canton—as ought to be every foreigner convicted of the like offence, by the recognised authority of his own nationality.

We were favoured with a minute inspection this morning of the steamer *Ville de Hoe*, constructed by the well-known shipwrights, Messrs. Fergusson, Fisher, and Co., in an inlet near Green Island, for Messrs. Russell and Co. Her dimensions are as follows:—length, 160 feet; beam, 24 feet; depth of hold, 15½ feet; tonnage, 440 tons, builders' measurement. Her engines are on what practical men call the *incline* principle, of 80-horse power, nominal, working up to 150. Her frame is of thick teak and Molavia wood, her inside planking of Oregon pine, and her bends of teak. The cabins are very spacious, and she is admirably fitted for passengers. A light wheelhouse and other airy dwellings are upon the spar deck. She is schooner rigged, and we should imagine, from her general appearance, she will prove a very fast boat. By far the largest steamer ever constructed in Hong Kong, she certainly reflects great credit upon her builders; and we fancy the Peak will raise its head a few feet higher when it sees that the inhabitants of the little town over which it reigns supreme, can construct such a vessel with the limited facilities for building which Hong Kong at present affords.

The *Evening Mail* of the 14th August says:—"In Saturday's *Gazette* we observe, by a proclamation of the Acting Governor, that the ordinance authorising the supplementary estimates has been confirmed and approved by the home authorities. From a notice communicated by H.M.'s Consul at Boston, masters and owners of steamers and passenger vessels trading between this and the United States are notified that 'no vessels will be allowed to discharge hereafter, bringing passengers without passports duly *viséd*;' which restriction, however, does not apply to ordinary emigrants. Intestate estates' returns for the past half year are also published. The Volunteer movement would appear still to be in the possession of some sparks of life. Tenders are asked for the erection of head-quarters for the corps, to be given in on or before the 21st inst. The official recognition of the Hong Kong and Shanghai Bank also appears in this number of the *Gazette*, by a notification that the notes of said company will be received in payment of Government dues."

Our contemporary explains to his readers the reasons why Portuguese should and may be kept on small allowances in this colony. "Firstly," he says, "because they can stand the climate better." This would imply that standing the climate is a fault rather than a virtue. He then says—"Secondly, because, not requiring those comforts and that accommodation which Englishmen require, they can live much cheaper." This is also fallacious, because we know of English, German, and American Missionaries who get along with fewer comforts and worse accommodation than hundreds of Portuguese. "Thirdly, because they are better adapted for being horses at a mill," which is only another way of stating that the hardest worked should have the smallest pay. "And, fourthly, because they do not drink." This is the first time we ever heard of a premium being set upon drinking, and we presume that our contemporary must be behind with his accounts for "Cutler," when he presses his subscribers so hard for money, and threatens to expose defaulting debtors.

SIAM.

BANGKOK.

Dates are down to the 23rd August, and report that the prohibition against the export of rice has been removed. The import market was in a very losing condition, owing to heavy imports from Singapore.

MALACCA STRAITS.

SINGAPORE.

Dates are down to the 31st August. Our files of papers has again missed. In the *Singapore Free Press* there is a notice of Mr. W. H. Read's manifesto. The British steamer *Jaya* had arrived out from Glasgow on the 25th August.

SHIPPING INTELLIGENCE.

ARRIVALS.

HONG KONG.—From London: Aug. 17, Esperanza. From Liverpool 18, Smyrna. From Bordeaux: 17, Bertha and Pauline.

At SINGAPORE.—From London: Aug. 19, Radama.

DEPARTURES.

From SHANGHAI.—For London: Aug 9, Star of China.
From HONG KONG.—For London: Aug. 13, Allendale.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

AITKEN—At Hankow, on Aug. 2, the wife of James Aitken, Esq., of a daughter.

DUNAWAY—On July 20, on board H.M.S. Adventure, during the passage from Shanghai to Hong Kong, the wife of James J. Dunaway, Esq., Deputy Purveyor to the Forces, of a son.

HARPER—On the 30th August, at 12, Oxford-terrace, Hyde-park, Mrs. George Harper, Fairfield House, Suffolk, of a son.

WILLCOCKS—At Hong Kong, on Aug. 12, the wife of E. J. R. Willcocks, Assistant Master of the Central Schools, of a daughter.

MARRIAGES.

BARNES—BARNES.—On the 5th inst., at St. Mary's Church, Faversham, by the Rev. Chas. Collins, M.A., vicar, assisted by the Rev. R. G. Holland, M.A., Frederick Dallas Barnes, of Singapore, youngest son of W. G. Barnes, Esq., of Shirley, Hants, to Marion, eldest daughter of the late Henry Barnes, Esq., of Faversham, Kent No cards.

BOURNE—BRASS.—On the 25th July, at H.M.'s Consulate, and afterwards at Christ Church, Yokohama, by the Rev. M. B. Bailey, Consular Chaplain, William Bourne, Esq., of Yokohama, Japan, eldest son of the late James Bourne, of Birmingham, to Ellen, daughter of the late William Brass, Esq., of London. No cards.

THOMSON—CONOVER.—At the Church of Our Saviour, Shanghai, on Aug. 8, by th Rev. Samuel I. J. Schereschewsky, the Rev. Elliot H. Thomson, of the American Episcopal Mission, to Jeannette R., daughter of Joseph B. Conover, Esq., of Philadelphia, U.S.A.

DEATHS.

BRONSON—Drowned, at Newchwang, Mr. Bronson, pilot at that port.

BOYLE—On Aug. 5, of *coup de soleil*, very suddenly, Patrick Boyle, proprietor of the Army and Navy Tavern, Hongque Road, Hongque.

COPE—On Aug. 7, of typhoid fever, James de Riemer Cope, Esq., of the firm of Cope and Cheshire, deeply regretted by numerous friends.

CROCKETT—On the 1st June, of dysentery, in the harbour of Bombay, on board of the P. and O. steamer Emeu, Oliver Richard Crockett, Esq., of Shanghai, aged 29.

DADY—At the General Hospital, Hong Kong, on the 18th Aug., George Dady, Private 2nd Batt., 9th Regt., aged 27 years.

FLINTOFF—On the 5th Aug., of a sudden illness, during the passage from Hong Kong to Shanghai, John Flintoff, Third Engineer of the steamer Wokee.

GIBB—On the 26th Sept. at his father's house, Woodlynch, near Ryde, Isle of Wight, of rapid consumptian, Frederick Matthew Gibb, of Hong Kong, in his 27th year.

GLEDSTANES—On the 1st Oct., at his residence, Cheshunt, Herts, John Hampden Gledstanes, Esq., in the 83rd year of his age.

GUY—On the 29th-30th June (supposed to have foundered in the P. and O. Steamship Corea, in a cyclone off the coast of China, of which ship he was chief officer), James Miller Guy, only son of the late James Guy, Esq., of Lymington, Hants, aged 35.

HAYES—At the General Hospital, Hong Kong, on the 18th Aug., Patrick Hayes, Private, 2nd Batt., 9th Regt., aged 28 years.

MCIVOR—At Victoria Gaol, Hong Kong, on the 16th Aug., John McIvor, late turnkey, aged 52 years.

MORTLOCK—At the General Hospital, Hong Kong, on the 16th Aug., James Mortlock, Sergeant Royal Artillery, aged 30 years.

O'NEIL—At the General Hospital, Hong Kong, on the 17th Aug., John O'Neil, Private, 2nd Batt., 11th Regt., aged 23 years.

OLDING—On the 30th Sept., at the residence of Benjamin Cooke, Esq., Adelaide-crescent, Brighton, Joseph Aldersey Olding, Esq., of Lee-road, Blackheath, second son of the late Stephen Olding, Esq., Assistant Managing Director P. and O. Steam Navigation Company, and formerly Superintendent at Hong Kong.

POUNDSBERRY—On the 9th Aug., at the Shanghai Floating Hospital, of dysentery, Edward Poundsberry, Master of the British schooner Water Lily.

REDDIE—On Aug. 12, Robert Muirhead Reddie, Esq., senior partner in China of the firm of Messrs. Holliday Wise and Co., deeply regretted by all who knew him.

ROACH—At the General Hospital, Hong Kong, on the 18th Aug., David Roach, Private, 2nd Batt., 9th Regt., aged 27 years.

WHITE—On board H.M.S. Melville, on the 17th Aug., George White, Military Cook of H.M.S. Adventure, aged 40 years.

WHITE—At Morrison Hill, Hong Kong, on the 19th Aug., William White, Civil Engineer, of the Hong Kong Mint, aged 28 years, of cholera.

COMMERCIAL POSTSCRIPT.

In consequence of the demand for passage to India at present, the Messageries Imperiales are sending an extra steamer on the 29th inst.

TEA.—The new Kaisows just arrived in dock have been placed at 2s. 2d. to 2s. 10d., prices quite equal (for the same quality), per *Fiery Cross* and *Serica*, and in a few lots 1d. higher.

SILK.—Market continues strong both by speculators and consumers. Tsatlee, No. 1, sales this day at 30s. 6d. to 31s. 6d.; Taysaam, No. 1, 26s. 6d. to 27s 6d.; Japan Mibash, 33s. to 34s. 6d.

COTTON.—Market flat, at a reduction of ½d.

ARRIVALS NOT INCLUDED IN THE TABLES.—Oct. 7, at London, from Shanghai, Eliza Shaw; 8, from Foo-chow-Foo, Belted Will, Flying Spur; 9, Black Prince,; 8, from Macao, Pakwan; 5, at Bremen, from Rangoon, Johanne and Emilie; at Portland, from Maulmain, Arthur Matthews; 9, at London, from Singapore, Elizabeth.

DEPARTURES.—Oct. 6, from Shields, for Batavia, India; from Texel, for Padang, Excelsior; 7, from Sunderland, for Singapore, O'Thyen, for Galle, Star of the North.

SPOKEN.—Europe (Dut. ship), Hamburgh to Batavia, Sept. 17, 43 N., 14 W.; Baroda, Hong Kong to London, Oct. 6, 50 N., 8 W.

CASUALTIES.—The Archibald Delargy, from Cardiff for Shanghai, put into Queenstown Oct. 6, leaky.

MISCELLANEOUS.—The Admiralty have invited tenders for the conveyance of about 4 officers (including a medical officer), 1 staff-sergeant,

Digitized by Google

1 woman, 3 children, and 103 men, with a proportion of wives and children, from London to Colombo.

Laid on.—At London: For Shanghai, Flying Spur, Min. For Yokohama, Eliza Shaw.

Opium Sales at Calcutta.—It is gratifying to know (says *The Times'* correspondent) that at the last Calcutta opium sale each chest fetched £104, owing to the diminution of supply. The whole month's sale gave the State about £70,000 more than the Budget estimate, and £110,000 more than the same quantity the month before. I trust Mr. Massey will be as fortunate in this respect as Mr. Laing was. He is likely to be so, for the trade returns of the thirteen open ports in China show that the Chinese took only 52,088 piculs in 1864, against 98,916 in the previous year.

The King of Siam.—Sir John Bowring, in the *Fortnightly Review*, writes:—During the reign of the usurping sovereign, the legitimate heir (let him be honoured with all his titles), Phra Bard Somdetch Phra Paramendr Maha Mongkut Phra Chom Klau Chau Tu Hua, provided for the safety of his person, seriously menaced, by withdrawing from the sphere of public observation, giving to himself the sacred character of a Budhist priest, and taking possession of apartments in one of the Wat or temples, which form the most prominent objects in all the towns of Siam, and especially in the city of Bangkok. He there devoted himself to profound study. He not only explored such literature as the ancient Siamese records presented to him, but mastered the Sanskrit and the Pali languages; of Latin he had acquired such a mastery, mainly by the aid of the Catholic bishop, that he was engaged while I was in Siam in writing his autobiography in that language, and paid great attention to the English tongue, in which he was assisted by his intercourse with the American missionaries, who had maintained their ground in Bangkok and its neighbourhood, notwithstanding the persecutions and annoyances of the Court. But his principal source of instruction was found in dictionaries, and his conversation was therefore much combined with words little used in ordinary colloquies. For example, he would use zenith and nadir in preference to north and south; his collocation of words is not always grammatical, but he had always an expression at hand, though not in common use, by which he very distinctly conveyed his meaning. He reminded one of a man talking through the medium of a dead language, translating his thoughts from a language more familiar, but not thinking in the language which he spoke. On one occasion, when I read an English address to him at the time of my formal official reception, he sent for me to the interior of the palace, said he had understood perfectly every word but one, and of that word he asked an explanation. And this reminds me of one of those "touches of nature which make the whole world kin." On my first public audience we passed through the centre of a large hall, in which all the principal nobles of the land, clad in garments of gold, lay on all fours prostrate with their faces nearly touching the ground, when a curtain was drawn, and from a raised tribune at the end of the hall appeared the king seated on his throne, clad in gorgeous apparel, a sceptre in his hand, a richly jewelled crown on his head, surrounded by "all the wealth of Ormus and of Ind." The ceremony over, he desired to see me in the interior of the palace in one of his private apartments. He sat there divested of every ornament, with no other garment than a shirt; he held on his knee a little girl absolutely naked, and with no adorning but a chaplet of fragrant white flowers round her head. He asked me to admire her beauty—she was his youngest born; and here I may add that I received a letter not very long after informing me that since my departure from Siam five children had been added to the royal race. "Plenty of royalty," was one of his Majesty's expressions. In fact, he rejoiced in the possession of three hundred wives and concubines, which he said was a very moderate number; his father had seven hundred for his portion. He laughed loudly on one occasion when I told him that in England one wife was found all-sufficient. He had a drama got up for our amusement, in which no less than a hundred ladies of the Court were engaged as actresses, under the discipline of an ugly old promptress, whose scoldings were sometimes louder than the music of the piece. The women were of every hue, from the snowy to the sable, and of every Oriental race.

French Trade in China.—The *Patrie*, in drawing attention to the foreign trade of China, laments that France should not hold a more forward rank in commercial enterprise in that quarter. "If our last expedition in China," it remarks, "which imposed on us heavy sacrifices in men and money has not proved directly advantageous to our commerce, we may be assured that the presence of our arms in that country can have but one result—that of aiding the preponderance of English commerce, a result to be regretted. We would therefore call the attention of our Chambers of Commerce to this point. It is reserved to them to enlighten our manufacturers, merchants, and others, on those considerations which lead the present limited number of exporters to make their ventures, and so incite to larger enterprise, and as speedily as possible, in order that we may no longer figure for only 50 000 tons in an annual foreign tonnage in the China ports a hundred times more considerable.

Ailanthus Silk-Worm.—The long continuance of warm weather has greatly favoured the experiments made in the rearing of the *Bombyx cynthia*. In the enclosure within the Jardin d'Acclimatation, in the Bois de Boulogne, may be seen at the present moment a large number of these worms of the third generation of this season, feeding in the open air on the ailanthus, or spinning their cocoons. The creatures are of great size, and seem to be in perfectly healthy condition. The cocoons are generally formed at the extreme end of the branches, or rather of the leaves, for the ailanthus has long compound leaves, with many leaflets, like the ash, where no bird, however light, could rest and make a meal of the occupant, and the worms take the curious precaution, before commencing the cocoon, to attach several threads of their web to the leaf stalk as high as the third or fourth leaflet, so that if that on which the cocoon is fixed were to be broken from its stalk, it would still be held pendant by these stay-threads.

The Brindisi Route.—The adoption of this port in lieu of Marseilles has been again noticed in *The Times* in the following letter:—"Being in Turin last May I obtained from official sources the following information relative to the route from London to Alexandria, via Brindisi, viz.:—

	H.	M.
From London to Paris, about	10	30
Paris to San Michele	15	30
San Michele to Susa	7	0
Susa to Ancona, 590 kilometres, at 50 kilometres per hour	11	50
Ancona to Brindisi, 559 kilometres, at 38 kilometres per hour	14	45
Brindisi to Alexandria, 822 knots	82	12
Stoppages at San Michele, Susa and Brindisi	6	43
From London to Alexandria	148	30

Next spring the distance between Ancona and Brindisi will be performed in 11¾ hours instead of 14¾ hours; add to this that the distance from Brindisi to Alexandria can be performed in 74 hours instead of 82 hours 12 minutes, if there are steamers running 11 knots per hour, the time then occupied through from London to Alexandria will be 137½ hours. Therefore the time saved over the route *via* Marseilles could be at present 29½ hours, and next spring 40½ hours. This, I think, will fully reply to Mr. Palmer's recent statement in *The Times*, in which he says that the saving of time would be only 12 hours. Regarding the means of communication existing between Alexandria and Brindisi by their steamers, my task is not to criticise the way in which that service is performed, but I cannot admit that a proper communication between England and Asia exists, through Italy, until a traveller will get there all the facilities he meets through Marseilles, and I think that only the well-organised Peninsular and Oriental Company can perform such an important service with the regularity, speed, and comfort it requires; and for the general benefit it is to be hoped that they will shortly be enabled to complete such arrangements as may be necessary, so as to enable them to take this route in hand.

The Chinese Giant.—His Excellency Chang, with his wife and ugly dwarf, continue to attract crowded audiences at the Egyptian Hall. On the 2nd inst. he made his appearance for a short time at the Crystal Palace. A giant bigger even than Chang, measuring some eight feet, is on his way to England; but we think that the Chinaman will command the preference. His personal appearance is very much liked, and if he wanted a wife in England he would have no difficulty in obtaining one.

The Will of Her Majesty's Consul at Siam.—The will of Sir Robert Hermann Schomburg, Knight, formerly Her Majesty's Consul at the Island of San Domingo, afterwards Consul at Bangkok, in Siam, was proved in the London Court on the 20th Sept. by the sole executor, Mr. Edward Buxton, of Ealing, formerly of Ampthill-square. Sir Robert was an eminent naturalist and geographer, and a member and fellow of many English and foreign societies, and had received several foreige orders. Sir Robert has left the whole of his property in England, San Domingo, and elsewhere, to his sister, Louisa Theresa Schomburg, of Merseberg, Prussian Saxony.

TEA.

(*Travers' Circular*, Oct. 7.)

Shipments from China are now sufficiently advanced to admit of an estimate being formed as to the probable supply of tea, but as the latest intelligence brought by the mail comprises a period of little more than two months after the opening of the season, it is as yet too early to express any decided opinion on the subject. Exports to Great Britain are stated to be, in round numbers, thirty-four million pounds, against forty-four million pounds last year; and to the United States, three million four hundred thousand pounds, against four hundred thousand pounds last year; thus showing a decrease of ten million pounds in the shipments to this country, and an increase of three million pounds in those to America. Assuming, then, that the extra three million pounds shipped to America represent a corresponding reduction in re-shipments from England to that quarter, we have still a deficiency of seven million pounds, or nearly a month's consumption, to deal with. But statistical comparisons, if they are to be of any real value, ought to extend over several years; and if this test be applied in the present instance, it will be found that the exports from China during the months of June and July, 1864, were more than seven million pounds larger than in the same months of 1863, and nearly equal to the first three months' shipments of the previous season, so that the deficiency of the present as compared with last year is, of itself, no proof that the crop is a short one. The season of 1864-5 was remarkable, not only as showing the largest total export of tea, but also for the unusually heavy shipments of its two opening months,—those for July alone having exceeded twenty-one million pounds,— and the nearer assimilation to the practice of former years which is observable this season would appear rather to be a subject for congratulation, if it afforded any guarantee for more careful preparation of the leaf, and consequently ensured a larger proportion of useful, if not finer teas. But advices from the principal ports in China do not bear out this favourable view—on the contrary, they rather lead to the opposite conclusion—being unanimous as to general inferiority in quality, and also, with one exception, as to relative deficiency in supply.

We do not propose at present to consider the opinions as to the quality of the new season's teas, but, with regard to quantity, we learn from Shanghai that, "notwithstanding the fine weather during the picking of the first crop of Black Tea, the yield has proved 30,000 chests short of last year," and the accounts of the crop of Green Tea received from the same quarter, though less circumstantial, are not more encouraging. At Hankow the settlements and contracts are stated to be one-sixth less than at the same time last year, but the stock was 8,000 chests larger, and this would reduce the deficiency to about one-seventh; while at Kinkiang the arrivals were 20 "chops," or 17,000 chests, less than last year. At Foo Chow, on the contrary, the arrivals to date had been about on a par with those of last year, and the sales and contracts larger, but the stocks for the present year showed an appreciable deficiency. These reports do not indicate any expectation that the supply this season will be large, but they certainly do not prove that it will be deficient. It should be remembered that these statements are relative, and that the comparison is made with the season 1864-65, the largest on record; and, further, that they are only reliable so far as concerns the teas actually received at the ports, all estimates as to the

Digitized by Google

on the way or yet to be forwarded being necessarily very imperfect. For instance, what under ordinary circumstances would be the practical value of any calculation as to the probable yield of any given crop in England? And yet this could be made with great rapidity by taking advantages of the facilities for locomotion and intercommunication enjoyed in this country, and by a comparison of the opinions of trustworthy and well-informed persons interested in the subject on which information was desired. China does not possess these advantages, and has in addition a much larger area to be traversed before even the roughest estimate could be formed; that is, unless the testimony of native dealers and others interested in misleading the foreign merchants is to be accepted without verification. It may be argued, on the other hand, that the quantity of Tea which it received up to a given date in one season is a fair criterion of the amount that is likely to follow, but calculations made on this principle must be frequently upset in a country so unsettled as China, where the communication between the ports and the interior is liable to be cut off at any moment by the rebels, and where goods are exposed to capture by pirates in the course of transit by water. Very little reliable information is obtainable as to the more remote districts of China, and the fact that smaller supplies have this year reached the ports may perhaps be due to causes of which we are entirely ignorant; for instance, the picking and preparation of the leaf may have been interrupted by the presence of the rebels, and supplies may have been for the same reason retarded at the various stages of their progress from the interior, or the means of obtaining money to discharge ordinary incidental expenses may have been, wanting. That this last cause may have operated to some extent seems probable enough, judging from the reports as to the financial difficulties in China, which were widely circulated in this country some months ago as these, if they did exist to any extent, could hardly fail to restrict somewhat the circulation of foreign capital through the country. Knowing the vast extent to which tea cultivation is carried on in China, and in the absence of unfavourable weather, there is little probability of any scarcity of leaf, and it therefore seems reasonable to conclude either that exceptional causes have delayed its arrival at the coast, or that the prices ruling do not offer sufficient inducement to the holders to undertake the risk and cost of transmission from remote places, coupled as it is with the further risk of having to pay for unlimited and illegal tolls along the route. If the former supposition be correct, the tea will come forward quite as soon as it is wanted, but in the latter case higher prices will be required to tempt supplies down from the outlying districts. It is thought by some that when intelligence is received in China of the high prices paid here for the first two cargoes of the present season, purchases on the reckless scale of former years will be at once resumed. It is to be hoped that this anticipation may not prove correct, but should it do so, there can be little doubt that, the demand once raised, the supply will follow.

Prices have remained firm this week under circumstances sufficiently adverse to produce flatness, if not to cause a reaction. The Tea market, being practically a cash one, is particularly sensitive to any advance in the value of money, and the fact that the Bank rate has been raised 1½ per cent. in four days—the last and largest portion of the advance having taken place while the public sales were actually in progress—might naturally have been expected to influence prices. Then the sales were unusually large, at least for a time when purchases of old Tea were for the most part suspended, and when all were waiting for further arrivals of new season's shipments, several cargoes of which were known to be close at hand; thus neither an advancing money market, nor a large supply offered without reserve, has produced the slightest reaction; on the contrary, Congous from 1s. to 1s. 2d., which were strongly represented at the sale, sold remarkably well; while with regard to other descriptions a decline was observable only in a few isolated instances. It would, therefore, appear that the market is in a more satisfactory position that for some time past—a position equally removed from the extreme depression of the year 1864, and of the first three months of 1865, and from the still more extreme elation which followed the reduction of duty in April last.

At the public sales of China Tea, which commenced on Tuesday, 25,000 packages were offered, and of these about 20,000 were without reserve. Prices generally were very well supported, especially those of good common to fairish Black and Red Leaf Congous, and this was rather surprising, as the bulk of the Congous consisted of these descriptions. This firmness may, however, be due to an impression that the high price of fine Tea would increase the consumption of the medium and lower sorts, and that the latter would in consequence improve in value. Low and dusty Green Teas, as well as medium Scented Capers, sold rather more easily, but in other kinds there is no change to notice; several breaks of coloured Japan Tea were taken for shipment. By private contract there has been very little doing, as the trade are still waiting for further samples of new season's Tea. Four vessels from Fow Chow, one from Hankow, and one from Canton, are in the Channel, and others are reported to be close at hand, so that a large business may be looked for as soon as the samples are placed upon the market.

THE DEATH OF MISS BAXTER.

In our issue of the 28th August the death was recorded of Miss Baxter. Feeling that the death of so good a person should not pass unnoticed in our journal, we have obtained the following notice, which has been published in the *Record* and a local paper:—

Our obituary records the death of a lady who was a native of Doncaster, and who, for the last five years, has been carrying on an important missionary work in the remote colony of Hong Kong, in China. It is now many years since Miss Harriet Baxter left Doncaster, and ceased to take part in the parochial visiting, and the schools of this town. She laboured assidiously both here and in Westminster, and wherever she might happen to be residing, in every good work, and was unwearied in her efforts for the improvement and religious enlightenment of the poor around her. In the year 1859 she received an invitation from the Bishop of Victoria and Mrs. Smith, who are so well known in the neighbourhood of Doncaster, to undertake the care of an important school, which was about to be established in Hong Kong. The post was an arduous one, and no English lady could be found to undertake it. Miss Baxter, after much deliberation, resolved to go out to China as a volunteer, and to become a missionary both to the female Chinese population and also to the wives and children of our soldiers and sailors, who require so much care in distant colonies. She went out and laboured there at her own expense, receiving subscriptions towards the support of her schools, but contributing the greater portion of their maintenance from her own resources.

She sailed in 1860, in the ship which carried out Lord Elgin to his Chinese Embassy, and was shipwrecked with him at the Point de Galle. She bore testimony to his noble calmness and courage, as the ship was going to pieces, and she passed him with other ladies to the boats, while he stood on deck waiting his turn with the gentlemen in the midst of the storm. Arrived in China, with her books and all her baggage lost, or irreparably spoiled, she devoted herself to the study of Chinese; and in a comparatively short time, though possessed of no talent for languages, her indomitable perseverance enabled her to make herself understood by the Chinese women and children. She founded two schools for the better class of children, one for boys, English, Chinese, and half-castes; and another for girls, English, and half-castes; and she afterwards added a third school for poor Chinese girls, and a fourth for poor Chinese boys. Among the more numerous inmates of these schools she had about seventeen orphans, of whom she considered herself the especial protectress. After a time the school for poor Chinese boys was undertaken by the Missionary of the Church Missionary Society, Miss Baxter retaining a supervision as visitor, and aiding with advice. For the upper Boy's School she had obtained the services of a master from the Highbury College, trained by our former pastor, the Rev. C. R. Alford. This master only arrived a short time ago, and was scarcely settled in the school.

Besides these schools, she was indefatigable in visiting the poor, and in recalling the wives of soldiers or sailors to the Protestant faith amidst the temptations of surrounding Paganism and the activity of the Roman Catholics. In that hot climate, where exertion becomes a labour, and exposure to the sun is dangerous, she wended her way with untiring zeal from quarter to quarter of the town, and from school to school, encouraging her teachers, canvassing for contributions to her various charities, relieving distress, and speaking of the Gospel in their own language to the Chinese women. In this way five years were passed, chequered with many trials and at first with much opposition, and attended with constant anxieties for the result of her labours. Once she fell into ill health and feared that she should be taken away before her work was crowned with success. But a voyage to Macao was the means of restoring her to health, and from that time to her last illness she enjoyed almost unusual strength. When the fever seized her, she was on the eve of returning home. At first it attracted little observation, as the fever of the country is no unusual visitor at Hong Kong. But it soon became evident that it was a mortal sickness, and in spite of all that medical skill and the unremitting care of friends could do, she breathed her last on the 30th of June. Her death was felt as a public loss, and her remains were accompanied to the grave by a large number of the inhabitants, and laid, in fulfilment of her wish, in that portion of the cemetery set apart for soldiers and sailors, among whom she had done so much good. Thus has passed away a noble and heroic spirit, after carrying out a work from which brave men might have shrunk; unflinching in her labours, careless of danger and disease, and self-denying and patient, sagacious in discerning the steps to be taken, and managing the resources at her command with a wisdom and economy which doubled their results; supported and animated by a missionary spirit which led her to consider it the duty of her life to devote all her energies to the spread of the Gospel, and counting herself happier in her death when her work on earth was finished, than if she had been spared to return to her dear native land.

More than five years ago (writes Bishop Smith) Miss Baxter dedicated her life and talents to the work of Christian education among Chinese females; and went to Hong Kong unsupported by any missionary society, and dependent for the pecuniary means of working out her beneficent schemes of missionary usefulness on her own private resources and those of her family, with the assistance of the Society for Promoting Female Education in the East, and other friends on the spot. In the multitude and variety of her zealous and energetic labours she prematurely wore out her strength, and has entered early into her rest. How great has been the loss sustained by the missionary cause in the removal of this devoted and efficient labourer is proved by the sorrow prevalent among Europeans and Chinese at Hong Kong, where she has secured a permanent place in the affectionate memory and respect of the native race, for whose benefit she cheerfully sacrificed the endearments of her native land and home. Amid the mournful regrets for her loss, the sympathy of many Christian friends is excited on behalf of her afflicted family, and especially her worthy and respected father, in this season of trying bereavement. Prominent himself in every good work of Christian activity at home, he has made the most valuable of all contributions to the missionary cause abroad. To few parents has fallen the privilege of offering up the costly gift of so precious a daughter on the altar of missionary self-sacrifice. Cheerfully as he has borne, for the sake of the Gospel, many years of reparation from his beloved daughter, we doubt not that he will now be sustained by the comforting assurance that her work is done, and that she is now present with that Saviour whom she so ardently loved and served.

(From the Hong Kong *Evening Mail*.)

We regret to record the decease of Miss Baxter, who died this morning (30th June) at nine o'clock. Of all the honest labourers in the East, she was preeminently the first. She was unwearied—we are sorry we cannot add unwearіable—in well-doing. Selecting, voluntarily, a sphere of usefulness for herself, this resolute and good young lady determined to come to China and educate native children in the sublime doctrines of Christianity. For years she has laboured like a heroine as she was, training her little flock with kindness and assiduity, asking no man's help, but fighting alone under a tropical sun, in the most unselfish manner. Totally unpretending, she bowed only to a sense of duty, and she bore the yoke meekly, as the good can only do.

We were not personally acquainted with the late Miss Baxter, but we have had a hundred opportunities of noticing her pure enthusiasm in the cause of good. At a future time it will be proper to say more on the subject, but grief for her loss is too deep to allow of any further remarks. We can only say that Hong Kong will not soon replace the loss it has sustained in the death of this lady.

The London & China Telegraph.

LONDON, TUESDAY, OCT. 10, 1865.

TELEGRAPHS AND RAILWAYS FOR CHINA.

Recent accounts from China furnish us with the latest preliminary action taken by English residents in Hong Kong and Shanghai to introduce telegraph and railway communication into the country. We regret to learn, through a correspondent at the former colony,* that the committee appointed to inquire into the feasibility of carrying out Sir Macdonald Stephenson's projected line, have reported unfavourably of their application to the Chinese for their sanction to such an undertaking. The experimental line was to be from Canton to Fatshan—the Birmingham of the Quang-tung province—some twelve miles long, and the estimated traffic purely Chinese, in goods as well as passengers. Therein, we are of opinion, lay the weakness of the project. Here was a body of foreigners proposing to establish a new system of communication by land so as to supersede the existing traffic by water, without themselves having anything but an infinitesimal interest at Canton in the traffic. Had the scheme projected been laid at first between two points where British interests prevailed, such as the Kowloon shore and Canton, or better still, Shanghai and Woosung, the application would have been made with greater weight, inasmuch as the introduction of a railway was simply for foreign convenience in trade, according to the improved means of communication in their own country. By placing the grounds of application on this basis the Chinese authorities could not easily refuse their sanction in granting a concession to the committee. As it was, they sought for power to lay down a line across a densely populated country, and into a manufacturing town where no foreigner resides. In this light it was, to the suspicious Chinese mind, an innovation of such a character as to bear a political significance, especially if they remembered the attack upon Fatshan, when their fleet of gunboats was burnt in 1858. Under these circumstances we are not surprised at the Provincial Government refusing to give their support or sanction to the proposed line; and, as far as the general question of railways for China is concerned, it is to be regretted that this special application was made, for it may be held as a precedent in future applications. We likewise express our regret that the efforts of Sir Macdonald Stephenson have been for the time frustrated; but he is not the man to give up at the first failure of his plans, and we trust he will meet with success at his next attempt to put them into practice.

While this railway project has so far failed in the South of China, we note the first step taken to establish the sister scheme of electric telegraphs in the North, where a short line has been attempted in the vicinity of Shanghai, by an adventurous British resident named E. A. Reynolds; but not without coming into collision with one of the petty Mandarins, through whose district the line is intended to pass. As far as we can learn from the imperfect report of the affair in the local journals, it would appear that Mr. Reynolds, without saying to the authorities "By your leave, I am going to lay down an "electric telegraph, on the European system, between Shanghai "and the Kin-toan beacon at the entrance of the Yang-tsze," he commenced to lay his posts along the line of route. As he is well acquainted with the prejudices of the Chinese peasantry, from a long residence in the country, he curried favour with the small occupiers of land to respect his posts by distributing *cumshaws* of *cash* among those whose farms he crossed. Moreover, he "refrained from commencing operations until the wheat "had been gathered in, when, apprehensive of disturbing the "possible arrangements of the villagers, he had the holes made "with an augur, which removed no more earth than was absolutely necessary to make room for each post." This showed a judicious care not to interfere unnecessarily with the people's land—for which he deserves credit—and he thought all was right for constructing his telegraph. But he reckoned without his host, for the magistrate of the small town and district of Chin-za, or Chuen-sha, went and deliberately cut down the posts already fixed in the ground. It does not appear that this functionary warned Mr. Reynolds of his intention; but we strongly suspect that some communication must have taken place, in requesting him to pay some subsidy to the Mandarin for permission to lay the line, which probably was refused. Be that as it may, it was a grave oversight on the part of Mr. Reynolds to commence operations without obtaining the sanction of the Chinese authorities. This was especially necessary as the land he passed through was on the Pootung side—literally, the *east*-bank of the Wong-poo River—and beyond the concession or settlement occupied by the British residents on the west bank. However, the British Consul deemed the vandalism of the petty Mandarin a case for complaint to his superior officer the Taoutai, or Chief Magistrate of Shanghai City; who promptly ordered him to replace the posts at his own expense. So far this is satisfactory, and reflects credit on the liberal views of Ting the Taoutai. But it would have been much better if Mr. Reynolds had gone legitimately to work and secured the concession to lay the telegraph from the proper native authorities. It is this apparent contempt for the laws of the country which often causes mischief between foreigners and Chinese; and there is no precedent in any country or people throughout the world pretending to civilisation for committing such acts against authority. Moreover, it would appear, in the absence of anything to the contrary, that this is a private telegraph to be laid down under the control of one person, and we presume to be worked for his exclusive benefit, without the supervision of the British authorities. However much we may compliment the projector on his enterprising spirit in the matter, we do object to his having this exclusive means of communication between Shanghai and the seaboard, as it may tend to subvert the very advantage it professes to give. The Kintoan beacon is seventeen miles in a straight line from Pootung Point, and, from the level nature of the country, the telegraph may not diverge a foot to the right or left. Vessels passing up to Shanghai sight the beacon, where a boat can easily board them in ordinary weather. By this means information of an important nature may be conveyed to Shanghai a day or two in advance of the route by Wooosung, some thirty-six miles, should the tide not serve to proceed beyond the "marks." In that time this telegraph, under the control of a private individual, might convey exclusive intelligence which he may sell at an extraordinary charge to the merchants. We know that exclusive information has been obtained by the dispatch boats of private firms calling at Yang-tsze Cape, and sending couriers overland to Shanghai, at an enormous cost, but that was "all fair" in the prosecution of Chinese commerce. The case is different in this instance, where it comes under a public method of conveying intelligence over public lands, subject to public authority; and the foreign residents of Shanghai are entitled to have some control, if not the Chinese authorities, over the telegraph messages. We are surprised that the British Consul at Shanghai did not see it in this light, and advise Mr. Reynolds to make his telegraph a public undertaking, under the control of the Shanghai British Chamber of Commerce. The days of exclusiveness in the China trade are rapidly passing away, when private monopoly should be discarded. Whatever be done in the future for introducing telegraphs or railways into China should be done legitimately, under the sanction of the constituted authorities, foreign as well as Chinese, and the means for carrying them out should be by associated enterprise under the control of a responsible body of directors. We hope soon to see an influential company formed to carry out telegraphic communication on both banks of the Wongpoo, and the still more important undertaking of constructing a railway from Shanghai to Woosung, with docks and warehouses commensurate with the trade of the great emporium of North China.

CHINA GRASS.

The active spirits of Rouen seem determined to establish China grass amongst the materials of their manufacture, and a company has been formed with a capital of three millions of francs, divided into shares of five hundred francs each, to carry the matter into practical operation; and, amongst other things, to erect works in the neighbourhood of Rouen for the disintegration, combing, and cottonisation of the fibre. The composition of the company promises well for the undertaking, the directors consisting of the President of the Tribunal of Commerce of Rouen; the Maire of Rouen, one of the Deputies for the Department of the Seine Inferieure, and another gentleman—all three of whom are likewise members of the Administration of the Bank of France, as well as of the Council General of the Department, or of the Chamber of Commerce of Rouen, or of both; two other members of these latter bodies, one of the directors of the Comptoir d'Escompte of Paris, a merchant of Rouen, and M. Canoby, formerly merchant, and prime mover in the undertaking.

The subscription was kept open in Paris from the tenth to the twenty-third of September, and a certain number of shares were taken up, and it is expected that the rest will be placed in Rouen and its neighbourhood. As regards the economical portion of the question, we have already given in our columns all the information existing. With respect to the capabilities of the fibre for cottonisation, for spinning and working either as cotton or as silk, separately or mixed in various proportions either with cotton or wool, and for bleaching and dyeing there, can be no question; those who have not seen the yarns and tissues exhibited at the Chamber of Commerce of Rouen, and at the Society of Arts in London, may do so at the present moment, if not at the house of the society, at the offices of the company in Paris, No. 41, Rue Taitbout, where we examined them a few days since. In the present condition of the silk and cotton trade, the practical introduction of a new fibre, always an important event, is of special interest; and considering that China grass may be obtained not only from China, but from many other parts of the world, and also that it can be grown without difficulty and, it is stated, economically in Western Europe; the attempt of M. Canoby and his friends deserves to find favour in the eyes of the commercial and manufacturing world, and we heartily wish that it may be successful. China grass and its products have lain far too long in the museums and amongst curious miscellanies, it is quite time to set it to work and try its value.

THE NEW GOVERNOR FOR HONG KONG.

Sir Richard Macdonnell has not yet arrived from Nova Scotia, and it appears by the last advices to be doubtful when he will quit that post. The following is an outline of Sir Richard's career. In 1838 he was called to the bar in Ireland, was Chief Justice and subsequently Governor of the Gambia from 1843 to 1851. In 1852 he was appointed Governor of St. Lucia. In 1855 Governor-in-Chief of South Australia. In 1864 appointed Governor of Nova Scotia. Although our Government will not confer the appointment on Mr. Mercer, it appears they are willing to allow him to hold the reins as long as possible.

THE TELEGRAPH *VIA* ST. PETERSBURG AND KIACHTA.

Last mail brought intelligence from Shanghai that Mr. C. Mitchell Grant was endeavouring to obtain subscriptions—from the merchants of that place, to the extent of 5,000 taels, in 50 shares of 100 taels—for the purpose of establishing a line of couriers from Tientsin across Mongolia to Kiachta. Mr. Grant estimates the distance *via* Kalgan at 1,098 miles, and that a pony courier service can accomplish that distance in 6½ days—being about 168 miles per day, or 7 miles per hour. From Shanghai to Tientsin the steamers are generally under four days, and allowing the transmission by telegraph from Kiachta to St. Petersburgh and London to be one day, the total time would be about 11 to 12 days. Mr. Grant estimates that if 20 messages can be obtained per week for nine months it will yield 24,000 taels, while the outlay would be 17,000. The line from Kiachta (or rather from Troitskosavsk, about four versts distant) is open, and in daily communication with St. Petersburg when the lines are in order, but this is just the trouble; the wires and posts are constantly being blown or washed down, and for some time past we have been receiving telegrams from Kiachta varying from one to fifteen days. Mr. Reuter's agent (Mr. Bishop) has been stationed at Kiachta for a long time, but their united efforts, with all their advantages, have not yet resulted in organising a service of telegrams from China. From the following paragraph in the *Morning Post* it would appear that other persons also contemplate making a trial of the matter. We believe that one of the telegraph companies in London have a hand in this latter project. Should any progress be made in it we shall inform our readers.

The construction of a line of telegraphic communication is proposed between Europe and China *via* Russia, by way of her frontier trading town of Kiachta, by which our Government and merchants will be able to have news from China in from 10 to 12 days. There is already one line in existence, but it is exclusively the property of the Russian Government, and strictly used for political purposes only, whilst the new line will be free to every one. The Russian Government has been applied to by the London interest of the projected line, and has ex-officially expressed its approbation and intention of supporting the undertaking.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Oct. 8.

The Minister of the Financial Department presented the Budget for 1866 in the sitting of the 23rd of last month, and delivered his annual speech, in which he was fully justified to congratulate the members of Parliament and the whole country with the state of the Treasury. The ordinary expenditure for 1866 is estimated at 74,000,000f., while the ordinary income will make up a total of 64,000,000f. To provide the deficit of the 10 millions, and likewise for the 31¾ millions, which will be spent for extraordinary expenses, the favourable balances of the years 1863 and 1864 are assigned, which amount together to 12 1-5th millions, besides the balance of the East Indies (*batig slot*) to 25 millions, and the last term of the sold Scheld duties to 3 1-5th millions. Under the extra ordinary expenses appear 14¼ millions for the sinking fund of the National debt, 13¼ millions for the construction of State Railways, 1¼ million for the waterways to the sea from Rotterdam, Amsterdam, &c. Twenty-five millions from our East Indian possessions is very much; it is true that Mr. Betz told us that the public service in India will not want such large sums as in former years, and that the prices at which the produce are estimated are very low; but I think it was preferable that a part of that large amount remained in the East to extend there the European element, which should be the best lever for the social development.

Perhaps our own expenditure could be diminished also enormously. The Finance Office requires 11,600,000f., the Marine Office, 9,043,000f.; Home Department, 23,295,000f.; and the Colonial Office only 3,760,000f.; while 12,766,000f. are assigned for the War Department, which amount is very much too excessive for a country like Holland. In general, however, this budget made a very good impression, and doubtless it will tend to strengthen the position of the Cabinet. The Opposition and its organ the *Dagblad* does its best to impugn the accuracy of the statements; but these prophecies of evil have been uttered many times already that the public does not believe one word of the Tory assertions.

The address, in reply to the Speech from the Throne, caused only a very unimportant discussion of one half-hour. The Colonial question was not touched at all, while the Bill about the cultures, which was laid some days ago before the members by Mr. Fransen van de Putte, will, offer perhaps, oppportunity enough for an animated debate. This very important but voluminous Bill, which ought to be translated in full for your English readers, while it gives a sketch of the cultures since 1830 to the present year, contains the following principal points:—The Inland proprietors will come into possession of those grounds which they use now individually or by inheritance. The coffee-gardens belong to the State. It is forbidden that Europeans and foreign Orientals shall be in possession of grounds which belonged to the natives. After a lapse of five years this stipulation will be revised. The obliged delivery of coffee to the Government by natives is maintained. The Government is able to interfere to continue the existing sugar-contracts when these are expired, and to establish new ones. Without this intervention no sugar manufactures can be established. Without doubt this Bill will make a very favourable impression in Java, because it proves that our Government inclines more and more to introduce in our colonial possessions a liberal policy.

Digitized by Google

The first Sittings of the Second Chamber were dedicated to a debate on the *rinderpest*, which prevails still in our country, and extends itself from one province to another. The Government asked a credit of 100,000f., to take some extraordinary measures. This trifling sum, of course, was allowed, but the Opposition made a severe attack upon the Cabinet, while our premier was absent when this plague made its appearance here. Ridiculous as this attack was, it did not give any result; Belgium, as well as our provinces, which were not infected, are now infected, notwithstanding every measure was taken to prevent the plague spreading. Our Minister at the Court of St. James's, as well as the Consul-General in London, were blamed because they did not inform the Government betimes that this epidemic plague prevailed in your country.

In the Bois le Duc a Catholic Church Congress was held during the last days. Notwithstanding this has not been celebrated in our country within 400 years, it did not make much sensation.

J. F. de Casembroot has published a relation about the battle of Simonoseki. You will remember that this officer was Capt. of the *Medusa*, which took part in this battle.

COMMERCIAL.

The floating trade is less active since the enhancement in the rate of discount, and the market was rather dull. Some large affairs in sugar and tin excepted, there only took place a few private auctions of coffee and tobacco.

Coffee.—The Dutch Trading Company announced its monthly auction, which will be held on the 18th, and consist of 125,903 b. The greatest quantity being good to good ordinary, the prices were estimated ½ c. in average higher than in the former month's sale. The market remains very firm, but there took place no transactions of any importance; for foreign sorts, as Santos and Ceylon, there was a lively demand.

Sugar.—Firm. Here and at Amsterdam about 5,000 kr. Java were sold at unaltered prices. The stock of the Trading Company consisted on the 1st Oct. of 30,151 kr., against 18,870 kr. in 1864, while the private stock amounted to 56,723 kr.

Rice.—Without business doing. The 2,700 b. Java arrived per Nagasaki are not yet sold.

Spices.—Good qualities remain in a firm condition. Nutmegs: No. 1 were paid with 75 c.; No. 2, with 67 c.; but nothing can be bought now without an advance of 2 c. Mace is offered at 70 for D, and 66 c. for E. Cloves: With a moderate demand; there is only inquiry for No. 2 at 25 c. The unsold stock of the Trading Company consists of 165 casks nutmegs, 95 casks mace, cloves.

Tea.—On the 25th of October the Trading Company will offer at auction 7,062 ¼ and 529½ -chests Java Tea.

Tobacco.—Java—Several private auctions took place since the departure of the former mail. The following parcels were sold:—

Bales.		Trade-mark.	Sold from		In average.
1,550	Java Tobacco	MGB,	„ 35½—126½ c.,	„	83¾ c.
1,326	„	Soekowono	„ 21½—108 c.,	„	65½ c.
557	„	S	„ 16½— 33 c.,	„	25¼ c.
2,782	„	Tanl	„ 23½—101 c.,	„	46⅛ c.
756	„	FvdP	„ 25 — 96 c.,	„	54½ c.
293	„	P	„ 19½— 38 c.,	„	26½ c.
245	„	BCVO-Kenalan	„ 14½— 23½ c.,	„	18¾ c.
132	„	MK	„ 20½— 55 c.,	„	38½ c.
21	„	TTWW	„ at 74 c.		
82	„	GB	„ 74½—113 c.,	„	92¾ c.
76	„	Kemoening	„ 45 — 83 c.,	„	66⅞ c.
10	„	Titan	„ at 66 c.		
277	„	JGB	„ 25 — 85 c.,	„	57½ c.
389	„	V	„ 22¼— 49½ c.,	„	37 c.
120	„	Singahan	„ 18 — 62½ c.,	„	38⅛ c.

In general very high prices were paid, not only for the brown leaves, but also for the middling qualities, because there is no stock of importance. The greatest quantity was sold by foreign houses, and much is to be shipped for England. For Manila there is some more inquiry at better prices, in consequence of the high quotations of the Java tobacco. The stock consists now of 3,170 barrels Java and 2,863 barrels Manila.

Manila Segars.—On the 18th inst. 200 pn. 2a. Cortados Cavita, 1865, and 100 pn. 2a. Cortados, 1864, will be offered in auction.

Indigo.—The indigo auctions of the Trading Company gave very satisfying results. For bad 10 to 30 cents was paid more than in May; for middling, 20 to 40 cents; good middling, 50 to 60 cents; and fine, 70 to 90 cents. The Bengal sorts were paid according to the London prices. Since the auctions some private business was done; the quantities offered in private auctions were sold, the 123 ch. Bengal at 415 to 575 cents, and the 112 ch. Java at 365 to 670 cents.

Cotton.—In consequence of the animated Liverpool market there was a lively demand.

Banca Tin.—For the last week there was a lively demand, and very considerable transactions took place, while the prices increased. 2,000 slabs were sold at 54½f.; 1,600 do. at 54¾f.; 1,500 do. at 55f.; 1,000 do. at 55¼f.; 1,200 do. at 55½f.; 500 do. at 56f.; 1,000 do. at 56¼f., 4,300 do. at 57f. The large purchases for shipment to America, estimated at 600 tons, being done, the market became somewhat weaker, and 700 slabs were sold at 56¾f., and 800 do. at 56½f. The stock amounts to 180,957 slabs, against 123,946 slabs in 1864, when the price in average was 61f.

Hides with a moderate demand; only 648 p. Passaroean ex Boui, and 2,176 p. Batavia Buffalo were sold at prices that did not transpire.

Arrack.—100 casks Soerabaya ex Cherokee, and 100 casks do. ex Nordstern, 25 casks Batavia ex L. A. Bang; 90 do. ex Antelope, and 50 do. ex Maria Elizabeth, were sold at secret but very firm prices, because the stock is unimportant.

Rattans.—The very unimportant imports caused a firm demand, and several private parcels were sold at somewhat firmer prices. On the 19th inst., 59,151 bundles will be offered in public sale by the Trading Company, which are estimated at 12f. to 16f.

Cochineal.—99ch. sold by auction were paid with—No. 1, 200c. to 230c.; No. 2, 185c. to 205c.; No. 4, 155c. to 195c. Zaccatelle—No. 8, 185c. to 240c.; No. 9, 195c. On average the prices were 10c. to 20c. higher than those paid in May.

Cocoa Nut Oil.—Cochin is quoted at 30½f.; 2a, at 29½f.

Camphor.—The market is in a firmer condition, and higher prices are willingly paid.

Cubeben are paid with 45c. to 46c. At these prices 800 bags were sold.

Pepper.—Some parcels were sold at 20c. to 21c.

Cassia Lignea with much demand; under 56c. there is nothing to have. Cassia Vera with much demand in the different sorts. Tigablas is willingly paid with 32c.

Japan Wax.—There is much inquiry at firm prices. A, 40f.; B, 38f. to 38½f.

Gummi Elasticum.—Holders decline to operate without an advance.

Gutta Percha.—16,000 kilos. of the cargo imported per *Joan*, and 800 kilos. ex *Helen Baird* were sold at secret prices.

Gum—Damar.—With much inquiry at 26½c.; prime quality cannot be bought now under 27c.

Cotton Manufactures.—A considerable business was done last week as well for account of the Amsterdam as Rotterdam exporters; they amounted to about one million of guilders. The greatest quantity is to be shipped to our East Indian possessions, but a part of them will be sent to Calcutta. The prices are 20 to 25 per cent. higher; our manufacturers cannot sell anything more before the second quarter of 1866.

Money.—In consequence of the measures taken by the directors of the English Bank, the rate of discount of the Netherlands Bank was advanced 1 per cent., so that the minimum now is fixed at 4 per cent. for bills, and 4½ per cent. for acceptances. Stock: Two and a-Half per Cents. Dutch, 60 3-16ths; Three per Cents., 72; 4 per Cents., 96; Trading Company, 146; Dutch Rhenish Railway, 112; Dutch Railway, 128½; Rotterdam Bank, 97½; International Bank, 97. 'Change on London, 3 mo., f.11.73; 2 mo., f.11.79; short, f.11.81; Paris, 3 mo., f.46.70; 2 mo., f.46.85; short, f.47.25; Antwerp, 3 mo., f.46.65; short, f.47.15; Hamburg, 3 mo., f 35; 2 mo., f.35.11; short, f.35.45.

Shipping.—Arrivals.—Sept. 27, at Texel from Padang, Alcyone; Oct. 2, at Brouwershaven from Batavia, Nagasaki; at ditto from Panaroekan, Pieter.

Departures.—Sept. 25, from Hellevoet for Batavia, Maarten van Rossem; 26, from Zierikzee for Batavia, Nederland and Oranje; 27, from Helvoet for Batavia, Medea; 28, from Helvoet to Java, H.M.'s war steamers den Briel, Commander A. J. van Mansvelt; Aert van Nes, Commander J. J. Wichers; Bali, Commander J. A. R. A. M. Clifford van Brengel; 30, from Texel for Batavia, H. M. war steamers Cycloop, Commander C. A. L. H. Baron van Hekeren; and Maas and Waal, Commander C. A. B. D. Ryk; Oct. 1, from Texel for Batavia, Oceaan; from Brouwershaven for ditto, Jupiter, Diana; 3, from Texel to Padang, Excelsior; from Brouwershaven for Batavia, Eva Johanna.

Loading.—At Amsterdam, for Kanagawa and Decima, Gloria, China; for Padang, Henrietta; for Batavia, Jacoba and Christina; for Batavia and Samarang, Goede Verwachting, Java Packet, Aria and Betsy; for Batavia and Sourabaya, Quartet, Vertrouwen; for Samarang, Ortelius; for Sourabaya, Presto, Sourabaya Packet. At Rotterdam: for Kanagawa and Decima, Duodecima; for Batavia, Dordrecht; for Batavia and Samarang, Johannes Anthonius; for Batavia and Sourabaya, v. d. Palm, Otto; for Sourabaya, Jeannette and Cornelia; for Singapore and Hong Kong, Katharina Maria.

PASSENGERS OUTWARD.

For Java, per Jupiter, Mr. J. J. F. Pacqué and family, Mr. H. W. C. Bredezode and family, Mrs. G. Staverinus Rys and family, Miss Pacqué, Mr. J. F. Dinger and family, Mr. A. N. Dinger, J. W. B. Borgerhoff van den Bergh, J. M. van Berckel, L. van Hengel, C. L. A. Gaillard, and B. W. Hertzveld. Per Medea, Mr. J. Blaaupos, Miss Blaaupos, Messrs. Boudewyns, Jugenluyff, van Hengel, de Sturler, A. Straeter, B. Straeter, Th. v. d. Ben. Per Nederland and Oranje, Mr. A. S. Fransen van de Putte and family, Miss van Weelderen and Kraal, Messrs. van Weelderen, Schiff, and Gransberg.

Monetary and Commercial.

Advices from Vienna allude to arrangements which are reported to have been entered into with Messrs. Rothschild, Barings, and Hope, for an Austrian Five per Cent. Loan of £5,000,000 or £6,000,000, at 74, with a sinking fund that will cause it to yield a rate of interest equal to about 8 per cent.

The biddings for bills on India took place at the Bank of England. The proportions allotted were—to Calcutta, £102,700; to Madras, £24,000; and to Bombay, £80,000. The *minimum* prices were fixed at the advanced rates of 1s. 11½d. on Calcutta and Madras, and 1s. 11¾d. on Bombay. Tenders on Calcutta and Madras at 1s. 11⅞d. will receive in full, and on Bombay at 2s. about 29 per cent.; above those prices in full. These terms show a considerable increase in the demand for means of remittance, consequent on the recent rise in the cotton-market.

An extraordinary general meeting of the shareholders of the London and Bombay Bank and General Financial and Insurance Agency Corporation (Limited) will be held at the London Tavern on the 20th December next, for the purpose of amending

Digitized by Google

the title, changing it to that of "The London, Bombay, and Mediterranean Bank (Limited)," and repealing or altering various regulations contained in clauses of the articles of association. It is rumoured that several other banks lately formed in India, and having London branches, will amalgamate. The Scinde, Punjab, and Delhi Bank, formed in London about two years since, is also mentioned for amalgamation.

Mr. William Dent, senr., chairman of the Thames and Mersey Marine Company, and Mr. James White, M.P., have joined the board of the Credit Foncier and Mobilier.

At a meeting of creditors of Messrs. Lindsay and Co., of China, it was resolved to accept of a guarantee fund of £90,000, which the partners, H. H. Lindsay and R. C. Antrobus, had obtained from their friends. This sum would yield about 7s. 6d. on the amount of their estimated liabilities. It was expected, however, that some other assets would yield 2s. 6d., making 10s. in all. Great complaints have been uttered by creditors that the firm did not stop long ago. It appears that the losses incurred by the banks by this firm have arisen on local bills and loans, and that the bills on England, with some exceptions, have been all duly honoured. Local loans for houses of any standing is a new and dangerous institution in China, and pretty certain to indicate a result similar to that of Messrs. Lindsay and Co. Among the exceptions we understand there are two bills in the hands of the Bank of Hindustan, one for £4,000 on Messrs. J. W. Cater, Sons, and Co., of Mincing-lane, and one for £6,000 on Messrs. Springfield, Son and Nephew, of Coleman-street. It appears that both these houses had granted their credits in favour of Messrs. Lindsay and Co., but that having gained some information as to the state of the firm previous to the presentation of the bills, they declined to accept them. While we do not presume to enter into the legal grounds for such refusal, we think it only right that the fact should be known to the mercantile communities in the Far East. The case appears as flagrant as the one noticed in our last issue, where the banks refused to deliver up shipping documents on receipt of the amount of the bills drawn against them. Any mercantile firm in this city which is not prepared to give honour to its own act, deliberately granted in the shape of a "Letter of Credit," should certainly be ostracised. It is not of importance, nor do we know on what particular grounds these bills were refused, but assuming that Messrs. Lindsay and Co. drew them in anticipation of the shipment of the goods against which they were intended, and that previous to the shipment they stopped: this is a matter to adjust with them, and measures should not be adopted to visit the sins of the drawers upon the holders of the bills. By granting a credit, without a clause stipulating that shipping documents were to be attached, or what is termed "a clean credit," the grantors took upon themselves all the responsibility. We understand that the Bank of Hindustan has entered suits against these firms, and we presume that they withhold their consent to the arrangement for liquidating Messrs. Lindsay and Co.'s estate above-noticed, pending the result. It is to be hoped that Messrs. Cater, and Messrs. Springfield, will both agree to accept these bills, and thus preserve the integrity of a "Letter of Credit."

The Ceylon Government Loan of £100,000 in 6 per cent. debentures, offered to public competition on the 14th September, by the Crown agent for the colonies, but of which only £10,300 was taken, has, it is understood, now all been disposed of at the minimum originally declared, viz., 104.

On the first arrival of the new teas considerable excitement existed in Mincing-lane, and in some cases parcels which had been offered at 2s. 6d. in the hands of one broker, were sold through another at 2s. 9d. This sort of wild dealing gave rise to much dissatisfaction, and some dealers refused to operate at all. One of the large dealers issued the following circular to their constituents, in order to mark their view of the case. Considering the heavy losses incurred by the importers during the past two years, we cannot blame them for squeezing the utmost fraction :—

About this time last year we deemed it necessary to bring to your special notice the extreme prices paid in China for teas, the novel system adopted of hurrying them to this market by the expensive overland route, and pointing out its disastrous tendencies. It was satisfactory to us that our views coincided with those of most of the importers, and it was equally so to find by your firm determination not to encourage such an unwise course, the losses fell upon those who committed the error. This season, in China, there was a return to the sound principle of purchasing teas with a steady thoughtful care as to their value, thus enabling importers to sell their fine teas at exactly the prices we indicated, viz., 2s. to 2s. 6d.; but we regret to find that an opposite course has been pursued here the early part of this week. Buyers rushing one against another in wild haste to get the teas with but little regard to quality and price (the same tea in different brokers' hands having been sold at a difference of 3d. per lb.), and without the slightest ground for it, not even the competition for Russia which we had last year. Now unless this undue eagerness and want of prudence are met by you with the same calm decided opposition evinced last season, all the benefits conferred upon the community by the reduction of duty will be frustrated, or you must sacrifice your profits as vendors to the consumer. The two cargoes already at hand, averaging from 4d. to 9d. per lb. profit to the importers, will, we fear, produce a corresponding excitement in China, and thus react upon all engaged in the trade with similar disastrous results as were witnessed during the earlier part of this year. But be this as it may, our present purpose is to urge you to keep steadily in your minds that there are now on the water about thirty millions pounds of good and fine teas, costing on an average 6d. per lb. less than last season, all of which are due here during the next three months, and are equal to nearly twelve months' consumption of these qualities.—JAMES STEAINS & Co.

The following circular was issued, showing that the prices paid for the teas were not excessive :—

We have just been shown a weak circular, dated 16th, impugning in a loose way the value of the finest New Season Kaisow. Allusion is first made to a similar address last year, a reference to which will show that the finest Kaisows began and continued to rise in value from the date of that print, shortly after its issue, its own author coming into the market and giving the highest price, viz., 2s. 10d. for overland Kaisows.

We have, as a rule, found the highest class in the first vessels; last year the total quantity proved inadequate to the requirements of the trade, while this season the demand, in consequence of the low duty, falls still heavier upon this quality of tea.

Two of the largest cargoes arriving together upon the market, prices for the highest grades have not proved so high as might have been anticipated; in the *Childers* we lost the largest shipment of early New Seasons Kaisows. These and other salient features have induced the trade here to take the *Fiery Cross* and *Serica* with readiness, and some confidence that they will prove of advantage to the ultimate buyers.—R. M. HOLBORN AND SONS.

The Board of Trade Returns for the month and eight months ended the 31st August again present a falling off in the value of exports, which is more marked than for some time past, and must in a great measure be attributed to the general dulness of trade. The total declared value of exports for the month of August was £14,158,648, against £16,274,269 in the same month of 1864, and £14,088,814 in that of 1863, which is a decline compared with the former period of £2,115,621, but an increase over the latter of £69,834. For the eight months of the present year the total was £102,400,696, against £108,716,219 in 1864, and £89,751,851 in 1863, which is a decrease as contrasted with 1864 of £6,315,523, but an increase over 1863 of £12,648,845. We thus find that up to the end of August the export trade had not regained the volume acquired by it last year; yet, comparing the first eight months of the present year with the same period of 1864, the falling off is of little practical importance, while by comparison with 1863 the increase is considerable. Amongst the features of interest it may be noticed that the value of the exports of cotton "piece goods" amounted to only £3,247,981 in August, 1865, against £4,775,185 in 1864, and £3,745,332 in 1863. On a comparison of the eight months' figures the falling off is not so large in proportion, the shipments of piece goods having amounted to £27,685,461 this year, against £30,051,112 in 1864, and £21,819,908 in 1863. These returns are perhaps too early to show the effect of that revival of trade with America which was generally looked for now that the civil war is over, but probably those published at the end of October will tell a more encouraging tale. The trade with the Far East, as far as distinctively classed, is represented in these returns by the following figures :—

EXPORTS TO CHINA AND HONG KONG.

	For the Month ended 31st August. 1863.	1864.	1865.
Cotton yarn	178,898 lbs.	155,911 lbs.	— lbs.
Cotton manufactures	3,589,936 yds.	8,110,857 yds.	6,620,512 yds.
Worsted stuffs	991,356 ,,	2,140,598 ,,	1,127,272 ,,
Woollen and worsted cloths	162,556 ,,	140,927 ,,	114,417 ,,
Lead	875 tons	821 tons	151 tons
	Value for the Eight Months ended 31st August.		
Cotton yarn	£90,555	£172,021	£82,925
Cotton manufactures	689,886	1,409,104	1,646,436
Worsted stuffs	400,951	644,165	829,871
Woollen and worsted cloths	226,571	199,322	194,329
Lead	229,287	111,770	25,660

The Cotton Manufactures exported to other ports and countries of the Far East were, in quantity for the month, and in value for the eight months, as under :—

	Quantity for the Month ended 31st August. 1863.	1864.	1865.
Ceylon	1,106,281 yds.	107,600 yds.	1,110,865 yds.
Singapore	5,134,637 ,,	619,534 ,,	2,927,722 ,,
Java	1,805,223 ,,	512,815 ,,	2,168,522 ,,
Philippine Islands	3,851,507 ,,	4,323,889 ,,	206,477 ,,
	Value for the Eight Months ended 31st August.		
Ceylon	£226,827	£271,888	£176,478
Singapore	383,596	522,914	655,004
Java	218,711	433,941	443,412
Philippine Islands	252,515	457,517	439,825

Digitized by Google

Of Cotton Yarn, the quantity forwarded to Singapore was, for the month, 39,400 lbs., against 87,810 lbs. last year, and 290,660 lbs. in 1863. The value of the export for the eight months was, in the present year, £89,570, against £82,157 last year, and £119,338 in 1863. To Ceylon 5,000 lbs. of Raw Cotton was forwarded in August, against 5,500 lbs. in the same month of 1864, and 48,500 lbs. in 1863. The value for the eight months is £10,318, against £20,910 in 1864, and £32,941 in 1863.

IMPORTS.

British India and China resumed their importance in August as providers of Raw Cotton, supplying not far from two-thirds of the whole quantity obtained:—

	1863.	1864.	1865.
Quantity for the month ended 31st August.			
British India..	251,173	323,273	530,105 cwts.
China	49,183	54,637	44,581 "
All parts	470,807	545,376	866,978 "
Quantity for the Eight Months ended 31st August.			
British India..	1,805,518	2,213,270	1,941,401 cwts.
China	187,376	537,965	301,509 "
All parts	3,174,282	4,670,000	4,561,040 "
Value for the Seven Months ended 31st July.			
British India..	£11,950,999	£17,816,147	£7,460,795
China	994,425	4,216,584	1,210,335
All parts	22,601,368	44,392,716	24,534,839

Of Unrefined Sugar, the quantity imported from Java and the Philippine Islands during the month of August was 32,925 cwt., of the 3rd quality (not equal to Brown Clayed), and 25,968 cwt. of the 4th quality. The quantity for the eight months, and value for the seven months, is returned thus:—

	1863.	1864.	1865.
Quantity for the Eight Months ended 31st August.			
Of all qualities (cwts.)	621,786	140,777	512,418
Value for the Seven Months ended 31st July.			
Of all qualities	£559,039	£133,281	£446,657

Of Hemp the import from the Philippine Islands for the month of August was 16,563 cwt., and the trade for the year is shown by the following figures:—

	1863.	1864.	1865.
Quantity to 31st Aug. (cwts.)	217,522	110,196	162,125
Value to 31st July	£249,293	£176,932	£214,116

Ceylon delivered to us 9,968,924 lbs. of Coffee in the month of August, and the quantities and values for the three years are returned thus:—

	1863.	1864.	1865.
Quantity to 31st Aug. (lbs.)	47,137,593	47,234,274	48,228,050
Value to 31st July	£1,389,478	£1,282,216	£1,314,330

The Declared Value of the British and Irish Produce and Manufactures exported to the various ports and countries of the Far East during the seven months of this and the two preceding years is given thus:—

To	1863.	1864.	1865.
	Exports for the Seven Months ended 31st July.		
China(exclusive of HongKong).	£1,357,953	£1,693,039	£2,140,234
Hong Kong	689,326	1,021,284	878,307
Singapore and Eastern Straits	650,202	840,926	924,211
Ceylon	469,412	509,523	329,538
Netherlands India (Java, &c.)	302,777	567,248	517,916
Philippine Islands	233,116	441,854	612,474
Siam	10,586	11,513	22,365
Japan	49,320	214,316	775,609

The amount of bullion by the P. and O. Company's steamer *Delta*, from Southampton on the 4th inst., was:—In gold, to Alexandria. £29,000; to Madras, £1,170. In silver, to Madras, £39,500; to Hong Kong, £20,000; to Penang, £440; to Singapore, £1,310. Total in gold, £30,170; in silver, £61,250.

ARTICLES OF IMPORT.

TEA.—During the past fortnight our market has been steady, although the amount of business has been limited, owing to the absence of further arrivals with new teas (with the exception of Canton kinds), the trade only buying old season's teas for immediate wants. We fear that the rapid rise in the value of money will tend to keep the prices of old teas low for some time longer, as speculators will not be tempted into the market, notwithstanding that our deliveries for the past month again show the very satisfactory amount of 12,000,000 lbs. Further arrivals of new teas, principally from Foo-chow, are announced, and will be dealt in this week. In broken leaf and dusty kinds of Congou the few sales made have been at previous prices; the fair to good common show no material alteration. In the grades next above these some sales have been made at rather easier prices. In good flavoury kinds, of old import, a few parcels have changed hands at about former rates. In good to fine Kaisows there have been no transactions, in the absence of further supplies of new season. In common to fair blackish-leaf kinds there has been but little inquiry, and prices are rather easier. In medium kinds there is no change to notice. In fine to finest but little has been done, but the quantity left in first hands is moderate. The new-make Canton kinds, ex "Burdwan," did not meet with a very ready sale, and prices for these must be quoted rather lower. In Colongs there have been large transactions, chiefly in the common to good qualities, for export to America, and prices are fully 1d. per lb. higher. In Souchongs there is no alteration to notice. Flowery Pekoes are only saleable at low prices. The first arrivals of Scented tea, of new season, did not meet with so much attention as usual, but sales to a fair extent have been made from 1s. 8d. to 2s. 6d. per lb. for Capers, and 2s. to 2s. 8d. per lb. for Orange Pekoes. In old season's common to fair have sold at full prices, but the good to fine show a further reduction of 1d. per lb. There have been further purchases of uncoloured Japans, which are now very scarce even at 1d. to 2d. per lb. advance. The Public Sales of Indian Tea passed off with fair spirit, the finer kinds realising full prices, but the commoner kinds selling rather lower. In Green Teas the deliveries for export continue very large, and further orders from America having come to hand, prices for suitable kinds have advanced 1d. to 2d. per lb., and Young Hysons and Imperials are now difficult to be met with at prices which exporters can pay. Hysons show no change. Good to fine Gunpowders have sold 1d. to 2d. per lb. higher. The commoner kinds are still comparatively difficult of sale. Canton-make remain neglected, and are only saleable at very low prices for all common to fair qualities. The public sales of the 28th ult. comprised 1,494 packages of Indian tea, of which 923 packages were sold, those of the 3rd inst. comprised 24,879 packages of China tea, of which 19,940 packages were sold, nearly the whole being without reserve. The letters were delivered on the 30th ult., latest dates being Hong Kong, August 12; Shanghai, August 4; Foochow, August 5; and Hankow, July 29. The stock in the United Kingdom on the 30th ult. was estimated at 76,400,000 lbs., against 84,500,000 lbs. last year, and the quantity afloat at 38,160,770 lbs., against 41,335,000 lbs. Arrivals announced are the Burdwan, Broadwater, Flying Spur, Young Lochinvar, Belted Will, Eliza Shaw, Pakwan, Black Prince, Ziba, Min, and Yangtze.

SILK.—We have had extensive business in China silk during the past month, mostly, no doubt, of a speculative nature, but on the whole fairly backed up by purchases for actual consumption. The demand has been principally for the better descriptions of Tsatlee, which are becoming comparatively scarce. The home trade are still the largest buyers, though business has been done for export, and latterly Chop Silk has been sold for speculation at some advance on previous rates. In Japan silk but little business has been done owing to the scarcity of available sorts; unfortunately, the first arrivals of new Mibash do not present us with the size and quality required, though they have realised very high rates; but by the last advices from Japan we are led to expect a better assortment in future unloadings. The deliveries for the month, 3,174 bales of China, and 1,082 bales of Japan, show a considerable improvement on those of previous months. The reports from Lyons agree in stating that, in spite of the tolerably large arrivals of Asiatic silk to make up for the scarcity in Europe, the best report that can be made is that there is just sufficient animation exhibited to hold out a slight hope for the future. For some time, however, the transactions in tissues of fine quality cannot be very large seeing that the stocks are very low and are daily becoming smaller, and that it is difficult to obtain first-class raw silk except in very small quantities.

SUGAR.—The advance in the Bank rate of discount has checked the rising tendency of the article observable for several weeks past, and, although prices have been well maintained, transactions of late have been on a rather more moderate scale, causing the market to present a calm and comparatively inactive appearance towards the close. 3,371 bags Penang taken freely at fully previous rates, low and low middling yellow 34s. 6d. to 36s.; 579 bags Natal, ordinary to fine brown, 29s. to 33s. 6d., low to good yellow and grey, 34s. to 36s. 6d.; 24,000 bags clayed Manila at 33s. 6d. to 34s.; 10,200 bags Unclayed at 30s. 6d. to 31s. The stock of sugar in the leading ports of Europe, on the 1st inst., was 256,000 tons, against 295,300 tons last year, and 270,600 tons at the same period of 1863; that in the United Kingdom being 222,800 tons, against 255,500 tons, and 235,000 tons.

COFFEE.—Some abatement of demand has been experienced for Colonial sorts, and notwithstanding that the bulk of the supply on offer has found buyers, the value has been barely supported. Ceylon: 1,210 casks, 810 barrels and bags plantation, at public sale, were chiefly disposed of, in some instances at a decline of 6d. per cwt., fine fine ordinary to low middling 77s. 6d. to 80s. 6d., middling to good middling 81s. 6d. to 85s. 254 casks, 1,280 bags native were great part realised, without particular change in quotations; good ordinary 65s. 6d. to 66s. 6d., fine ordinary 67s. 6d. to 68s. The stock of coffee in the chief ports of Europe, on the 1st October, was 73,000 tons, against 56,800 tons at the same time in 1864, and 64,800 tons in the preceding year; the proportion held in the United Kingdom being 17,900 tons, against 16,300 tons last year, and 14,850 tons in 1863.

COTTON.—This market has been more excited than for a long time past, prices advancing 3d. to 4d. per lb., and although subject subsequently to some fluctuation, owing to the rise in the value of money, this great advance has been ultimately quite maintained. Quotations—Broach, ordinary, 1s. 3d. to 1s. 4d.; Dhollera, ordinary, 1s. 3d. to 1s. 4d.; China and Japan, mid. fair, 1s. 3d. to 1s. 4d. The extraordinary rise is owing en-

Digitized by Google

irely to speculation, and no reliance can be placed on the rates holding. The quantity of China and Japan afloat is 6,300 bales, and of Indian, 287,000.

RICE.—A rather dull tone has prevailed in the market, and, though prices remain firm, only small parcels have been sold, including middling Nakrenzie at 10s. 6d. 1,928 bags, damaged (of the new crop) at public sale, brought 10s. 3d. to 10s. 9d. For floating cargoes full prices are obtainable.

CINNAMON.—Ceylon, 1st sort, 1s. 7d. to 2s. 9d. per lb.; 2nd, 1s. 5d. to 2s. 4d.; 3rd, 1s. 4d. to 1s. 10d.; 4th and Jungle, 1s. 1d. to 1s. 5d. Remains steady, with moderate business. Cloves: Penang, unchanged in the absence of business; Zanzibar, steady, and of 745 bags at auction half sold at 3¼d. to 3½d. per lb. for fair.

TOBACCO.—Japan, supplies limited; sales at 4d. to 9d. Java, 6d. to 1s. Manila cigars, 6s. 9d. to 7s. 6d.

PEPPER.—Singapore has been in demand, but with little offering, only 1,200 bags have been sold at 3¼d., which is again dearer; 1,500 bags Trang are also reported at or about 3⅛d., and a few West Coast at the same price. 844 bags West Coast Penang, at auction, were held above the value and withdrawn. White has been more readily taken, and besides half of 504 bags Singapore at public sale, 500 bags have been sold privately, the bulk fair at 5⅛d. to 5½d., a few good 5⅝d., and bold 5¾d.

CASSIA LIGNEA has continued in demand, and sales of 350 cases are reported at a further advance, middling and good middling, 95s. to 97s. 154 boxes slightly mouldy, at auction, fetched 90s to 92s.

MACE.—62 packages Dutch at public sale met scarcely any bids, and were bought in at 1s. 3d. to 1s. 4d. A few lots Penang went at 2s. to 2s. 6d. for pale. Nutmegs: In auction, 39 cases were chiefly taken, small to middling 1s. 1d. to 1s. 7d.; 13 casks Dutch were mostly withdrawn, limed 1s. 3d. to 1s. 6d., fair brown (sold) at 1d. 7d. to 1s. 8d.

SAGO.—1,755 boxes brought forward found buyers at full prices, grey to good small pearl 20s. to 21s. 6d., fair medium 19s. 6d. to 20s., large grain bought in at 23s. to 23s. 6d. Sago Flour: Of 961 bags in auction only a small part repacked was realised at 14s., but 200 bags sound have since been sold at 14s. 3d., and 800 bags by private contract at the same price.

TIN.—Market very active. Sales of Banca at £95, and Straits £92.

JAPAN WAX.—Sales of saucers at 75s.

GAMBIER.—Good private business at 20s. 6d. to 22s. 6d. per cwt. for ordinary to very good, and 28s. 6d. cubes: of 146 bales at auction, one-third sold at 21s.

HEMP.—Market strong, and Manila good; current roping quoted at £36 to £39; Sarsagon, £40. Stocks 2,800 tons, against 5,000 in 1864.

SUNDRIES.—Gum, Benjamin, &c.: Sales Sumatra at £12 per cwt; Gamboge, picked, £10 to £12. Gutta Percha: A sale is announced of 200 tons, at 2s. for very fair genuine. India Rubber: 1s. 3d. to 1s. 5d. Good qualities scarce, and in demand. Camphor: Firm and sales of China, at 92s. 6d. to 97s. 6d.; and Japau, £5. Sapan-wood in demand. Sales of Siam at £21 to £22; Ceylon, £14.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7 to £7. 5s.; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10; sheets, single, £10. 10s. to £10. 15s.; Staffordshire bars, £8. 10s. to £9. 10s. rails, £7 to £7. 5s.

STEEL.—Swedish keg, £15.

COPPER.—Sheet and Sheathing, £91 to £93 per ton; yellow metal, 7½d. per lb.

TIN.—94s. for block; 95s. for common bars. Tin plates, best charcoal, I.C. 30s. to 31s. 6d.

LEAD, &c.—English pig, W.B., £21; shot, patent, £22. 10s.; sheet, £20. 10s.; spelter, £21 to £21. 10s.; zinc, English sheet £27. 10s.; quicksilver, £7. 18s. 6d. to £8.

The following is from the Circular of Messrs. French and Smith:—In the Metal Market the past month, especially the latter part, there has been a decided increase in activity, and prices generally tend upwards. Iron: Scotch pig advanced to 59s. per ton, but has now gone back a little, and to-day's quotation is 58s. for mixed numbers. For rails and bars there is a good demand, with fair prices. Copper: Is looking firmer, and for raw descriptions there is no disposition to sell, except in small quantities. Foreign is also well held. Tin: English is in good demand, and official quotations are now for the most part adhered to. Foreign advanced considerably, as high as £93 having in a few cases been paid for fine quality, both on the spot and to arrive. This advance in price is owing in a great measure to the large demand for America, there is also a considerable consumption for tin plate purposes. It is probable the advance in the Bank rate will check any further upward tendency for the present. The quantity of Straits tin afloat for Europe is about 1,680 tons, against 1,127 tons in 1864, and 769 tons in 1863. Tin Plates: Continue in great demand, most of the manufacturers are full of orders for months to come, and are now declining to give quotations. The quantity shipped last month was 112,000 boxes, against 55,000 boxes in September, 1864. Lead: Improved in demand, and soft common pig advanced about 12s. 6d. per ton in price, and is very firm at quotations. Spelter: Is quoted £21 to £21. 10s. per ton, without much business. The stock on the 30th ult. was 6,807 tons, against 11,592 tons at the same period last year. In Quicksilver nothing new.

FREIGHTS AND CHARTERS.

Outward freights to the China ports are somewhat brisker, so that early arrivals of vessels will be easily placed at good rates. The Peninsular and Oriental Company having invited tenders for the supply of 9,000 tons of coal at Galle, a greater activity is evinced in coal freights.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 35s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £40 to £42 and £1. 19s. to £2. For Shanghai: £50 and £2. 6s. For Manila: £1. 15s. to £1. 17s. 6d. For Batavia: £26. 10s. and 24s. to 26s. For Singapore: £31 and 29s. to 30s. For Galle: £27 and £1. 6s. to £1. 7s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have invited tenders for the conveyance of 14 tons clothing from the river Thames to Hong Kong.

CASUALTIES.

The Singapore, Holjes, which arrived at Liverpool Oct. 1, from Singapore, had her bows stove, was making water, and had thrown part of her cargo overboard, having been in collision on the 20th September.

The Lennox Castle, Dobbie, from Sunderland for Hong Kong, was in contact off Flamboro' Head on the night of Sept. 20, with the Marquis of Bute (brig), and sustained damage to spars, rigging, bulwarks, coveringboard, &c.

The Ellen Brown, McDonald, from Sunderland for China, got on shore in Tees Bay last night, but was towed off and proceeded.

The Eliza Shaw, Steele, which arrived off Plymouth from Hankow and Shanghai, Oct. 4, lost her sails and bulwarks, and had her decks swept in a typhoon, 21 June, in 16 N. 125 E.

The Beatrice, Martin, from Shanghai for London, which put into St. Helena May 28, leaky, will be ready for sea in three or four days. About 900 boxes of tea were sold yesterday, to defray expenses. This intelligence bears date St. Helena, Sept. 9.

MISCELLANEOUS.

At ST. HELENA.—Aug. 24, from Batavia, Wellington, Mahy, and sailed 25 for Amsterdam; Fop Smit, Leverstein, and sailed 25 for Rotterdam; from Shanghai, Eva, Kidd, and sailed 25 for Halifax, N. S.; Cissy, Spencer, and sailed for London; 25, Veritas, Carey, and sailed for New York; from Batavia, Oeolus, De Vries, and sailed 26 for Middleburg; Lammina Elizabeth, Pot, and sailed 26 for Rotterdam; from Samarang, Bengal, Petterson, and sailed 26 for Rotterdam; 26, from Batavia, St. Jan, Lommerse, and sailed 28 for Rotterdam; from Singapore, T. J. Southard, Starrett, and sailed for New York; from Padang, Caroline Agnes, Croft, and sailed for Rotterdam; from Singapore, Molly, Hugen, and sailed 27 for Hamburg; 27, from Hong Kong, Banda, Morris; from Yokohama, Dora, Millbank, and both sailed 28 for London; from Shanghai, Guiding Star, Muhlenroth, and sailed 28 for Montreal; from Batavia, Christina Maria, Veer, and sailed 28 for Rotterdam; 29, from Shanghai, Heversham, Pearce, and sailed 30 for New York; 30, Woosung, Colebank, and sailed for Liverpool; from Sourabaya, Anglia, Wilson, and sailed 31 for Amsterdam; from Singapore, Zephyrus, Meier, and sailed for London; from Hong Kong, Recife, Douglas, and sailed 31 for New York; 31, from Batavia, Nieuwe Waterweg, v. Lindern, and sailed Sept. 1 for Rotterdam; from Shanghai, &c., Lalla Rookh, Campbell, and sailed Sept. 2 for Liverpool; Sept. 1, from Batavia, Nederland, v. d. Eb, and sailed 2 for Rotterdam; Sindbad, Kooy, and sailed 2 for Amsterdam; 3, from Singapore, &c., Energie, Baasel, and sailed 5 for New York; 4, from Hankow, Silver Eagle, Longman, and sailed for London; 6, from Manila, Raby Castle, Sharp, and sailed 7 for Liverpool; 6, from Shanghai, Fire Queen, Duggan, and sailed for London.

At TABLE BAY.—Aug. 25, from Singapore, Fortitude, Booth, and sailed 27 for London.

At SIMON'S BAY.—Aug. 25, from Shanghai, Mirage, Campbell, and sailed 27 for London; 23, Benbang (s.s.), Webber, sailed for Singapore; 29, from Hamburg for Singapore, Tekla, Kilr.

At ALGOA BAY.—Aug. 12, Mountain Ash, McCredie, sailed for Hong Kong (after repairing).

Another new iron steamer, built and engined by Messrs. W. Simons and Co., has been launched from the London Works, Renfrew, for the Netherlands India Steam Navigation Company. This vessel is named the *Sundy*.

H. Howe Wiggins, Esq. (Manager Commercial Bank Corporation of India and the East).

David Reid, Esq. (Messrs. Reid and Co)

The Company being about to be reorganised for a further term of three years, from 1st January, 1866, application for Shares will be received by the undersigned until 31st October current.

A certain number of Shares have been allotted to London, but further applications from there will be received until 30th November.

Application for Shares, from persons not resident in Shanghai, must be accompanied by Power of Attorney to their Agents, to sign the Deed of Settlement on their behalf, and generally to represent them in all matters connected with the Company.

By order of the Directors,

J. S. MACKINTOSH, Secretary.

Shanghai, July 12, 1865.

FORM OF APPLICATION FOR SHARES.

No.

TO THE DIRECTORS OF THE NORTH-CHINA INSURANCE COMPANY.

Gentlemen,— hereby request you will allot to Shares in the above Company, and agree to accept such Shares, or any less number you may allot to ; and agree to pay the first call of Tls. 1,000 per Share, and all subsequent calls, and to subscribe the Deed of Settlement whenever required to do so.

Gentlemen,

Your obedient Servant.

Application for the Shares allotted to London must be made to—

ASHTON AND CO.,

AGENTS,

ATTON-COURT, THREADNEEDLE-STREET.

SCINDE RAILWAY (INDUS STEAM FLOTILLA, PUNJAUB, and DELHI RAILWAYS) COMPANY.

At the NINETEENTH HALF-YEARLY GENERAL MEETING of the above Company, held at the LONDON TAVERN, Bishopsgate-street, in the City of London, on Friday, the 29th September, 1865; W. P. ANDREW, Esq., Chairman of the Company, presiding,

The following RESOLUTIONS were carried unanimously:—

1. That this Meeting receive and adopt the Report of the Directors.

2. That the Directors be, and are hereby, authorised to raise £500,000 additional capital by the issue of 25,000 Shares of £20 each, on account of the Punjaub Railway, upon which capital the Secretary of State for India in Council has guaranteed interest at the rate of £5 per cent. per annum.

3. That all the Punjaub Railway Shares in respect of which the whole sum of £20 shall hereafter be paid up, shall from time to time be converted or consolidated into Punjaub Railway capital stock.

4. That the cordial thanks of this Meeting are tendered to W. P. Andrew, Esq., for his courteous conduct in the chair this day. W. P. ANDREW, Chairman.

S. H. R. PARRY, Acting Secretary.

Gresham House, Old Broad-street,
London, Sept. 29, 1865.

THE BANK OF HINDUSTAN, CHINA and JAPAN (Limited).

1, Bank-buildings, Lothbury, London.

Capital, £4,000,000.

Paid and to be called up, £1,000,000.

BANKERS.

The Bank of England.

The National Bank | The Alliance Bank (Limited)

Branches and Agencies at Bombay, Calcutta, Colombo Kandy, Hong Kong, Shanghai, Yokohama, Singapore, Point de Galle, Manila, Foochow, Ningpo, Hankow, Nagasaki, and Kiu-kiang.

Deposits received at ten days' notice, on the usual terms and for fixed period, at rates subject to special agreement.

Drafts issued and Bills negotiated payable in India China, &c.

Circular Notes and Letters of Credit, payable throughout Europe, are also issued for the convenience of travellers per overland route.

The purchase and sale of Indian and other securities, and the safe custody of the same undertaken. Dividends, pay, pensions, interest, or other moneys realised, and the registry of Indian Government loan notes effected so that the interest may be paid in England. Every other description of Banking and Agency business in connection with India, China, &c., conducted on the most favourable terms.

J. OUSELEY, General Manager.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

ASIATIC BANKING CORPORATION.—Incorporated by Royal Charter. Authorised Capital, £2,000,000. Paid-up Capital, £500,000.

Head Office—No. 4, Lombard-street.

Agencies and Branches are established at Bombay, Calcutta, Singapore, Ceylon, Hong Kong, Shanghai, and Melbourne.

The Corporation grant drafts and negotiate bills of exchange payable at the above places, issue letters of credit, and conduct every description of banking business connected with the East. They effect the purchase and sale of Indian securities, the receipt of dividends, &c. and undertake the sole custody of securities. They also receive deposits, bearing interest, for fixed periods. Rates of interest and exchange may be ascertained at the Head Office.

W. H. BURKE and CO., Proprietors.

SOLE AGENTS FOR THE INVERNETTIE GRANITE COMPANY.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, in all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot of 12, RUE RICHER, PARIS.

THE "LONDON AND CHINA EXPRESS" ON SALE

UMBRELLAS and SUNSHADES suitable for all Foreign Markets and the Colonies are supplied to Shippers on the most favourable terms by JOHN MORLAND and SONS, Wholesale Manufacturers 50, Eastcheap, London-bridge, City. Silk, Alpaca, Gingham Steel Frames, Canes, Fittings and all kinds of Materia for the Trade. Oiled and japanned silks and cambrics.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet. Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfume

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists, Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S PILLS.—A remedy for bilious and liver complaints. Those who suffer from bile and liver complaints should try the effects of this valuable remedy, a few doses of which will make the sufferer elastic and vigorous, remove all impurities, give a healthy action to the liver, and strengthen the stomach. If bilious attacks be allowed to continue without using such a preventive, more serious casualties may arise and the sufferer be consigned to a bed of sickness. Holloway's Pills are an extraordinary remedy, acting immediately in the removal of acidity of the stomach, indigestion, debility and nausea, preparing the food thoroughly for assimilation, rendering each tributary organ perfect in its function and stimulating the kidneys.

Penang		Aug. 29	„ 9

The incoming mail, due on 27th inst., arrived at Suez on the 14th, and may be expected in London on the 25th or 26th.

List of Passengers.

PASSENGERS INWARD.

By this mail, per P. and O. Company's steamer Mongolia, arrived at Marseilles Oct. 14.—From Shanghai: Lieut. Russell, Mr. Walter. From Hong Kong: Messrs. Coyder and A. Smith. From Singapore: Messrs. R. Paddy and J. P. Charlton.

To Southampton, per Poonah, expected to arrive 21st inst.—From Shanghai: Captain and Mrs. Beale and three second-class passengers. From Hong Kong: Lieut. Fraser, four second-class passengers and four privates (11th Regt.). From Singapore: Mrs. Atkinson, Mr. H. Sewell, and one second-class passenger. From Penang: Two second-class passengers. To Gibraltar.—From Hong Kong: Two second-class passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Syria, from Southampton, Oct. 20.—To Hong Kong: Mr. and Mrs. Hermann and infant, Dr. Knife. To Ceylon: Mr. R. Mossie, Lady Chichester, Mr. and Mrs. Wright and two children. From Marseilles, Oct. 28.—To Shanghai: Mrs. Herbert Hancock and three children. To Hong Kong: Mr. T. A. Lane and Mr. D. Lapraik.

Per P. and O. steamer Massilia, from Southampton, Oct. 27.—To Singapore via Bombay: Mr. and Mrs. J. E. Macdonald, Mr. and Mrs. F. D. Barnes, Mr. Watson. To Hong Kong via Bombay: Mr. J. B. Leslie, Mr. Sinnett, Mr. Mackintosh.

Per P. and O. steamer, from Southampton, 4th Nov.—To Hong Kong; Mr. M. Murray, Lieut. Luard, R.N. To Singapore: Mr. and Mrs. H. O. Robinson, Mr. and Mrs. Lipscombe. To Ceylon: Mrs. Brotherton. From Marseilles, 12th Nov.—To Singapore: Mr. W. Alten, Mr. W. Paterson. To Hong Kong: Mr. F. Jerdein. To Shanghai: Mr. N. G. Howell, Mr. A. Campbell.

Per P. and O. steamer, from Suez, Nov. 26.—To Penang via Bombay: Mr. and Mrs. Hasche.

Per P. and O. steamer, from Southampton, Nov. 20.—To Penang: Mrs. and Miss Mackay. To Ceylon: Miss Staples, Mr. Cone.

Per P. and O. steamer, from Southampton, Dec. 4.—To Shanghai: Miss M. A. Russell. From Marseiles, Dec. 12.—To Hong Kong: Mr. R. C. Lambert and friend.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The dates from this port are to the 11th August. The following is the mail report of the Japan Herald:—

The principal item of interest politically is the fact that his Excellency, Sir Harry Parkes, has notified to the Gorogio his intention of residing in Yedo, a determination that will be very generally approved, and which he has made known in a plain and unequivocal manner, that will show the Japanese at once the character of the man they have to deal with. Sir Harry has been at the capital during a great part of the interval between the present and the preceding mails, but nothing is absolutely known as to anything special having been arranged.

[A later telegram announces that official quarters had been granted to Sir Harry.]

H.M.'s ship *Princess Royal*, with Admiral King on board, has arrived, and gives quite a grand appearance to the fleet, as she floats side by side with H.M.'s ship *Conqueror*. It is supposed she will remain here for some time. The *Conqueror* has received orders for England, and will sail on the 25th with the marines.

Preparations are being made by the French authorities for the Fete Napoleon, on the 15th. The English military and naval authorities have decided upon having a grand review on that day, in honour of our Imperial ally.

Yokohama was visited by a severe gale on the morning of the 7th, during which much damage was done to the weaker tenements in Yokohama, and to the Bund, and two hatobas. Several vessels dragged their anchors, and a great number of boats, both Japanese and European, were driven over to the opposite side of the bay.

The weather is still somewhat overcast and unsettled—very unusual for this season of the year.

In municipal matters there is nothing whatever to report.

Tuesday, the 1st August—the anniversary of the battle of Minden—was a grand field day for H.M.'s 20th, who were reviewed by Major-General Guy, and went through the ceremony of trooping the colours.

The following article is from the same journal:—

A few days ago a rumour was spread through the settlement that in an encounter between the Tycoon and Nagato, the former had been defeated. Though we cannot positively contradict this statement, we doubt its veracity; for, as far as we know, the Tycoon's army had not even entered Nagato's dominions when the rumour reached us. Whatever the truth may be, it is of some interest to state that the announcement of the victory of the rebellious Prince did not meet with the reception with which the news of the defeat of an ally ordinarily does. There were some who were quite satisfied to hear that the Tycoon had been humiliated, and declared openly that Nagato's cause was identical with that of foreigners.

CHINA.

PEKING.

We take the following items from the *North China Herald*:—

"A native interpreter, arrived from Cheffoo, informs us that the Nienfei have completely evacuated the province of Shantung and marched westward into Honan. They betray no wish to occupy the places they subdue, but merely plunder the neighbourhood and then migrate. They are for the most part mounted, so that they are able to overrun the country with great celerity and comparative impunity, while organized bodies of troops cannot cope with them in the rapidity of their movements.

It is reported that San-ko-lin-sin was killed, not by the Nienfei, but by the country people. On the twenty-second day

Digitized by Google

of the fourth moon (May 16th) he had an engagement with the enemy which resulted in his defeat. On the evening of the following day (May 17th) he, with about ten followers, sought the protection of some villagers, who received him with every demonstration of hospitality, but beheaded him and his guard during the night. This occurred outside the city of Tsu-chow-fu.

The instability of official favour in China has already afforded a theme to the essayist, the novelist, the dramatist, and even the poet. We have on various occasions been led to adduce instances of this failing in the Government, but we have recently obtained an example which casts most other instances into the shade. Every foreigner in China is familiar with the name of Kwan Wen—one of the few purely Tartar viceroys who have succeeded in gaining the affections of their temporary subjects. Some time since he was recalled to Peking for the purpose of receiving honours and dignities, such as had seldom before been lavished on a vassal of the Celestial Emperor. He was created a Senior Guardian of the Heir Apparent, received the highest title of nobility, and was presented with the double-eyed peacock's feather. Such was his high degree during a few brief months. The throne now accuses him of remissness in crushing the Nienfei rebellion, while yet it was rampant in the Two Hu, and degrades him from his post in the Imperial family, while it snatches from him the highly-prized decoration which some forty years of faithful service had entitled him to wear.

SHANGHAI.

Dates are down to the 21st, or five days later than those per French mail. The Inspector of Customs has issued a report on the trade for 1864, and we hope he has sent us a copy, in which case we shall in our next give a full epitome.

Some months ago Mr. Hanbury announced through the local papers, that he had obtained some American cotton seed, and that he would distribute specimens of it to those who might wish to experiment on its growth. A portion of this seed was planted by Mr. Vaucher in his garden on the Sikawai-road. The result is a patch of cotton far superior to any China cotton. The climate has agreed with it, and the plants are in as flourishing a condition as though they had never been removed from their native soil.

Much sensation has been caused here by the discovery that 2,000 barrels of gunpowder, belonging to H. M.'s Government, was stored at the Ningpo Joss House (some three quarters of a mile from the settlement). Eventually a proper guard was provided.

Four English rowdies, who were recently captured while in the act of breaking into a house at Hongque, were sentenced to one year's imprisonment each. Stokes, the ringleader, kept a house in the Maloo, ostensibly a blacksmith's shop, but in reality a rendezvous of desperate characters.

The rate of interest has shown a downward tendency since the departure of last mail, and though the nominal rate for money upon good security is 10 per cent., we hear of an advance having been made by one foreign bank at as low a rate as 6½ per cent.

The third ordinary general meeting of the shareholders of the China Fire Insurance Company took place on the 8th of August. The business transacted consisted chiefly of laying the statement of the accounts and current affairs before the shareholders. A special meeting of the shareholders of the Shanghai Brick and Sawmill Company took place on the 12th.

During the absence of Mr. F. B. Fairley, Mr. H. Thorburn will act as manager of the Bank of India.

A fraud is now being put in practice by the Chinese, and to which many foreign houses have already fallen victims. The article of silk waste has advanced very considerably in price, being now about double the value it was last year. The result is that the Chinese, who, as usual, cannot bring themselves to be contented with a reasonable profit, have set about an ingenious plan of mixing salt and chalk in a moist state with the staple, thereby at once increasing its weight and apparent quality.

The following notification has been issued by the Taoutai:—

"The number of native and foreign merchants now residing in Shanghai has so largely increased, that in the business relations of one with the other integrity is above all things necessary, and any attempt at overreaching must be carefully abstained from. I have lately heard of certain fellows who, when selling silk and cotton, put stones into the bales, or pour water over them, thus endeavouring to increase the weight and gain a dishonest profit. Such conduct is truly disgraceful, and, moreover, comes under the penalties exacted by law. Officers have already been appointed to inquire into these malpractices, and I now issue this notification, that all may know that for the future those who bring silk and cotton from the interior must have their produce in good order, and must also be careful not to cheat in money matters. Stones and such things must not be put in the bales. But if any are foolhardy and unprincipled enough to continue such practices, I will, without mercy, inflict the severest punishment upon them so soon as I find out about them or have a formal complaint laid before me."

A melancholy accident occurred upon the river on the night of the 10th August. Captain Hanssen, of the barque *Eidsvold*, had returned with his wife after spending the evening on board another vessel. Before Mrs. Hanssen had stepped out of the sampan it was caught by the tide and upset. Her husband sprang into the water to rescue her, but they were both sucked under the ship's bottom and drowned.

In extracting the correspondence of the Municipal Council and the charge against Mr. Pickwoad we overlooked the following letter, which quite exonerates Mr. Pickwoad:—

(To the Editor of the *North China Herald.*)

Sir,—In your daily issue of the 8th inst. you published a copy of a letter addressed by Mr. Alabaster to the Clerk of the Municipal Council, in which he defends Mr. Pickwoad from any suspicion which may attach to him, in respect of a discrepancy in the accounts of the Council, amounting to 1,000 tls.

As the Treasurer of the Council for the year in question, I am glad to be able to support Mr. Alabaster's statement. So far as I can recollect, it was never supposed that Mr. Pickwoad had received the 1,000 tls. The tale of Sankee was, I believe, to the effect that he paid this sum to me direct or through my compradore; this, however, he failed to prove at the time. I do not think that Sankee ever hinted that the money had passed through Mr. Pickwoad's hands, and I certainly do not see how that gentleman can be held accountable.

I think this brief statement is due to Mr. Pickwoad. I trust it will be thought a sufficient apology for trespassing upon your space.—Your obedient servant, J. Priestley Tate.

HONG KONG.

Dates are down to the 28th Aug.

The English mail of the 17th July by the French line of steamers was hourly expected, her arrival at Singapore having been reported, and her news laid down by the private steamer *Suwonada*, from New York, a new vessel belonging to Messrs. Augustine Heard and Co., which arrived in Hong Kong on the 26th August. The London telegrams are up to August 4th, and convey the result of the general elections. Most of the items of news conveyed by this mail have been anticipated by the French mail, and given in our issue of the 10th inst.

Another attempt is now being made to introduce guano into China. The present attempt appears to be well organised, and is committed to strong hands. The principals are people of large means who have a lien on the Chincha Islands. The sole management of the affair is entrusted to the powerful agency of Messrs. Jardine, Matheson and Co., and as a permanent supply for some time is positively secured, a steady demand will assuredly appear.

It was reported that the Royal Marines about to leave for England would proceed to Japan, but we can inform our readers that the rumour was incorrect.

At Manila a daily journal has just been started. It is entitled the *Porvenir Filipino*, and appears to promise well.

We (*China Mail*) hear of changes about to take place in the Consular service, by which the Amoy Consulate will be placed in charge of one of the best junior-linguists in the service.

From Canton we learn that an old member of Gordon's force, named Baffey, an American, had been brought a prisoner to that port by the Chinese authorities, and given up to the U. S. Consul there.

With the advent of Captain Kinder and the other Mint official, says the *China Mail*, we observe a new issue of mils and cents, bearing the date 1865; and also what seems a fresh supply of ten-cent silver pieces, bearing, however, the old date of 1863. The fresh issue will be gladly received by all parties, as these small coins have been found so convenient and useful. We hope that the quantity to hand will be sufficient to meet all requirements until the Mint here commences to coin them, along with the dollar and the other sub-multiples. Discretion, however, might be recommended to the Treasury as to the paying out of these coins at present—caution being necessary, on the one hand, to avoid glutting the market; and, on the other, to prevent them, through the chicanery of the Chinese money-changers, reaching an almost fabulous premium.

COCHIN CHINA.

Our advices from Saigon give full accounts of the holding of a magnificent *fete Dieu* in that city. The different roads con-

Digitized by Google

verging towards it were from an early hour on the day of the celebration crowded with villagers from Goviap, Choquan, and Arrayo, anxious to witness the solemnities. Mgr. Miche, Bishop of Dansara, and Apostolic Vicar of French Cochin-China, bearing the Host, and preceded by the clergy of his diocese, closed the procession, the most magnificent yet witnessed in that quarter of the world. The Governor's musical band executed a superb triumphal march for the occasion. The procession having paraded the chief streets drew up on the quay, where it was joined by the Governor and the chief military and civil authorities. The Host was here elevated, amidst the thundering of cannon, the whole population bowing to receive the benediction. The Annamite barques were ornamented with flowers, which, agitated by the breeze, presented a most picturesque spectacle. A solemn mass, celebrated by the Bishop, assisted by the Governor and various high functionaries, terminated a ceremony the impression from which is likely to be lasting on the population.

The *Moniteur de la Flotte* publishes a letter from Cochin-China of the 5th August, which gives a very favourable account of the new French colony. It states that six lots of waste ground in the suburbs of Saigon, covering a superficies of 47,457 square yards, were set up by auction on the 1st August, and sold for 74,070f. The purchasers are preparing to build on the ground. The new settlement of Cholen is said to be progressing rapidly. Stone houses are erected on ground which was not long since waste marsh. The central canal of Hoi-Hiep is about to be excavated, by which the town will be completely drained. The contractor for the canal has, moreover, undertaken to build a market and two new villages, which will be a great advantage to the Annamites. The French transport *Sarthe* had returned to Saigon from Yokohama, bringing a number of Japanese horses for the French artillery and cavalry in Cochin-China. Notwithstanding the fatigue inevitable during such a long voyage, it is said the horses arrived in excellent condition. It appears, moreover, that horses are cheap in Japan.

SIAM.

Dates from Bangkok are to the 15th August. A correspondent writes :—

His Majesty the Second King has been quite ill, but is improving. For two years past his Majesty has been withdrawing more and more from public business. Much of his time has been spent at his country palace at Sitha, a romantic place east of Ayuthia. The withdrawal of his Majesty from public duties is a source of much regret, but his position is such that it requires so much prudence and discretion to keep clear of blame and jealousies, that it is not very surprising he avoids it as much as possible. The best of feeling exists between the First and Second Kings, and if correctly informed, his Majesty the First King would be greatly pleased to see his royal brother taking a greater interest in the affairs of the kingdom.

There was a report in circulation last week of an attempt to poison the First King, which made some stir, but it is now generally believed to be a false rumour.

A combination of Chinamen has been discovered which had formed some design against the Government. A number of muskets, pikes, badges, &c., were also discovered. Rumour says the combination amounted in number to about three thousand. The leader was a petty officer under the Government, and a Hokien Chinaman. He, it appears, acknowledged his designs, and has been banished the country. Some reports say he was disposd of by dumping him into the gulf, but it appears, upon reliable authority, that he was placed on board of the Siamese barque *Castle*, bound for Hong Kong, with the injunction that if he returned his head would pay the penalty.

PHILIPPINEES.

MANILA.

Dates are to the 20th August. The London mail of June 26 arrived out on the 12th August.

On the 10th inst. the *Tigris*, from Liverpool, arrived, bringing moderate supplies of plain staples. White and grey staples are fully worth our last quotations; grey long cloths, however, have been placed at somewhat lower rates than last quoted. Exports: Little has been doing during the past fortnight; a small lot of current sugar has been taken at $5.37½ per picul, but to-day clayers would willingly accept $5.25 per picul. We quote Zebu and Yloylo sugars at $4 per picul, and sales of Taal have been made at $3.68¾ per picul. Current hemp has sold at $7 per picul. Tonnage is plentiful. Exchange on London, 4.2 for first class six months' sight bills.

STRAITS OF MALACCA.

SINGAPORE.

Dates are down to the 7th Sept. The London mail of 26th July arrived out on the 4th Sept. by H.M.S. *Coquette*, as the P. and O. Company's steamer met with an accident off Penang.

In general business the market has been moderately active during the past fortnight. For cotton goods the demand has improved. Grey shirtings have moved freely at gradually advanced prices. The stocks of T cloth have been nearly cleared, and considerable sales made for arrival. Long cloths have also been sold for present delivery and for arrival. Twist has been in good demand for No. 40's., and rather better rates obtained. In coloured, transactions in imperial red, green, and orange have been small; but stocks of Turkey-red have been nearly cleared at improved prices. White shirtings of the finer qualities have been taken freely at fair rates for immediate delivery and for arrival. For low and medium qualities clearances have been limited. Spotted have been quitted to a small extent at former rates. White cambrics of the finer descriptions have been in good inquiry and high rates obtained for arrival. In Turkey-red cambrics transactions have been small at former prices. Dyed goods generally have been very languid, Sarongs remain in heavy stock, and in very limited inquiry. The demand for woollens has been almost confined to Spanish stripes, in which moderate clearances have been made for China. In iron very little has been done. Spelter and tin plates continue to be neglected. Sheathing copper and yellow metal have been taken to a small extent. For coal the demand is still unabated and high rates obtained. Marine stores generally have been exceedingly dull. Australian flour has been imported largely and lower rates accepted. Clearances in bottled beer have been extensive at fair prices.

In exports the transactions during the fortnight have been moderate. The supplies of betelnut have been parted with at lower rates. China camphor continues in some demand. Gambier is offered at slightly reduced rates. Coffee is still in demand and very scarce. Gutta percha has been imported to a very limited extent and high rates realised. Buffalo hides and horns still command extreme rates. Pepper is very scarce, and in great demand. The small imports of india rubber have been taken at a slight advance on previous prices. Rattans are still scarce and high prices maintained. Pearl sago has slightly advanced. Sugar has been in demand and higher rates given. Benares opium has fluctuated considerably, but transactions have been almost restricted to Bazaar speculators. Nothing doing in Turkey opium. The market is well supplied with wheat.

The *Straits Times* of September 7 contains a long correspondence on the Screw Pile Company and the Tanjong Pagar Dock Company. The same paper also has the following in connection with Java :—

"Our readers will remember that in our paper of 24th July we mentioned the cool reception the Resident of Rhio met with from the Sultan of Assahan, and concluded by remarking, 'It remains to be seen what steps our neighbours will take to enforce a proper respect being shown them,'—and we are now in a position to state what these steps are to be.

"We are informed that an expedition, consisting of the *Djambi*, screw steam corvette, *Amsterdam*, paddle steam corvette, and *Sindoro*, screw corvette, *Montrado*, screw corvette, carrying about 1,000 troops fully equipped for field service, will leave Batavia on the 5th Sept., and proceed to Assahan, first calling at Rhio for the *Delfyzl*, screw corvette, and *Dassoon*, N. I. Government paddle steamer. This is a powerful force, and will be able, if properly managed, to bring the Sultan to terms."

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

AMES—On the 5th July, at Bangkok, Siam, the wife of S. J. B. Ames, Esq., Commissioner of Police, of a daughter.

GARDNER—On the 2nd Sept., at the Patent Slip and Dock Company's Bungalow, Singapore, the wife of Capt. F. E. Gardner, of a son.

HELMS—On the 7th Aug., at Sarawak, the wife of L. V. Helms, Esq., of a daughter.

ULLETT—On the 11th Oct., at Blythe House, the wife of R. B. Ullett, Esq., of a son.

MARRIAGES.

LLOYD—SAUNDERS.—On the 3rd Oct., at St. Saviour's, Southwark, by the Right Rev. Bishop Smith, D.D., late of Victoria, Hong Kong, assisted by the Rev. Samuel Benson, M.A., chaplain of St. Saviour's, Percy Lloyd, Esq., late of Canton, China, to Ellen Sarah, only daughter of His Excellency the late William Henry Saunders of The Island, St. Petersburg. No cards.

Digitized by Google

DEATHS.

Briggs—At Hong Kong, August 26, S. S. Briggs, Captain of the barque Caroline Chisholm, aged 29.

Blaydes—On the 20th July, at sea, between Taku and Foochow, on his voyage home, aged 21. Edward Henry, eldest son of the Rev. F. H. M. Blaydes, vicar of Harringworth, Northamptonshire.

Hoeven—At Macao, August 25, Mrs. Des Amoric van derHoeven, aged 29.

Gonzaga-Mantua—On the 10th Oct., after a short but severe illness, H.S.H. the Princess Maria Eliza de Gonzaga-Mantua, daughter of the late distinguished Col. Coke, of the Indian Army, and beloved wife of H.S.H. the Prince Alexander First of Gonzaga, Duke of Mantua, &c., aged 62.

Heelis—On the 10th Oct., at the residence of his father, at Limehouse, Edward Heelis, M.R.C.S., late Surgeon to the Government Civil Hospital, Hong Kong, and formerly of the P. and O. S. N. Company's service, third son of Robert Heelis, M.R.C.S. and L.S.A.

Henderson—On the 30th July, at Nagasaki, Dr. James Henderson, of Shanghai.

Highat—On the 2nd Aug., at Nagasaki, by drowning, Mr. Robert Highat, of Liverpool, passenger per Lammermuir, from London.

Horton—On the 2nd Aug., at the American Consulate, Yokohama, of consumption, after a very long illness, George E. Horton, aged 86 years.

Ingram—On board H.M.S. Melville, August 25, Albert Ingram, private marine, H.M.S. Cormorant, aged 24.

Tomlin—At Stone Cutter's Island, August 25, on board the Convict Hulk, Ernest Harry, son of Captain Tomlin, aged one year.

Whiley—At St. Francis Hospital, Hong Kong, August 25, Louisa Agnes Whiley, aged 2 years and one month.

COMMERCIAL REPORT.

CHINA EXPORTS.

Tea.—Canton.—The market has been quiet during the fortnight, and transactions have been limited. Buyers require more concessions than the teamen are disposed to submit to. There have been no settlements of Country Congous nor Taysaams for the fortnight. In Scented Teas a little business has been transacted at reduced rates, but prices must decline still further ere purchasers enter the market freely. Country greens have been purchased for shipment to New York, but Canton Greens have been quite neglected The following are the settlements reported for the fortnight:—Pouchong, 2,500 hf-ch. at 21 taels; Scented Orange Pekoe, 3,500 boxes at 22 to 39 taels; Scented Caper, 5,000 at 13½ to 34 taels; Country Greens, 3,350 hf-ch. at 38 to 49 taels for Gunpowder, 35 to 56 for Imperial, 20 to 56 for Young Hyson, 29 to 54 for Hyson, 15 to 17 for Skin. The stock is reported as under. Country Congous 6 chops, Country Greens 9,000 hf-ch. Other descriptions uncertain.

Foochow.—An active market resulting in an advance for all descriptions. Third crop Congous had arrived in quantity and had been purchased freely. Some Souchongs had been taken at full rates. Little was doing in Oolongs, the buyers for New York not having entered the market. For Flowery Pekoes, extreme rates have been paid. Scented Teas have advanced nearly two taels. The following are the sales since the report issued for last mail. Congou: 19,000 chests at 6.3 to 10 taels for dust and broken leaf; 13 to 20 for ordinary to good common; 20 to 25 for flavory; 26 to 31 for good flavory to medium Kaisow; and 39 for fine Kaisow in boxes. Souchong: 1,500 chests at 20 to 23 taels for common to medium; 20 to 29½ for good to fine. Oolongs: 2,850 half-chests at 16 to 18 taels for common to good, and 20 to 29 for fine to finest. Flowery Pekoe: 450 chests at 24 taels for common, and 45 for fine. Scented Teas: 18,000 boxes at 8 to 20 taels for common to middling, and 22 to 32 for fine to finest.

Shanghai.—Black: There has been a considerable business, all parcels possessing quality having found buyers at previous rates. Second crop Oopack and Oonahms are, however, lower, and a fall is quoted on these kinds. Settlements during the fortnight consist of 61 chops. Quotations are—Second crop Oopacks, tls. 27 to 32; First crop Ningchow, tls. 27½ to 36; First and Second crop Oonahms tls. 20 to 32; First and Second crop Hohows, tls. 17 to 23.—Green: Only two chops Ping Suey settled during the fortnight as a slight decline on opening rates. A few small parcels of Fychows have arrived at Ningpo and were offered on this market, but at present nothing has been done. With exception of the Moyunes, the whole of the crop will this year come *via* Ningpo.

Hankow.—There has continued a steady inquiry, and rates have rather tended upwards. The demand has run chiefly on middling kinds at from 23 to 25 taels—common are in less request. The settlements of the fortnight exceed 30,000 chests and 4,000 half-chests. Stocks are reduced to 15,000 packages, and supplies are falling off. The total arrivals this season to date are 206,000 chests and 45,000 half-chests against 240,000 chests and 46,660 half-chests the same period last season.

Kiukiang.—Green: The new crop is expected down in about two weeks. Black: The settlements of the fortnight amount to 21 chops or 7,300 chests at 22½ to 28¾ taels, which rates display an advance over last quotations. The total settlements of the season to date amount to 20,032 chests, against 18,723 chests corresponding period last season. The stock on offer is 1,400 chests.

Yokohama.—Since the departure of last mail the continued demand for America and the encouraging news received of the state of the home markets, have had a considerable effect on the tea market, and a good business has been transacted. Supplies, which were at one time restricted by the bad weather, are now coming forward freely, though the bulk of the teas are of a very mixed character. Finest description have not yet come to hand. Prices have advanced fully $1 on the last quotations. Good Common, $16.00 to 18.50; Medium, $21.00 to 23.50; Good Medium to Fine, $24.50 to 28.00; Finest, nominal.

Raw Silk.—The French mail steamer Donnai took 277 bales for Marseilles and Southampton. This mail, the Behar takes 3,022 bales, of which about 1,348 bales are Japan (2,376 bales being for Southampton and 646 do. for Marseilles). She has also 600 cases silks, &c., for Bombay.

Shanghai.—Of the Silks now offering the quality is generally much inferior to the earlier shipments of the season. A large proportion are in a moist and unmarketable condition and, though it was at first thought that the damage by wet was not serious, it now appears that some parcels are in part actually mildewed. No. 3, Tsatlee tls. 490 to 515. Settlements: China, 3,700 bales. Japan, 1,300 bales. Total settlements from 1st June, 33,000 bales. Total settlements from 1st June to 19th August, 1864, 9,000 bales. Export for the season to date, 29,775 bales. Export from 1st June to 19th August 1865, 8,041 bales. Unsold stock about 3,000 to 4,000 bales. Unsold last year, 3,000 to 4,000 bales. The following are the latest quotations:—Tsatlee, No. 1, tls. 550 to 560 per picul; No. 2, Tls. 525 to 540 per picul. Taysaam, short reel, No. 1, tls. 465 to 475 per picul; No. 2, tls. 445 to 460 per picul.

Yokohama.—This market has been extremely active and excited throughout the fortnight. Owing to the favourable nature of the advices from Europe by the last mail or two, the demand kept on steadily increasing in the face of a continuous rise in prices. 1,450 bales have been settled at an advance of $25 to 35 on our previous quotations, and the market closes with a very firm appearance. Fine Mybashes have been particularly inquired for, a few parcels having fetched the highest figure yet known in Japan—viz, $770. The total settlements this season amount to 2,850 bales, against 274 at the same time last year. The supply from the country keeps pace with the demand, notwithstanding the unsettled state of the weather; the effect of the latter on this year's produce can be seen in an excess of moisture in most of the parcels of silk which have lately come down.

Drugs.—Canton.—Cassia Lignea: This market remained very much in the same position as last reported and nothing doing, but at the very last moment there is a sale reported of 1,000 piculs on terms kept secret The quotation stands at 16.90 to 17 per picul—stock 2,000 piculs. Cassia Buds $49 per picul, nominal. Rumour has it that the new crop is anything but promising, and supplies will most probably run short for the whole of the season. China Galls: The native demand continues, and the article must be quoted higher again, say $13 to $13.25. Vermilion, $37½ per box of 50 catties, very little doing. Musk: No supplies, no settlements. Rhubarb: No fresh supplies reported as yet. Galangal, $1.80 to $2. Holders are becoming more and more anxious to be clear of their stock. Essential Oils scarce, no settlement.

Camphor.—Hong Kong.—Only 100 piculs Formosa have been sold at $19.50, packed, and 100 piculs has been transhipped to Singapore, a vessel has just arrived from Formosa with 2,000 piculs for which $19 packed is asked, but there is not much demand at present. Our stock now consists of 2,000 piculs Formosa, and 300 piculs Japan.

CHINA IMPORTS.

Hong Kong.—There has been a steady demand both for local consumption and for shipment North, and a good business has resulted. Yarn: Large sales have been made principally of low numbers, the stock of the higher running low. Rates tend up and have advanced $50 per bale, which perceptibly checks the demand. Grey Shirtings continue in good demand, and an advance has been obtained for the best makes. White Shirtings are about 10 cents higher, but there is very little inquiry. T-Cloths: The stock is very low, and a good inquiry exists for 6 to 7lb. goods, but the dealers have not confidence in the article as they will not buy to arrive, and the advance is not more than 10 cents. In Fancy Goods—Dyed Brocades, T. R. Shirtings, Chintz and Black Velvets are in moderate demandt; oher sorts are not inquired for. Woollens: Long Ells are in small stock, good demand and improved value. Spanish Stripes: The local demand is slack; the news from the North has driven rates up 10 cents per yard. Camlets continue in steady but not extensive demand. Lastings have fallen short in stock, and are readily saleable even to arrive. Good assortments command $20 to 20.25. Metals: Lead is very dull with a large stock. Iron has tended down, both nail rod and bar. Tin Plates are lower but are saleable. Quicksilver is in extensive enquiry.

Canton.—Yarn is quoted $5 to 7 higher, but the Import market generally continues very flat. The following are the sales of the fortnight.—Lead: Common, 1,600 pls. at $6.15; WB 900 pls. at $6.55. Quicksilver: 300 flasks at $66½ to 67. The stocks embrace 9,500 pls. Lead and 400 flasks Quicksilver.

Foochow.—The sales of the week following the date of last advices are thus reported:—T. Cloths: 1,000 pieces 7 lbs. at $3. Lead: 500 pls. at $6.75.

Shanghai.—During the past fortnight there has been much activity in the market for Grey goods. Grey Shirtings have steadily advanced in price in consequence of absence of arrivals; 6½ catty being now at tls. 3.8.0 for Eagle Chop in Market, tls. 3.5.0 to arrive, 7 lb. Grey Shirtings being extremely scarce have advanced to tls. 2.8.0 on Market and Tls. 2.3.0 to 2.4.5 to arrive (Eagle Chop). Scarlet Long Ells still continue in demand, H.H. being quoted at tls. 8.5.0 per piece. Assorted colours are less inquired for and H.H. are quoted at only tls. 7.3.0., C. P. H. tls. 7.20. In Fancy Goods there has been little doing. There have been some transactions in Nail Rod Iron. Good assortment is quoted at tls. 2.5.0 tls. to 2.5.5.

Chefoo.—Grey shirtings had advanced about 10 cents., and 8 lbs. 6 oz. were going off readily at tls. 3.6.0. There had been large transactions in sugar at tls. 7.5.0 to 8.8.0 for Canton White, and tls. 5.1.5 for brown; lead, tls. 5.6.5 in small stock. Cotton, tls. 16.2.0 per picul. Beancake, tls. 1.0.8 per 90 catties; small green peas, tls. 6.5.0; large, tls. 5.1.0; yellow, tls. 5.5.0 per ton. Tonnage not wanted.

Tientsin.—Advices are to Augustt 11. Stocks of goods in foreign hands were still inconsiderable, and prices were nominally higher than before advised. Shanghai rates for Grey goods are, however, still about 3 mace per piece higher than those ruling in Tientsin. Lead was worth taels 4.7 per picul; and steel, taels 5.3 per picul.

Hankow.—Advices from that port come down to August 12. A good business had been done in imports during the fortnight, Grey Shirtings having been in active demand at 2 mace per piece advance for 8.4 to 6.6 lbs. cloth. Fancy goods had changed hands only to a small extent, but prices were firm. Woollens were selling freely at about former rates. Metals: W. B. lead was worth taels 4.5 per picul.

Yokohama.—There are dates to 11th August. During the latter part of the fortnight there had been an active demand for Grey Shirtings, and considerable sales of 8.4 to 8.6 lb. goods had been effected at $5.10 to $5.25 per piece. Camlets were not in such good inquiry, and S S were only worth $23.50 per piece. Fancy goods remained dull of sale. Cotton yarn: 300 bales had found buyers at $75 per picul for 16 to 24, $90 per picul for 28 to 32, and $100 per picul for 38 to 42. Metals: All kinds continued without inquiry, and prices were nominal.

Coals.—Hong Kong: The arrivals of the fortnight have been 2,888

Digitized by Google

tons English and Welsh, and 1,050 tons Australian, of which 1,200 tons of the former realised $9.75, while 200 tons of the latter changed hands at $6.75. At Shanghai but a limited amount of business has been done, owing to the non arrival of any cargoes from England during the past fortnight. Most of the stocks last reported afloat from Great Britain have been sold and reshipped to Japan for French steamer's account, leaving the market bare of stocks afloat, and inducing holders to advance their rates. American coals are being held for better rates. Stocks afloat and on the market, 700 tons. Sydney coals, of the best quality, have been sold to arrive, and the demand is a little more active, although no advance has been established upon last quotations. None in stock. Sales since the 3rd instant.—Cardiff Coals, by the cargo, at Tls. 8.7.5 to 9.0.0 per ton from ship and for reshipment to Japan; Bulli Coals, by the cargo, to arrive, at tls. 6.7.0 to 6.7.5 per ton from ship. Quotations, almost nominal for all descriptions. English Steam Coals, tls. 8.0.0 per ton from ship; Cardiff at tls. 9 per ton from ship; American at ls. 9 to 10 per ton from ship; Sydney at tls. 6.7.5 to 7 per ton from ship; Japan Coals at tls. 6.5.0 per ton from ship. Arrivals since the 3rd instant: 1,450 tons from Sydney; against, for same period last year, 9,040 tons English, 1,410 tons American, and 1,600 tons Sydney.

COTTON.

Hong Kong.—An excellent demand continues, and as supplies have been small, the market tends up and bears a firm appearance. On the departure of last mail, some Bengal cotton was sold as low as $24.50, but subsequently the price gradually rose to $28 to $29, which is the present quotation. At present there is no Bengal left in stock. Small supplies of the native occasionally arrive from the North, which are readily placed at $31.50 to $32.50. The prospects for the Native crop, which is due in about one month, are unfavourably reported on, by reason of heavy floods and the present standard of rates seems likely to be maintained. The market for cotton in Bombay having advanced materially, no shipments from that port to China have yet been reported. The advance in the China market may induce shipments from India, but supplies from Bombay cannot be expected here in quantity so long as the English market is maintained. Some Bengal cotton is expected by the Calcutta steamers during the first week of next month.

Canton.—The transactions have been light, but rates tend up. The following are the settlements of the fortnight. Shanghai, 260 bags, at 22¼ to 22½ taels; Ningpo, 90 bags, at 22⅜ to 23¼ taels; Shangtung, 160 bales, at 22½ to 13 taels; and 750 bales Bengal, at 19¼ to 19¾ taels. The stock is only 200 bags China and 200 bales Bengal,

Shanghai.—There has been a greater demand for this staple for shipment to the Southern ports since the departure of the last English mail, and nearly all the old cotton on the market has been shipped. The new season's crop is expected in about three weeks, but it is anticipated the market will open at high rates, owing to the probable scarcity in consequence of the late rains. Sales have been effected within the last day or two at tls. 17 to tls 17.50, at which rate the Chinese have been the chief purchasers for shipment to Swatow. Among European houses only tls. 16.50 to tls. 17 is offered.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	6s. 2d.	6s. 2d. to 6s. 3d.

SHIPPING INTELLIGENCE.

ARRIVALS.

At Shanghai.—None.

At Hong Kong.—From London: Aug. 17, Esperanza. From Liverpool: 18, Smyrna. From Bordeaux: 17, Bertha and Pauline.

At Manila.—From Liverpool: Aug. 11, Tigris. From Cardiff: 16, Nordesp.

At Singapore.—From Sunderland: Aug. 25, Teutonia. From Glasgow: Japan (s.). From Shields: Ocean Home. From Cardiff: Sept. 1, G. van der Beck.

At Penang.—From Glasgow: Aug. 25, Priam.

DEPARTURES.

From Shanghai.—For London: Aug. 9, Star of China, Ellen Rodger; 18, Norwood; 19, John Lidgett.

From Foochow.—For London: Aug., Areta, Whinfell, Queen Bee, W. Mitchell Thurso.

From Hong Kong and Canton.—For London: Aug. 13, Allendale; 24, Constance; 13, Scawfel; 21, Herald. For Channel: 10, Alida.

From Macao.—For London: Aug. 16, Mary Nicholson.

From Manila.—For Queenstown: Aug. 11, Edward. For New York: 4, Shirley. For Boston: 16, Ocean Rover.

From Singapore.—For London: Aug. 4, Hastings; 24, Caldew; Sept. 6, Pearl. For Liverpool: 23, Vigil. For Falmouth: 28, Ernte. For New York: 2, Earl Shaftesbury.

From Penang.—For London: Aug. 20, Peter Rohland.

FREIGHTS.

Yokohama.—To London: Cotton and Tea, £3 per ton; Silk, £4. 10s.

Shanghai.—There is no improvement to notice, and rates remain about the same as last quoted, though tonnage can be obtained as low as £1. 17s. 6d. per ton of 50 cubic feet; to New York, $9.

Foochow.—To London: £1. 10s. to £2 per ton.

Hong Kong.—The vessels on the berth for home are loading at 30s. per ton; to New York, $10.

Manila.—To England nothing doing. To New York: £1. 10s. Sugar, £2 Hemp.

Singapore.—Tonnage is in better demand, and rates are gradually improving; for dead weight 20s., and 30s. measurement.

PASSED STRAITS OF SUNDA.

From England and Continent to China, &c.—August 12, Adriana Petronella, Cardiff to Manila; 14, Robin Hood, Sunderland to Shanghai, Moulin, Cardiff to Manila; 15, Jupiter, Hamburg to Hong Kong; 17, Gaurije and Maria, Cardiff to Manila; Assyrian, London to Shanghai, Gebrs. Vander Beck, Cardiff to Singapore; 23, Langdale, Cardiff to Manila; 25, Encarnacion, Cardiff to Manila; 26, Ravensburne, Hartlepool to Bankok; 27, Johannes Lodewyk, Cardiff to Manila; 13, Sea Snake, Liverpool to Shanghai.

From China &c., to England and Continent.—Aug. 9, Ocean Pearl, Batavia to Rotterdam; 18, Early Dawn, Singapore to Liverpool; 21, Monitor, Singapore to Bristol; 27, Concepcion, Manila to Cadiz; 28, Johanne Marie, Hong Kong for London.

From United States to China, &c.—Aug. 16, Magenta, New York to Manila.

From China &c., to United States.—Aug. 10, Batavia to New York; 17, Fearless, Manila to Boston; 27, Benefactor, Hong Kong to New York.

COMMERCIAL POSTSCRIPT.

The following is from the Circular of Messrs. W. C. Sillar, and Co., of 85, Cheapside:—Silver: This has been in fair request for shipment to the East, both from here and by way of Marseilles, but the rise in the Bank rate of discount has somewhat checked business, and caused a decline in price of about ¼d., the present quotation being 5s. 0⅛d. per oz. standard. Mexican dollars are still neglected, and nominally quoted at 4s. 11½d.

Arrival not Included in the Table.—Oct. 15, off Falmouth, from Shanghai, Fire Queen.

THE NEW TEA SEASON CLIPPERS.

It will be observed that of the various clippers the Taeping, Captain McKinnon (late of the Ellen Rodger), maintains her reputation for speed, in making the shortest passage home, viz., 102 days, having left Foo-chow on 29th June, and arrived at the Downs 9th October. In January last she arrived in London from Amoy, after the unprecedented passage of 88 days. The following will show the various passages:—

Ship.	From.	Date of Departure.	Date of Arrival at.	No. of days.
Yang-tzse	Foo-chow	May 26	Off Plymouth Oct. 5	132
Ziba	Do.	„ 27	London „ 7	133
Flying Spur ..	Do.	„ 30	Off Scilly „ 4	127

CHINA GRASS.

(To the Editor of the *London and China Telegraph.*)

Sir,—Having noticed in your late issues sundry articles about China grass, and apparently congratulating Frenchmen upon their great mercantile acumen, perhaps you will allow me to inform the public what is already known to many China merchants. This fibre has been manipulated upon by a certain individual in England as far back as twelve years ago. The patents of the machinery then got into the possession of another person, who organised a company (kept private) for working it, and although several hitches occurred in perfecting it I believe it is still in working in Yorkshire, though whether remunerative or not I cannot say. As far as the raw material is concerned, I can only tell you that three years ago upwards of 1,000 tons lay in London (to the great grief of the importers), laying down at a cost of from £70 to £80 per ton, and valued nominally at only £40. Although I was never an importer of the commodity, still I have from the first been much interested in its being manufactured in England, and have at times, in my correspondence with the late Sir W. Hooker, Dr. Maximovitch (the well-known Russian Government botanist in Japan) and a friend of mine in China, received all the information about this willow or withy (for such it is) that any one can desire. Should your readers require further information I have no doubt that by referring to old letters and pamphlets I can supply it. The great difficulty, as far as I can see, arises from the fact that it cannot be imported into Europe at a low enough cost. To obviate this, the only way is to send preparing machinery to China, and then to spin and manufacture in Europe.—I am, Sir, &c., An Englishman.

London, October 12, 1865.

HOLLAND.

(from our own correspondent.)

Rotterdam, Oct. 15.

The tug-steamer *Kapoeas*, built at the iron-works at Feyenoord, for the service in India, is now ready. The ship will be taken to pieces and shipped in the forthcoming month.

Several Japanese have arrived in our country, to be instructed

Digitized by Google

in several branches of industry. This seems very favourable, not only for them, but also for our several manufactories, which are favoured with considerable orders for the Japanese Government.

COMMERCIAL.

Coffee.—With a few transactions in Company's coffee in waiting for the auction of this month. The private transactions consisted in 1,728 bags Padang ex Alcyone, 2,500 bags do. ex Solide, and 3,000 bags Java ex Gebroeders.

Sugar.—The market remains in a firm condition. In the 1st hand about 3,000 kr. were sold at former prices.

Rice.—2,000 b. 2nd quality Java ex India, and 2,270 b. do. ex Nagasaki, were sold at 11f. to 11¼f.

Spices.—Nutmegs unaltered. For Mace there is some inquiry, and one parcel was sold at 75c. for D., and 70 for E.

Tea.—The market remains in a very firm condition for China qualities.

Java Tobacco.—The market is very calm; the stock here consists of 13,114 b.

Manila Cigars.—On the 18th instant the following lots will be offered: 200 mille 2a Cortados Cavite 1865, 100 mille 2a Cortados 1864, 10 mille 1a Cortados 1863, 100 mille 2a Cortados Cavite 1864, 150 mille 2a Cortados 1864.

Drugs.—Camphor unaltered, the holders decline to operate without an advance; on the 26th 10,100lbs. will be offered at auction; the quality is fine, and estimated at 61 to 65 cents per ¼ks.

Cubebs.—45 cents; Cassia Lignea again higher, 1a quality 60 to 62 cents. 2,000 b. ex Nagasaki were sold at firm prices; Cassia Vera has much attention, fine quality is paid with 33 cents. Oleum Cassiae, nominal 5¾: Japan Wax with much inquiry, but without stock. Ginger: The stock is much diminished; for fine quality 80 and 82 cents is willingly paid. Gum Elasticum: A few lots were sold; Gum Damar with much inquiry at former prices.

Rattans.—At the last quotations all can find place. Banjermassing is now worth 14f. to 16f.; Padang, 12f. to 14f. 50 pic. ex Helen Baird, 143 pic. ex County of Renfrew, 209 pic. per Juno, and 100 pic. per Miranda, were sold.

Java Indigo.—The market remains very firm, but the want of fine qualities hinders transactions.

Java Curcuma.—200 bales, floating, were sold at 12f.

Cotton.—The Trading Company will offer, on the 26th, at public auction, 2,275 b., which are estimated as follows:—611 bales Comptah, middling fair, 87½c.; 50/2 bales ditto, 87½c.; 35 ditto, good middling, 85c.; 5 ditto, middling, 80c.; 397 Dhollerah, fair, 97½c.; 224 Broach, fair, 95c.; 197 Indes Neerl, sawginned fair, 70-75c.; 5 Indes Neerl, (graine de Java, Nouv. Orleans et Sea Island), good fair to fine, 90-140c.; 322 Tinnevelly, fair, 90c.; 322 du Japon, good fair, 92½c.; 84 ditto, fair, 20c.; 23 ditto, middling fair, 85c. The transactions of this week were not important. Only 350 b., E. I. were sold.

Cocoa-Nut Oil.—1,500 ks. prime Cochin were sold at 32f. 3,000 ks. good white at 31¼f.

Banca Tin.—500 slabs were sold at 56f., 1,500 ditto at 55½f. Under 56f. nothing can be bought now.

Hides.—The transactions of the week consisted in 2,010 Sourabya ex Helen Baird.

Arrack.—50 cases, ex Maria Dorothea, 35 ditto, ex Codan, 50 casks, ex Marinus Willem, 50 casks, ex Margarethe, were sold at secret but firm prices. The stock now consists of 669 casks and 7 half casks.

Money.—The market is unaltered. Two-and-a-Half per Cents. Dutch, 60⅞; Three per Cents., 71⅝; Four per Cents., 95⅝; Trading Company, 145⅝.

'Change.—London, 2 mo., f.11.81½; short, f.11.96¼; Paris, 2 mo., 56 5-16; short, 56 13-16; Hambro', 2 mo., f.35¼; short, f.35½.

Shipping—Arrivals.—October 11, from Batavia, at Brouwershaven, Holland; from Samarang, at Hellevoet, Bengal; 12, from Sourabaya, at Brouwershaven, Prince Carl; from Batavia, Pop Smit, Christina Maria; at Texel, from Batavia, Ymuiden, Wellington; at Flushing, from Batavia, Æolus; 13, from Batavia, at Brouwershaven, Lammina Elizabeth, St. Jan; 12, at Texel, from Sourabaya, Albert, Glencaple; 13, at Flushing, from Java, H.M.'s frigate Prins Mauritz der Nederlanden; 14, at Texel, from Batavia, Nicot, Fanny.

Departures.—October 9, from Texel, for Batavia, Electra; 10, from Hellevoet, for Batavia, the steamer W. Cores de Vries, for Batavia via Cape Vincent and the Cape of Good Hope.

PASSENGERS OUTWARD.

For Java.—Per Ouderkerk a.d. Amstel: Mrs. Sythoff and four daughters, Mrs. Steffens, Mr. Blasius and family, Hardes, and family, Cochius and family, Dingerinck, Van der Mandele, Reeze, H. Bezoet de Bie, Haase, J. and A. Arnold. Per Mary and Hillegonda: Major J. H. E. Wiegand, Lieutenant L. J. A. J. Broman, Riesz, De Stoppelaar Blydestein, and R. E. Beck, and 125 soldiers.

PASSENGERS INWARD.

From Java.—Per Holland: Mr. F. Vreede and family, Mrs. Joostens and family. Per Prinz Carl: Mr. Warmolts and family. Per Ymuiden: Mr. Beling. Per Æolus: Mr. Van Ooyen and family, Mr. Van Munnich, Van Zadelhof and family.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

October 14.

I begin this letter by refuting the statement contained in the postscript of my last, that "it is not Admiral Wullerstorff but his brother" who has accepted the post of Austrian Minister for Commerce and National Economy (*Volkswerthschaft*). It is, after all, the gallant and enlightened commander of the Novara Expedition. He is now in his fiftieth year, having been born at Trieste, in January, 1816, and he entered the Austrian Navy at the age of eighteen. In 1839 he was appointed Director of the Naval Observatory, and Professor of Navigation and Astronomy at the Naval College. In 1854 he obtained the rank of full captain, and shortly afterwards (1857) took the command of the Novara Expedition, of which he has written such an interesting and graphic description, which became so popular that of the German edition 40,000 copies were immediately sold on publication, since which several new editions have been required. When he entered on the duties of his new office last week he appeared in full parade uniform as an admiral of the Austrian Navy. Whoever has been so fortunate as to have had an opportunity of reading the above-mentioned work, cannot fail to have been struck with the humane and liberal sentiments with regard to religion, the management of colonies, but above all free trade, with which the book abounds. In his inaugural address to the officials of his department the new Minister laid great stress on following and extending in every direction the principles of free trade, and the abolition of all monopolies and protective duties as the foundation-stone of commercial prosperity and national wealth, which he hoped to increase and develop by his administration of the commercial department, and to see the trade of Austria assume that extent to which it was entitled from the advanced state of their manufactures and industry.

The new Minister's first act was to dismiss all the officials, and he is now engaged in replacing them by men of liberal sentiments, in whom he can confide the duty of carrying out the details of the reforms he is about to introduce.

A Hamburg paper called the *Reform*, perhaps but little known abroad, but with a very extensive local circulation—printing 25,000 copies—says that the administrators of the estate of Mr. Carl Broderson, of Altona, a China merchant who failed last autumn for a very considerable amount, have sent a circular to the creditors of that gentleman, informing them that the principal creditor—the house of Messrs. Joseph Oxford and Co. of London—has offered to pay the others 25 per cent. of their claims in two instalments, on their granting him permission to realize the assets for his own account. These assets consist principally in shares or parts of sixteen vessels accounted in the schedule worth 386,777 marks banco. The Court of Magistracy or Municipal tribunal at Altona found it needful to issue a public proclamation inviting the creditors to register their claims before a certain day, in order to ascertain the exact amount of the liabilities. At first the claims sent in amounted to more than two millions of marks banco, but after a strict investigation on the part of the assignees, that sum has been greatly reduced, and the amount proved and admitted as lawful claims is now ascertained to be 1,161,000 marks banco. Experts have been employed to value the shares in the vessels, which are booked at having cost him 420,000 marks banco; but their report shows that they are only worth 264,000 marks banco, to any one that can make use of them, and that in the event of a forced sale they would fetch considerably less. The assignees officially appointed by the authorities at Altona are Messrs. H. W. Hinrichsen, C. A. Hubener, and C. Jacob. In their circular they recommend the creditors to accept the terms offered for a composition.

I observe in your last number a statement that the Leipzig Michaelmas Fair went off well, and gave general satisfaction. I know not where you obtained the information, but it is diametrically at variance with the accounts printed in the Leipzig newspapers, which one and all are unanimous in complaining woefully that the result was a most unfortunate one, and not to be compared with the Easter Fair. Leather and cloth were the only articles that experienced anything like a fair demand, whilst, on the other hand, cotton and silk manufacturers, gold and silver articles, and furs of all description, found no sale to any extent, and were all decidedly dull.

A letter just received from Corfu announces the arrival in that port of the Austrian frigate *Schwartzenberg*, where she dropped her anchor not far from the Danish frigate *Niels Juel*, which was lying in the harbour. These two vessels did the leading part of the work on different sides in the naval engagement off Heligoland in May last year, and are both still commanded by the same officers. It would have afforded them an interesting conversation to have compared notes and talked over the particulars of the action, with an exchange of their respective ideas of the manœuvres of the opposite and then hostile squadron; but no such opportunity offered, as the Austrian having arrived from the Levant, was under quarantine, and the Dane sailed two or three days later to Malta.

Digitized by Google

Mr. Woldemar Nissen has been appointed Consul for Bremen at Hong Kong, and Mr. G. H. Miesegaes, Vice-Consul for Prussia at Samarang, vice Mr. Jacobson, deceased.

Mr. Alexis de Lentz, Bachelor of the Imperial University of St. Petersburg, and Expeditor in the Asiatic Department, is appointed to the Translating Department of the Imperial Legation at Peking, vice Michel Henning, Collegial Secretary.

The *Melissa*, Capt. Wiese, mentioned in my last as having sailed from this port to Singapore, on the 1st of October, was detained in the Elbe, and only got out to sea on the 11th inst.

COMMERCIAL.

COFFEE.—Owing to the scarcity of money and the high rate of discount the market is less firm, and several parcels have been sold under last week's currency. Yesterday, however, an improvement took place, and the market closes firm at about last week's rates. Sales of the week, 11,500 bags.

SUGAR.—A further advance of 4 to 6 Sch. Bco. has taken place in Raw, the business done was not however large, and chiefly confined to West India sorts. Refined: Firm, sales 10,000 loaves.

RICE.—No alteration to report. The opinion for the article remains favourable, but the transactions were neither numerous nor extensive.

SPICES.—Business limited to the execution of small orders for consumption; and full prices paid. No sales by importers recorded.

TEA.—471 chests of Congou, ex Persia, sold at firm rates. The deliveries are satisfactory. Some considerable orders from the United States have been executed for fine mid. Green and Oolong.

SPELTER continues to droop. The only sale reported was 2,500 centners for delivery in November and December at 13.12, at which price there are now sellers.

MONEY rather easier, discount, 6½ to 6¾ per cent.

CIVIL WAR IN JAPAN.

OWING to the manner in which the news recently received from Japan has been treated by most of the daily papers, and also to the tenor of certain telegrams, the British public generally are impressed with the conviction not only that a civil war of portentous magnitude in that country i inevitable, but that it has actually commenced; while, notwithstanding the threatening measures adopted by the TYCOON, and the defiant attitude of the rebel Daimio CHOSIU, those better acquainted with the politics of that country, and the peculiarities of its people and form of government, will not be surprised if the commencement of actual hostilities should be delayed for a considerable period, and perhaps averted altogether. That a large army, headed by the TYCOON in person, had left Yedo *en route* for CHOSIU's dominions, is beyond doubt; but since its departure the programme has been changed, and we now hear that Kioto, not Nagato, is the present destination of the Imperial forces; and that, according to present arrangements, they will remain there for an indefinite period, while consultations are pending between the TYCOON, the MIKADO, and their respective Ministers, as to the course finally to be adopted. It is also rumoured, and probably not without foundation, that negotiations of a pacific nature are not unlikely to be initiated by CHOSIU himself, and that the MIKADO is disposed to view with favour some peaceful solution of the difficulty, such as the surrender of a portion only of the Prince's territory, as a punishment for his insubordination, and a ransom for the remainder.

In our endeavours to understand the motives which actuated this rebellious Daimio, in his apparently indiscriminate aggressions both on his own and foreign Governments, we have been constantly puzzled by conflicting statements which seemed to neutralise each other, and by the difficulty of discriminating between conjectures and facts; the former being always so plentiful, and the latter, with our present imperfect knowledge of the country, so difficult to arrive at. Many doubtful points are, however, cleared up by a proclamation issued by the TYCOON shortly before his departure from Yedo with the army, a translation of which document appears in the *Japan Herald* of the 1st of July. In this we see for the first time an official account of the charges brought against CHOSIU by the MIKADO and the TYCOON, and we are also informed that it is at the instance of the MIKADO that he is about to be brought to punishment. His various offences are recited at considerable length. He is accused of conspiring with intent to overthrow the Government; of misrepresenting the TYCOON's acts, and otherwise endeavouring to sow dissension between the TYCOON and the MIKADO; of intriguing to produce discontent with the foreign treaties among the members of the Kooghay, or Council of the MIKADO; of attacking, without provocation, inoffensive vessels belonging to countries having such treaties with Japan; of falsely representing that he had the authority of the MIKADO for these aggressions; of causing certain officials, sent to him by the TYCOON, to be murdered in a most treacherous manner; and finally, when his plots had failed, and his real character been unveiled, of having made a desperate attempt to seize the person of the MIKADO, and destroy Kioto. For these offences, the proclamation goes on to say, it was resolved by the TYCOON to call upon all faithful Daimios for aid in punishing him; but he at first feigned submission, and voluntarily promised to destroy his fortified castles and surrender his territory. This, however, having proved to be only a subterfuge, probably practised to gain time for more effectual resistance, the MIKADO had urged the necessity of no longer delaying that chastisement so richly deserved. Such is the official narrative of the circumstances which have induced the TYCOON to march at the head of an army numbering no less than one hundred and twenty thousand men, destined, no doubt, to ravage with fire and sword the territory of the luckless MORI DAIDJEN. Of the crimes imputed to him we know some to be justly laid to his charge; for instance, the attempt to destroy inoffensive vessels belonging to foreign merchants and the attack on Kioto; but whether he be guilty of *all* the offences enumerated in the TYCOON's proclamation, and what extenuating circumstances there may be in his favour, we have no evidence to show. What if there be, after all, some germs of truth in his defence? Our treaties have never been ratified by the MIKADO, and that potentate has never looked with a favouring eye on the presence of foreigners in his dominions. What if it be really true that, jealous of our intrusion into the hitherto secluded waters of the Suwo-nada, the MIKADO authorised CHOSIU to close the Straits of Simonoseki; and what if, finding himself in a false position, and his hastily-adopted policy untenable, he ruthlessly sacrificed its exponent, and made a scapegoat of the luckless Prince? The avowed efforts of the TYCOON to prevent the attack of the allied fleets on Simonoseki, and the rumoured disposition of the MIKADO to treat him leniently, are both calculated to throw, at all events, a shade of probability on this surmise, and to favour the idea that this much-abused Daimio may after all be more sinned against than sinning.

The effect of such treatment as we have here hinted at, upon a man of haughty, resentful and fiery disposition, would doubtless be to incite him to the most desperate acts of rebellion, such as would afford still further pretexts, if any were needed, for inflicting chastisement upon him. The army against which he will have to contend, should he persist in defying the authority of the Government, is a formidable one. A letter from an officer holding the rank of a colonel of artillery, recently published in the *Japan Herald*, gives some interesting particulars regarding its composition. The TYCOON's own army, properly so-called, consists of 70,000 men, 10,000 of whom are said to be equipped and drilled in European style. The remaining 60,000 men have been raised and equipped by ten powerful daimios, and a portion of these forces are also more or less perfect in European tactics. The troops are said to be in fine condition, and the march is conducted in the most orderly manner, the use of all intoxicating liquors being absolutely interdicted. Notwithstanding the strict discipline enforced, entire harmony prevails among the officers and men, and all seem eager for the fray and averse to pacific measures. On the other hand CHOSIU, is by no means without the weapons for a powerful resistance. His *samourai* are renowned as being among the most warlike in the empire; and with a considerable army, strong fortifications, and good store of European arms and ammunition (with which he has doubtless managed to supply himself), he will surely make a resolute defence. We are not among those who believe that SATSUMA will array himself on the side of the rebel. Among other reasons for this opinion, we may mention, firstly, the fact that several of SATSUMA's steamers have been chartered to the Japanese Government for the purpose of conveying troops and stores to Simonoseki in connection with the TYCOON's expedition; and, in the second place, it seems very unlikely that, after the result of his former collision with a foreign Power, he would again place himself in direct opposition to foreigners, which would assuredly be his position did he support CHOSIU, one of the principal features of whose late career has been his determined series of aggressions against the several treaty Powers. The generally pacific attitude of SATSUMA, of which the mission to this country lately noticed in our columns is a substantial proof, also favours the idea that if not active in support of the Government, he will at all events remain neutral in the impending struggle.

FRANCE AND THE CHINA TRADE.

Much dissatisfaction begins to be expressed in France at that country being so far behind Great Britain in the aggragate amount of its annual trade with China. Is it to this the valour of her arms has come? Can her diplomacy accomplish nothing more? To be in the third or fourth rank of foreign dealers offends the national *amour propre*, which would fain find France first in commerce as well as "first in war." The *Patrie*, in casting about for the means of enlarging French transactions with China, appeals to the Chambers of Commerce throughout the country to take measures to make more widely known those advantages that incite the enterprise of the French merchants already engaged in the China trade, and so increase the number of exporters. The *Patrie* never asks how new customers in China are to be immediately secured, or consumption at home suddenly stimulated; nor does it deny that demand is already equal to supply in either country; still less does it consider that increased exports to China under existing circumstances would be to reduce existing profits, which for the past year have been inconsiderable, and, as regards home importations, problematical. The *Patrie*, we presume, would have inaugurated a sort of Franco-Chinese crusade, French goods routing English goods in the China markets, or making both a drug. The spirit of competition itself can only lead to loss when unsupported by other considerations; it may stimulate to increased ventures, but affords in itself no guiding direction. A most material point to be kept in view in the endeavour to enlarge the trade of a country with foreign and distant ports is the character of the return cargo. The commerce of a nation cannot suddenly be raised from moderate to gigantic proportions; and the same causes would be likely to give a proportionate increase to other countries. It would be as well for the *Patrie* and its enthusiasm for the glory of France to remember that an extensive trade, when not existing by virtue of a monopoly, is the product of agencies matured by time, and triumphing over successive obstacles. The vast capital we have embarked in trade with the Far East, the long credits we are ready to furnish, the character and prices of our manufactures, our exhaustless wants and world-wide relations—all favour the maintenance of our pre-eminence. At the same time we are satisfied that French enterprise is too much on the alert not to take advantage of any legitimate openings that may present themselves in the China trade; but they must be patient if they wish to rival the "nation of shopkeepers."

THE MENDICANTS OF PEKING.

The *Cour de Miracles* of Paris was in old times the rendezvous of all the vagabonds of Paris, and M. de Mont Louis, who has visited China, Persia, and other parts of the East, gives us an account of what he calls the *Cour de Miracles* of Peking, in other words, of vagabondage in the capital of China. He says that the largest collection of the most miserable and most hideous mendicants in the world is to be found on the great bridge which crossed the canal and forms a portion of the route which the Emperor takes when passing from the gate of Tchang-Yung-Min, in the wall on the south side of Peking, to his palace. Here, says M. de Mont Louis, may be seen beggars seated in the dust, often with a dead or dying relative or comrade by their side, gambling with the *sapeques* which have been thrown to them, while others importune the passers by, or seek in the mud of the place for rind of vegetables, bits of rag or other refuse. He describes the frequenters of the place as entirely naked, or covered with such rags that it is a miracle how they are kept together, covered with sores which they vaunt with awful imprecations, their faces shaded by a mass of filthy hair that never knew comb, brush or water, and covering their heads at times with the only utensil or piece of property which they possess in the world, the black earthen pot which is given to them by the authorities. M. de Mont Louis gives a graphic account of the flattery, tricks and insolence of these vagabonds, and mentions a curious privilege which they possess of taking from the shops on New Year's Day any article of food which they can hold within their hand. Amongst many extraordinary things, we are told that the death of one of these miserable creatures near any house renders the owner of it responsible, and that, consequently, if threats, entreaties and bribes are ineffectual to remove a dying beggar the good man of the house lifts the unsavoury burden and removes it to some other spot. If they buy their necessaries, these miserable beings steal their luxuries, and they are said to have a novel method of preparing themselves for a midnight job; they smear their bodies all over with any greasy matter they can get, no matter how filthy, and stick needles or bits of broken glass in their hair, so that it is next to impossible to catch and hold them. The mendicants in Peking, according to M. de Mont Louis, amount to four per cent. of the population, and all belong to secret societies or bands, confined to certain localities and lorded over by a chief who holds the reins because he has the power to seize them, and punishes any infraction of his orders with great severity. Not long ago one of these functionaries, who had acquired extraordinary influence, is said to have been made a Mandarin, and to have died five years since in all the odour of respectability if not of sanctity. Marriage holds a curious position in the code of the vagabonds. If one of these gentlemen desires to become domestic he chooses a lady, and is obliged to inform his chief of the fact; but the marriage is neither a civil nor a religious ceremony, the husband quitting his wife when he may think fit, and not acknowledging his paternal obligations in any way whatever. By this arrangement the Chinese beggars escape all the scandal of divorce and police courts! M. de Saint Louis admits that there are many Yang-Tsi-Yuanns, or houses of charity; that a tax is levied on all housekeepers in aid of the poor, and that the Emperor and the Princes give large sums for the same object. Last year, he adds, the Emperor gave at the commencement of the winter six thousand taels, and on the very night preceding the distribution, thirty mendicants died of starvation on the marble bridge of the palace. M. de Mont Louis hints that the fear of rebellion has more to do with these arrangements than any actual feeling of charity, and adds that the functionaries who preside over the houses of charity have generally no remuneration, and therefore take care of themselves out of the money and millet entrusted to them for distribution, this custom being quite regular in China. The number of mendicants who receive rations of millet twice a day during three winter months is supposed to be somewhere about three thousand. There exists also in Peking a public dormitary for these miserable creatures, a large building consisting of four sides, with a large court-yard in the centre. One of the wings is devoted to men, a second to women, and a third to children, while the fourth is occupied by the officers and servants of the establishment. No beds or furniture of any kind is provided, but sometimes the ground is strewed with feathers *given* by mandarins and other grandees, who simply order their poulterers to carry so many feathers to the dormitary. When the weather is very severe the poor mendicants have a thick blanket-like covering, with a hole in the middle, through which the head appears. The sleeping space is so restricted that the mendicants are unable to lie down, but are packed together like negroes in a slave ship. In case of death the bodies are placed in rough coffins, which remain for months piled one on each other in the place where the beggars come daily for their dole, for the law only allows the interment to take place during the first week of spring! M. de Saint Louis admits that private charity exists to a considerable extent in Peking, but he is rather hard upon poor human nature when he attributes nearly the whole of the almsgiving to policy, self-interest, and vanity. We none of us do so at home!

CHINESE COMPETITION IN TRADE.

We would be glad to learn more particularly the grounds on which the French Consul-General at Shanghai affirms that his visit to the chief silk districts has resulted in improving the facilities for foreign, or at least for French trade. There can be no question that the occasional visits to the interior of China of the official representatives of foreign Powers, bent on discovering the local causes that enhance prices or render them so fluctuating, apart from the conditions of supply and demand and cost of transit, and making complaints *in propria persona* to the Mandarins controlling the routes of trade, would prove favourable to foreign interests. The central power has always been too inefficient or careless to check the exactions of the Mandarins; and it may be made a question whether these extortioners might not thus be made more amenable for infractions of the treaty. Such official visits by our own Consuls, accompanied by gunboats, would not only give a wholesome sense of our readiness to defend mercantile interests, but would prepare the way for further enterprise by private traders. In so far as concerns our purchases, we are yet too dependent on the middleman. A vast change will be brought about when we are enabled to hold more direct dealings with the producers. Adding to this a clearer understanding of the conditions of transit to be come to with the local authorities, we would be able to enter into a more effective competition with native exporters.

THE NEW GOVERNOR FOR HONG KONG.

Sir Richard Graves Macdonnell has arrived from Halifax, and it is reported will take his departure for Hong Kong next month. The correspondent of the *Canadian News*, writing from Halifax on the 28th Sept., says:—

Sir Richard Graves Macdonnell leaves here to-night by the steamer for England. Yesterday a warm and flattering address was presented to his Excellency by the corporation of this city of Halifax. As this address and the reply to it seem to me worthy of reproduction, I append them to this letter. The reply especially strikes me as one which is conceived and expressed in very good taste. Sir Richard and his graceful and accomplished lady have endeared themselves to the numerous circle who, since their arrival here, have enjoyed the unwonted and genial hospitalities of Government House; and the great body of our citizens and the people of this province generally will warmly sympathise with the kindly sentiments contained in the address to which I have just alluded. There is not, of course, much scope under our present form of Government for the active exercise, on the part of one in his Excellency's position, of statesmanship in the local government of the colony; but the energy and ability of Sir Richard as Commander-in-Chief have been most successfully exerted in advancing the local defence of this province. No previous Governor has bestowed a tithe of the personal attention which Sir Richard has given to this important branch of the public service, and which he has the satisfaction of now leaving in a high state of efficiency. It may be safely stated that in no part of Her Majesty's dominions can there be found a more zealous and devoted representative of the Crown than Sir Richard Graves Macdonnell.

The following is the address alluded to:—

To his Excellency,—

We, the Mayor and Aldermen of the city of Halifax, for ourselves and on behalf of our fellow-citizens, assure your Excellency that on departing from this province to assume a post of greater responsibility and more important trust, to which our Most Gracious Queen has been pleased to transfer you, you will carry the sincere regrets of our citizens generally that your sojourn in Nova Scotia has been so brief, and that you will not be afforded the opportunity of carrying out the improvements of our country which, we are confident, you were anxious to suggest and promote.

During your short administration of the Government, you have been distinguished by a marked desire to perform the duties appertaining to your exalted position faithfully and zealously, to uphold the good government of our illustrious Sovereign, and to advance the prosperity of the people.

Impressed as your Excellency evidently has been with the vital importance of having a self-protecting force to guard our homes, we have viewed with much satisfaction the deep interest you have evinced in our militia forces and the internal defences of our country. The improvements made and the active measures promoted by you, the Commander-in-Chief, must have occasioned much thought, anxiety, and trouble, and are likely in our future to prove largely beneficial.

The gentle and urbane bearing of your amiable lady has commanded the deep respect of the community, and we beg to assure your Excellency that the citizens of Halifax will long cherish pleasing recollections of the residence in our midst of your Excellency and her Ladyship.

Though we much regret your early departure from our shores, we must be permitted to congratulate your Excellency on the high estimate Her Majesty places upon your administrative talents by entrusting you with so dignified and important an appointment as the one to which you have been promoted; and now, when thus according to us the privilege of a parting farewell, we respectfully wish your Excellency and Lady Macdonnell a safe, speedy, and pleasant passage to your new sphere of usefulness.

His Excellency replied as follows:—

Mr. Mayor and Aldermen,—

Your address embodies so much genuine and kindly feeling to myself personally that I should find it difficult at any time to express adequately the sentiments which its language awakens. How much more so, then, at a moment when, amidst an unusual pressure of business, the recollections connected with my sojourn here and the regrets so natural at leaving are crowding on me.

It may be true that the only durable reward of exertions for the public good lies not in mere human approbation, but in the inward conscious sense of efforts honestly and fearlessly made to act up to a high standard of duty. Nevertheless, I hope I can adequately appreciate the friendly approval of those who reside near and personally know me, and who are at this moment, during the Parliamentary recess, the most important representatives of public feeling in the province. I also appreciate fully the value of the opinion of a representative body such as yours, to whose intelligence and enterprise the increasing improvements of this city of late years bear such ample testimony.

Although I did not feel warranted to decline that personal promotion to which you allude in a career so long followed, I frankly own that it is rendered less acceptable by the severance which it entails of much pleasant intercourse with valued friends and the interruption of many labours, whose fruits, nevertheless, will not, I trust, be wholly lost.

Amongst those labours I shall always look back with special pride to the improvements which the liberal spirit of your Legislature has enabled me to effect in the organisation and equipment of your local forces. Their increasing efficiency will soon render them formidable opponents of any regular invading army, whilst the loyal and cheerful spirit in which they contribute time and labour to render themselves efficient defenders of their native land justly merit the grateful recognition of the country.

I scarcely know how to allude suitably to your just appreciation of one whose companionship has constituted the chief happiness of myself. I will only say that I am well aware that to her presence here will be almost entirely due those pleasing recollections which you say will abide with you of our sojourn here.

I am not at this moment, as you may suppose, inclined to touch on any subject connected merely with the arduous duties of my public life. I only feel that I am bidding farewell, through you, to a community for whose prosperity I have endeavoured conscientiously to labour, and whose continued progress and happiness shall never cease to interest me.

RICHARD GRAVES MACDONNELL.

Government House, Sept. 27, 1865.

IMPORTS FROM JANUARY 1, TO JUNE 30, 1865.

Annexed is a statement of the computed value of our importations for the above period. Each country is placed in the order in which it ranks, according to the magnitude of the supplies it has sent to us. The total shows a falling off of about 19 per cent., but this is almost entirely consequent on the reduction in the price of cotton, which has caused India to figure for only £9,489,188, against £20,503,510 in the first half of last year, and Egypt for only £8,964,947, against £11,040,841; while China and Brazil, also from that cause, exhibit a proportionate diminution. The most remarkable feature in the list consists in the place occupied by the United States, which now, instead of standing at the head of the foreign contributors to our wants, show a total only a little more than a third of that of France, about half that of Egypt, and less than those respectively of Germany, China, and Holland:—

IMPORTS FROM FOREIGN COUNTRIES AND BRITISH POSSESSIONS DURING THE SIX MONTHS ENDED THE 30TH JUNE, 1865.

Literature.

—o—

The great publishing houses are beginning to be sensible of the approach of winter and its long evenings. Their dormant season is during the bright summer days when every healthy mind that is fortunately incorporated in a healthy body is away to fragant meads or the breezy shore. History has taken the lead in the recent additions to the library catalogues ; for Lady Theresa Lewis's *Extracts from the Journals and Correspondence of Miss Berry* consist so entirely of anecdotes and reminiscences of personages who have already been placed by posterity in the niches awarded to them in the Temple of Fame that the three volumes they fill must not be classed as mere ordinary autobiography. The sisters Berry, long ago introduced to the public by Horace Walpole, flourished during the long period extending from 1783 to 1852. The elder of the two was the delight of the old age of that prince of anecdote-writers just mentioned, who was born under the reign of George the First, and her days were lengthened out till, little more than a dozen years ago, she was presented to Queen Victoria, who did her subject the unusual honour of expressing a desire to make her acquaintance. Nor do the "Extracts" refer to English life and English celebrities alone. The ladies were travellers in their younger days, before the French Revolution broke out to change the entire aspect of manners and society ; the short respite from war of 1802 took them again over to Paris ; and another visit after the restoration of the Bourbons enables them to note how completely the events of the earlier part of the nineteenth century had disunited the then generation from the past. The volumes may be considered an indispensable supplement to Horace Walpole's collection of *memorabilia*, and will, no doubt, be as extensively read and treasured up.—*The Story of the Great March* is the narrative of Sherman's wonderful movement from Atlanta to Savannah, and thence northwards, told by one of his aide-de-camps, Brevet Major George Ward Nichols. Sherman's exploit is now thoroughly appreciated by the professional military critics, who admit that it displays the very highest quality of generalship—that of winning bloodless victories by dint of consummate manœuvring. Grant will soon receive his turn of hero-worship, for it certainly must be confessed that the two make a pair of whom America ought to be proud. Indeed, it is clear that the perfect confidence felt by each in the other enabled Sherman to decide on his brilliant flanking campaign, and brought Grant to remain immovable and apparently inert before Richmond, where the event proved he did the Union better service by retaining Lee also motionless, than if he had hazarded a hundred conflicts. Besides possessing the highest interest as regards the topic it embraces, the book is very ably written, and may be set down as a really spirit-stirring performance.

Of lighter publications, we must recommend *A Summer in Skye*, by Alexander Smith, the poet and essayist. In Skye, says the author, one is freed of one's century, wafted far beyond the atmosphere of Edinburgh reviewers or sensation novels, and everything is seen "in the light of Ossian, as in the light of a mournful sunset." During a residence of several successive summers in Skye, he grows deeply interested in the Ossianic controversy, and becomes thoroughly convinced that Macpherson was no literary forger, but simply an inefficient and untrustworthy translator. A short extract will sum up his decision :—

That a large body of poetical MSS. existed in the Highlands we know ; we know also that when challenged to do so, Macpherson produced his originals ; and the question arises, Was Macpherson a competent and faithful translator of these MSS. ? Did he reproduce the original in all its strength and sharpness? On the whole, perhaps, Macpherson translated the ancient Highland poems as faithfully as Pope translated Homer, but his version is in many respects defective and untrue. The English Ossian is Macpherson's just as the most popular English Iliad is Pope's. Macpherson was not a thoroughly equipped Gaelic scholar ; his version is full of blunders and misapprehensions of meaning, and he expressed himself in the fashionable poetic verbiage of his day. You find echoes of Milton, Shakespeare, Pope, and Dryden, and these echoes give his whole performance a hybrid aspect. It has a parti-coloured look ; is a thing of odds and ends, of shreds and patches ; in it antiquity and his own day are incongruously mixed—like Macbeth in a periwig, or a ruin decked out with new and garish banners.

Mr. Smiths' acute perception of external beauties renders his account of his residence in Skye a charming piece of word-painting. All kinds of matter appear in his volumes, from poems composed in a bothy to a description of a row at Keady Fair ; and the people among whom he mixed, whether gentle or simple, stand out well from the canvas as character-studies.

Some reprints of American *facetiæ* are just now having a rapid sale. In addition to *Major Jack Downing* and the *Biglow Papers*, there are four or five others not so well known to the English public. The success of these republications may have the excellent effect of inducing a desire in American authors and their publishers to accede to that international respect for copyright which has been formally sanctioned by treaty and legislation among many European nations. *Artemus Ward, his Book*, and *Artemus Ward, his Travels*, are perhaps destined to achieve the honour of this beneficial result. One publisher advertises a shilling edition of all these books with the following—

Notice.—Beeton's edition of "Artemus Ward" is not issued under the authority of Mr. Brown, the author. It is printed without his leave or sanction, precisely as Mr. Beeton's books, and Englishmen's works generally, are reprinted in America without their leave or sanction.

A rival publisher has filed a bill in Chancery against this bold retaliator in literary appropriation, founding his claim to copyright on certain petty rectifications of the American original, alleging that he, the plaintiff, "made such additions, suppressions, and alterations to and in the edition of the author's work so prepared by the plaintiff for the English reader and published by the plaintiff in England." The plaintiff's grievance is, as he puts it, that Mr. Beeton's edition is printed without authority, not from the American, but from his English edition. The question, therefore, is whether these variations are sufficiently important to constitute an infraction of copyright. In principle there can be no doubt that anything added by an English editor to a work, whether copyright or not, is copyright if published for the first time in this country. It is customary with some English writers publishing in America to get some small portion added to their work by an American writer, which is generally considered to secure copyright in the entire volume, if the exact extent of the work of the American collaborateur is not divulged. All these devices, however, only serve to illustrate more strongly the unsatisfactory state of international copyright law—or rather no law—as between England and the United States.

Among the matters that point to the winter's merry fireside are some of the Games for Round Parties, issued by Dean and Munday. Mrs. Blackwell's *Game of Quotations from the Poets* deserves special mention for the clever notion of fixing in the memory the words and sources of the phrases and lines that continually spring to the lips even in ordinary conversation, so completely have they become "household words." The game may be played, it seems to us, in two ways, either by the exact reminiscent being rewarded by a counter, or by the faulty one being mulcted in a forfeit. It possesses the merit of being so framed that, whilst young people beyond the age of childhood will findin it amusement and instruction, their seniors will be able to join in it without forfeiting one atom of their dignity beyond occasionally affording a proof of having lived long enough to find they have forgotten much that they knew.

Gustave Dore's great masterpiece—viz., the *Illustrated Bible*—upon which he has been engaged for the last four years, is now on the eve of completion. Messrs. Cassell, Petter and Galpin have purchased the engravings for their sole and exclusive use in the English language, and their edition of this great work, for England and America, will be shortly announced. The illustrations will consist of 230 large page drawings, the cost of their production being upwards of £15,000.

Mr. Murray has published a new *Handbook for Russia, Poland, and Finland*, which has been compiled by Mr. Michell, an *attaché* to the Embassy at St. Petersburg. Having lately had experience of the incorrectness of Bradshaw, we welcome this book most heartily as much needed.

Naval and Military.

The Orontes, iron screw troop-ship, Captain H. W. Hire, left Plymouth on the 30th Sept. for Madeira, *en route* to China. Her supernumeraries consist of about 170 officers and 870 seamen, &c., there being, when all told, about 1,250 souls on board.

It has been officially announced at the head-quarters of the Royal Engineer establishment, Chatham, that the appointment of principal instructor in field fortifications to the Royal Engineer corps, vacant by the death of Major F. H. de Vere, has been conferred by Field-Marshal the Duke of Cambridge on Lieut.-Col. W. O. Lennox, V.C., now attached to the Quartermaster-General's Department at Aldershott camp, who will forthwith enter on the duties of his post. Colonel Lennox has seen service eminently fitting him for the appointment. He was present during the whole of the campaign in the Crimea, the gallantry he then displayed entitling him to the Victoria Cross. He also served throughout the Indian mutiny, and commanded the Royal Engineer brigade at the relief of Lucknow, for which he was honourably mentioned by Lord Clyde, and publicly thanked by the Governor-General of India in Council. He served throughout the whole campaign in India.

The screw frigate Racoon, 22, Captain Count Gleichen, has arrived from the Mediterranean, and will steam into Portsmouth harbour to be docked. Lieut. Prince Alfred was to have joined the Racoon at Malta, and served on board her in the Mediterranean until his promotion to Commander's rank in the spring. The outbreak of cholera, however, in various ports of the Mediterranean has been the cause of the Racoon's recall to England.

A new rudder on Lumley's patent is being constructed for the screw troopship Orontes, Captain H. W. Hire, at Portsmouth dockyard, and will be fitted to that vessel on her return to England from her present China voyage. The Lumley rudder, which is fitted to Her Majesty's ships Columbine, Scotia, and six other vessels in the navy, is one of the most simple, yet efficient, forms of steering that can be applied to single screw ships, yet, strange to say, none of our large ironclads have yet been fitted with it.

Her Majesty's screw gun-vessel Sylvia, partially completed at Woolwich, to carry four guns, and to be of the burthen of 695 tons, the building of which has been suspended since 1860, is now ordered to be completed. She is to be fitted with a chart-house on deck, similar to that of the paddle sloop Hydra, and it is reported the command will be given to Staff-Commander Reed, who performed efficient service during his command of the surveying vessel Rifleman, in the China waters.

The late Dr. Barry, inspector-general of military hospitals, was found after death to be a woman. The *Carlisle Examiner* says that the fact was suspected during life by reason of voice, stature, and beardless face, but that Dr. Barry was very haughty and bold, having given more than one challenge to a duel.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

OCTOBER 7.

The Austrian Commodore (now Rear-Admiral) Baron von Wullerstorff-Urbair has just been appointed Minister for Commerce. This gallant officer will no doubt be known to many of your readers in the Far East when he commanded the "Novara expedition," of which he has written such a highly interesting description. This is the first time that he has ever accepted a civil appointment, and from the zeal and energy with which he in that work has advocated the desirability of opening the Austrian trade to China and Japan, there is every reason to expect that one of his first official acts will be to take earnest steps to conclude commercial treaties with those empires.

A correspondent of the Russian *Northern Post*, admitting that the fair at Nijni Novgorod has been a bad one this year, proceeds to investigate the question whether the fair is in a chronic state of annual degeneracy, or whether the calmness which prevails is only attributable to local and transitory causes. He arrives at the conclusion that it is owing to the latter, and states that people most intimately acquainted with the condition of the fair for many years all agree with him in ascribing the present dulness to the numerous changes and reorganisations going on in the interior of the empire, and cannot be placed to the account of the extension of the railway system, as by far the greater part of the bulky goods are brought by water.

The new Siberian journal called the *East Coast*, published at Nicolayefsk, at the mouth of the Amoor, complains bitterly of the dearness of provisions and other necessaries of life in that town, giving the following quotations:—Butcher's meat, 8 to 9 Roubles per pood of 40 lbs.; butter, 13 Rs.; wheat flour, 5 Rs. 50 cop.; rye flour, 2 Rs. 10 cop.; buckwheat groats, 3 Rs.; pearl barley, 2 Rs. 40 cop.; wax candles, 22 Rs.; stearine do., 11 Rs.; fresh sturgeon, 12 Rs.; a bottle of milk costs 20 copecks, and ten eggs 30 copecks.

The Prussian steam-corvette *Vineta*, of 20 guns, is ordered to proceed forthwith to the China and Japan waters, where she will remain for some time on the station. She is now fitting out for that purpose at Kiel, and will probably sail in the course of this month, proceeding, however, not direct, as she is under orders to go, in the first place, to the Brazils, where her presence may be required for some little time for the protection of the Germans there.

Mr. Ludwig Wiese, having resigned his appointment as Vice-Consul for the King of Sweden and Norway at Victoria, Hong Kong, his resignation has been accepted by rescript dated Stockholm, the 19th of September last.

Another flagrant case of piracy in the Far East, by which the Hamburg underwriters are again partial losers, has come to light since last mail, and made a painful sensation here. Captain Fuchs, of the Prussian ship *Fuchs*, of Stettin, in a letter dated Amoy, July 27, reports as follows:—

"On the 24th of May last I left Ningpo, and, to cut off a long distance, went through the Kin-tang Channel, which leads into the Foto Channel, but with an 8-knot breeze it was not possible to make head against the current, which was so strong as sometimes to turn the ship round and round, as in an eddy. However, I got through between the islands of Dumb and Deadman. On the 29th I anchored off the island of Tagasan. For fear of the pirates which swarm on this coast I had loaded my two guns, and my ten muskets, though a common trading junk carries six, and pirates twenty and more, chiefly 18-pounders; I therefore run out four wooden dummies. In the morning a fisherman came on board to offer me fish for sale, and he appeared to look attentively at the dummies. I sent him away, and heard him laugh derisively. I then got under weight and, as the wind was light, the ship was carried away by the strong ebb and flood tide alternately. When between the Elephant Island and Ketow North Point, fourteen junks hove in sight, bore down on the ship and fired, dividing their forces so as to surround me. Fortunately their balls took no effect, as these pirates are bad gunners. I reserved my fire till three of the junks had approached pretty near, and their guns had demolished my bulwarks. Both of my balls took effect, the first junk losing her mainmast, which, in falling, crushed some of her crew; the second made a hole in another of the junks just above the water line: my muskets also caused some confuson and loss. Notwithstanding this they tried to board me; but we managed with our muskets to pick off the men at the guns, and thus prevent their firing, while the more distant junks were unable to fire without hitting their consorts. We now fired with canister, and my men cheered loudly as their shots told. One of the pirates managed to get under our stern, where only one man was stationed, armed with a revolver. He let go the wheel and ran down into the powder-room, returning immediately with a tin case, half full of musket cartridges. Having put in some lighted tinder, he tossed the case on to the deck of the pirate, where it exploded immediately, and set fire to the tinder of their own guns, which were loaded with canister. These went off, demolishing the masts of several other junks. The Chinese, probably thinking that this fire proceeded from my ship, were greatly disconcerted, and made off, we continuing to send canister after them on their retreat. The mate, Peters, was wounded in the leg by a ball. The *Fuchs* then continued to drift with the tide for two days, when a breeze sprung up which enabled us to reach an anchorage."

A correspondent of the *Daily News* writes:—

The Senate of Hamburg has just laid before the Burgerschaft, for their consent and ratification, a contract lately concluded with the Submarine Telegraph Company in London for a new submarine line from the east coast of England to Cuxhaven, at the mouth of the Elbe, for which a concession has been granted for ten years. The company is bound to put up two wires between London and the coast of Norfolk, and thence by submarine cable to Heligoland, with a branch line to Cuxhaven, passing through the little outlying island of Neuwerk, at the mouth of the Elbe, and belonging to Hamburg; whilst Hamburg engages on her part to put up two wires along the banks of the Elbe, to form a junction at Cuxhaven. Both contracting parties bind themselves to accomplish their several engagements within twelve months from the date of the exchange of the ratifications, and to keep the lines in good working order during the whole period of the concession. For the present there will be no alteration in the charge for telegrams, which remain as those forwarded between Hamburg and London by the other existing routes; but should any of the competing companies at a subsequent period reduce their tariff, the charge for telegrams by the direct route will also be moderated to the same scale. On all telegrams forwarded by this new line Hamburg is to receive eight silver groschens, or tenpence for each, and if the number of telegrams amount to more than 40,000 in any one year, the company are to be reimbursed two silver groschens, or threepence for each. Hamburg further promises to prolong the concession for another term of ten years at the expiration of the present agreement, provided the existing convention with Hanover be renewed. The contract was signed in London on the 2nd of July last, by Mr. Syndicus Merck, on the part of Hamburg; and Mr. George von Bunsen, on the part of the Submarine Telegraph Company, but as the Burgerschaft has only now met after the summer recess, it could not be brought forward for ratification at an earlier period.

P.S.—I have just ascertained that it is not Admiral Wullerstorff, but his brother.

COMMERCIAL.

Coffee.—There is a continued good demand both for consumption and shipment to the United States, to which large quantities are still sent by almost every vessel. About 5,000 bags have also been taken on speculation, and the market closes very firm, to which the destruction of 15,000 bags by fire in a large stack of warehouses at Altona may have somewhat tended, it being the practice of the Hamburg merchants to store a great part of their coffee and some other articles in the adjoining town, where certain municipal charges are lower than here. Since the departure of last mail the sales of the fortnight amounted to 43,000 bags. The imports of this year to the end of September were 84,700,000 lbs., against 52,500,000 in the same period of last year, and 71,400,000 in 1863. The present stock is 24,000,000 lbs., against 7,500,000 last year, and 18,500,000 lbs. in 1863.

Sugar.—Raw firm and 4 Sch. Bco. higher, which advance is well supported. The small stock precludes any extensive operations. Among the sales were 1,000 bags yellow E. I. and 700 Kranjangs of Batavia. Refined firm, sales of the fortnight 30,000 loaves.

Rice.—Market steady with limited demand; 2,700 bags of mid. to fine Java were sold at a high figure.

Spices.—Very extensive purchases have been made of Cassia lignea for shipment and the demand still continues, in consequence of which the price has risen very considerably, and nothing is now to be had under 11 Sch. Bco., whilst the stock is nearly cleared off. Ginger is again in favour, and 389 chests of Cochin just arrived found a ready sale. More demand for Mace and Cloves. Pepper steady.

Tea.—About 500 chests of Congou, Souchong and Pecco sold at full prices. A demand for Oolong has sprung up for the United States, but the orders cannot be executed for want of stock. Ord. and good Ord. Congou continue in favour, and not be had under 11 Sch. Bco. A large parcel of good mid. Kaisow Congou has been taken for shipment. Some small lots of Kaisow and Pak Ling Congou sold at 40 to 48 Sch. Bco.; they are of the new crop, and have a strong aromatic smell. There is still a good demand for Pecco and Souchong for the North of Europe.

Spelter.—Better accounts from America were neutralised in their effect on this market by dull advices from other European places, and the article is calm, with a downward tendency. After a few sales had been made at 14.5, the next day 1,000 centners in loco were taken at 14.2. and 2,000 centners for delivery in December at the same figure. The imports of this metal in September were 45,000 centners. The total imports of this year to this date were 232,000 centners, against 417,000 last year. The present stock is 15,000 centners, against 24,000 in 1864.

Money scarce and discount risen to 6¾ per cent.

Shipping.—Sailed.—Oct. 1, Melissa to Singapore.

Loading.—Mauritius, for Singapore; Fidelio, for Hong Kong; Garland ditto; Colima, Macassar and Hong Kong; Catharina, Shanghae.

FREIGHTS AND CHARTERS.

Notwithstanding the recent numerous arrivals from the East, the export market continues firm, and but little difficulty has been experienced in placing ships for the outward voyage. Coal freights, however, are somewhat easier, and show a downward tendency.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 35s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £40 to £42 and £1. 19s. to £2. For Shanghai: £50 and £2. 5s. For Manila: 33s. to 35s. For Batavia: £26. 10s. and 27s. For Singapore: £31 and 29s. For Galle: £27 and 25s. to 26s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

CASUALTIES.

The W. Cores de Vries (s.s.), from Rotterdam for Batavia, put into Ramsgate Oct. 11 with slight defect in machinery.

The Silver Cloud, from Singapore, arrived at Deal Oct. 12 with master dead.

MISCELLANEOUS.

The Admiralty have accepted the Isabella for the conveyance of troops to Colombo.

At Mauritius.—Aug. 29, from Hong Kong, H.M.S. Tamar, and sailed Sept. 2 for East London and England; 31, from Singapore, Jeanne Meyer, Loesewitz; Sept. 4, from Saigon, &c., Pionnier, Ducasse.

THE NORTH-CHINA INSURANCE COMPANY.

(Established 1st January, 1863.)

CAPITAL, Taels 1,250,000, IN 250 SHARES OF Taels 5,000 EACH.

Paid up Capital, Taels 1,000 per Share.

Directors.

L. G. DUNLOP, Esq. (Messrs. Birley, Worthington, and Co.), Chairman.

E. H. Lavers, Esq. (Messrs. Gilman and Co.).

Sol. D. Sassoon, Esq. (Messrs. David Sassoon, Sons, and Co.).

H. Howe Wiggins, Esq. (Manager Commercial Bank Corporation of India and the East).

David Reid, Esq. (Messrs. Reid and Co.)

The Company being about to be reorganised for a further term of three years, from 1st January, 1866, application for Shares will be received by the undersigned until 31st October current.

A certain number of Shares have been allotted to London, but further applications from there will be received until 30th November.

Application for Shares, from persons not resident in Shanghai, must be accompanied by Power of Attorney to their Agents, to sign the Deed of Settlement on their behalf, and generally to represent them in all matters connected with the Company.

By order of the Directors,

J. S. MACKINTOSH, Secretary.

Shanghai, July 12, 1865.

FORM OF APPLICATION FOR SHARES.

No.

To the Directors of the North-China Insurance Company.

Gentlemen,— hereby request you will allot to Shares in the above Company, and agree to accept such Shares, or any less number you may allot to ; and agree to pay the first call of Tls. 1,000 per Share, and all subsequent calls, and to subscribe the Deed of Settlement whenever required to do so.

Gentlemen,

Your obedient Servant.

Application for the Shares allotted to London must be made to—

ASHTON AND CO.,
AGENTS,
HATTON-COURT, THREADNEEDLE-STREET.

THE BANK OF HINDUSTAN, CHINA and JAPAN (Limited).

1, Bank-buildings, Lothbury, London.

Capital, £4,000,000.

Paid and to be called up, £1,000,000.

Bankers.

The Bank of England.

The National Bank | The Alliance Bank (Limited)

Branches and Agencies at Bombay, Calcutta, Colombo Kandy, Hong Kong, Shanghai, Yokohama, Singapore, Point de Galle, Manila, Foochow, Ningpo, Hankow, Nagasaki, and Kiu-kiang.

Deposits received at ten days' notice, on the usual terms and for fixed period, at rates subject to special agreement.

Drafts issued and Bills negotiated payable in India China, &c.

Circular Notes and Letters of Credit, payable throughout Europe, are also issued for the convenience of travellers per overland route.

The purchase and sale of Indian and other securities, and the safe custody of the same undertaken. Dividends, pay, pensions, interest, or other moneys realised, and the registry of Indian Government loan notes effected so that the interest may be paid in England. Every other description of Banking and Agency business in connection with India, China, &c., conducted on the most favourable terms.

J. OUSELEY, General Manager.

Hong Kong, Jan. 1, 1864.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

ASIATIC BANKING CORPORATION.—

Incorporated by Royal Charter. Authorised Capital, £2,000,000. Paid-up Capital, £500,000.

Head Office—No. 4, Lombard-street.

Agencies and Branches are established at Bombay, Calcutta, Singapore, Ceylon, Hong Kong, Shanghai, and Melbourne.

The Corporation grant drafts and negotiate bills of exchange payable at the above places, issue letters of credit, and conduct every description of banking business connected with the East. They effect the purchase and sale of Indian securities, the receipt of dividends, &c. and undertake the safe custody of securities. They also receive deposits, bearing interest, for fixed periods. Rates of interest and exchange may be ascertained at the Head Office.

69, COLEMAN-STREET, CITY, and 21, DUKE-STREET, EDINBURGH.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had received a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, in all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot of 12, RUE RICHER, PARIS.

Sold Retail.—London: Jozeau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danilowich Malta: Dr. Pirotti, Bugeja, Magri, and Rolando, Esperanza. JOHN GOSNELL and Co.'s Stereodesmic or Dentists, Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S PILLS and OINTMENT.—BILIOUS DYSPEPSIA.—There is no organ in the human body so liable to derangement as the liver. Food, fatigue, climate, and anxiety all disorder its action and render its secretion—the bile—more or less depraved, superabundant, or scanty. The first symptoms should receive attention. A pain in the side or the top of the shoulder, a harsh cough and difficulty of breathing, are signs of liver disease, which are removed without delay by friction with Holloway's inestimable Ointment. The Pills should also be taken early. For all diseases of this vital organ the action of these conjoined remedies is a specific by checking the over supply of bile, regulating its secretion and giving nervous tone.

The French mail, with ten days later news, is due on the 5th November.

List of Passengers.

PASSENGERS INWARD.

By this mail, per P. and O. Company's steamer, Delta, arrived at Marseilles Oct. 26.—From Yokohama: Col. Suther. From Shanghai: Messrs. Webster and Beveridge. From Hong Kong: Messrs. Jenny and Woodward.

To Southampton, per Tanjore, expected to arrive Nov. 2.—From Yokohama: Mrs. Winchester, Mrs. Jacquerent, Mrs. Alliwand. From Singapore: Capt. Cox. To Malta.—From Hong Kong: One 2nd class passenger. To Gibraltar: One 2nd class passenger.

PASSENGERS OUTWARD.

Per P. and O. steamer Syria, from Southampton, Oct. 20.—To Shanghai: Miss Reynell and one second-class passenger. To Hong Kong: Mr. and Mrs. Hermann, infant, and European servant, Dr. Knife, Lieut. Luard, R.N., Captain E. B. Chase, and one second-class passenger. To Ceylon: Mr. R. Massie, Lady Chichester, and European servant, Mr. and Mrs. Wright and two children. To Calcutta: Messrs. G. O. Beeby, and A. Gordon, Mrs. Waddington, Miss McKenzie and native servant, Mrs. Tierney and infant, Mrs. Harrington, Surgeon and Mrs. Barnard, two children, and European servant, Mrs. Colonel Nicolls, two children, and European servant, Messrs. J. C. and W. Martin, Low and Odling, Mrs. Mallock, infant, and European servant, Miss Brook, Mr. A. Tween, Mrs. Spilbury, Miss Whishaw, Messrs. A. Broadfoot and H. St. G. Tucker, Miss Davis, Mr. H. B. Finlay, Mrs. Rogers, Mrs. Beadon, two children, and European servant, Major Peste, Mr. E. Taylor, Dr. Gardiner Miss G. Elliott, Mrs. and Miss Brown, Mr. and Mrs. Johnson, and eleven second-class passengers. To Madras: Miss Bliss, Mr. and Mrs. Sim, three children, and two servants, Miss Jacob, Colonel Shakespear, Major Stevenson, Mr. C. Jones, Staff Assistant-Surgeon Dunn, Colonel Goodes, European servant and child, two second-class passengers and one child. To Suez: Four second-class passengers. To Alexandria: Mr. F. Brown, Mrs. Hassanaine, three children, and female servant, Mr. Ameen, Mr. A. Carey, eleven second-class passengers, and one child.

From Marseilles, Oct. 28.—To Shanghai: Mrs. Herbert Hancock, two children, and European servant. To Hong Kong: Mr. T. A. Lane and Mr. D. Lapraik. To Singapore: Mr. Ginberg. To Calcutta: Messrs. C. P. Carmichael and Danby, Mrs. F. H. Smith and daughter, Mr. Apear, Miss Agabeg, Messrs. D. Cunliffe and L. S. Jackson, Major General and Mrs. Flemyng, Miss Flemyng, Mrs. C. Johnson, Mr. J. B. Street, Mr. and Mrs. Blackett, Lieut. Holdsworth, Mr. H. Dear, the Rev. Mr. and Mrs. Stone, Major and Mrs. Thelwall, Messrs. Sconce and Grant, Mrs. General Mactier and European servant, Mr. and Mrs. Griffiths, Mr. and Mrs. Shakespear and child, Miss Mackintosh, Messrs. Peacock, T. H. Drake, Wilkinson, H. Dean, W. Terrancan, W. Newton, Dampier, W. Bradbury, and six second-class passengers. To Madras: Miss Lawrenson. To Alexandria: Miss Marten, the Rev. H. Marten, Messrs. Wightman and P. Francis, Mrs. Hasclden and two infants, Miss Yearsley, and two female servants. From Suez.—To Shanghai: Mr. Halls. To Calcutta: Messrs. U. Gray and G. Steinthal.

Per P. and O. steamer Massilia, from Southampton, Oct. 27.—To Singapore via Bombay: Mr. and Mrs. J. E. Macdonald, Mr. and Mrs. F. D. Barnes, Mr. Watson. To Hong Kong via Bombay: Mr. J. B. Leslie, Mr. Sinnett, Mr. Mackintosh.

Per P. and O. steamer, from Southampton, 4th Nov.—To Hong Kong; Mr. M. Murray, Assistant Surgeon J. Fraser, R.N. To Singapore: Mr. and Mrs. H. O. Robinson, Mr. and Mrs. Lipscombe. To Ceylon: Mrs. Brotherton. From Marseilles, 12th Nov.—To Singapore: Mr. W. Alten, Mr. W. Paterson. To Hong Kong: Mr. F. Jerdein. To Shanghai: Mr. W. G. Howell, Mr. A. Campbell.

Per P. O and steamer, from Southampton, Nov. 12.—To Shanghai via Bombay: Mrs. Bennett and child. From Suez.—To Penang via Bombay: Mr. and Hasche.

Per P. and O. steamer, from Southampton, Nov. 20.—To Penang: Mrs. and Miss Mackay. To Ceylon: Miss Staples, Mr. Cone.

Per P. and O. steamer, from Southampton, Dec. 4.—To Shanghai: Miss M. A. Russell. To Hong Kong: Mr. R. C. Lambert and friend.

Summary of News from the Far East.

JAPAN.

The London mail of June 26 arrived out on the 17th August. The dates are now down to the 27th. Nothing definite is reported as to Sir Harry Parkes taking up his quarters at Yedo. We observed the following in a Hong Kong paper:—

"We learn from private letters that Sir Harry Parkes has notified the Gorogio (who, by the way, are already desperately tired of him) that he will, as soon as arrangements for his reception are completed, take up his residence at Yedo. The following characteristic anecdote is now going the round of the community at Yokohama:—'At an interview with some of the chief Ministers Sir Harry Parkes mentioned as a fact which might possibly interest the Gorogio, that he was about immediately to repair to Yedo. 'Oh,' said they, 'the thing is out of the question, it mustn't be thought of.' Sir Harry Parkes replied, with significant urbanity, 'I did not wish to trouble you for an expression of your opinion on this matter, I merely desired to intimate the fact.' The Gorogio have heard of the Canton war, and it probably does not tend to reassure them under the decisive tone adopted by the new Minister.

We observe that Sir Edmund Hornby had paid a visit to Japan, returning to Shanghai by the mail steamer *Cadiz*.

The following notifications have been issued:—

The undersigned having this day received instructions from Sir Harry S. Parkes, K.C.B., Her Britannic Majesty's Envoy Extraordinary, Minister Plenipotentiary and Consul General for Japan, to affix and exhibit in the public office of this Consulate the Order of Her Majesty in Council, dated the 9th day of March, 1865, for the establishment of a Supreme Court for China and Japan, and also to make known by public notification throughout this Consular District of Kanagawa that the said Order in Council is affixed and exhibited, as aforesaid; and the undersigned having also received notice from C. A. Winchester, Esq., Her Majesty's Consul at Shanghai, that the said Order in Council was duly published in Shanghai on the fourth day of the present month of August, in the manner provided by the said Order.

The undersigned has accordingly to notify to all subjects of Her Britannic Majesty within this Consular district that the said Order in Council, and also the rules of procedure framed thereunder, are now conspicuously affixed and exhibited as above directed, and as provided by the 3rd clause of the 164th section of the said order, will come into effect in this Consular district on the fourth day of September next.—MARCUS FLOWERS, H.B.M.'s Acting Consul. British Consulate, 18th August, 1865.

With reference to the Notifications issued by her Majesty's Charge d'Affaires, and Acting Consul General, on the 22nd day of June last, making known the risks and penalties which would be incurred by British subjects in resorting to the neighbourhood of Simonoseki, for purposes of illicit trade, the undersigned has now to give notice to all subjects of her Britannic Majesty that he has been officially informed by the Government of the Tycoon that two Japanese ships of war have received orders to cruise in the neighbourhood of the Straits of Simonoseki, and to seize all foreign vessels which they may find engaged in unlawful trade, either in that neighbouhood, or in the Inland Sea.

(Signed) HARRY S. PARKES.

Her Britannic Majesty's Legation, Aug. 8th, 1865.

The regatta is pronounced a failure. The following is a list of the winning boats of the second day:—

10th Race—Entries returned.
11th Race—For Cook's Tubs. 1st Conqueror, 2nd Princess Royal.

The following account of a fire is from the *Japan Herald*:—A fire broke out in the kitchen of Messrs. Glover and Co.'s, Hong, situate immediately at the back and within 10 feet of the dwelling-house, which is built entirely of wood. The kitchen, with the suite of servants' rooms, &c., were fortunately built strongly of stone with a good tile roof, consequently, the fire being quickly discovered, and several engines on the spot within a few minutes, the supply of water from the sea being also at hand and of course unlimited, and plenty of willing hands to work the engines, the fire was extinguished in the course of half-an-hour, without even so much as scorching the dwelling-house. The smoke being perceptible to the ships, almost every man-of war, English and French, sent a boat's crew ashore to assist—and very valuable aid they rendered. Mr. Freeman, the captain of the fire brigade, was there early, and most energetic in the disposition of his force. A great many of the leading members of our community were quickly on the spot, and many worked with a vigour and skill unsurpassable; happily their efforts were thoroughly and very speedily crowned with success. Towards the close, and when all the engines had ceased working, a few Japanese officials made their appearance, but there was nothing further to do, only, had they been early they might have seen the advantage of good stone walls and powerful fire engines.

After the work was done Mr. Kingdon kindly directed a cask of bottled beer to be placed on the bund, that all who had laboured so well might refresh themselves, a boon that was taken advantage of by many. It is a subject for congratulation to Messrs. Harrison and Kingdon, who occupy the house together, that the damage was entirely confined to the building it broke out in. The origin of the fire is supposed to have been the overheating of the iron chimney flue, and the rafters of the roof igniting therefrom. We believe that the building was insured, so that inconvenience alone will be experienced.

The same journal also notices the sudden death of Mr. Schroyer as follows:—

The hand of death has once more snatched with its inexorable grasp a member from our midst. Suddenly, and almost in a moment, in a full meeting of landrenters, and after having made a very effective speech on the business of the meeting, he was taken with a fit, and although all flew to obtain water or other restoratives, and Dr. Hepburn immediately waited upon him, the spirit fled, and the chairman of the Municipal Council lay a corpse in the midst of that assembly. Raphael Schoyer was a man who, like all men of marked individuality, had both friends and foes, stronger in either case than other men; but in death all animosities cease, and we have only to look upon him as one of ourselves, who, whether for his own or public ends, acted with zeal in whatever he undertook. In the Municipal Council he took a most prominent part, and was the right spirit to assist in carrying it through its present crisis in a firm and unwavering course; and so far as this body was concerned, the community has lost one of its most useful members. The terrible news of his sudden decease rapidly spread through the settlement, and a general feeling of awe, and expressions of deep sorrow were everywhere prevalent. We can assure his widow and family that in their loss they meet with the most profound and universal sympathy, and that the many acts of generosity so often performed by him, and so little known at the time, his constant interest in all public matters, and his great usefulness in the settlement, will be remembered and spoken of long after generous minds have forgotten the differences of opinion that have existed between him and them.

A fire took place on board the P. and O. steamer *Cadiz*, damaging some 150 bales of silk

H.M.S. *Princess Royal* has arrived at Yokohama from Hong Kong. The other men-of-war in harbour are the *Rattler*, *Scylla*, *Argus*, *Leopard*, *Bouncer*, and *Kestrel*. H.M.S. *Conqueror* left for Hong Kong on the 24th August with the Royal Marines.

The Messageries Imperiales service to Yokohama commences on the 13th Sept., so that we shall in future have advices by the French mails arriving in London about the 5th of each month.

Yokohama was visited on the 9th August by one of the severest gales that it has experienced within the ken of foreign residents. The weather had been unsettled, with squalls of wind and rain during the preceding twenty-four hours, and at half-past 12 A.M. the gusts became more frequent and more heavy, the showers of rain poured down in a perfect deluge, and at length, about 3 A.M., the full strength of the storm displayed itself, continuing at its height until about 5. It then began to moderate, and by 9 o'clock had left the atmosphere pure and limpid, the sun shining brightly, and all nature looking as if such a terrible contention of its elements were impossible. But it left a trace behind in the evidences of its power in every portion of the town. Hardly a wooden tenement, or any building, shed, or fence that could feel its influence is left scatheless, whilst the bund which the day before was so largely used by promenaders, is now almost a wreck. From the French Hospital to the Old Hatoba, the whole of the coping stones are displaced, some thrown more than half way across the road. The sea at high water was actually over the bund, and washed the roadway in such a manner that scarcely any of it remains fit for its ordinary uses. At low water, the tide was as high as an ordinary full tide—the waves still breaking over the sea wall. Both Hatobos are much injured. The boats that broke adrift and came to grief are numberless, most of them being cast on the Kanagawa coast. Several ships dragged their anchors—the *Norfolk* and steamer *Jinkee* amongst the rest. The Swamp is as extraordinary a sight as any. The embankment, raised, as a preliminary, round the portion to be filled in, and which is three feet higher than the old Swamp concession, kept in the water, and it looked like a little sea. Some alarm was momentarily felt, through a portion of the new embankment giving way just at the back of Ottamatchi; but a number of coolies were speedily on the spot with bags of earth, and under the superintendence of several men in authority quickly removed any cause of anxiety. In the canal the boats on the davits and hauled taut to the blocks were actually floating in their slings, so high was the water. The damage done in the native town was very considerable, some houses being upset. The worst injury, however, is that done to the bund; and, unfortunately, the expense of its repair falls upon the municipality. Here is one of those exceptional events that are so likely to occur in this land of earthquakes and typhoons, and that demonstrate how ridiculously small is the 20 per cent. that the Japanese have given up to the municipality.

The following is a report of the meeting of landrenters at Yokohama, held at the British Consulate:—Mr. F. Hall was requested to take the chair, and Mr. Wilkin to act as Secretary. The Chairman called on Mr. Schoyer, as the chairman of the Municipal Council, to state the object for which they had met. Mr. Schoyer accordingly read the following written statement:—

The Municipal Council have thought it necessary to call a meeting of their constituents to lay before them the position they hold towards the Board of Consuls.

On the 9th of June the Municipal Council was organised by the adoption of a constitution and election of officers. On the 23rd of June the Municipal Council among other business passed what is known as the "Dog ordinance." This ordinance was in every particular the same that was circulated by Consuls, or, at any rate, some of the Consuls, the year previous; we all remember the lamentable results of neglecting to circulate in time an order to protect the citizens from rabid dogs. Having adopted the orders circulated by the Consuls without any material alteration, we conceived that the Consular Board would not hesitate to give it full effect; we were doomed to disappointment, for it met with the most determined opposition, not by the public (for they commenced by obeying the ordinance), but by some of the Consuls; this was soon known by the public, and it became a dead letter—in fact, it was suggested that any one killing a dog under the ordinance would be liable for damages. Rather than have our ordinance disregarded, we made a new ordinance which, as we supposed, would meet the views of the Consuls; to our surprise the next we see or hear of the "Dog ordinance" is in the *Japan Herald*, differing altogether from the ordinance passed by the Municipal Council, by a large majority of the members present, without first referring it back to us again. Subsequently, we submitted two ordinances to the Board of Consuls, one of these forbidding bettoes from riding horses through the settlement, and from exercising horses by leading them on the bund or on public thoroughfares not indicated for that purpose by the Police Committee. The ordinances were returned with marginal notes in pencil mark, striking out most of the important features of the ordinances.

I considered it my duty to lay these alterations before the Municipal Council, who thereupon passed the resolution to call this meeting of land-renters with a view to consult with them as to the course that it is ne-

Digitized by Google

cessary to pursue under the existing circumstances. Much will depend upon a moderate but firm action in this meeting; whilst we are willing to accord to Consuls all due respect, we cannot consent to be made mere instruments to carry out their peculiar views at the expense of self-respect and all independence.

The Municipal Council has done much for the improvement and the government of the settlement, and would have accomplished much more if they had met with some encouragement from the Consuls. I have reason to know that their excellencies the English and French Ministers are desirous that the municipality shall be a success. It requires but a moderate concession on the part of the Consuls to make it such.

Mr. Macpherson moved that the charter signed by the Consuls be read to the meeting.

The Secretary read the charter.

Mr. Schoyer then rose and said:—"The Municipality had full knowledge that their powers must be limited, and with what difficulties they had to contend, but could they be assured of the co-operation of the Consuls, what might not be realised? Instead of being met in an open and friendly manner, and argued with, they were treated without any respect, like so many children. He was well aware there were certain difficulties which the Consuls could not get over, neither were they asked to grant full powers to the Council, because they could not, and the only way to achieve a successful Municipality was that suggested by Her Britannic Majesty's Acting Consul, viz, for each Consul to obtain a charter from his Government. But mutual concessions might be made—a respectful recognition of their authority, and a due return of courtesy, and something better than a total disregard of their ordinances. For instance 'the Dog ordinance' was simply a renewal of one issued' by nearly all of the Consuls last year (after a very distressing case had occurred), which had been acted upon; but now, when passed by a large majority in the Council, it was mutilated and published without any notice to them whatever. He particularly wished it to be understood that he did not refer to all the Consuls, for he knew that some were anxious to see the Council succeed. The 'Dog ordinance' was the turning point; it had been passed and published, obeyed and disobeyed, through Consular action. The Municipality cannot force Consuls, but the latter might at least have accorded to it the trifling concession required for that ordinance. The Council has not passed one ordinance stating any fines without leaving them to the Consuls to be fixed and imposed according to the laws of their respective countries. He (Mr. Schoyer) had consulted Consuls before submitting them to the Council, and altered them to suit their views. He would propose 'that a committee be appointed to wait upon the Consuls, and report the result to the land-renters.' By such a line of action, supported by the body of land-renters, the Council would have more force."

Mr. Macpherson thought that if the land-renters wished the Council to consider they should pass a vote of confidence. They had already placed every confidence in them, and there could be no use in the land-renters meeting again.

The Chairman inquired if the "Dog ordinance" was the only one then under discussion?

Mr. Schoyer replied it was not. Several ordinances had been passed; in one, a portion had been struck out, and another had been returned by the Consuls.

Mr. Kingdon said that, with reference to the ordinance returned, a memorandum had been written stating that Consuls had no power over Japanese, but that they would use their best influence with the Japanese local authorities.

Mr. Schoyer would inquire—if they have no power to conduct the affairs of the Settlement, what is their position? He denied *in toto* that they have no power. They had full powers over every indecent act, although no power to punish. "But," he added, warmly, "we will remove them, Sir, and take the responsibility. If Japanese are found obscene, or endangering the lives of others, the municipal police shall arrest and take them to the Consuls, or, if they prefer it, to the Japanese authorities themselves. Why should Consuls tell us that which a child might say? It is mere schoolboy talk. Our very nature gives us the right, or our position as land-renters gives the right, and it is sheer folly to talk in such a manner. Ladies within the last ten days have been insulted and their lives endangered by bettors' furiously riding, and I say it shall be put down. Obscenity to be tolerated, and in public places, too, where ladies are promenading with young children—the very bare idea is absurd; and for any Consul to say that we cannot prevent it, is a gross insult to our common sense."

Mr. Schoyer resumed his seat, and Mr. Kingdon rose to reply, when the meeting was startled by Mr. Schoyer apparently fainting. Great excitement naturally arose, Dr. Hepburn immediately presenting himself to give the benefit of his medical skill, and all very eager to do what they could—but it was of no avail. In a few minutes it was too apparent that Mr. Schoyer was dead.

NAGASAKI.

The Nagasaki correspondent of the *North China Herald*, writing under date of the 10th August, informs us that rice is daily becoming dearer at that port in consequence of the failure of the crops. The price has, in fact, doubled during the past six weeks. The bay is full of vessels, but trade is at a perfect standstill. One Robert Highat, who was a well known Confederate agent during the continuance of the war, and who lost his whole fortune in fitting up Confederate cruisers, lately visited Nagasagi, and while there committed suicide by drowning himself. An inquest has been held on his body, but we have not yet received the minutes.

The foreign residents, who seem to be the most good-humoured and fun-loving people in the Far East, gaily and gladly seized on the Fete Napoleon as a capital excuse for a day's jollification, and an equally capital opportunity of showing the cordiality which exists between the French and the other members of the community. We dare say the Emperor would scarcely believe that in a small, out of the way spot like Nagasaki, placed on the very confines of civilisation, so much could have been done in his honour. At 8 A.M. H.M.S. *Barrosa*, *Osprey*, and *Bustard* dressed ship, and their example was quickly followed by almost every other steamer and sailing vessel in the harbour. At 11 A.M. a *Te Deum* was sung in the Catholic Chapel, which was attended by the Consular body and the officers of the Royal Navy. After the religious ceremony a large number of officials and others were entertained at breakfast by M. Drury, Consul for France, and at noon the *Barrosa* fired a Royal salute, which was taken up by Messrs. Glover and Co.'s battery, and the French and English merchant-ships.

In the afternoon games were got up for the delectation of the natives. A greased pole surmounted by a package of new clothing was provided, and the attempts of the Japanese to seize the coveted prize produced, as was expected, much amusement. They had never before seen anything of the kind, and in consequence many were the falls and downward slides, until one, more fortunate or more active than his fellows, contrived to reach the top and carry off the bundle. M. Drury gave a ball in the evening at which no less than fourteen ladies were present. It passed off with much animation, and dancing was kept up until a late hour. Before the dancing commenced there was a grand disply of Chinese fire works and transparencies, obtained specially from Canton for the occasion. The French Consulate and several private residences in the settlement were brilliantly illuminated, and the streets presented a most festive aspect. M. Drury has on several occasions taken the lead in schemes of public enjoyment, but to this last effort he bent all his energies, and the result was well worthy of his taste and patriotic feeling. We look on the united action of a cosmopolitan community like that at Nagasaki as at all times most gratifying, whether the object of their endeavours be to obtain political advantages or merely to while away *ennui*. But the circumstances attending the celebration of this national *fete* are of especial importance, as they must lead the natives to consider that, so long as English guns are ready to do honour to the French Emperor, neither French nor English can with impunity be outraged while either nation supports a force in the Eastern waters.

CHINA.

SHANGHAI.

The London mail of 10th July arrived out on the 26th August. The French mail of 17th July arrived on 2nd September. The dates are down to the morning of the 4th.

We regret to observe the following notification, which looks like a severe blow to the employment of foreign tonnage by Chinese; not, however, we believe that it will have the working it is intended, the "tremble and obey" being now quite common to Chinese merchants, as a matter of form only.

Not having received a copy of the report of the Inspector of Customs, we subjoin the account which appeared in the *Recorder*:—

The report upon the trade of Hankow for the year 1864, by Mr. A. Macpherson, which is published, together with

Digitized by Google

those upon the trade of Shanghai and the other treaty ports, by order of the Inspector General of Customs, will doubtless be perused with the greatest interest. The future progress and prosperity of Shanghai must be intimately connected with the development of the trade at Hankow. In addition to this, the business conducted at Hankow is of a nature which peculiarly calls for attention. It is here that, even more than at the coast ports, the effects of competition between foreigners and natives can be observed, and where practical experience has put to flight many high-sounding theories respecting the advantages of the opening of new ports and the extension of trade. As is well observed by Mr. Macpherson, "the beneficial effects of opening fresh ports will always be more apparent in increasing the demand for imports than in reducing the price of exports." But in the trade with the smaller ports to which few shipments of imports come direct from home, the natives can always compete upon the most favourable terms with the foreigner, as they have not the same expensive establishments to maintain. A recognition of this fact has made foreigners of late more inclined to sell their goods upon the market in Shanghai than transship them to the out-ports; and many houses have found it impossible to maintain their establishments at those places. It thus appears that the advantages of being able to trade in the interior, upon which so much stress has been laid, would be very questionable. The goods sent by smaller craft, or steamers, from the large emporiums to which they are imported direct from home, would not be likely to be more profitable to foreign merchants in the interior than at the places of importation; and, as regards exports, the fact is incontrovertible that the farther foreigners have gone up the country to purchase the higher have been the prices they have had to pay. Upon the question of opening new ports we think that great misconception has generally existed. The removal of restrictions upon foreign trade at new ports has naturally increased the consumption of imports, but competition has, after a short time, invariably brought profits down to their ordinary level; and although merchants may at the onset have made large gains, it has soon become apparent that the rates were only temporarily enhanced. It is to be regretted that the outbreak of the American war makes it a matter of difficulty to ascertain with accuracy what is the probable quantity of cotton goods which could be taken by the new treaty ports at average rates; but that Tientsin and Hankow were altogether overstocked shortly after they were opened, there can be little doubt.

The truth seems to be that the extension of trading facilities results rather to the benefit of the producers and consumers on either side than to the middlemen, namely, the merchants. In England, the cotton manufacturers and tea-drinkers; in China, the wearers of cotton goods and growers of tea; but not necesarily the merchants who import and export those articles, are the people mainly benefited. The haste and competition on the part of foreigners in buying produce is noticed by Mr. Macpherson, who sums up his review of the trade of Hankow in the following words:—

> The two past years will hardly be regarded as bright ones in the commercial annals of the port. Miscellaneous articles of produce are principally Chinese owned, and tea has resulted in enormous losses, whilst the high prices, existing stocks, and disturbed state of the neighbouring districts, prevented any compensatory development of the import trade. Moreover, formidable opponents have arisen in the persons of Chinese, who forward foreign imports from Shanghai to Hankow, where, owing to their having no expensive establishments to maintain, they can undersell the foreign merchant. The facilities also offered by banks and certain commission houses, enable the Cantonese to compete with the foreigners in the tea market. Still, the extent to which the Chinese can carry their competition, either in imports or exports, is but limited. In the absence of unforeseen disasters, 1865 will doubtless be distinguished by an increased demand for piece goods and opium, and by a proportionate gain to the importers; and, if merchants will but display sufficient resolution in refusing to pay unreasonable prices for tea, the export trade will possibly be relatively profitable. The high prices offered so willingly by exporters have resulted in teamen paying proportionately high prices to the growers, and neither teamen nor growers will submit patiently to a reduction; but submit they must, as the retaining the tea in their hands will be productive of more loss and inconvenience to them, than the not purchasing it will be to the foreigner.

The Report by Mr. Macpherson is admirably made up, gives evidence of great accuracy and reflection, and is worthy of the careful perusal of all interested in the China trade.

NOTIFICATION.

Liu, Imperial Commissioner and Acting Governor of the province of Kiangsu, issues a proclamation:—

The employment by Fukien and Canton, merchants, of (foreign) sailing vessels to carry cargoes of oil and bean-cake, has thrown the (native) sea-going craft out of employment, and caused daily increasing misery and distress (amongst the junk owners). In consequenceof this the number of junks available will not be sufficient to convey next year's tribute (to Peking), and difficulties will inevitably arise. I am for this reason compelled to take the matter up. I have been informed that amongst those Fukien and Canton merchants, who employ (foreign) sailing vessels, the following houses are the most notorious, Te-sheng, Kuote-ve, Feng-hsing and Li-shui-chi. I now, by this proclamation, inform the heads of the Kuo-te-ye, and Li-shui-chi hongs, as well as all others whom it may concern, that they must for the future recollect that nothing is saved pecuniarily by the employment of foreign vessels, and that, therefore, they are to charter Chinese junks to the exclusion of all foreign ships. This course will be of great advantage (to the nation), by enabling the tribute to be carried next year. Moreover, a mere life adherence to this order will avail nothing towards aiding the important measure of founding the tribute. Should any disregard this regulation the full penalties will be enforced. Let all obey.

An official confirmation of the death of Burgevine has now been received by the Chinese authorities at this port. It appears that the Magistrate of Lan-ke-heen has reported through the Foutae of Chekiang to H. E. the Imperial Commissioner *Le* that a boat from Fuhkien, having on board Burgevine and Green (?), with an officer in charge, by name Ho-kwang-ae and ten soldiers, passed through his district; he increased the escort by the addition of some soldiers and official servants. On the 26th June, the boat arrived at a place called Hway tin tan, where the mountain torrents suddenly overflowed, and the winds and waters raged violently. The men were unable to bear up against them, and in a moment the boat was overturned, and the officer, the ten men, Burgevine and Green, thirteen in all, were drowned. Measures were taken to recover the bodies; an inquest was held, and they were placed in coffins and deposited in a T'ing fang [a temporary burial place above ground].

The British boat *Despatch* was lost in the Yang-tse, the wreck was sold for 27 taels, by Mr. P. Maclean. The steamer *Woosung*, sold by Mr. T. R. Wheelock, realised 10,050 tails.

With reference to the inquiry into the loss of the steamer *Wokee*, held at Her Britannic Majesty's Consulate at Shanghai, Sept. 1, the finding of the court was that the steamer struck on a ledge of rocks not marked in the latest charts; but in running through a narrow channel without having the lead going, nor a special look-out kept, showed want of precaution on the part of Captain Orkney. At the same time, in justice to the captain, the court expressed its sense of the ability displayed by him and the chief engineer after the vessel struck. The court had much pleasure in returning Captain Orkney's certificate.

The Nien-fei, who have been, as we stated a few mails ago, driven out of the Shantung province, are now in possession of Hu-seang, Che-ch'eng and Mamuche, three cities in the prefecture of Kuei-te, province of Honan. A Shantung man who arrived on the 24th ult. in Shanghai brought the important intelligence that the kingdom of I-li has been wrested from the hands of the Emperor of China by a son of the once celebrated Chang Kai-ur. Chang Kai-ur was a notorious Mahomedan leader, and was beheaded in the second year of Tao Kuang. I-li lies to the north and north-west of Thibet, from which it is separated by the Koulkun mountains. Its southern half is more familiarly known as Eastern Turkestan and Yarkand, and it contains the important district of Khoten. It has long been employed by the Tartar sovereigns as a place of banishment for political offenders. Its area is estimated at 265,000 square miles, or about four and a half times that of England and Wales.

The well-known steamer *Fire Dart*, which has for so long traded on the Shanghai and Ningpo line, has been sold for the sum of $65,000. She will for the future run between Hong Kong and Macao.

The following is from the *Recorder*:—

The question whether, according to the Treaty of Tientsin, British subjects are entitled to build and open houses in the interior has been brought before the notice of the public at the recent meeting of the Shanghai Chamber of Commerce. Mr. Dent, the Chairman, while admitting that the despatch received from the Home Government formed a reply to the arguments adduced by the Chamber, considers that an error was

Digitized by Google

committed by that body in omitting to call attention to Art. IX. which he thought conclusively established their view of the subject.

Much as we are desirous to see the rights of British merchants strenuously upheld by their representatives in the Chamber of Commerce, and while admitting that great credit is due to Mr. Dent for the energetic manner in which he had brought this matter forward, we cannot, upon due consideration of the circumstances of the case, conclude that the correct reading of the Treaty will admit of the constructions which he has put upon it. Mr. Dent states that, "unless it were permitted to open hongs this Article (IX) would become a dead letter, for traders or rather pedlars in the interior would be reduced to hawking about their goods, or allowing them to remain in boats exposed to the elements. This argument certainly appears to have some weight, but we think that the expression "purposes of trade," assumed to have a meaning which does not necessarily belong to it.

Whether such a privilege would be to the advantage of merchants themselves, we are much disposed to think that the benefits to be derived from this species of trade would be found to be very doubtful. The competition with the native, who without expensive establishments to maintain could conduct his trade upon much more favourable terms than the foreigner, would tend to bring profits on imports down to a minimum; while we would have to pay, as has always proved to be the case, more highly for exports, as we proceeded further into the interior.

FOO-CHOW.

Considerable dissatisfaction has been expressed at the British Consul for committing a pilot, named Robinson, to prison for one month under the following circumstances:—In consequence of the number of losses it was proposed to form a Board of Superintendence for Pilots. Mr. Robinson, an old hand of some twelve years' was notified by Mr. Wild to appear in Foochow, with a view to join the Board, which, it appears, he refused to do. Mr. Robinson tore the notification into two or three pieces, and his next notice was a warrant, issued by the British Consul for his arrest; but he, in a manly manner, appeared at the Consulate, where he was arrested by a constable, lodged in a small, ill-ventilated prison, bail refused for him, pens, ink, and paper denied him for communications with his friends but through iron gratings. He was tried and sentenced to one calendar month in Victoria gaol, his certificate taken from him for twelve months for contempt of court, or for tearing the said letter which was without Consul's signature or seal.

HONG KONG.

The following notice has been published by the *China Mail*:—It having recently transpired at a Magistrate's Court in Hong Kong that Chinese coolies, entrusted by their employers with the conveyance of correspondence to the Post-office, have been guilty of cutting off the postage stamps, and suppressing the letters, it is necessary that people at home should be advised of the fact, as they might otherwise be surprised at the non-receipt of their regular correspondence. The most stringent measures are being adopted to check the evil, and it is likely that delinquents hereafter detected in such a very grave misdemeanor will be most severely dealt with.

We observe that the six French ships have been chartered to convey coolies to Havanna, at £12 to £14 per man. We also see the *Spray of the Ocean* (British) is chartered to convey coolies at £7 to Tahiti to work at coffee and cotton plantations.

An elegant notice of the Chinese dinner of 15th July appears in the *Daily Press*, which we should only spoil if we attempted to summarise. It must be taken as a whole.

The French mail of 17th July arrived out on the 28th August. The following mail of the 26th was looked for, but our readers will see in our Singapore news that it did not go on until the mail of the 10th August arrived out per steamer *Barvoda*.

The following summary of items is from the *China Mail*:—

That the past week formed seven days of September, is saying quite enough, to those who know China, as to its healthiness or otherwise. Heat, sickness, and death have been the order of the days and nights, while people are comforting themselves solely on the fact that a change for better must soon take place. A sharp thunder-storm enlivened us on the evening of the 5th sharper than has been experienced for four years.

The Victoria Library and Reading Room, however, may be said to have been restored to life since our last issue, and, presupposing some activity and tact in its management, fairly "set on its feet" once again, we sincerely trust for a long race of prosperity. Its proprietary fixed, its attractions increased, and its management well seen to, nothing will be wanting to complete success.

Our own authorities here have earned considerable credit by a spirited notification anent the blame cast upon them in the loss of the steamer *Fohkien*, and effectually rebutted the charge against them upon the Naval Court of Shanghai who made it. A new steamer, the *Japan*, consigned to Messrs. Lapraik and Co., came in this morning, and is, we believe, to take the place of the lost *Chanticleer* on the coast line.

The value of the exports and imports during the month of July last, carried in and out of Macao in sea-going ships, amounted to $656,106; the exports being valued at $356,943, the imports at $299,166. The principal articles of import were—rice, $10,050; cotton, $3,640; cash, $20,229; opium, $206,560; silk, $34,300. The principal articles of exports were—rice, $17,247; tea, $49,165; cash, $36,400; canella, $33,540; anniseed, $28,430; anniseed oil, $25,000.

We are sorry to have to record the death of Madame van der Hoeven, the wife of the Consul-General of Holland in China, who for many years lived happily in Macao. Born in Batavia in the year 1836, she had just completed her 28th year. Married to Mr. van der Hoeven in 1857, she gave birth to six children, whom she has left at such a tender age that the eldest is not yet seven years old, the youngest only two months.

A melancholy and fatal accident occurred on Saturday last on the arrival of the *Plymouth Rock* at Canton, with a large number of native passengers, who were returning from a visit to Hong Kong during the late holidays. A boat, containing some five-and-twenty Chinese, was putting on shore, in the midst of the fierce confusion and jostling of the numberless sampans and cargo boats, which always crowd round the river steamer, long before they have arrived at their mooring-places and through some misadventure, got capsized, when seventeen of her passengers were drowned. It will be well if this catastrophe leads to the maintenance of a little more order among the crowding, struggling, shrieking boat people, who contrive to render hideous a stranger's first impressions of the Canton River.

The advertisement of the China Traders Marine Insurance Company will be found in our advertising columns.

The high provincial authorities have lately issued a proclamation to the people of Canton, prohibiting the sale of indecent books and pictures, and notably the exhibition of stereoscopic views of a similar character, with which for some time past the streets of the city have abounded.

COCHIN-CHINA.

A visit has been made by a party of Frenchmen to the magnificent ruins of Angcor, Trôm, in the province of Angcor, situate thirty miles from the lake Polysap, which feeds a branch of the Meicon, the great river of Cambodge. It is surmised that the lake formerly extended far inland, for no great centre of population would be established so far from its waters as are the existing ruins. Spacious gateways, vestibules, courts and magnificent galleries, presenting a combination of Saracenic and Arabic architecture were discovered, shadowed by the gloomy foliage of magnificent trees that had forced their way into the interstices of the massive masonry, and thus contributed to its preservation.

SIAM.

BANGKOK.

The following account of the unwarrantable conduct of the French Consul, or Envoy, is from the *Straits Times*. The remarks in another column on Siamese affairs were, of course, penned before the delivery of the mail this morning:—

"We have just heard of another escapade of the French Consul at Bangkok, Siam. It appears that a Catholic priest was pleading in one of the local courts of Siam, presided over by a Siamese judge, and had some words with a Siamese Catholic nobleman present, ending in mutual recrimination, when a scene ensued which ended in both being peremptorily ordered out of court. Deeming himself gravely insulted by the Siamese nobleman, the priest repaired to the French Consul, who so warmly espoused his cause that he despatched an agent to the Court of the First King, demanding an ample apology for the asserted insult, and requiring the instant dismissal of

Digitized by Google

the Siamese nobleman who had given it from the position which he held over the native Christians. So importunate was this agent to deliver his despatch that he forced himself into the Royal presence at 2 A.M. The King, deservedly annoyed at so untimely an interruption upon so trivial an occasion, reprimanded the messenger, and told him that the subject could not be considered till the following day. The messenger, however, who apparently shared the impetuosity of his master, demanded an instant reply, and had ultimately to be forced out of the palace. From the palace the messenger returned to his Consul and told the story of his expulsion, when that functionary wrote direct to the King that the friendship between France and Siam had been violated—that he should leave, be in Paris in six weeks, and there lay the matter before the Emperor. The good old King, thinking that there must surely be some misunderstanding in all this, despatched his own cousin, the Chief Judge of the Royal Court, to the French Consulate to receive and give an explanation. The Consul, it seems, however, had worked himself beyond all explanation; and when the Royal Judge arrived the Consul refused to listen to him, and seized him by the hair of his head, ejected him from the Consulate, and threw his betel box after him. M. Aubaret, the Consul referred to, has since left Siam, and we trust sincerely that on his arrival at Paris the Emperor will take another way of vindicating the dignity of his foreign embassies than that which M. Aubaret from his letter to the King of Siam appears to expect.

Our readers will be rather surprised at the following array of churches for the requirements of the community of Bangkok, native and foreign:—

Protestant Church; the services being conducted in turn by the different missionaries.

Chinese Church; Rev. W. Dean, D.D.; services held in the Chinese language only.

Congregational Church; Rev. D. B. Bradley; services held in Siamese only.

Presbyterian Church; Rev. S. Mattoon; services held in Siamese only. A large school is connected with the mission.

Union Church; Rev. C. J. Smith; services in Siamese and English.

Her Royal Highness Princess Phraong Chau Ambhon, the second daughter of the late Second King, on the third reign, being the elder sister of the late Prince Kumbhor, whose death was noticed not long since, died on the 2nd inst. at 6 A.M. at the Palace of her younger brother Phraong Chau Noadge. Her Highness was born in 1815, and has been ill of consumption about seven months.

James M. Hood, Esq., U.S. Consul, with Mrs. Hood, arrived in the steamer *Chow Phya* on the 9th Sept. The customary calls on the Siamese officials and the Consuls of the Treaty Powers were made on Monday, and he assumed the duties of his position on the 13th. Mr. Hood has received a most cordial welcome from all sources, and especially so from American citizens.

The iron steamer *Maggie Lauder* was successfully docked in the new dry dock belonging to the Bangkok Dock Company last week.

The subject of abolishing the soft worthless lead coin, and substituting a hard and valuable metal as copper, bronze or nikol, has engaged the attention of the Royal Mint authorities for some time. We hear that the Mint is to be enlarged. One part is to be devoted to coining gold and silver, and the other to copper, bronze or nikol coin, as may finally be decided. The general feeling appears to be in favour of bronze, rather than anything else. How soon the people will be furnished with the proposed new coin it is difficult to say. It is proposed to issue several varieties, representing one-sixteenth, ⅛, ¼ and ½ of a fuang, and will be called solots, ats, pi, and song pi.

JAVA.

The *Java Bode* of the 26th August has the following article on the expedition alluded to in our last:—"Contrary to what we informed our readers of (under reserve) in our last number, the troops destined for the expedition to Assahan are not yet gone. The unwilling population can now, before the expedition is there, be informed of our design by their friends at Singapore (for which the French mail, which left for Singapore this morning, offered an excellent opportunity), and, moreover, can prepare themselves to give us a good reception. It appears that we Dutchmen cannot make up our mind to expedite expeditions."

The same paper, on the 20th, gives us some further particulars:—'The troops for the expedition to Assahan, under command of Major Van Heems Kerr, were embarked this morning in twelve tongkangs, which were at once towed to the roads by the tug steamer *Tjitarum*, from whence the troops will be transferred to the war steamers *Amsterdam*, *Djambi*, and *Sindoro*, designed for this purpose. The troops are accompanied by their own band, and the colours of the 12th battalion."

From some articles in the *Oost Post* of 22nd and 26th August, it appears "that the unwillingness of the Sultan of Assahan is not the only reason of complaint the Dutch Government has; but that Assahan people have hoisted the English flag, and attacked a Kruis boat, which, however, by the intrepidity of the controleur, has held its ground."

The *Straits Times* says:—"The expedition has passed through the Straits on the way to the scene of action. No less than six steamers were signalled at the flagstaff, as coming in from the eastward, there were not apparently symbols enough to indicate the full number, but a telegraph signal to that effect was flown; these steamers constituted the expedition. We shall await with no small interest the result of this demonstration."

MALACCA STRAITS.

SINGAPORE.

The London mail of 10th August arrived out on the 12th September by the Peninsular and Oriental steamer *Baroda*, which vessel towed up from Penang the Company's steamer *Ottawa* in a disabled state, as reported in our last issue. The mails, passengers, &c., of 20th-26th July, per *Ottawa*, for China, &c., were conveyed on by the *Baroda*. The French mail of 17th August was hourly expected. The dates are down to the 20th Sept. The *Straits Times* says:—

"In local matters we have not much to report. The appearance of the town is rapidly improving from the addition of new and handsome buildings, and the municipal commissioners have resolved to widen some of our narrowest thoroughfares. A steamer was launched from the building yard of Messrs. Buyers and Riach during the fortnight, adding one to the already pretty extensive list of steamers that have been built at Singapore. The Court, and establishment, returned a few days ago from Malacca, where it had been on circuit. The Governor still continues at Penang. By the present mail, the settlement loses an able and devoted servant, Captain McNair, R.A., Executive Engineer, who has worked himself ill in the public service, and of whose services we have more to say when he is gone."

(To the Editor of the *Singapore Daily Times.*)

DEAR SIR,—"Redde Cæsari quæ sunt Cæsaris." During the past months, some improvementi n the administration of the French in Cochin-China seems to have taken place; a civil tribunal has been established, the regulations of justice have been published, some reduction in the taxes have been made. The last numbers of the *Courrier de Saigon* instead of being a bitter polemic against civilians, contains interesting notices about the country and its productions; an exhibition will take place in a few months. There is no question any more of the ex-official principles exposed in the pamphlet of 1864: "Voies et moyens de la politique Française."

There are still in the commercial news some very amusing mistakes, and the sale of the last opium farm is not easily to be forgotten; but they may be considered as the last reflects of an old system which is to be carried away.

Unhappily, the name of the new Governer in the official acts is always followed by two italic letters, *p. i.*

P. I. is the abbreviation of *per interim*, and till this day the accomplishment of its signification is expected with some terror.

P. I. is the thin thread to which is suspended the sword of Damocles.

But now, a new perspective is opened, if, as we may believe, the following report has some consistence. A rumour was circulated in Paris at the departure of the last mail that the Vice-Admiral Bouet Vailaumez being elevated to the rank of Senator, Rear-Admiral de la Grandiere will have the command in the Mediterranean sea of the same fleet, and therefore will be promoted to the grade of Vice-Admiral.

Then there is some ground to believe that Rear-Admiral Roze will for two years assume the heavy charge of managing a French colony. The game is interesting; for the beginning seems to give some inducement that he will be more successful than his predecessors.—Yours, &c.

Singapore, 16th September, 1865. FIGARO.

A meeting of the Chamber of Commerce was called together shortly after the departure of the last mail, with a view to raise some fresh agitation on the subject of the transfer of the settlement to the Crown. Nothing, however was done, as it was conceded that the question was a public one—not a mercantile one—affecting the entire mercantile community equally with the merchants. Nor was it afterwards thought expedient to have any general meeting of the residents on the subject; and as the measure is believed to be in point *of* fact accomplished—awaiting only the formal sanction of Parliament—any fresh agitation now would probably be useless. As we have repeatedly brought before the notice of our readers at home, the early accomplishment of the transfer of the settlement to the Crown has become more than expedient merely

Digitized by Google

we are now, and have been for the last three years, entirely excluded from Indian legislation, in anticipation of the coming change, and, consequently, suffer all the evil consequences of neglect. The sooner in the next session, therefore, the Bill to effect this end is introduced the better.

The Dutch continue to push their way on the West Coast of Sumatra with their characteristic persistency. It will be remembered that in one of our recent numbers we reported that at Assahan the native Rajah had declined to have any intercourse with an expedition which was despatched from Rhio to amend political relations between the Dutch and himself, and that he indicated his disinclination in a somewhat vigorous manner, firing upon the expedition whenever they attempted a landing; so successful was he, too, that he carried his point, and drove the Dutch for the time out of his waters. Though we cannot but admire such a gallant resistance as this by a native Prince in what he believes to be the legitimate defence of his native country against invidious attack, we must at the same time pity it, as against a European opponent it must in all cases be unavailing, and only hasten the brave man's ruin. The Dutch were not likely to rest quietly, or to rest long under such a repulse. Immediate measures were taken at Batavia to equip a fleet and a force to chastise the Rajah's contumacy; and this passed Singapore on its way to Assahan on the 9th inst. It consisted of six war steamers and about 600 European soldiers, besides the ships' crews and marines. We have not yet had any reports as to the operations of this formidable expedition; but we can have very little doubt of the ultimate result of this difference, namely, a large accession to Dutch territory on the West Coast of Sumatra.

Notice has been given that a further hearing in the matter of the insolvency of Messrs. D'Almeida and Sons would be heard on the 28th February, when a dividend would be declared.

It is reported that gold has been discovered in the hill from which the Tanjong Paggar Dock Company are making their excavations.

It is reported that a company of the 14th brigade, Royal Artillery (Bombay), are ordered for duty at Singapore.

We (*Free Press*) understand that an arrangement has been come to between the firm of Messrs. B. H. Cama and Co. and their creditors here which will temporarily, at all events, relieve the estate from the expenses of litigation which it has lately incurred to some extent. The claims of Messrs. Oxford and Co., of the Bank of India, of the Oriental Bank, and of the Bank of Hindustan, amounting in all to about $150,000, became preferential because the proceedings for their recovery, having been early initiated, had reached a point which placed them beyond the reach of the assignment made in Bombay for the general benefit of the creditors. These are to be paid in full out of the money paid into the Supreme Court of this colony, as proceeds of the estate. All other claims have to await the settlement of the legal question as to the validity in this colony of the deed of assignment made in Bombay. Meanwhile none of the household property nor other effects are to be sold at auction; firstly, because in these hard times a sacrifice would be involved in such a mode of realisation; and secondly, because there are tangible hopes entertained of the estate clearing itself by the liquidation in full of all claims upon it. The state of the law here is most impracticable; the litigation in Hong Kong in relation to this estate is a positive disgrace to British jurisprudence. Our ordinances may be good in theory, but they will not stand the strain of practice.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

HEINSEN—At Shanghai, Mrs. R. Heinsen of a son, prematurely.

TYERS—On the 18th Aug., at Shanghai, China, the wife of William T. Tyers, Esq., of a son.

WOOLLETT—On the 14th Oct., the wife of William Woollett, Esq., of 2, Grove-place, Brixton, of a son.

MARRIAGES.

GASKELL—SADGROVE.—On the 25th Oct., at Holy Trinity Church, Lee, Kent, by the Rev. T. D. Halsted, incumbent of St. Paul's, Greenwich, assisted by the Rev. S. W. Burke, incumbent of Holy Trinity, Richard Allanson Gaskell, Esq., of St. Helen's, Lancashire, to Julia Alice, only daughter of W. H. Sadgrove, Esq., of 64, Mark-lane, London, and Greenwich. No cards.

LEDGER—TAYLER.—On the 23rd Oct., at St. Mary's, Islington, Edward, only son of Mr. Frederic Ledger, proprietor of the Era newspaper, to Marion Aldis, younger daughter of Mr. William Henry Tayler, of St. Paul's-road, Camden-town. No cards.

THOMSON—PAGE.—On the 6th Sept., at St. Andrew's, Singapore, by the Rev. Edward S. Venn, M.A., William Thompson, Esq., of Singapore, to Fanny, second daughter of Henry T. Page, Esq., of Stainsby House, Stainsby-road, London. No cards.

DEATHS.

ALBERT—On the 4th Sept., on board the Behar, on her passage from China, Christopher Albert, Master R.N., of the Pelorus.

ALLAN—On the 4th Sept., at Penang, Harriet Scott, aged 16 months, the infant daughter of John Allan, Esq.

ALLEN—At Shanghai, on the 29th Aug., Herbert Maury, infant son of Rev. Mr. and Mrs. Allen.

AYRES—At Shanghai, on the 30th Aug., on board the steamer Mercury, Mr. Ayres chief mate.

BEATTIE—At Hong Kong, on 29th Aug., Margaret Beattie, aged 23 years

BROWN—At St. Francis Hospital, Hong Kong, on 26th Aug., Annie Louisa Brown, aged 11 months

BRONSON.—Drowned at Newchwang, Mr. Bronson, pilot at that port.

COGHILL—At Shanghai on the 31st Aug., Donald Mackay, aged four months, only son of J. G. Sinclair Coghill, M.D.

CONNOR—On the 19th Oct., at 7, Alexandra Villas, Angell-park, Brixton, in his 15th year, of typhoid fever, W. W. C. Connor, son of the late W. Connor, Esq., one of H.B.M.'s Vice-Consuls in China.

CUTHBERTSON.—At Shanghai, on the 21st August, James Cuthbertson, Manager of the Asiatic Banking Corporation, aged 38.

GEM.—At Shanghai, on the 22nd August, Kate, wife of Robert Gem, aged 32 years.

HACKETT—On the 19th Aug. last, on board H.M.'s ship Tamar, on her homeward passage from Singapore, the Rev. William Hackett, late Military Chaplain at Malacca, leaving a widow and four young children to deplore his loss.

HALE—On the 5th Sept., on board the P. and O. S. N. Co.'s ship, Behar, on his way home invalided, Lieut. Henry George Hale R.N., late in command of H.M.'s gunboat Wensel, in China.

HALL—At Shanghai, on the 26th Aug., Joseph Hall, of the P. and O. S. N. Co.'s service, aged 32 years.

HODGSON—On the 11th Oct., at Lescar, near Pau, France, Christopher Pemberton Hodgson, Esq., formerly H.B.M.'s Consul at Hakodadi, Japan, aged 46

HUMPHREYS—At Shanghai, on the 2nd Sept., at the residence of J. Andrews, Wheelock, Jane Humphries, aged 38 years, late of New York.

JACKSON—At the Civil Hospital, Hong Kong, on the 28th Aug., W. Jackson, unemployed seaman.

KAHLER.—At Hong Kong, on the 28th Aug., Robert Kahler, clerk, Wm. Pustau and Co.'s, aged 24 years.

KINGSMILL—At Kingsclere, Hong Kong, on the 1st Sept., Fanny, the wife of Henry Kingsmill, barrister; deeply regretted.

LYONS—At St. Francis Hospital, Hong Kong, on 27th Aug., Amelia Lyons, aged 1 year and 9 months.

LYSTER—On the 17th Aug., on board H.M.'s troop steamer Tamar, Lieut. Lyster, Royal Engineers (three years in China).

McKINNON—At Shanghai, on the 3rd Sept., John McKinnon, a native of Ayrshire Scotland, aged 36 years.

MORTON—At St. Francis Hospital, Hong Kong, on 27th Aug., William Morton, aged 1 year and 3 months.

MORTON—At St. Francis Hospital, Hong Kong, on the 5th Sept., Sarah Morton, aged 4 years and 11 months.

MURPHY—At Shanghai, on the 23rd Aug., Ellen, wife of M. W. Murphy.

MUNRO.—At Shanghai, on the 24th August, Capt. D. G. Munro, late of the P. and O. S. N. Co.'s service, aged 51 years.

NEALE.—On the 30th August, at Hong Kong, Thomas D. Neale, of Bradford, Wilts, of fever.

PARTRIDGE.—At Shanghai, on the 25th August, on board Messrs. Jardine, Matheson and Co.'s receiving ship Lady Hayes, of cholera, after a few hours' illness only, Walter, youngest son of Captain and Mrs. Partridge, aged two years and two months.

PAULY—At Saigon, on the 3rd Aug., Wm. Otto Pauly.

PICOT—Drowned, on the night of 12th Aug., at 1.45 A.M., in lat. 14.34 N., lon. 112 54 E., on board the British ship Prince Alfred, bound from London to Shanghai, Mr. Picot, cabin passenger.

POYER—At Hong Kong, on the 3rd Sept., John Poyer, late chief officer, ship Zephyr, aged 26 years.

PROCTOR—At Hong Kong, on the 1st Sept., Arthur George Proctor, of London, aged 26 years.

RALPHS—At the General Hospital, Hong Kong, on the 5th Sept., W. Ralphs, Private, 2nd Batt., 11th Regiment, aged 28 years.

SCHOYER—On the 21st Aug., at the British Consulate, Yokohama, Japan, suddenly, of apoplexy, Raphael Schoyer, Esq., a native of Baltimore, Maryland, U.S., and late of Francisco, California, aged 55 years.

STEWART—On the 24th Oct., at Somerset Villa, Granville-road, Southfields, Wandsworth Francis Stewart, formerly of 6, Old Bond-street.

SULLIVAN—At the General Hospital, Hong Kong, on the 30th Aug., John Sullivan, Serjeant 2nd Batt., 9th Regiment, aged 36 years.

SWEENEY—At Shanghai, on 28th Aug., from the effects of an injury received on board the steamer Hercules, Capt. John Sweeney, a native of Westchester, New York, aged 40 years.

WAINWRIGHT—At Shanghai, on the 30th Aug., Mary D. Wainwright, wife of James E. Wainwright, of San Francisco, California.

WATSON—At Yokohama, on the 24th Aug., suddenly, David O. Watson, son of the late David Watson, surgeon, Royal Navy.

WRIGHT.—On the 21st August, of typhoid fever, Stephen Wright, Chief Officer of the British barque "Ethel."

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months sight.	4s. 7¼d.	4s. 8d. to 4s. 8¼d.
At Shanghai (per Tael.)	6 ditto	6s. 1¼d.	6s. 2d. to 6s. 3d.

At Manila	6 ditto	4s. 1d. to 4s. 2d.	4s. 2d. to 4s. 3d

At Shanghai, Bills on India, Rs. 297 to 298 per 100 taels. At Hong Kong, Rs. 216 per $100. Bar Silver at Shanghai, 111 taels; at Hong Kong, 10 per cent. prem. Mexican dollars at Shanghai, taels 73 per 100, and Exchange on Hong Kong, 26 to 27 discount. Hong Kong and Shanghai Bank, 6 prem.; Gas Company, 30 prem.; Hong Kong and Whampoa Docks, 40 prem.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—The amount of the season's export will entirely depend on the extent of the supply, unless the banks should see occasion to curtail the facilities they now afford. The Black Teas, both this season and last, have been shipped off as speedily as they could be secured, and as this season's export displays a deficiency when compared with last, it may be inferred, as comparative stocks are also smaller, that this year's yield will run short of that of last year. At Foochow the rates for Black Teas have sensibly advanced, whilst at the other ports they have not yielded even to the deterioration of assortment consequent on the season advancing. The usual supply of Green Teas will not be sent to Kiukiang this year—about half will go there; the remainder are being sent to Ningpo and Shanghai. Some settlements of new Greens have taken place at the latter port at high rates.

CANTON.—During the fortnight a steady business has been transacted, and the most noticeable feature has been the anxiety evinced by teamen to place their Scented Teas, especially Capers; their stock being large

Digitized by Google

and demand becoming very limited. Country Congous: Three chops have been taken at slightly stronger rates than former settlements, say at 26 to 29 taels; for the remaining 9 chops, now on our market, teamen are firm. Country Greens: 2,750 half chests have found buyers during the fortnight for the American market, proportion price ranging from 32 to to 36 taels; these rates are also rather higher than previous settlements. Present stock is 6,250 half-chests, and the new crop may be expected in about two months. Canton Made Teas: A few Fayshans have been bought at about former rates, say 400 half-chests and 800 boxes at 22 to 31½ taels. Scented Teas: For medium and commoner classes of both Scented Orange Pekoes and Capers prices are quoted down about three taels, but for the choice parcels Scented Orange Pekoe teamen continue firm; there are, however, very few in the market. The sales of Scented have been 9,000 boxes Orange Pekoe at 20 to 38 taels, and 12,000 boxes Caper at 12 to 31 taels.

Shanghai.—Black: Business has been more restricted, but we cannot quote any material decline, though prices for all teas are weaker, with the exception of parcels possessing decided quality, which are in short supply. Musters of third crop tea have arrived; the quality is wretched. Settlements during the fortnight consist of 30 chops as follows:—15 chops second crops Oopack at tls. 26 to 32; 9 chops first and second crop Ningchow, at tls. 28.5 to 33.5; 4 chops first and second crop Oonahms, at tls. 16 to 20 50; 2 chops first and second crop Hohows, at 19 2.5 to 22.5. Green: Continues to come forward very slowly; stocks are inconsiderable, but gradually increasing. Teamen are notwithstanding asking high rates. Two chops of good Teenkei tea and one Fychow have been settled at from tls. 32 to 38, which show a considerable advance on prices ruling at the close of last season.

Foochow.—No mail in, and the latest date is 31st Aug. Supplies have been larger than expected, but the demand has more than kept pace with them. In Congous large settlements have been made for shipment to London, the Continent of Europe, and for the Australian colonies; the better kinds have advanced fully two taels, and the commoner grades about one tael. In Souchongs a good business has been transacted, both for London and New York, at an advance of 2 to 2½ tls. Flowery Pekoes have been taken at the last high quotations. Oolongs have only been moderately dealt in, and have not partaken in the advance. Scented Teas have been taken to a fair extent, and tend up somewhat.

Kiukiang.—Black Teas: About 4,000 chests had been settled during the fortnight at previous rates, but arrivals had been in excess of the shipments, and teamen were more ready to sell, so that a decline in rates appeared imminent. There was a stock of nearly 6,000 chests left on the market. Quotations were—Ningchows, medium to fine, tls. 24½ to 28½. Hohows: medium to fair, tls. 22½ to 26. Green Teas: Overland musters of one chop Fychow had been received and forwarded to Shanghai direct, and one small lot of Kiukiang-packed tea shipped to Shanghai. The first chop of Fychow was expected in about a week's time.

Hankow.—Settlements reached 42 chops, mostly speculative purchases for re-sale in Shanghai, and at first buyers had paid again a slight advance for medium to fine teas. Latterly, however, the receipt of home advices of 26th June had checked the ardour of purchasers; lower rates had been paid for common teas, and the news of the weakness of this market would probably, when known, cause a farther decline. The falling off in supplies this year is still observable, but it is doubtful whether the high prices already paid may not lead the teamen to make up this deficiency in the third crop. Arrivals had been delayed by unfavourable weather, but the stock on the market had risen to 38 chops. Quotations were—Oopacks, medium to good (third crop), 23 to 26 taels; Oonams, common to fair, 15 to 22 taels.

Nagasaki.—Prices again advanced considerably, and the rates are now almost as high as those ruling last year, and a reduction in prices cannot be looked for unless buyers remain firm.

Yokohama.—Arrivals from the country come forward freely, and a few parcels fine to finest have been placed on the market, but the prices asked by the teamen preclude the possibility of purchases being made beyond a very limited extent. In prices we have no change to report. Settlements amount to about 4,000 pcls.—stock to about 2,100 pcls., comprising the following, viz.:—Good Common, 500 piculs; Medium, 1,100 piculs; Good Medium to Fine, 400 piculs; Finest, 100 piculs. Quotations are as follows:—Good Common, $16 to 19; Medium, $21 to 23.50; Good Medium to Fine, $24 to 28; Finest, $30 to 35.

Raw Silk.—This steamer, the Orissa, will carry away about 2,700 bales, say 2,300 bales for Southampton and 400 bales for Marseilles, also 148 cases of silkworms' eggs.

Shanghai.—We have to report rather less activity in silk during the past month than prevailed throughout June and July. A good general demand has existed during the past week, and quotations, notwithstanding the decline in the home market reported by telegram, show prices to be, if anything, rather higher than those current a month ago. No. 3 Tsatlee tls. 490 to 510. Settlements for the past month are estimated at 8,000 bales, giving a total from the 1st June to date of 36,000 bales (viz, 30,800 bales Chinas, and 5,200 bales Japans), against a total of 12,500 bales for the corresponding week of last season. In the country silk continues to be held for extreme rates, stocks estimated at about 3,000 bales. The Cadiz brings about 550 bales from Yokohama, about 150 having been injured in consequence of the fire. The total export to date is 32,995 bales China and Japan, against 9,956 last season.

Ningpo.—The exports of the month comprise 631 bales, in completion of former contracts, making a total for the season of 2,098 bales. What still remains in the country natives are purchasing at $500 per bale Hainins, $470 per bale Hangchows, $410 per bale Shounings.

Canton.—Since last report the yield of the fourth crop has been placed upon the market, and about 150 piculs have been taken for export at prices slightly below last quotations.

Yokohama.—The settlements for the fortnight may be estimated at 650 bales, making a total for the season of 3,500 bales, against 580 at the same time last year. The arrivals from the country have been somewhat light, but they are still in excess of the demand. The unsold stock on the market is about 800 piculs of all grades and descriptions. It is reported that a few parcels of old silk, of good but full sized qualities, have been sent back into the interior. There is a very active demand for silkworm's eggs, and large settlements have been made at a considerable advance on the prices that were ruling a month or six weeks ago. New Silk: Actual prices paid:—Mybash and Sinchu, best parcel offering, $780 to 807½; ditto medium, $750 to 770; ditto inferior, $720 to 740.

Drugs, &c.—Cassia Lignea: We are still without any advice as regards supplies expected. As there is a good demand for this article, the probability is that prices for the next supplies will open high. Cassia Buds: Holders are not as yet willing to reduce the price, consequently there are no buyers. Cassia Oil: Is scarce, and 10 piculs only are offered at $190. Star Anniseed: We are without any stock, and quote nominally $25. The demand for the northern ports continues, and small parcels have been taken for that quarter at high rates, even if not of a desirable quality. Star Anniseed Oil: Advices from the producing districts state that the stock there is small and for which exorbitant prices are asked. China Galls: 330 piculs have arrived during the past fortnight, of which 230 piculs found buyers at $11.75, leaving 100 piculs of rather an inferior quality on the market, for which holders ask comparatively a very high price. China Root unaltered: Sales, 200 piculs at $3 20; none is offering at present, but supplies are expected. Galangal: Remains as last quoted $1.75, with 1,700 piculs stock. Vermilion: $31 per box of 900 packages, and $34 50 per box of 1,000 packages.

COTTON.

Hong Kong.—In the early part of the fortnight, supplies continuing moderate, a good demand was experienced, and the rate for medium to good Shanghai was maintained at $28 to 32. Since then, dealers have become alarmed by the sudden arrival of three steamers from Calcutta, nearly entirely laden with the article—intelligence being also received of two ships loading in the Hooghly with further supplies. Some of the importers became nervous, and sales of common quality were reported at $22 50 This figure induced some Canton dealers to enter the market, and a good deal of business resulted in Bengal staple at $22.50 to $25.25, according to quality. Of late arrivals from Calcutta more than 3,000 bales have changed hands, and the market disp ays a tendency to rise. The little Shanghai staple which remains in stock has been withdrawn, in expectation of an advance. Present rates are likely to be maintained until the new China crop comes to market—they may advance should it prove as deficient as reported, or decline, should the yield be more plentiful. Quotations are—Bengal staple, $23 to 25 per picul; Shanghai: there has been a continued inquiry for this staple, but, owing to the absence of any quantity on the market, transactions have been limited.

CHINA IMPORTS.

Cotton Yarn.—The demand for Yarn has fallen off, although prices are maintained; sales only amount to about 185 bales. Grey Shirtings: A brisk demand still continues for these goods, and prices are advancing; settlements amount to 48,500 pieces, of which about 2,300 have been sold at auction as damaged goods. White Shirtings: Clearances only amount to 150 pieces; prices are unchanged. T-Cloths: Sales of only 2,500 pieces are reported, but the advance in price shows that this is principally owing to the scarcity of supplies. American Drills: There are no sales to report. White Spotted Shirtings, Dyed do., Brocades: The market for these goods remains much as last advised; White Spotted Shirtings are neglected, but Dyed Shirtings and Brocades have been sold to the extent of 250 pieces of each. Damasks and Chintzes: Continue to improve in value; of the former 160 pieces have found buyers, and of the latter 1,500 pieces. Handkerchiefs: Sales amount to 5,000 dozen at rates last quoted.

Woollens.—Spanish Stripes, and Habit Cloths continue in moderate demand, and prices tend upwards. Sales amount to 639 pieces of the former and 212 pieces of the latter. Long Ells: Prices for these goods are still advancing, and a good demand exists for them. Sales are reported of 1,200 pieces. Camlets: No sales to report and prices nominally unchanged. Lastings: 200 pieces have found buyers and higher prices are asked. Blankets: Clearances amount to about the same quantity as last reported, viz., 300 pairs at previous rates.

Metals.—Iron.—Square and flat: Some 840 piculs have been sold, also 120 piculs of wire. Nothing has been done in nail rod iron. Quotations are unchanged. Lead: During the fortnight 1,300 pigs have found buyers, against 100 pigs reported in last circular. Prices have advanced about $10 to $15. In Canton 900 piculs of common quality have been sold at $6 25c. and 400 piculs of W B. at $6 65c. Tin: 1,100 slabs have been sold at previous rates. Tin plates: Sales amount to 1,000 boxes at a slight advance. Steel: 590 tubs have been sold; no change in prices. Quicksilver; Settlements amount to 59 flasks.

Coals.—At Hong Kong, Welsh, $10; English, $9½; Australian, 6 to $7. At Shanghai, American anthracite in demand at 9 to 10 taels; English and Welsh, 8 to 9 taels; Sydney, 7 taels.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—From London: Aug. 19, Lord Clyde; 23, Queen of the Forth; 24, Prince Alfred. From Liverpool: 21, Patna, Amelia. From Newport: 21, Napoleon III. From Shields: 24, Queen of the Ocean.

At HONG KONG.—From Liverpool: Sept. 7, Corea. From Sunderland: 7, Tynedale. From Hamburg: 2, Jupiter.

At MANILA.—From Cardiff: Aug. 21, Labrador.

At SINGAPORE.—From Liverpool: Sept. 12, Therese. From Sunderland: 14, Zoe; 15, Naples. From Cardiff: 15, Heng Hoi.

At PENANG.—None.

At BATAVIA.—From Glasgow: Three Bells, Buston Vale.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London: Aug. 24, Dunkeld; 29, Fychow. For Liverpool: 29, Burnswark.

From FOOCHOW.—For London: Aug. 7, Whinfell, Areta; 10, Queen Bee; 12, William Mitchell; 15, Thurso. For Liverpool: 5, Everest.

From HONG KONG and CANTON.—For London: Sept. 3, Scawfell; Aug. 29, Kate Carney.

From MANILA.—For New York: Aug. 31, Golden Fleece. For Boston: 20, Ocean Rover.

From SINGAPORE.—For London: Sept. 19, War Eagle. For Cork: For orders, 17, Preciosa. For Sunderland: 7, Noorfool.

From PENANG.—For London: Sept. 12, Napier.

From YOKOHAMA.—For London: Aug. 10, Eleanor.

LOADING.

At YOKOHAMA.—For London: Simon Hobley, Rafael, Thomas Blythe, Seringapatam.

At HANKOW.—For London: Iron Crown, Philip Nelson.

At SHANGHAI.—For London: Garawalt, Art Union, Helen Nicholson, Statesman, Polmaise, Glencoe, Horsa, Dartmouth, Ensign, Wild Deer. For Liverpool: Patna. For New York: Finzel, Podesta.

At FOOCHOW.—For London: Berwickshire (full), Merse, Banian, Agra.

At HONG KONG and CANTON.—Annie Archbelle. For Liverpool: Veronica (full). For New York: Panama, Sea Serpent, Powhattan.

At MANILA.—For London: Nelson. For Liverpool: Gloucestershire, Peeress, Tigris. For New York: Cutwater, Melita,

At SINGAPORE.—For London: Rowena, Eliza Thornton, Zanthippe, Caldbeck. For Liverpool: Sparkler, Panic.

At PENANG.—For London: Adelaide, Balnaguith. For New York: Casilda.

At BATAVIA.—For Channel for orders: India, Dorothea, Thusnelda. For Boston: Silvercraig.

PASSED STRAITS OF SUNDA.

From ENGLAND to CHINA, &c.—Aug. 13, Sea Snake, Liverpool to Shanghai; 14, Robin Hood, Sunderland to Shanghai; Moulin, Cardiff Manila; 17, Assyrian, London to Shanghai; 23, Langdale, Cardiff to Manila; 21, Ravenbourne, Hartlepool to Bangkok; 29, Patrician, London to Shanghai; Sept. 1, Cambalu, London to Hong Kong; 3, John Stanton, Cardiff to Shanghai; 7, Naples, Sunderland to Singapore.

From UNITED STATES of AMERICA to CHINA, &c.—Aug. 16, Magenta, New York to Manila.

From CHINA, &c., to ENGLAND and CONTINENT.— Aug. 9, Ocean Pearl, Batavia to Rotterdam; 18, Early Dawn, Singapore to Liverpool; Sept. 3, Zeelandia, Manila to London; 6, Caldew, Singapore to London; 7, Harvest Home, Batavia to Amsterdam; Glencoe, Singapore to London; 10, Huntress, Singapore to England; Chaa Sze, Foochow to London; 11, Forrest, Foochow to Liverpool.

From CHINA, &c. to UNITED STATES.—Aug. 10, Atlas, Batavia to New York; 17, Fearless, Manila to Boston; 27, Benefactor, Hong Kong to New York; 31, Memnon, Manila to New York; Sept. 7, Rainbow, Singapore to Boston.

FREIGHTS AND CHARTERS.

YOKOHAMA.—To London: Cotton and Tea, £3; Silk, £4. 10s. per ton of 50 c. ft.

NAGASAKI.—To London: £3.

SHANGHAI.—The market remains extremely dull, and no charters of note have been made. The tonnage on the berth for home is large, and 30s. to £2 is all that can be obtained. To the coast ports equal dulness prevails.

FOOCHOW.—To London: £1. 10s. to £2.

HONG KONG and CANTON.—Vessels on the berth for U. K. loading at £1. 10s.; some little improvement is shortly anticipated. Very little is doing to the North.

MANILA.—Nominal, at £1 for clayed sugar, and £1. 15s. for unclayed.

SINGAPORE.—The advancing rates previously noticed could not be maintained, and lower had to be taken, viz., dead weight, 25s., meast. 35s. to United Kingdom.

PENANG.—The supply of tonnage is in excess of requirements. To Europe the rates are 20s. sugar, 30s. measurement.

BATAVIA.—To Europe, £2. Tonnage abundant.

CASUALTIES.

HONG KONG.

The Bengal, from Foochow, has put into Hong Kong with loss of rudder, having been in a typhoon.

The John Lidgett has also put into Hong Kong with loss of sails, &c., having been in severe weather.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—Oct. 25, at Falmouth, from Manila, Vorsetzen; at Gironde, from Singapore, Prophete; 26, at London, from Colombo, Julia Augusta; 27, at Deal, from Macao, Northfleet; 26, at Falmouth, from Bassein, Scandia (late Johnson); 26, at Deal, from Colombo, Geelong, Chaturanga; 12, at Boston, from Manila, Conquest; 26, at Liverpool, from Shanghai, Lalla Rookh; from Singapore, Richard Cobden; from Rangoon, Bosphorus; at Queenstown, from Maulmain, Mary Russell; at Nieuwe Diep, from Sourabaya, Anglia; 27, at Deal, from China, Wm. Melhuish; 27, at Liverpool, from Singapore, Christopher Newton.

DEPARTURES.—Oct. 22, from Liverpool, for Hong Kong, Sir Lancelot; 23, from Shields, for Shanghai, Isabella; 24, from Cardiff, for Shanghai, Vanguard; 26, from London, for Shanghai, Burdwan.

CASUALTIES.—The Lochalva, Sydney from Cronstadt for the Amoor river, arrived off Ramsgate Oct. 25, with loss of mainboom.

The Sunda (s.s.), v. d. Bolek, from the Clyde for Batavia, put into Plymouth Oct. 25, with slight defect in machinery.

The Fairy, from London for Bangkok, put into Exmouth Oct. 24, with loss of fore and maintopmast. She had also sprung her fore and main lower masts, and lost a man overboard during heavy weather on the 20th when off Dungeness.

The Veritas, of Liverpool, Carey, from Shanghai, which arrived at New York Oct. 13, reports having experienced a hurricane Sept. 30, in which she unshipped her steering gear, sprung her rudder, fore and mizen masts, had part of her bulwarks stove and lost an entire suit of sails. On the 1st of Oct. she was hove on her beam ends during heavy weather, but righted with 5 feet water in her hold.

The Webster, reported in our last impression as having arrived at New York from Shanghai, proved to be from Liverpool.

Naval and Military.

The Basilisk, 6, paddle-sloop, 1,031 tons, 400-horse power, Captain Hewett, V.C., announced in previous issues, sailed from Spithead for China on the 23rd inst.

A correspondent of the *Army and Navy Gazette* writes:—The P. and O. Company's ship Poonah arrived at Southampton on the 22nd inst. with the India and China mails, passengers, &c. We regret to learn that between Hong Kong and Malta five deaths occurred, the first of which, that of Mr. Christopher Albert, master, R.N., took place when within a day of Singapore. Lieutenant H. G. Hale, late in command of Her Majesty's gunboat Weazel, died when within a day of Penang; Major Atkinson, when within a day of Point de Galle; then Mr. Charles Kettyles, quartermaster of 25th Regiment, when within two days of Suez; and, lastly, a private soldier of the 11th Regiment, soon after leaving Alexandria. All these were invalids, and the fact tells very much against the absurb system of delaying sending men home till hardly a hope exists of their recovery, which is invariably the case, more especially in the navy. Whether it is the fear of responsibility on the part of the medical officers, or that they are too much bound down by red-tapeism, it is hard to say; at all events, such cases should be worth the consideration of those in authority. Few things shocked the passengers more than the want of any means of providing for [the invalided soldiers on disembarking at Suez. There was no sick quarters, no one to attend to the men, and had it not been for the kindness shown by some of the passengers, whose indignation was aroused by such neglect, one poor fellow would probably have died ere he reached the train. The men were unprovided with money to pay for meals or any trifling wants while crossing the Desert, and money had to be subscribed for them. Surely it would be an easy matter to establish sick quarters at Suez, with a medical man at hand to receive invalids of both services, and see that they were properly attended to while waiting at Suez, which they sometimes have to do for many hours. A distinguished officer, who arrived at Southampton in the Poonah, was an eye witness to the whole of this management, and we sincerely hope he will bring the matter before the proper authorities.

20th Regiment.—A correspondent in Hong Kong writes:—"About two years ago the second battalion of this regiment embarked at Portsmouth for India. On reaching Calcutta the regiment received orders to proceed to China, the women and children being sent to Dum Dum and there left. After some little time the regiment was ordered to Japan, leaving the women and children about seven miles from Hong Kong, at Stanley, where they have been left open to all temptations that could be possible for poor creatures in such a helpless condition. They have now been there sixteen months without the least effort being made to have them sent to join the regiment. Many of them have gone to a long home. Many orphans and husbands mourn their loss. The soldiers of the regiment have to see so many of their wives and children left to shift for themselves. In Japan there is plenty of room to build a few huts."

Major-General Lord Henry Percy, V.C., has resigned the command of the brigade at Aldershott, to which he was appointed in the spring. Lord Henry has since gone into Parliament as member for North Northumberland, and very properly thinks staff duties incompatible with those involved in a seat in the House of Commons. His successor at Aldershott has not yet been selected, but we hear it is not unlikely that the place will be offered to Sir Alfred Horsford, K.C.B., now Deputy-Adjutant-General. Another brigade command at Aldershott will be vacant shortly, Major-General David Russell's period of service being about to expire. General Russell was appointed in April, 1860, but the time during which he was on duty in Canada was not counted as part of his five years' staff service. Lieut.-General Sir Hope Grant, G.C.B., will enter upon the duties of Quartermaster-General at the Horse Guards on the 1st of November.

Although, as we (*Army and Navy Gazette*) stated last week, we do not expect to see any reduction of the army advocated by the authorities during the next Session of Parliament, we shall be prepared for a proposed decrease in the Navy Estimates, both in reference to the *matériel* and *personnel* of the service. We are not in a position just now to say how far the pruning knife may be applied generally to the former, but, with regard to the latter, we can state that in the Coastguard alone the Commissioners of Customs have pointed out that, as far as the protection of the revenue is concerned, they can dispense with the whole of the mounted guard, besides a considerable number of the other men. They have also pointed out to the Admiralty that there is no necessity for keeping up so large a fleet of cruisers as at present exists; and it is believed that they have recommended a diminution to the extent of one-seventh. It does not, however, follow that the Admiralty will adopt to their full extent the economical measures thus brought under their notice.

War Office, Oct. 20.—Brevet: The undermentioned promotions to take place in succession to Major-General John Macduff, C.B., who died on the 25th September, 1865: Brevet Colonel Francis Plunket Dunne, major, half-pay, unattached, to have the rank of major-general, September 26; Brevet Colonel Rawdon John Popham Vassall, major, half-pay, unattached, to have the rank of major-general, September 26; Lieutenant-Colonel and Brevet Colonel James Pattoun Sparks, C.B., from inspecting field officer of a recruiting district to be major-general, September 26; Major Frederick Percy Lea, half-pay, unattached, to be lieutenant-colonel, September 26; Captain Hugh Bent, Royal Artillery, to be major, September 26.

On the 23rd, Paymaster David T. Waugh, late of the Medea, was appointed to the Basilisk, before her departure for China.

Paymaster Bertram Mitford is appointed additional to the Octavia, 39, screw frigate, fitting at Portsmouth for the East Indies.

Letters have been received from Singapore which announce the death of Lieutenant Henry G. Hale, lately lieutenant and commander of Her Majesty's gunboat Weazel. He died on the 8th of September, on his way from Japan to Singapore. The gallant officer was appointed to command the Weazel on the 1st of January, 1863, and was returning home invalided.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

Rotterdam, Oct. 24.

There is no news of political interest; the members of the Second Chamber of the States General are busy with the consideration of the Budget, and several reports have already been printed. They contain, however, little more than the usual estimates and remarks. Within a few days the discussion will begin. As to the Budget of the Department of War the *Arnemsche Courant* predicts that this will be rejected, and that Mr. Blanken, the Minister, will be obliged to resign, when his place will be filled upby a *bourgeois*. Mr. Blanken will hereafter replace Jhr. de Casembroot, who has resigned as member of the Council of State.

Our King went to-day to Het Loo, where he will remain some weeks, and will be joined by the Queen on her return within a few days from Germany.

A rumour is again in circulation that Mr. Betz will resign as Minister of the Financial department. I, however, believe it to be unfounded.

The thirty-seventh annual report of the Bank of Java, extending from April 1, 1864, to March 1, 1865, has been issued. This institution, which has had successive privileges accorded it, has flourishing branches at Sourabaya, Padang, and Macassar. Its principal operations consist in discounting bills, exchanging money, and lending on the hypothecation of State bonds and produce. The capital is 6,000,000 florins; the highest circulation of notes attained during the past year represented an amount of 25,278,305 florins; the profits for that period of 450,000 florins being set aside for the reserve fund, and a dividend of 7½ per cent. being distributed among the shareholders.

COMMERCIAL.

Coffee.—The results of the auction of the trading company, on which 125 903 b. were offered, was very favourable. The general opinion was, that by the actual condition of the money market, the prices should decline, but in average the valuation was paid in full; while for Tjilatjap and Padang, in consequence of American orders, ¼ to ½ c. was paid above valuation. Good ordinary Java is now worth 45 to 45½. Since the auction the market is very firm, and there is much demand for green qualities; 1,460 b. ex Maria Diederika were sold at firm but secret prices.

Sugar.—Raw in good condition; about 4 000 per Java, imported some weeks ago, were sold at prices which are thought to be ¼f. above the September quotations. Refined with much demand.

Rice.—1,000 b. Java table (damaged) ex Nagasaki, were sold at auction at 9½f. to 10¼f.

Spices.—There is a good demand for Mace, and 80 c. was willingly paid for D and 75 c. for E. Nutmegs No. 1 unaltered; for No. 2 there is more demand, and nothing can be bought under 69 c.

Tobacco.—Dull, in waiting for the private auction on the 3rd Nov.

Manila Cigars.—The auction which was held on the 18th gave the following results:—200 m. 2a Cordados Cavite, 1865, were partly sold at 40¼f. to 41½f., and the rest bought in; 100 m. 2a Cortados, 1864, were retired; 10 m. 1a. 1863, were partly sold at 63f.; 100 m. 2a Cordados Cavite, 1864, were partly sold at 35½f.; 450 m. 2a, 1864, partly sold at 31¼f. to 33¾f., and the rest retired at 38f. The holders decline to operate at the actual quotations.

Rattans.—On the 19th inst. the Trading Company offered 59,151 bundles in auction. The Banjermassing was sold at f.13.90 to 15f., and the Padang at f.13.90, the Koetie at 13f., and the mixed lots from f.12.10 to f.13.80.

Java Indigo.—Of the new imports 20 chests were sold at firm prices. The opinion is favourable.

Cotton.—The market was animated, but closed somewhat heavier.

Banca Tin.—The prices become daily higher. 300 slabs were sold at 56f., 250 at 56½f., 900 at 56¼f.; 1,000 slabs at 56¾f., 1 000 at 57f., 500 at 57¼f., and 1,500 at 57½f. As there are no more orders for America the market will become flatter, and at 57f. may be bought.

Arrack.—Without transactions, but the market remains in a very firm condition. The reports from Batavia say that the exports will be very trifling, while the stock is unimportant.

Hides.—With a few transactions for the consumption.

Money Market.—The rate of discount is still unaltered, while the Bank returns are more favourable than in the last weeks. Dutch: Two and a-Half per Cents., 61; Three per Cents., 71 9-16th; Four per Cents., 95⅜; Handelmaatschappy, 146¾; Indian Bank, 81¼; Rotterdam Bank, 98¼. Change on London: 3 mo., f.11 77; 2 mo., f.11.84; short, f.11 98; Paris: 3 mo., f.46 65; 2 mo., f.46.85; short, 47.25. Hambro: 3 mo., 35f.; 2 mo., f.35.11; short, f.35.45.

Shipping—Arrivals.—October 16, at Brouwershaven, from Batavia, Japara; 15, at Texel, from Padang, Stad Assen; 17, at Brouwershaven, from Batavia, Nieuwe Waterweg; at Zierikzee, from Batavia, Nederland; 17, at Texel, from Padang, Carolina Agnes, Sindbad; 18, at Texel, from Batavia, Laura and Adele.

Departure.—October 23, from Brouwershaven, for Batavia, Dordrecht.

PASSENGERS INWARD.

From Java, per Fop Smit, Messrs. Borger and family, de Waal and family, van Bloemenstei, and family, van Dunen and family, Egberts and family, Hacquebord Dikhuis; per Nicos, Messrs. L. L. Gross, De-

Digitized by Google

sauvage, Grauss, Bloemen Waanders; per St. Jan, Messrs. Riesz and family, J. de Quay and family, de la Chaux and family; per Stad Assen, Mr. B. H. Boer and family; per Nederland, Messrs. Hagenzieker, van Riemsdyk, Hofman; per Sindbad, Messrs. Textor, Epple and family, van Beveren.

PASSENGERS OUTWARD.

To Java, per Zeenimph, Mrs. E. van Sheeden Coles and family, Mrs. S. van Rossum, Mrs. J. Lang, Miss H. van Gudnaan, Mr. J. Ellinkhuyzen, H. Jonken, A. Tersenaar.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

OCTOBER 23.

The Russian *Gazette of the Academy* contains the following :—"During the course of the present year, the Minister of Finances laid before the Council of the Empire a project respecting a revision of the statutes of the Russian American Company, and the organisation of colonies in America. The project was approved by the Council, and confirmed by the Emperor, on the 14th of June, 1865. By this document the period of the existence and privilege of the company is fixed for the 1st of January, 1882. The following are the principal provisions of the new charter :—The company remains, as hitherto, an administrative authority in the colonies, with its own functionaries, seal, with the Imperial arms, flag, troops, and coinage. The political part of the Administration to be replaced by a general direction of the colonies, appointed from the present time by the Imperial Government. The Aleutes, and all other natives, to be in future exempt from forced work for the company, and may change their residences and absent themselves as they like. All inhabitants are divided into natives and colonists. All trade and industry declared free except the chase and the fur trade, which remain the exclusive privilege of the company within the limits prescribed by the law. Beyond these limits the chase may be followed by all natives and colonists, and the fur trade by all Russians. The ports of New Archangel on Sitka Island, St. Paul on the Island of Sandjak, and eventually some others, are declared free ports for the importation of all goods and merchandise in Russian or other vessels, with the exception of gunpowder, arms, and spirituous liquors. A special general meeting of the shareholders of the company will be shortly convened, when it will be seen if they agree to these alterations."

In the Folksthing, or Lower Chamber of the Danish Parliament, Mr. Westenholz last week requested Ministers to state what steps they intended to take to facilitate the opening of the Danish trade and navigation with China and Japan, as their ships were now placed in such an unenviable position that several had lately been put under the protection of foreign flags to enable them to trade between China and Japan ; and, if nothing was done to prevent it, all Danish vessels in the East would be compelled to do the same. The Minister for Foreign Affairs, Privy Councillor Bluhme, in reply, stated what had already been done, and what steps were further intended to be taken towards negotiating a treaty of commerce with Japan. Preliminary measures had been taken some time ago, through a friendly government (the Netherlands), to pave the way with the Tycoon, and he (the Minister) had lately put himself in communication with the Minister for the Marine for the purpose of sending out a ship of war to show the Danish flag in the waters of Japan. Mr. A. Hage, one of the Members of the Folksthing, expressed his satisfaction at hearing that Ministers were not forgetful of the interests of the Danish mercantile navy.

The Italian Government is now fitting out the steam frigate *Magenta* for a voyage to China and Japan. A letter just received from Florence states that Professor de Filippi, lately appointed to a seat in the Senate, will go out in her as scientific commissioner, but also furnished with instructions and full powers to negotiate treaties of commerce with those Eastern States. Though it has been known for some time past that such an expedition was projected, it was not believed that it would be so soon undertaken, and the announcement has, therefore, taken the public by surprise. The frigate will be fitted out for an absence of two years, and will circumnavigate the globe before her return to Europe.

At Vienna a joint-stock company has just been formed under the firm of the "First Austrian Export and Import Company," with a capital of five millions of florins. For the present, however, only one-fifth will be raised, by the emission of 5,000 shares of 200 florins each. The object of the undertaking is, as the name implies, the furtherance of Austrian commerce with foreign States, for which purpose agencies are to be established in distant countries, special mention being made of China and Japan. Until the realisation of this latter part of the project the business in those countries is to be confided to the agencies of the Swiss Export Company. The shares have been all taken up, and great hopes are entertained that the patriotic undertaking will receive the special countenance and support of the New Minister for Commerce.

COMMERCIAL.

COFFEE.—The favourable result of the Dutch sales and better advices from the Brazils have caused greater confidence in this market. To this may be added the continued large deliveries, the reduced stock, and the small supplies known to be at sea, which can hardly suffice for local demands during the winter months, when we may expect to be shut up by the frost. Sales of the week, 20,000 bags, including a cargo of 2,200 bags expected, and ordered to proceed to Sweden on arrival.

SUGAR.—Raw continues in favour, with a further rise of 8 sch. bco., and market closes firm. Among the sales are 600 bags yellow E. I. for delivery, 2,200 bags brown and yellow ditto ex warehouse, and 250 kranjangs of Batavia. Refined firm in value, but with limited demand.

RICE.—Prices without alteration, business moderate. Arrived this week, 8,300 bags Bassein per Helvetia, 6,000 Rangoon per Peder Aneus, and 1,000 per Melbourne.

SPICES.—Cassia Lignea continues in demand at rising prices, 11½ sch. bco. having been paid. Ginger steady. There is more inquiry for Mace and Nutmegs. Pepper firm.

SPELTER.—Market dull, and prices with a downward tendency. The only sales reported are 1,000 centners *in loco* at 13.12, and 500 centners for November delivery at same figure, since which 2,500 centners *in loco* at 13.10.

MONEY rather easier. Discount, 6¼ per cent.

SHIPPING.—ARRIVED.—Oct. 16, Melbourne, from Singapore ; Helvetia, from Bassein ; Peder Aneus, from Rangoon ; 20, Molly, from Singapore.

SAILED.—Oct. 18 (from Cuxhaven), Colima, to Macassar and Hong Kong.

THE RUSSIAN AND AMERICAN TELEGRAPH.—The *New York Herald* reports :—A telegram has been received from Port St. James, on Frazer River, stating that the Russian-American telegraph has been built from New Westminster to that point by Assistant Engineer Conway, who was progressing still further with great success. Captain Conway's party will undoubtedly reach Stuart's Lake before the close of the season, where Captain Carlin is preparing bateaux to cross supplies for the passage to Lake Babine. Messrs. Henly and Co., of London, are manufacturing wire for the main line of the company, and one thousand four hundred miles will soon reach Colonel Bulkley at Sitka. This is in addition to one thousand two hundred miles of wire previously sent from New York. The cable which is to cross the Straits has been ordered in England. Mr. Mumford, vice-president of the Western Union Extension, sailed from this port a few weeks since, with full power from that company to contract for four hundred miles of cable, to be finished in three months and laid next August. M. Abasa left San Francisco the latter part of July in the barque *Olga*, for the Amoor river, from which point he will build northward with an efficient working party, and meet the party sent by Colonel Bulkley from the Gulf of Anadeer. The whole enterprise, according to latest advices from official sources on the Pacific, bids fair to be most successfully and triumphantly carried out to final completion at a much earlier day than has heretofore been anticipated by its most sanguine friends. The Government, from which was expected the assistance of a steamer to enable Colonel Bulkley to complete certain important marine explorations on the coast, has most signally failed to respond to the requirements of the case, and the enterprising and energetic engineer in charge of the expedition has proceeded thus far without the aid sought for and granted by Congress. Now that so many steamers have been put out of commission by the cessation of the war, it is confidently expected that one of our national vessels may be detained to represent our flag among the frigid regions to be traversed by the energetic and hardy expeditionists. It may not be generally known that the expeditionary corps sent from San Fransisco, and which departed from Vancouver's Island the last week in July, is organised on a military basis, similar to a brigade of our army ; but such is the fact. Not only is the expedition so organised, but all the *employes* are uniformed in a blue suit, not varying materially from that of our infantry. Among the officers attached to the expedition is Captain Lawrence Conlin, chief Carpenter, who is also drill officer, being an old soldier, he having served in the Mexican war, subsequently in the regular army in Texas, and latterly a lieutenant in the Third Massachusets cavalry. Colonel Bulkley and many of his assistants also served in the telegraph corps, under General Banks, and nearly all of them have frequently been under fire. Colonel Bulkley, in equipping the expedition, while in New York, provided enough arms and ammunition to fully equip five hundred men for active service against Indian or "any other man" not susceptible to the kindness and suavity which are the known characteristics of the head of the expedition. Captain Conlin has had considerable experience in fighting the Lipau, Camanche, and other Indian tribes in Texas, as well as the guerillas of Louisiana ; and, where the diplomacy of Colonel Bulkley, aided by the most liberal presents (of which a great quantity was shipped from this city), is not effectual in securing an uninterrupted right of way, free from molestation by the wild tribes of those regions, the bayonet and bullet will be fearfully brought into requisition, wielded by boys who have braved death under their old flag, which they now carry with them on their peaceful and civilising errand. No fears are entertained on this point ; and the warlike tribe of the Tchooktchees will receive as much conciliation as may be accorded to the more effeminate and peculative Chenooks ; but any attempt to impede the progress of the grand enterprise will be promptly, fearlessly, and bloodily met and effectually punished. The next advices from the expedition may announce the uniting of the wires of the second section of the line with those being built up to Stuart's Lake.

LONDON, SATURDAY, OCT. 28, 1865.

—o—

THE HONG KONG GOVERNMENT.

The elements of a Colonial Government in the Far East are, perhaps, more subject to frequent changes, from the demise or retirement of its officials, than any other; the vacancies so occurring are, however, usually filled up without delay, and the affairs of the colony are carried on with little, if any, interruption. By a singular coincidence, the colony of Hong Kong has been deprived almost simultaneously of *three* of its chief functionaries; and presents to us the unusual combination of a colony without a Governor, an episcopal see without a Bishop, and a Supreme Court without a Chief Justice. Not, of course, that the functions of these several offices are all in abeyance; for, as is usual in such cases, the duties of the Governor and Chief Justice are performed for the time, with more or less ability, by subordinate officials; while the powers of the episcopate, not being of such a nature as to admit of their being delegated for a time to any substitute, must perforce remain dormant until a successor to Bishop Smith be appointed.

Firstly, with regard to the new Governor. We think we may safely congratulate the colonists on the choice that has been made of a successor to Sir Hercules Robinson. In Sir Richard Graves MacDonnell they will have a man of considerable administrative abilities, of great energy (as evinced in the active measures taken by him to improve the internal defences of the colony he has lately governed), and one, moreover, whose personal character and genial disposition have won for him universal respect and esteem. Nor is this all; Sir Richard MacDonnell, coming as he does fresh from the wholesome atmosphere of a quiet, well-conducted colony like Nova Scotia, and free from the taint of those corrupting influences which have in years gone by made a very Augean stable of Hong Kong, will be far better fitted to assume the reins of Government—to administer with a vigorous hand, without fear or favour, such reforms as are necessary—than any official whose long tenure of office in the colony might seem, to a superficial observer, to qualify him for the post. Without wishing to reflect in an unfavourable manner on the way in which the present Acting Governor, Mr. Mercer, discharges the duties of the office, we have already strongly advocated the necessity of placing at the head of the Government a man whose experience has been acquired in a totally different field. It is impossible to touch pitch and not be defiled; neither is it possible for any ordinary man to live for twenty years surrounded by abuses such as those which have in times past rendered the Government of Hong Kong notorious, without becoming so far familiarised with, and influenced by them, as to be less able to improve the *morale* of the Government than one coming fresh from an entirely different sphere of action. This qualification in the new Governor will, we contend, far more than counterbalance any slight shortcomings which may at first arise from his being an entire stranger in the land to which his new appointment calls him.

We do not yet hear of any appointment of a successor to the late Chief Justice Adams; and this calls our attention to another singular feature in the present anomalous condition of the colony, namely, the fact that both Under Judge Ball, who at present acts in the capacity of Chief Justice, and Mr. Whyte, the Chief Magistrate, are members of the Romish Church; while the Acting Governor, although himself a Protestant, would seem, from the extraordinary encouragement he vouchsafes to the Roman Catholic cause, to be, at all events, disposed to favour the spread of catholicism in his jurisdiction; at least we can put no other construction on the "solemn distribution of prizes" (*vide China Mail*) lately performed by his Excellency at the Roman Catholic School of St. Saviour's, in which the Acting Judge and Mr. Whyte also took part. Now, although strongly averse to intolerance of any description, and anxious that free liberty of conscience be allowed everywhere, especially in such a mixed community as that of Hong Kong, still we cannot help thinking that in the Government of a colony belonging to the chief of Protestant nations, such Catholic proclivities as these should be avoided. The most glaring error, however, which Mr. Mercer has committed has been the surrender of Mowang, and on the meeting of next Parliament this matter will be fully inquired into. We trust that a careful selection in the appointment of a new Bishop and a new Chief Justice, will place the Government of the colony on a more satisfactory footing in all respects.

THE CEYLON LEAGUE.

The real or apprehended violation by Ministers of constitutional principles in their home policy, could not fail to excite a storm of public remonstrance. Why should it be otherwise when this happens in our colonial policy? A great part of the immunity which the Colonial-office in its administration has experienced is due rather to a deficiency of knowledge on the part of members entrusted with colonial grievances, rendering them liable to be silenced by a mere feint of defence, notwithstanding the truth and strength of their position. If any action on the part of the late Ministry has been calculated in its extension to injure our stately colonial fabric, it is the refusal of independent and responsible action to the Legislative Council of Ceylon. With the legislative control afforded by charter over the disposal of their revenue placed in abeyance; with an Order in Council enforced, which practically ignores the representative element; with special votes merged in a general fund capriciously expended or withheld from important public works, for the purpose of creating an illusive surplus to be arbitrarily applied to Imperial wants, and when to all this is added the perpetual restraint on the industrial and social development of the colony thus created, we arrive at a state of things meriting for its authors—

"A dismal universal hiss, the sound of public scorn."

The motives and principles by which men are actuated lie deeper than on paper and parchment; and for Ceylon to have tolerated this despotism, to have sanctioned this treason against her constitutional rights, would have been to consent to the positive injury of all her interests. But the enforcement of a military exaction, none the less compulsory because passed by a vote of the official members (for the whole united Council immediately petitioned home that its privileges and the rights of the people might be respected), has sounded the knell for any longer withdrawment of the control of the revenues from the representatives of the people. As the first result, we have the Ceylon League in vigorous action. Protests and memorials having been vain, this body, which represents every leading interest in that colony, has determined to enlarge the basis of operations, to bring the attack home to the Government of the day, and, without lessening active, local effort, creating a London Branch Committee, with power to raise funds, and take such action as shall arouse public sentiment in England. We cannot be indifferent to such a movement, aiming, as it does, to satisfy the just demands of the colonists without prejudice to Imperial interests; for there is no greater libel on Ceylon than that its people are indisposed to pay voluntarily their due proportion of the Imperial revenue. The League is represented in London by Mr. George Wall, the chairman of the League, and who arrived by the last mail. Mr. Wall was the most prominent of the non-official members who resigned, intimately acquainted with Ceylon interests, and possessing high statesman-like abilities. His course has been characterised by great judgment, and the organisation could not have been entrusted to abler hands. A published statement of the political history of Ceylon, for the last sixteen years, will shortly be issued under his auspices, and which will leave no refuge for Ministerial evasions when the subject is brought before Parliament at its next session. The case of Ceylon will secure the more ready acceptance, that the unofficial members who resigned at no time offered a mere factious opposition; neither they nor the League are agitators

Digitized by Google

in the accepted sense of that term, but, on the contrary, are really seeking to advance the cause of right government; and the action taken must tell eventually on Hong Kong, and other colonies with which British interests are so closely identified. We trust shortly to record Mr. WALL's movements in reference to the cause of which he is the accredited representative.

THE LEGISLATIVE COUNCIL.

THAT Sir Hercules Robinson should fulfil his announced intention of securing for the Legislative Council of Ceylon the complement of unofficial members has created no surprise; but that gentlemen so well acquainted with the views of the Ceylon community should have felt themselves justified in accepting place, has occasioned no little comment. Doubtless Sir Hercules brought to bear on them weighty considerations connected with prospective business; yet, until pending questions between the colonists and the home Government are determined, these gentlemen must consent to be the mere *umbra* of the representative element; seeing that, according to the last Order in Council, their assent is not necessary to any step in legislation. Sir Hercules, when in Hong Kong, contended for the very principles which characterise the present Ceylon agitation, resisting encroachments on colonial rights through official incapacity at home; and we believe is not inclined to look unfavourably on an arrangement which would give to unofficial members their due influence. The following are the names of the gentlemen appointed:—George Dennis, B. Harrison, George Smyttan Duff (Manager Oriental Bank); Christopher Barker Smith, Mutu Coomara Swamy, James Adrian Martensz, Edward James Dehigame.

THE BREAKWATER AT GALLE.

WE are glad to find that this important matter is likely to receive a solution at last. The plans proposed by Mr. GRINLINGTON, at present in Ceylon, have been approved by competent men as the most suitable amongst the many suggested during the last fifteen years. We understand that the matter is now under the consideration of the Ceylon Government as to what support they will give the project. The cost is, we believe, computed at £300,000, and with any sort of guarantee or support from Government, the P. and O. Company, the Messageries Imperiales, and others, there will be no difficulty in forming a company to carry out this long wanted public work, which will render Galle one of the most useful ports instead of the most dangerous one in the East. The *Colombo Observer* is, however, in error in stating that the P. and O. Company and the Messageries are ready "to bear the whole or the larger portion of the expense." They will be glad to give their influence to the project, and pay something handsome as dues, but they cannot furnish the required outlay; nor is it necessary, as the capital can be raised on the merits of the project, provided a good return can be shown.

THE SINGAPORE GAS COMPANY.

WE are happy to hear that this company has now a large share of public patronage, and by late accounts they had made use of about 250 street lamp posts, 21 private ditto, and about 2,300 lights in the houses of Europeans and natives. The charge was $3 per 1,000 feet, yielding a revenue to the company of about £6,000 per annum. Considering that the mains already laid were capable of yielding yet a considerable number of lights, and that the demand was daily increasing amongst the natives, it may be expected that the company's receipts by the end of the year will be so augmented as to yield a handsome dividend on the paid-up capital. The directors here and the local committee appear to have avoided by diligence, that enormous outlay and waste in establishing the works, which is generally inseparable from operations of a similar nature, conducted in the Far East. As they have been so successful the directors should now make overtures for lighting Ceylon, Java, Manila, &c.

THE SIAMESE PROHIBITION AGAINST THE EXPORT OF RICE.

WE regret to learn, by the last mail, that the King of Siam, who has adopted such enlightened views on most subjects, should have ordered the prohibition to the export of rice to continue for a further period of three months. This is a bad step for the prosperity of the country. If a stop is to be put on any article because of its scarcity, there can be no confidence by those engaged in the trade of Siam. It would be wiser to allow things to take their course, depending rather on the high prices bringing in cargoes from other ports, and also on the fact that, while extreme rates ruled there would be no buyers for export. We trust that the King, who has shown so many of the principles of free trade, will be put right on this matter. While on the subject of Siam we are glad to notice that the visit of Admiral King was suggested by the Foreign Office, with a view to strengthen the *entente cordiale*, which had rather slackened of late, owing to the action of the French authorities on one side, and the discourteous attitude assumed by our Consul on the other. It is only just, however, to add that we believe that Mr. KNOX has "turned over a new leaf."

NEW STEAMERS FOR CHINA.

THE screw steamer of about 900 tons, which we noticed some months since as building at Aberdeen for Messrs. Douglas, Lapraik, Lane, and others, will be ready for launching next month. She will be commanded by Capt. Baker, and will be named the *Douglas*.

The steam ferry, which has been constructed for the same owners, is somewhat on the model of that working across the Itchin river, at Southampton, capable of conveying passengers, cattle, carriages, provisions, &c.; and we expect this craft will prove quite a boon to the inhabitants of Hong Kong in connecting it with the Kowloong shore and places adjacent. It is intended to ship out this ferry in a vessel now building for account of Messrs. Robertson and Co. at the same yard.

There are three steamers—of 2,200 tons each—building by Messrs. Scott, of Greenock, originally intended for the Tea trade, but there is now some uncertainty as to their employment.

The screw steamer *Erl King*, Capt. Pinel, whose launch was noticed some time since, had her trial trip on the Clyde on the 19th inst. She will be despatched for Melbourne next month, and thence proceed on to China. The following account of her trial is from the *Glasgow Herald*:—

On the 19th the screw steamer *Erl King*, recently launched from the building-yard of Messrs. A. and J. Inglis, Point-house, was put on her official trial trip, when the distance between the Cloch and Cumbrae Lights was run in 67 minutes, being equal to 12·24 knots or 14·1 miles per hour, on a mean draft of 17ft. 6in., the speed attained being fully one knot per hour over that contracted for. Her dimensions are 250ft.; breadth, 34½ft.; depth, 22ft. 9in. The machinery, made by the same firm, consists of a pair of surface condensing engines of most approved construction, of 200-horse power nominal, and during the run gave an indicated power of 1,200 horses. She is also fitted with hoisting gear for lifting the propeller out of the water when under canvas. The *Erl King* has been built for the China and Australian trade, and is commanded by Capt. Pinel. She has superior accommodation for first, second, and third class passengers, being elegantly fitted up and admirably adapted for the trade. On arriving at the Tail of the Bank, a select company who were on board during the trial were taken ashore by the tug in attendance, and the *Erl King* proceeded to London.

TROOPS FOR CEYLON.

THE *Isabella* has been engaged for the conveyance to Ceylon of the following troops:—

2nd Batalion 25th Foot	..	..	2	officers	102	men.
Royal Artillery	..	..	1	„		
Ceylon Rifles	..	..	2	„	1	„
Army Hospital Corps	..	..			1	„
Staff	..	..	1	„		

With 2 officers' wives, 6 soldiers' wives and 9 soldiers' children.

CHINA GRASS.

WE have referred more than once to the subject of the application of China grass, or rather to the attempts that are being made to introduce that fibre into manufacture, by the men of Rouen, and a correspondent, "An Englishman," in a letter which was published in our issue of the 16th instant, seems a little jealous at, as he says, our "apparently congratulating Frenchmen upon their great mercantile acumen." We should have done so had we seen reason for it, but we did not; we merely recorded the fact that the manufacturers of Rouen were making efforts towards the application of the fibre, that they had succeeded in producing excellent specimens of fabrics composed in part of China grass, that they had managed to work it as cotton and as silk, and had dyed it with brilliant colours; and further, that they had succeeded in obtaining the support of men well known and standing high in the financial world All this is true, and we wish we could add that their object had been fully achieved, as we hope it may be some day sooner or later; for we hold that he who can bring into practical use a new fibre is just as much a benefactor to his species as he who makes two blades of grass grow where one only grew before. We are perfectly well aware that attempts have been made to

Digitized by Google

introduce China grass into English manufacture, and we know also that little or no practical result has yet been achieved; and, moreover, we feel sure that nothing is so likely to push our manufacturers forward as the knowledge that others are working in the same direction. As regards the cost of the material, or rather its economic value, we are not so well informed; and when quoting the reports of the Chamber of Commerce of Rouen, whose opinion in such matters is certainly deserving of the fullest attention, we merely said :—"If these reports be not all painted "*couleur de rose*, it appears that the want of a sufficient quantity "of the raw material is the only thing which prevents the im-"mediate development of the China grass trade;" we did not commit ourselves in any way. Our correspondent says that three years ago certain importers made an unfortunate venture in China grass, and he expresses his opinion that the material "cannot be imported into Europe at a low enough cost." But the Chamber of Commerce of Rouen has gone into all the questions apparently with great care, has printed its information and deductions, and tells the world that a tissue of China grass costs about two-fifths less than one of pure cotton; and the spinner and weaver who made the experiments at Rouen have expressed, in print, their readiness to take a ton a day of the material, while the former declares that he is prepared to devote himself entirely to the working of China grass, which, he says, "can be employed by itself or mixed with cotton, to the extent of 60 to 75 per cent. with great economy." We trust that this short statement will prove to our readers that we were not ill-advised, or unjust towards anybody in the world, in drawing attention to the efforts of the manufacturers of Rouen, our object being simply the dissemination of what we conceived to be useful information. In the *London and China Telegraph* of the 8th of August will be found a letter on the same subject from another correspondent, signed "An Exporter," the writer of which, after thanking us for calling attention to the subject, says :—"Evidently large fortunes are to be acquired by those who shall first prove successful in this enterprise, and it is to be hoped that instead of waiting for French experimental results, arrangements will at once be made for turning China grass to full account in our cotton and linen manufactures." If this opinion be correct, we congratulate ourselves upon having *irritated* the subject, for there is nothing like a little friction for putting Englishmen upon their mettle; and, while we trust that the most deserving may win the prize, if prize there be to win, we cannot conceal the fact that we should prefer it to fall into English hands. But there is no question of a special prize at all; if one country can work China grass another can, and if any country can get it cheaply from China it is certainly England. Lastly, if it can be grown at a lower cost in Europe or elsewhere, than it can be imported for, so much the worse for the China merchant. As for us, we are in the position of the visitor to the circumlocution office. "We want to know, you know!" that is all.

THE NEW SEASON TEA CLIPPERS.

Several of these vessels were detained in the Channel by easterly gales for a week.

The City of Aberdeen experienced heavy gales from S.W. just after leaving Foo-Chow, and lost all her topgallant masts. She came the eastern passage, arriving off Start-point 9th Oct., and London Docks 13th.

LONDON GAZETTE, Oct. 20.

The Queen has been pleased to appoint Sir Richard Graves MacDonnell, Kt., and C.B., to be Governor and Commander-in-Chief of the colony of Hong Kong and its dependencies; and Lieutenant-General Sir William Fenwick Williams, of Kars, Bart., K.C.B., to be his successor as Lieut.-Governor of Nova Scotia.

* The Challenger left Woosung 25th June, 4 P.M., passed Lombock 3rd Aug., Cape, 1st Sept., crossed the Equator 17th, arrived at the Start 14th Oct., in dock 17th, 11 A.M.

The steamers *Kwangsoo*, *Kwangtung* and *Amoy*, belonging to the Anglo-Chinese fleet, have been advertised for sale in the daily papers as they now lie in Bombay harbour. Why they should have been allowed to lay there for two years is one of those official acts which, as Lord Dundreary says, "no fellow can make out."

THE SILK TRADE—FRANCE v. ENGLAND.

(To the Editor of the *London and China Telegraph*.)

Sir,—In number 183 of your issue, dated the 28th of August last appears an article taken from the *Economist*, entitled "The Silk Trade—France *v.* England."

The writer of the article makes a statement to the effect that "the dealers of silk in France have not got large capital at their disposal; they are strongly disinclined to confide the control of what they do possess to men whom they cannot watch constantly, and they have not patience to wait for years for the success of a commercial operation." The foregoing is that portion of the article with which I propose to deal in this letter, and at a subsequent date I shall be disposed to discuss other portions, provided you are willing to give insertion thereto. I will now begin by stating that had the article referred to been written prior to the overthrow of the Orleans dynasty, its statements would have been true in the main; but, unfortunately for the writer, he is nearly twenty years behind the epoch on which he has ventured to treat. In the first place I must give an entire yet courteous denial to the statement that the silk trade of France is poverty-stricken.

Considering all the circumstances, it could not have been matter for wonder had such been the fact, knowing as we do that the silk producers of that country have, for a period of nearly ten years, been contending against a series of ruinously disastrous crops, which began to be seriously felt as far back as 1856, and which as yet no man can foresee the end of.

Now, notwithstanding the fearful losses incurred during this distressingly long period, I must beg to be allowed to maintain that the dealers of silk in France are still possessed of very large money capital. Formerly it was locked up in the production and perfection of the home silk crops, and consequently did not make its appearance in distant markets.

The case is now altered, and a portion—only a moderate portion—of the capital hitherto so employed in France (to which Italy contributes) has at length taken the alarm, and is slowly and gradually betaking itself to the silk markets of China and Japan.

At the time when the French had good crops at home, say for instance from 1840 to 1850, they were naturally disinclined to embark in distant enterprises; but no sooner did the crisis attending the cultivation of silk in Europe come upon them with severity, than they quickly gave signs of proving equal to the emergency, grave though it was. The very high range of prices to which China raw silks were driven up in 1856 and 1857, at the port of Shanghai, &c., was in the first place due to the alarming failure of the crop in Europe, and in the second to French capital chiefly (and in minor part also to German, Swiss, and Italian money) being brought into competition with English monetary enterprise in the race for the purchase of China silk, which was destined to remedy, in so far as it could, the disastrous deficits in the French and Italian crops of those memorable years.—I enclose my card, and beg to remain,

Mr. Editor, your faithful servant, Kioto.

Macclesfield, October 20, 1865.

Literature.

Code Annamite. Par G. Aubaret, Capitaine de Frégate. Paris: Imprimerie Royale.—Two handsomely printed volumes, published by order of M. Chasseloup-Laubat, Minister of Marine and the Colonies, contain the Annamite Code (*Hoang-Viét-Luât-Le*)—the Laws and Regulations of the Kingdom of Annam, translated from the original Chinese text, by G. Aubaret, Capitaine de Frégate in the Imperial Navy. The code in question is, it appears, almost indentical with that of China, with the spirit of which the majority of our readers are so well acquainted that we need not recapitulate the blood-thirsty severity of its punishments, nor the vexatious minute particularity of its provisions. We shall render them a more grateful service by placing entire before them Captain Aubaret's preface, which explains clearly enough what the volumes will furnish to the student curious in national laws and the morals founded thereon, while it supplies, in addition, an indication of the course that will be adopted by France, in her task of accustoming the Cochin-Chinese to the administration of justice on a settled and impartial footing. This preface, dated "Saigon, 1st Aug., 1862," is as follows :—

The Annamite Penal Code, this translation of which is offered particularly to persons interesting themselves in the future of Cochin China, is based entirely on the model of the code now in force in China under the Tartar dynasty of the Tsins. Written in the Chinese tongue—as, indeed, are all official documents, with the largest part of whatever is written in Cochin China—this code is composed of two very distinct parts, of which the one called *Luat* in Annamite and *Lu* in Chinese, is a reproduction of the fundamental law—a law almost unaltered from remote antiquity, which has been adopted nearly in its integrity by the peoples of Chinese descent; the other part, called *Lu* by the Annamites and *Li* by the Chinese, has been translated by the expression "Supplementary Regulations." These last, variable and susceptible of revision, are not, properly speaking, a commentary on the law, but an enlargement and extension of it. The literal language of the Chinese is so concise, that in many cases the judge would

Digitized by Google

certainly be much embarrassed if he had nothing but the letter of the law to guide him. Thence it is that the provisions especially belonging to the Annamite nation are found more particularly in these supplementary regulations. The translator has, therefore, broad himself, as regards the criminal and civil law, not to neglect one of them, notwithstanding their length and often tediously formal repetitions; and, on that account, the present translation is more complete than that of Sir George Staunton's "Code of China," which confines itself to the fundamental law.

The *Luat* or Chinese *Lu* may be looked upon as a sort of immovable canvas, on which different dynasties, and even different sovereigns of the same dynasty, worked, as suited their convenience, in delicate or deep colours, their notions of the way to control and judge the people. And thus the Tsin Tartar dynasty now governing in China, being in principle purely military and conquering, was compelled to bend the law as far as possible towards the ideas of domination that were above all else necessary to it.

The Annamite code having been already reduced to form under the reign and by the orders of King Gia-Long, the actual founder of the dynasty now existing in Cochin China, his son and successor, Minh-Mang, had no essential change to make in the revision he undertook of the *Le* or Supplementary Regulations; but he infused into them the extreme severity that was his own characteristic, and which old Annamites speak of even now with terror. These are the regulations, with a few modifications introduced in the last two reigns, that are in force at this day; the reader will easily perceive that they sometimes step beyond the fundamental law. Every tribunal is forbidden, however, to apply any other penalty than that laid down by the last-mentioned, in cases where doubts arise.

Unfortunately, in Cochin China the guilty are ever ignorant of the law or regulation that punishes them, and the people have only a hearsay knowledge of the penalties to which they are liable for the commission of an offence. This unjust barbarism is in nowise Chinese; neither was it in the intention of King Gia-Long, who says expressly the contrary in his preface. It is impossible for the translator to state precisely the exact date to which is to be ascribed this distrustful and jealous weakness, which does with the law in Cochin China just what was done by the priests in Egypt. The axiom that no one is to be deemed ignorant of the law must be announced here in a directly contrary sense; for it is extremely rare to meet with an Annamite who has any precise ideas on the subject. The people of the country appear to have submitted with the utmost philosophy to the entire supremacy of their mandarins; and perhaps it is to this kind of despotism, rare even in Asia, that the Annamite nation owes that inferiority which is so striking when they are compared to the Chinese, from whom they sprang. Everyone interrogated as to the reason that could induce the mandarins to appropriate so exclusively the knowledge of the laws, replies naïvely and without bitterness that it was to prevent disputes. There need be no astonishment then at the extraordinary ascendancy of a class, small in number, who are the judges, and from whom there is no appeal. That, moreover, which proves the great interest attached by the mandarins to this exclusive possession of the code is the extreme rarity of the work. In case of flight they carry it off in preference to the registers of population and taxes; in preference, that is, to documents infinitely compromising to themselves. To know these laws is, therefore, to be placed on a footing of equality with them, and to publish them for the instruction of the people, as is done in China, is to follow the formal prescriptions of the code itself.

That they may respond to what France has a right to expect from them, the Annamite nation must be first freed from those moral fetters which, while certainly rendering them more governable, has also the very great inconvenience of engaging them—precisely from their excess of passiveness—in revolts which it is painful to punish, on account of the great evil done thereby to the country. But they are from the same cause too attached to their customs to be easily pliant to our laws, which are neither suitable to the physical constitution nor the moral condition of the Annamites. On the other hand, their code is so simple, the particular cases that spring out of the character of the nation are so well provided for, that a better will not easily be found.

If there be one question that appears to be settled in regard to colonisation, it is that which consists in ruling conquered peoples, as far as possible, according to their own laws and their ancient customs. Time alone can diminish the extremely marked differences existing between Europeans and Asiatics; but, for a commencement, success being the important point, we must esteem it very fortunate to encounter a people fully organised, and for whom their administration has provided for almost everything that needs a provision.

Thus, therefore, whenever the French agents charged with the administration of the Annamites shall have acquired a knowledge of their laws and regulations, they will be in a position, as far as judicial proceedings go, to supplant the old mandarins, who had a monopoly of them. But when, in addition, the present work shall have been reproduced from the French translation in the vulgar Annamite tongue, by means of the Latin characters so ingeniously adapted and brought into use by the missionaries, then will fall the old and difficult barriers of the Chinese tongue; and those same administrative agents will be able in a short time to discuss the text of the law, while the Annamites will find themselves for the first time in actual possession of a written language, just entirely like those of Europe.

The vulgarising of these characters, as is done by the Catholic missions, will be a great advantage to the future of our establishments. By publications similar to the present, it will raise up young men exceedingly serviceable to the administration, from their complete acquaintance with a legislation the study of which has hitherto been exceedingly laborious.

It would, however, be an error to suppose that the Chinese text can absolutely go out of use, for it will doubtless long remain the only official text. But how much more accessible will it be when it can be compared both with a French version and a version in the vulgar tongue? The latter thus embodied in our Latin characters will open an easy path for the penetration of our civilising ideas; and who knows whether European science, so absolutely unknown to the Far East by reason of the insurmountable difficulty of its terms, may not one day clear its passage by this path? We may be permitted to hope that the section of the Annamite people whose future is now in our hands will by these means acquire an incontestable superiority over the rest of Cochin China; for to fix a language in writing is a revolution to be compared almost with the invention of printing.

The present translation has, therefore, for its main object to be reproduced hereafter in the vulgar tongue, and the author will certainly not regret his labour if it should contribute to draw the Annamites nearer to European and Christian civilisation. But the present and entirely practical purpose is to endeavour to fill up the *hiatus* existing in the administration of native justice. The translator has for the moment no other desire than to assist those of his intelligent comrades who are charged with the difficult and glorious mission of founding a French colony on the confines of China. It is to them principally that he addresses himself; therefore it is that he has sometimes employed terms whose meaning is to them very familiar, which a French paraphrase would have only weakened and rendered obscure. He trusts then that his comrades, in consideration of his good intentions, will be pleased to pardon his numerous imperfections of style, and to accept the work he has the honour to offer them such as it is.

Among the new books to appear within the first fortnight of November, Mr. Murray, of Albemarle-street, announces, in two volumes, with original illustrations, a work which has been looked for anxiously for some months past, viz., *Peking and the Pekingese during the First Year of the British Embassy at Peking*, by Staff-Surgeon D. F. Rennie, M.D. The same publisher has nearly ready another work that will excite an interest in the Far East, *Chinese Miscellanies, a Collection of Essays and Notes*, by Sir John Francis Davis, Bart.

In noticing Mrs. Blackwell's *Game of Quotations from the Poets* in a recent number, reminiscences of our own younger days led us into an error. The series of publications we were adverting to is issued, not by "Dean and Munday," but by "Dean and Son," a firm who are far eclipsing, both in number and importance, any of the publishing feats of their predecessors.

ORIENTAL BANK CORPORATION.

A half-yearly general meeting of the shareholders of this bank was held on the 19th inst., at the offices, Threadneedle-street, City; H. G. Gordon, Esq., in the chair.

The Chief Manager (C. J. F. Stuart, Esq.,) having read the notice convening the meeting,

The Chairman expressed his regret that the dividend which he was about to declare was less than that declared in the corresponding period of last year. The causes lay in a nut-shell, and he would briefly recount them. They were well aware that the year 1864 and a portion of the present year was a period which would be ever memorable in the annals of East India and China banking, as the most disastrous which had occurred for many years. That period was to the directors one of intense anxiety, care, and trouble, such as he trusted they would never see the like again. In this country, about the end of 1863, and at the commencement of 1864, a tremendous fall took place in the value of almost all Indian and China produce. Credit became much contracted, losses of a character exceedingly severe ensued, and eventually failures unsurpassed in magnitude occurred. Scarcely a mail arrived from India or China which did not bring accounts of disasters that had occurred or were occurring. The bank was as it were between two fires, and all that it had to do was to get out of range as speedily as possible. They restricted their business, and being vigorously supported by their representatives in the East, the result was that, although their profits were necessarily much curtailed, they avoided losses which would no doubt have otherwise occurred. Under the circumstances it was impossible altogether to escape loss, but it was certainly far lighter than he had anticipated would be the case. The board in considering those losses had come to the determination that the wisest and the most honest course, as well as the best, was to meet them at once. They had accordingly written them off, and made the most ample provision for all contingencies, besides carrying forward a considerable sum to the next account. (Hear, hear.) He was aware that it was no consolation to fellow-sufferers to know that others had been in the same predicament, and it was with no feeling of that kind that he alluded to the position of a bank having far greater advantages, more facilities for obtaining information, better situated, and with an immense capital—he meant the Bank of Bombay. That bank, which had the means of obtaining the best information, and was armed with great powers, announced at the recent meeting of the proprietors that its loss during the period to which he had been adverting amounted to no less than £300,000, and that it could declare no dividend. He did not now allude to the circumstance from any feeling of invidiousness, but to show that in such times the best managed institutions could not escape loss. He was happy to say that a change for the better had taken place, confidence had returned, and there was every reason to expect a large increase of business; many offers had been made showing how high a position the Oriental Bank Corporation maintained, and he had every hope that when he next met the proprietors, instead of announcing a smaller dividend than usual, he should have to congratulate them on the receipt of a larger one. He concluded by declaring a dividend of 5 per cent. for the half-year ending 30th June last, or at the rate of 10 per cent. per annum. In reply to a Shareholder,

The Chairman stated that the present meeting was simply for the purpose of declaring the dividend, and therefore all questions would be out of place. After an expression of dissent by the shareholder the proceedings ended.

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

An extraordinary meeting was held at the London Tavern on the 19th inst., Mr. Mitchell, M.P., in the chair, for the purpose of declaring an interim dividend for the half-year ending the 30th June last.

Digitized by Google

The Chairman said that, in conformity with their usual custom, the directors had abstained from submitting any statement of accounts to the shareholders. On this occasion it would have been very difficult—indeed, it would have been impossible to prepare a perfectly accurate balance-sheet until all the bankrupt estates in which they were interested had been wound up, and all the properties upon which they held hypothecation had been sold. On the last two occasions when he had met the shareholders, India was passing through the crisis which had lately fallen upon it, and he had recommended that a reserve of £22.000 should be made from their ways and means, in order to meet the losses which they estimated had then been incurred. Since the last meeting the crisis had passed away; but it had been very severe. He was not there to invite any invidious comparisons between themselves and their neighbours; but he might at least say that he believed they had not fared worse than any other bank in the East. As nearly as the board could calculate, their losses had not been severe enough to render it necessary to advise the withholding of a dividend. (Cheers.) By the terms of their charter, they were forbidden knowingly to trench upon the amount of their capital (£800,000), and they had not done that; but unquestionably a serious inroad had been made upon the reserved fund of the bank. Their losses had originated entirely with their branches. So far as he knew, no bad debts had been made at home; but the losses at Bombay, Calcutta, and Shanghai had been serious. He made no charge of dishonesty against their agents at those places; but he did charge them with culpable neglect, remissness, and disobedience of orders. Two of them—the agents at Bombay and Calcutta—had already ceased to be in the service of the company; and a successor had been sent out to supersede the one at Shanghai. Such had been the culpable remissness of their agent at Bombay in one instance, that it was possible, nay, probable, that they might come upon his sureties. The losses in that city had been severe, but so also had been the crisis—indeed, no such crisis had perhaps occurred since the famous South Sea Bubble. It had been caused partly by British and partly by native speculators; and it had culminated in all kinds of frantic projects which had led to enormous losses, for many of those speculations (including a number of new banks) had failed. To give some idea of what had taken place he might quote the price of stock in the Bank of Bombay. On the 15th of January last it stood at 275 premium, and on the 2nd of June it was at 2 discount. (Hear, hear.) That, be it remembered, was a State bank, the Government being interested in it to the extent of one-third of its capital.

A Voice: What is the price now?

Mr. Mitchell: Sixty-five premium; but he could assure the meeting that the prices he had read were correct. (Hear, hear.) With respect to Calcutta he had not much to say. At Shanghai their losses had been incurred in some respects fairly enough; but in the case of some houses which had since failed, he had no hesitation in saying that the agents of this company had allowed it to become the victims of a juggle. The houses in question were well known. They were houses of high repute, and the agent of the bank had let them have drafts at 15 days on Hong Kong, and had taken in exchange bills for 60 days. The consequence was that the bank was "in" for £25,000, and he must say that their agent had been guilty of most culpable rashness. (Cheers.) He believed, however, that now the crisis had passed away, the confidence the bank had enjoyed remained unimpaired; and he did not see why it should not renew its operations with results as favourable as before. (Hear, hear.) It was probable that there would be no recurrence of the crisis for many years to come; and he could only hope that when it did come again their agents would meet it with more judgment and discretion. (Cheers.) He begged to move that an interim dividend at the rate of five per cent. per annum, free of income-tax, be declared, payable on and after the 25th inst. (Cheers.) As he had said before, their reserve had been severely trenched upon, and they must take steps to replace it. He could not, therefore, hold out any hope of a larger dividend, at all events, for the next half-year. (Hear.) In conclusion, he begged to state that, although the directors had had a great increase of anxiety and trouble, they would this year divide only £2.500 amongst themselves instead of £4,000. (Loud cheers.) Their number, he should add, had been reduced by the retirement of Mr. Bell, through the unfortunate bankruptcy of his firm, Messrs. Scott, Bell, and Co. Mr. Bell had been with them from the beginning, and a more honest, faithful, or energetic director could not be. The bank would not lose any sum of the slightest magnitude by his failure, and it would very likely not lose anything by it at all. (Hear.) The resolution having been unanimously agreed to, Mr. W. H. Manson moved a vote of thanks and confidence in the board, which was carried with acclamation, and, after a few words in reply from the Chairman, the meeting broke up.

Manchester Chamber of Commerce.—A quarterly meeting of the Chamber was held on the 19th of October, and there was a very large attendance, including Mr. Bazley, M.P., and Mr. Pender, M.P. The President (Mr. M. Ross) spoke of several matters to which the directors had paid attention during the quarter, and mentioned that three gentlemen connected with the Chamber had consented to represent it at the Vienna International Trade Commission, where their services would be required in the course of a month or six weeks. Mr. Michell, Attaché to the British Embassy at St. Petersburg, had sent some samples of Russian fabrics to the Chamber, and would attend next week to offer explanations concerning them. It did not appear that Russian manufacturers had anything to fear from the competition of English ones, Russian prices being much lower than ours. A subject just now much discussed in Indian newspapers and in private letters was the export of mildewed goods from England to the East. It was suggested by the Board of this Chamber that a commission of six should be appointed to inquire into and report upon the subject of mildew. He (the President) had been called in to inspect goods which had been returned as mildewed, and had found that they were not mildewed, and that the certificates stating that they were so had been improperly granted. Another question touched upon was the supply of cotton, which remained extremely problematical. It would be a bold thing to venture upon prophecy, but he would venture so far as to say we were prepared to consume in this country as much cotton as the world would produce during the next three or four years. Mr. Bazley, M.P., said he was glad to hear the President's remarks about mildewed cloths, and hoped his testimony would rescue the trade from charges that had been brought against it. He exceedingly regretted to hear of this recrimination from India.

Singular Accident to Chang Woo Gow.—On the 23rd a singular accident happened to Chang Woo Gow, the Chinese giant. Hitherto the managers have contrived to transport their gigantic charge to and from the Egyptian-hall without permitting him to be seen by the inquisitive eyes of the public. But on Monday morning all the precautions were frustrated by a singular accident. As the vehicle containing the Chinese party neared Westminster Abbey the weight of Chang proved too much for the carriage, the bottom of which suddenly gave way, precipitating the whole Celestial party into the mud. Chang bore the accident with his usual philosophical equanimity, but poor little Chung Mow was sadly disturbed by his sudden plunge into the mud, and the wife's modesty was seriously offended. However, they contrived to scramble upon the seats, and managed to retain their position in the dilapidated vehicle until they were safely deposited at the Egyptian Hall.

New Dangers in the China Seas.—Captain Richer, of the ship *Immaculée Conception*, recently arrived at Havre, reports:—"I think it right, in the interest of navigators, to give information of a danger I discovered in the channel which separates the Pescadores Islands from the Western Coast of Formosa, in the Chinese seas. The danger consists in a very extensive line of breakers, on which the sea beats with great fury. It is situated, according to close observations taken at the moment we perceived it, in 23 deg. 47 min. 50 sec. north latitude, and 117 deg. 42 min. 10 sec. east longitude, from Paris. The English and French charts I possessed make no mention of the danger, with the exception of the English one of Imray and Son, which records danger at a distance of twenty-five miles, and fifteen miles more to the north, but does so doubtfully. The breakers referred to are very dangerous, for they stand almost in the middle of the passage between the Pescadores Islands and the West Coast of Formosa, and this passage is almost unknown."

Railways and Telegraphs in China.—The *France*, Paris journal, says that the "Chief of the Bureau of Sciences and Arts of Peking" has made a favourable report on the question of railways. This curious document, we are told, pronounces steam to be without danger for the population, and says that the establishment of railways may be authorised without inconvenience. It is therefore expected, says the writer in question, that concessions for several lines of railway will shortly be made to European companies. As to the electric telegraph between Peking and St. Petersburg, he adds, it is expected that it will be terminated in four or five years.

Major Bayly, R.A.—We regret to announce the sudden death of Major N. S. Keats Bayly, superintendent of factories of the South-Western district, which took place on the 18th inst., at Priddy's Hard, near Gosport. The deceased was at his duties on Tuesday, the 17th inst., in apparently his usual health. Major Bayly was brother-in-law to Colonel Gordon.

Mr. Henry Sewell, paymaster, Royal Navy, who during the past year has been residing at Sarawak, cultivating the land, &c., of the Dyaks, has been compelled to return to England in consequence of ill health.

Monetary and Commercial.

—o—

There has been considerable activity in the silver-market, owing to the demand for India. During the whole of the present month upwards of £1,200,000 will have been sent to Bombay and Calcutta, chiefly the former, of which about three-fourths will have been shipped *via* Marseilles. The engagements for the next Bombay mail, *via* Marseilles, which is to sail on the 5th of November, are already large, and it may be expected that over half a million sterling will be taken out by that opportunity. The price has advanced to 61¼d., both from here and from Marseilles. There appears to have been a large stock of silver in France, or the rise would have been more decided.

The biddings for £230,000 in bills on India took place at the Bank of England. The proportions allotted were—to Calcutta, £98,200; to Madras, £41,800; and to Bombay, £90,000. The *minimum* price was, as before, 1s. 11¼d. on Calcutta and Madras, and 1s. 11⅜d. on Bombay. Tenders on Calcutta and Madras at 1s. 11⅜d. will receive about 47 per cent., and on Bombay at 2s. about 19 per cent. Above these prices in full. These terms show a further increase in the demand for means of remittance to the East.

According to the Circular of Mr. F. M. Page, bullion broker, the export of September was as follows:—

	Mexican dols.	Bar Silver.	Total.	Total from Jan.
China	£48,240 ..	9,785 ..	58,025 ..	811,112.
Singapore, Penang, &c.,	71,700 ..	— ..	71,700 ..	531,539.
Ceylon	— ..	— ..	— ..	9,086.

The amount to China in the first nine months of 1864 was £1,548,966, and to Singapore, &c., £811,131.

At a meeting of the shareholders of the Chartered Bank of India, Australia, and China, an interim dividend for the half year, at the rate of 5 per cent. per annum, free of income-tax, was declared.

A meeting of the Oriental Bank shareholders has also been held, and a dividend declared of 5 per cent. for the half-year. The report of the meetings will be found in another column.

☞ In reference to the remarks in our issue of the 10th on the affairs of Messrs. Lindsay and Co., we have now to announce that Messrs. Springfield and Messrs. Carter have accepted the bills in question, held by the Bank of Hindustan. We presume that all obstacles to the settlement of their affairs are now removed.

We observe that six ships have left Callao for Macao, we presume with guana, according to the announcement in our last that guana was again to be tried in China.

The report of the Royal Mail Steam Company, presented on the 25th inst., states that, owing to the discontinuance of the temporary arrangement for the Honduras service, and a decrease in the receipts for freight, the available surplus for the half-year ended the 30th of June is £15,439 less than was that of the corresponding half of 1864. All the items of the passenger traffic, however, exhibit an increase, and as the diminution under the head of freight is simply in the shipments of treasure in connection with Brazil and California, which in 1864 were exceptionally large, the present account, looking at the increase of competition by other lines of steamers, is regarded as very satisfactory. The insurance fund has not been reduced by any casualty during the six months, and now amounts to £243,382. For the current half-year it will have to be debited with the damage occasioned by the fire on board the *Seine*, which was prevented from becoming a serious disaster by the high conduct of Captain Revett and those under his command. A dividend is recommended of £4 per share, and a bonus of £2 from the insurance fund.

The half-yearly meeting of the Credit Foncier and Mobilier of England was held on the 24th inst. at the London Tavern, the Right Hon. James Stuart Wortley in the chair. The report of the operations of the company, which was of a very gratifying character, had been previously circulated, and the chairman, in moving its adoption, congratulated the shareholders on the satisfactory results which have been achieved. He then adverted to the different features of the report, and gave explanations of their bearing on the prospects of the company. The result had been that the directors were enabled to declare a dividend of 20 per cent. for the half-year, or at the rate of 40 per cent. per annum. The Chairman also alluded to the rumours that had been circulated to the prejudice of the company, observing that this was only one of the penalties to which all new and successful systems were exposed. A cordial vote of thanks was passed to Mr. Grant, M.P., the managing director. In conformity with a resolution adopted at the meeting, the directors have announced the issue of 100,000 new shares of £20 each, on which only £5 per share will be called up, by instalments extending to the 1st March next. 50,000 of these shares are to be reserved for the shareholders at a premium of £2. 10s. per share, and to be allotted in the proportion of one new for every two shares held, and the remaining 50,000 to be subscribed for by the public at a premium of £3. 10s. per share. This would throw £300,000 into the reserved fund, raising to £500,000.

The following in relation to the working of the Indo-European Telegraph tends to confirm the suspicions previously excited :—

"71, Old Broad-street, E.C., Oct. 18.

"Sir,—As an illustration of the manner in which the Indo-European Telegraph line is worked, we beg to inform you that we are this day put in possession of a telegram, dated Bombay, October 4, while other messages were in town yesterday dated October 6, and at the same time in Liverpool they had advices to the 9th of October. How did our telegram get behind these on the file?

"We have strong reasons for supposing that messages to certain firms here and abroad are wilfully detained, or altogether suppressed. Owing to the number of telegraph lines used in sending any one message, it is difficult to say where such things are done, or who perpetrate the ingenious mutilations in messages that occur daily; but we think that the English companies who forward them from this should, in their own interest, make some attempt to solve the mystery. If the Indian line were creditably worked, its revenue would certainly be enormously increased.—We are, Sir, your obedient servants. "Crawford, Colvin, and Co."

The new companies formed of late comprise the following :—

The Tyne General Engineering Company (Limited), capital £100.000, in 10,000 shares of £10 each. The object is to supply the demand for marine engines, and hydraulic and other machinery, at Newcastle-on-Tyne; where, it is stated, the existing facilities are very inadequate, owing to the extension of the trade of the port.

The prospectus of the Household Patents Company (Limited) is issued, with a proposed capital of £100.000, in 50,000 shares of £2 each, of which one-half are to be issued in the first instance. It is explained that this company is established "for the manufacture and sale of articles chiefly of domestic use, and mostly protected by patents, and will comprise within its operations improvements in the construction of dwellings, and in their lighting, ventilation, and drainage; the preparation of all descriptions of food; the manufacture and economical use of fuel; and the most recent improvements in kitchen and other household furniture."

The Liverpool Shipbuilding Company (Limited). This company is formed to acquire the Steel and Iron Shipbuilding Works of Messrs. Jones, Quiggin and Co., in Sefton-street, Liverpool, to purchase an adjoining tract of freehold land from Messrs. Freme, of about 14 acres in extent, to construct thereon a large Graving Dock, Building Slips, and Shipbuilding Yard, and by a combination of capitalists interested in the trade who have subscribed largely for the purpose, to extend the existing concern into one of the most lucrative businesses in Liverpool.

The Metropolitan Parcels Delivery Company (Limited) propose to raise a capital of £20,000, in 4,000 shares of £5 each. The object is to take up the business of the Metropolitan Parcels Delivery, and to convert it into a limited liability company. The business has hitherto been carried on by Messrs. Bolton and Ambler, who are to be paid £4,000 in cash by easy instalments, and 400 fully paid up shares.

The Coffee, Cocoa, Cotton, and General Produce Freehold Estate Company of Venezuela, to carry out their arrangements, require a capital of £200,000, in 10,000 shares of £20 each. The properties which it is contemplated shall be developed are stated to be very valuable, and through the facilities which will be afforded by railway and other conveyance, the prices hereafter to be obtained will be considerably enhanced.

The amount of bullion by the P. and O. Company's steamer *Syria*, from Southampton on the 20th inst., was:—In gold, to Madras, £2,216. In silver, to Calcutta, £25; to Hong Kong, £9,700; to Yokohama, £325. Total in gold, £2,216; in silver, £10,050.

ARTICLES OF IMPORT.

Tea.—Sales have been made to a large extent of good and fine Kaisows from 2s. to 2s. 8d. per lb. (a few superior realising 2s. 9d. to 3s. 1d. per lb.), nearly the whole of the quantity arrived having been sold. At first the new Monings and Wopaks met with much less attention, and the opening prices of 2s. 4d. to 2s. 6d. were relatively cheap, but latterly the demand has extended to these also, and large sales have been made at from 2s. 2d. to 2s. 9d. per lb. for good to finest qualities. The new Scented Teas have met with less attention than usual, but Green Teas have sold readily at very extreme prices. In broken-leaf and dusty kinds of Congou the few sales made have been at former prices, as also the fair to good common qualities. The fair to good kinds of old Import show no material change. Good to fine Kaisows of new season have been sold to a larger extent than for some years past, at prices ranging from 1s. 11d. to 2s. 3d. for good, and 2s. 4d. to 3s. for fine to finest, closing at the highest quotations. In common to fair blackish-leaf kinds but little has been done, and prices remain nominally as before. There has been rather more inquiry for the medium qualities of old import, from 1s. 3d. to 1s. 5d. per lb., but the trade find it difficult to get quality to their mind. The new Monings and Wopaks have sold freely at from 2s. 2d. to 2s. 4d. for good kinds, and from 2s. 5d. to 2s. 9d. for fine to finest. Further sales of new-make Canton kind have been made at from 1s. 8d. to 2s. 4d. per lb. The export demand for Oolongs of common to fair kinds still continues, and prices are fully supported; good to fine of new season have sold from 1s. 10d. to 2s. 6d. per lb., the quality being better than last season. The few

Digitized by Google

Souchongs of new season to hand have not sold freely, the prices realised have been up to 2s. 10d. per lb. In old season's there is no change to notice. Flowery Pekoes show no improvement. In Scented Teas there has been a moderate amount of business, they having met with less attention than in former years, and prices have ruled in favour of buyers, both for Capers and Orange Pekoes. The decline being about 2d. per lb. in fair to good Capers, and 1d. to 2d. in Orange Pekoes, and the demand is still languid, even at this reduction. The further arrivals of Uncoloured Japan have sold with great spirit, and prices may be quoted at 1d. to 2d. per lb. higher. The Public Sales of Indian Tea have passed off at very good prices. In Green Teas there has been a large business done, the arrival of the Cissy and Fire Queen having given a better assortment. The prices realised have been very high, but the last day or two there has been less eagerness to buy, and a slight reduction from the extreme rates must now be quoted. Hysons, Young Hysons, Imperials, and Gunpowders were all taken freely, but the highest relative prices were paid for Young Hysons and Imperials. Good Canton Gunpowders have sold 1d. to 2d. per lb. higher, but the common to fair kinds remain as difficult of sale as ever. For uncoloured Japans prices have further advanced, and the Dora's cargo sold quickly, common grades showing 8d. per lb. and medium to fine 4d. to 6d. per lb. advance on prices ruling six months since. There have been two public sales: one, of China growth, on the 17th inst., at which 7,360 packages were offered, and 5,930 found buyers; the other of private India growth, on the 24th inst., 775 packages offered. Messrs. Sillar and Bateman's circular estimates the arrival of tea up to 31st December at 36,000,000 lb., against a demand of 26,000,000 lb.

Silk.—Business in China Silk continues active, and prices have still an upward tendency; chop Tsatlees are much sought after, and 30s. has already been paid for No. 3, while some importers decline to sell even at this rate. Japan Silk is taken readily both for arrival and on the spot, and prices of the better descriptions of Mibash are dearer. Deliveries, from the 1st to 24th inclusive:—China, 2,595 bales, Japan, 845 bales; total, 3,440 bales. Quotations see first page.

Cotton.—Since our last there has been a lull in the demand, and at the end of last week a good portion of the advance of ½d. to 1d. had been lost. During the week we note sales in London of 30 bls. of China, good, at 18¾d.; 30 bls. Japan at 19¼d., good fair; and 1,330 bls. Tinnivelly at 17¾d. to 20d. for middling fair to good. The stock in London on the 20th, was 42,174 bls., against 82,860 bls. last year; of this quantity the China and Japan formed 5,112 bls., against, 3,889 at the same time last year. The Woosung has arrived at Liverpool from Shanghai with 2,409 bls., and the Mirage, in the Thames, from Japan, with 589 bls. During the present week there has been only a limited inquiry, and prices tend in favour of buyers. On the 22rd, 150 bls. Tinnivelly, went at 19d. for fully fair. The following were the official quotations at Liverpool at the close of last week:—Fair Orleans, 25½d.; middling, 24d.; middling uplands 23¾d. China and Japan had been in fair request at rather higher rates. On the 24th there was a very moderate demand, and a very flat market at ¼d. per pound decline. The cargo of the Woosung had not yet been brought on the market, but has been sampled to be worth 17¼d. to 17½d. per lb. The cotton afloat to Europe on the 20th was 206,394 bales, against 448,372 in 1864. The arrival of the two vessels above named brings to port all that was known to be afloat from China or Japan. The total stock in Liverpool on the 20th was 280,370 bales, against 531,500 bales in 1864.

Sugar.—The demand continued steady during the whole of last week, establishing in some cases a slight advance on those of the previous week. By private contract, on the 20th, 10,000 bags unclayed Manila (Taal) went at 30s. to 30s. 6d. During the present week business has been restricted by the small supply offering, and the market continues firm.

Coffee.—At public sale on the 20th, 230 bags good ordinary Mysore brought 70s., and 30 casks 600 bags Native Ceylon were partly sold, ordinary mixed at 61s. to 61s. 6d. During the present week full terms have been paid, and a steady demand prevails for all qualities. At auction on the 24th 254 casks and barrels Ceylon sold at 75s. 6d. to 88s. for fine ordinary to middling plantation.

Rice.—Bengal descriptions are firmly held this week, and for soft grain stiffer rates are paid.

Cardamoms.—Steady; of 7 cases of Malabar at auction 2 of seed alone sold at 3s. 6d. per lb.; 2 bags Madras sold at 3s. 6d. for middling lean; and 18 cases Siam, wild, retired.

Camphor.—Market quiet, with very little trade; China in lead offering at 95s. per cwt.

Cassia Lignea is again considerably dearer, with good business up to 107s. 6d. per cwt. even for mouldy. Buds: Nothing of any consequence doing.

Cinnamon (Ceylon).—We quote 1st sort 1s. 7d. to 2s. 9d. per lb.; 2nd, 1s. 5d. to 2s. 4d.; 3rd, 1s. 4d. to 1s. 10d.; 4th and Jungle, 1s. 1d. to 1s. 5d. Very firm. The Quarterly Sales (small) will take place on Monday, 30th inst.

Cocoa Nut Oil.—This market has been steady, with continued good demand, and large business for arrival as well as on the spot, without material variation in terms: 160 casks Cochin, 170 Ceylon, 169 Sydney, and 18 Madras, at auction. Cochin, £47 to £50. 10s.; Ceylon, £45 to £48.

Drugs.—Cubebs: Quiet; of 66 bags at auction three-fourths sold at 82s. 6d. per cwt. Dragon's Blood: Steady; 3 cases sold at auction at £5. 17s. 6d. per cwt. for fair lump. Galangal Root: Nothing of any consequence doing. Rhubarb: Is very firm at the high rates lately established; only 18 chests at auction; one-fourth sold at 4s. 1d. per lb. for inferior small.

Gums.—Benjamin: Recent arrivals of Siam; 124 cases brought to auction, and all sold; the very fine and the common brought fully former terms, whilst the intermediate qualities declined £3 to £5 per cwt.; first quality ranged from £45 to £51; second, £36. 10s. to £42; third, £27 to £32; seed drop in block, £23 to £23. 10s.; dark gum, rather marbled, £21 to £24. 15s.; dust, &c., in block, £13 to £16. 10s. Sumatra: Quiet; 42 cases all retired. Damer: Firm, and in request, with little offering; no auctions. Gamboge: Is 10s. to 20s. per cwt. dearer; 83 cases sold at auction at £10 to £11. 5s. for middling to fair pipe, and £9. 5s. broken.

Gutta Percha.—Quiet, but firm; six cases at auction retired. Quotations, 1s. to 2s. 3d. per lb.

Hemp (Manila).—Has, owing to strong export demand, experienced further and material advances in value, the total rise being fully £5 per ton, with large business; only 426 bales at auction, and the bulk retired. Quotation, £42 to £45 per ton.

Horns (Deer).—Only 3 tons Bombay at auction sold at 49s. to 51s. per cwt. for 1½ to 1¾lb. average, being firm.

India Rubber.—Participates, though in a very moderate degree, in the advance in Para and West India Rubber, and some little business has been done up to 1s. 6d. per lb. for fine Java.

Japan Wax.—Steady; of 118 boxes at auction two-thirds sold at 62s. per cwt. for middling block.

Oils.—Aniseed: Moderate business at 7s. 9d. per lb. Sales advertised. Cassia: Sales to a tolerable extent effected both on the spot and for arrival at 7s. 9d. per lb. Cinnamon: A single case sold at auction at 3s. 3d. per oz. Mace and Nutmegs: Two cases Oil Nutmegs at auction retired: 7 boxes Expressed sold at 2d. to 2¼d. per oz.

Pepper.—Black: Singapore again a mere turn dearer; 823 bags Singapore sold at auction at 3¼d. to 3⅜d. per lb., and fair business done privately upon corresponding terms. White: Not any business of interest doing.

Spices.—Cloves: Nothing doing in Penang: Amboyna steady; 6 casks sold at auction at 5d. per lb.; Zanzibar rather cheaper, and of 1,120 bags offered three-fourths sold at 3d. to 3¼d. for middling to very fair. Mace: In much demand and dearer; good business done privately, but auctions unimportant. Nutmegs: Firm; only 16 cases Penang at auction, and one-fourth sold at 1s. 1d. to 1s. 2d. per lb. for ordinary small; not much business done privately.

Sago.—Not any transactions of interest to notice. Flour: Limited business upon former term.

Terra Japonica.—Cutch, Pegue: Steady, but quiet; 400 bags and 15 tons damaged at auction, sold at the previous value. Gambier: Rather cheaper; of 3,171 bales at auction, one-third sold at 26s. 6d. to 27s 9d. per cwt. for cubes, and 20s. 6d. to 29s. 9d. block.

Tin.—Subsequently to our last report Straits went back to £90 per per ton cash, but have since steadily advanced, and are now worth £93, very large transactions accompanying the advance; for arrival sales have been effected at £92 to £94. 5s.

Miscellaneous.—Blacklead: Firm, and dust again dearer; of 503 barrels at auction half sold at 19s. 6d. per cwt. for good lump, and 9s. 6d. to 10s. 6d. dust. Arrivals and sales advertised. Galls: Very little doing; 109 bales Turkey, and 48 boxes China at auction, all retired. Ebony Wood: Steady; 19 tons Ceylon at auction sold at £10. 2s. 6d. to £11 per ton. Musk: Without change; 5 caddies Tonquin at auction retired, and 11 caddies Cabardine sold at 10s. 9d. per oz. Rattans: Quiet: and of 5,071 bundles Singapore, 1,278 bundles Calcutta, and 959 bundles Akyab at auction, only one-third sold at 3s. 2d. to 6s. 6d. per 100 canes. Sapan Wood: Continues to command high prices, being very scarce and wanted. 2 tons damaged Siam sold at auction at £18. 12s. 6d. per ton. Soy: Of 20 casks new at auction, a few sold at 3s. 9d. per gallon, and that price obtained privately also. Star Anniseeds: Very scarce; only 5 boxes at auction retired at £10 per cwt. Sticklac (Siam); Steady; of 1,000 boxes at auction, two-thirds sold at 29s. to 37s. 6d. per cwt. for ordinary woody to middling broken and dusty, and 28s. to 30s. 6d. broken block; limited business privately upon similar terms. Vermilion: Scarce and dearer; 3s. 6d. per lb. offered for a few cases.

ARTICLES OF EXPORT.

Iron.—The quotations in London are for Welsh bars, £7 to £7. 5s.; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10; sheets, single, £10. 10s. to £10. 15s.; Staffordshire bars, £8. 10s. to £9. 10s.; rails, £7 to £7. 5s.

Steel.—Swedish keg, £15.

Copper.—Sheet and Sheathing, £96 to £98 per ton; yellow metal, 8¼d. per lb.

Tin.—94s. for block; 95s. for common bars. Tin plates, best charcoal, I.C. 30s. to 32s.

Lead, &c.—English pig, W.B., £21. 5s.; shot, patent, £22. 15s.; sheet, £20. 15s.; spelter, £20. 15s. to £21. 5s.; zinc, English sheet, £27. 10s.; quicksilver, £7. 18s. 6d. to £8.

The following is from the Circular of Messrs. French and Smith:—We have had considerable activity in nearly all descriptions of metals. Iron is generally firm, and for some descriptions of manufactured, higher rates are asked. Scotch pig iron is a little easier. In copper there is a good deal of improvement, and the smelters have declared an advance this day of £5 per ton. They generally are very full of orders. Tin: English is firm at full quotations. Banca is 95s. to 96s. Straits, 92s. Lead is much improved in value, and stocks are very low. Spelter rather higher in price, but not much doing.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

	Gold.	Silver.
Shanghai	—	£170,328

MANCHESTER MARKETS.

The last circular of Sam Mendel states:—Business has gradually become much more restricted, while prices do not show much alteration. There is more disposition to make sales at some moderate concession, but not sufficiently so to induce purchases to any noticeable extent. Quotations: Grey Shirtings, 8¼ lbs., 19s.; Cotton Yarn, Nos. 16-24, 2s. 4d. to 2s. 5d.; Maddapollams, 7s.; Long Cloths, 18s.; T-Cloths, 12s.; Spot Shirtings, 20s.; Brocade do., 20s.; Damasks, 35s.

FREIGHTS AND CHARTERS.

Owing to the unsettled state of the money market and the wet weather which has generally prevailed, the shipping business has been much depressed during the last few days. Our quotations below for coal and iron show some slight improvement.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 35s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £41 and £2. For Shanghai: £50 and £2. 10s. For Manila: 35s. For Batavia: £30 and 27s. For Singapore: £31 to £32 and 29s. to 30s. For Galle: £27 and 25s. to 26s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have invited tenders for the conveyance of 10 tons naval stores to Trincomalee, and six tons clothing to Hong Kong, both from the River Thames.

CASUALTIES.

The Blanch (brig), from London for Colombo, was spoken with on the 9th October in lat. 47 N., long. 10 W., with loss of jibboom, foretopmast, and mainroyalmast.

The Baron Bentinck (s.), from Clyde for Batavia, put into Queenstown with damage to machinery.

The Zeenimph, Roggen, from Texel for Batavia, while riding at anchor off Deal, Oct. 22, slipped 45 fathoms of chain and one anchor to clear a collision, and was supplied.

MISCELLANEOUS.

At ASCENSION.—Sept. 4, from Colombo, Geelong, and sailed for ——; 8, from Singapore, Hyppolyta, and sailed for London; 14, from Colombo, Jane Pardew, and sailed 16 for London.

Off ASCENSION.—Sept. 4, from Manila, Manila; 6, from Shanghai, Lalla Rookh.

At ST. HELENA.—Sept. 14, from Batavia, Noord Brabant, Loos, and sailed for Rotterdam.

At SIMON'S BAY.—Sept. 6, Tekla, Kier, and sailed for Singapore.

69, COLEMAN-STREET, CITY, and 21, DUKE-STREET, EDINBURGH.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had received a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words "DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

THE CAPE, INDIA, AND CHINA AGENCY.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of Fifty Pounds for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,
WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,
24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, in all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot of 12, RUE RICHER, PARIS.

JOHN GOSNELL and Co's Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S OINTMENT AND PILLS have over and over again proved the best friend to persons afflicted with ulcerations, bad legs, sores, abscesses, fistulas, and other painful and complicated complaints. Printed and very plain directions for the application of this Ointment are wrapped round each pot. Holloway's alterative Pills should be taken throughout the progress of the cure, to maintain the blood in a state of perfect purity, and to prevent the health of the whole body being jeopardised by the local ailment. Bad legs, old age's great grievance, are thus readily cured, without confining the patient to bed, or withdrawing him from the nutritious diet and generous support so imperatively demanded when weakening diseases attack advanced years or constitutions evincing premature decrepitude.

Secretary.—ALFRED LOWE, Esq.

OFFICES—17 and 18 CORNHILL, E.C.

PROSPECTUS.

The marked success which has attended the operations of the Credit Foncier and Mobilier of England (Limited) is almost unexampled in the history of any commercial undertaking.

The results of its operations have been so satisfactory that, as will be seen by the half-yearly report just issued, a dividend and bonus, up to the 30th September, at the rate of 40 per cent. per annum, has been declared, being the same dividend and bonus as was paid for the previous half-year.

Besides these unprecedented results, the Company is in the possession, up to 30th September, of a general reserve fund of £200,000, of a dividend reserve fund of £100,000, and has profits in hand up to the same period, after paying the above-mentioned dividend and bonus, of £50,805. 4s. 9d., the paid-up capital being £500,000, making in all £850,805. 4s. 9d., or above £8. 10s. per share.

The following is the business transacted by this Company:—

This Company negotiates Loans for Colonial and Foreign Governments.
Co-operates in the financial arrangements of British and other Railways.
Makes advances to Corporations, Town Councils, and other public bodies.
Negotiates Loans for Public Works.
Assists in the introduction of Industrial and Commercial Undertakings.
Makes advances upon approved Stocks, Shares, Bonds, &c,
Makes temporary loans upon eligible freehold and leasehold securities, and generally transacts such other financial business as is suitable to the capitalist, whether as principal or agent.

The greatly increased and still increasing amount of business offered to this Company, both by eminent private firms, companies, and corporations, has decided the Court of Directors to make their second issue of shares, by allotting the remaining capital of the Company, consisting of 100,000 new shares, on which £5 per share only is intended to be called up.

These 100,000 new shares the Directors propose to issue as follows, viz.:

50,000 shares will be issued to the shareholders in this Company who stand registered on the books of the Company, to be allotted to them at a premium of £2. 10s. per share, in the proportion of one new share for every two shares now held; and

50,000 shares will be issued to the general public (including such shareholders as may wish to apply for shares in addition to those they are entitled to as shareholders), to be allotted at a premium of £3. 10s. per share.

The premiums to be received upon this issue will amount to £300,000, which will be added to the £200,000 already standing at the credit of the general reserve fund, and will thus increase that fund to £500,000. The dividend reserve fund being £100,000, the paid-up capital will then be £1,600,000.

The new Shares will be paid up as follows:—

On those issued at £3. 10s. per Share premium to the Shareholders:—

£1 0 0 per share on application; being on capital account.
1 10 0 per share on allotment; £1 being on capital account, 10s. on premium account.
2 10 0 per share on 1st January, 1866; £1. 10s. being on capital account, £1 on premium account.
2 10 0 per share on 1st March, 1866; £1. 10s. being on capital account, £1 on premium account.

£7 10 0 being £5 capital, £2. 10s. premium.

On those shares issued at £3. 10s. per share premium to the general public, the following will be the mode of payment:—

£1 0 0 per share on application; being on capital account.
2 10 0 per share on allotment; £1 being on capital account, £1. 10s. on premium account.
2 10 0 per share on 1st January, 1866; £1. 10s. being on capital account, £1 on premium account.
2 10 0 per share on 1st March, 1866; £1. 10s. being on capital account, £1 on premium account.

£8 10 0 being £5 capital, £3. 10s. premium.

These 100,000 new shares will participate in the next distribution of profits, pro rata with the existing shares, according to the amount of capital paid up thereon; the valuable option will be, however, reserved to the holders of these shares of paying upon any of them the whole of the above instalments at any time previous to the date of the last instalment, viz., 1st March, 1866, on paying the Company back interest from the date of such payment to 30th September last, at the rate of 20 per cent. per annum on the £5 on capital account; the shares so paid up to be then entitled to the same amount of profits next half-year as is declared on the existing shares.

Interest at the rate of 20 per cent. per annum will be charged on all instalments not punctually paid; and any instalment not duly paid will render the previous payments liable to forfeiture.

The Directors are aware that in thus admitting the public to subscribe for shares at a price so much below their real value they are departing from the practice generally adopted in an issue of new shares, of offering the whole of them to the shareholders; but the Directors are so impressed with the importance of increasing the area of influence of this Company—influence secoad only in importance to capital to a Company like the Credit Foncierd and Mobilier of England—and have had such proofs in the result of the issue of shares a year ago of the sound policy of admitting the public to a participation in such issue, that they feel confident of obtaining the approval of the shareholders in the course they have adopted.

The following calculation will guide investors in estimating the intrinsic value of the shares, after the dividend and bonus now declared are paid, and when the issue is completed:—

The capital paid up will amount to	£1,000,000 0 0
The General Reserve Fund ...	500 000 0 0
The Dividend Reserve Fund...	100 000 0 0
In hand, profits not divided ...	50,805 4 9
	£1,650,805 4 9

Equal to above £8. 5s. per share on the whole 200,000 shares.

So that the public, on subscribing at £8. 10s. per share (being £5 capital and £3. 10s. premium), are being admitted partners in this Company by only paying 5s. per share premium, as premium; £8. 5s. per share being actually represented in value in the assets of the Company. Over and above these advantages, there is the probable enhanced value which will attach to these shares, in the same way that the shares issued to the public at £2. 13s. 4d. premium in September, 1864, after having received £1 per share in April last as dividend and bonus, are now worth £5. 5s. per share premium, making together £6. 5s. for what they paid £2. 13s. 4d. for, being in one year more than 140 per cent. increase in value on the amount paid for premium.

The Directors feel that with a paid-up capital of £1,000,000, a general reserve fund of £500,000, a dividend reserve fund of £100,000, making a total of £1,600,000, they will be in a position to meet the exigences of any business that may be brought before them; it is, however, the intention of the Directors to increase, out of future profits, the dividend reserve fund to £200,000, being in accordance with the plan announced in the last report, to have always in hand one year's minimum dividend at 20 per cent. per annum, calculated on the amount of the capital paid-up for the time being.

The Directors further wish to place on record their deliberate opinion and conviction that this Company is destined in a very short period to take a foremost place among the leading monetary institutions of the country.

Applications for shares may be made in the form annexed, and must be accompanied by the payment of £1 per share. Should a less number be allotted than is applied for, the sum paid on account of such application will, so far as it will extend, be applied in payment of the sum due on allotment.

Prospectuses, forms of application for shares, and copies of the half-yearly report, just published, may be had on application to the Bankers, Solicitors, Stock Brokers, or of the Secretary at the Offices of the Company, 17 and 18, Cornhill, E.C.

The lists of application for shares will be closed on Thursday, the 2nd November, at 4 o'clock, for London, and on Friday, the 3rd November, at 12 o'clock, for country applications, before the expiration of which time all applications must be made.

London, October 20, 1865.

Form C.—General Public.

THE CREDIT FONCIER and MOBILIER of ENGLAND (Limited).

NOTICE IS HEREBY GIVEN, that the LISTS of APPLICATION for the NEW SHARES in this Company will be CLOSED on THURSDAY, the 2nd November, at Four o'clock, for London, and on FRIDAY, the 3rd November, at Twelve o'clock, for Country applications, before the expiration of which time all applications must be made. By order.

ALFRED LOWE, Secretary.

17 and 18, Cornhill, London, Oct. 24, 1865.

THE CREDIT FONCIER and MOBILIER of ENGLAND (Limited).

At a MEETING of the Shareholders of this Company, held THIS DAY (Tuesday), the 24th October, 1865, at 11 o'clock A.M.,

The Right Honourable JAMES STUART WORTLEY, Governor, in the Chair,

It was proposed, seconded, and carried unanimously:—

That the Balance-sheet and Report be, and are hereby approved, confirmed, and adopted.

It was also proposed, seconded, and carried unanimously:—

That the best thanks of this Meeting are due, and are hereby given, to the Governor, Deputy-Governors, and Directors, for the great care and attention they have given to the interests of the shareholders, and for the extremely satisfactory results which have arisen therefrom.

It was also proposed, seconded, and carried unanimously:

That the cordial thanks of this meeting are eminently due, and are hereby offered, to Albert Grant, Esq., M.P., the managing director, for the talent displayed by him in the administration of the affairs of the Company.

It was futher proposed, seconded, and carried unanimously:

That the thanks of this meeting be given to Alfred Lowe, Esq., Secretary, for his unswerving attention; and to him and the other officers of the Company for their industry and zeal during the past half-year.—By order of the Court of Directors,

J. STUART WORTLEY, Governor.
ALFRED LOWE, Secretary.

17 and 18, Cornhill, London, Oct. 24, 1865.

THE CREDIT FONCIER AND MOBILIER OF ENGLAND (LIMITED).

The PROSPECTUS and FORMS of APPLICATION for the SHARES of the NEW ISSUE of CAPITAL of this Company are NOW READY, and, as well as copies of the Half-Yearly Report and Balance-sheet, can be obtained at the Company's Offices.

17 and 18, Cornhill, London, Oct. 24, 1865.

ALFRED LOWE, Secretary.

JAPAN.

The following telegram was published on the 2nd inst. Private mercantile telegrams were received on the 30th Oct.:—

SHANGHAI, Sept. 21.

The quarrel between the Tycoon and Prince Nagato has been settled.
A plot to murder the former has been discovered.
It is rumoured that Sir Harry Parkes' negotiations with the Japanese Government have been well received.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Syria, from Southampton, Oct. 20.—To Shanghai: Miss Reynell and one second-class passenger. To Hong Kong: Mr. and Mrs. Hermann, infant, and European servant, Dr. Knife, Lieut. Luard, R.N., Captain E. B. Chase, and one second-class passenger. To Ceylon: Mr. R. Massie, Lady Chichester, and European servant, Mr. and Mrs. Wright and two children. To Calcutta: Messrs. G. O. Beeby, and A. Gordon, Mrs. Waddington, Miss McKenzie and native servant, Mrs. Tierney and infant, Mrs. Harrington, Surgeon and Mrs. Barnard, two children, and European servant, Mrs. Colonel Nicolls, two children, and European servant, Messrs. J. C. and W. Martin, Low and Odling, Mrs. Mallock, infant, and European servant, Miss Brook, Mr. A. Tween, Mrs. Spilbury, Miss Whishaw, Messrs. A. Broadfoot and H. St. G. Tucker, Miss Davis, Mr. H. B. Finlay, Mrs. Rogers, Mrs. Beadon, two children, and European servant, Major Peste, Mr. E. Taylor, Dr. Gardiner, Miss G. Elliott, Mrs. and Miss Brown, Mr. and Mrs. Johnson, and eleven second-class passengers. To Madras: Miss Bliss, Mr. and Mrs. Sim, three children, and two servants, Miss Jacob, Colonel Shakespear, Major Stevenson, Mr. C. Jones, Staff Assistant-Surgeon Dunn, Colonel Goodes, European servant and child, two second-class passengers and one child. To Suez: Four second-class passengers. To Alexandria: Mr. F. Brown, Mrs. Hassanaine, three children, and female servant, Mr. Ameen, Mr. A. Carey, eleven second-class passengers, and one child.

From Marseilles, Oct. 28.—To Shanghai: Mrs. Herbert Hancock, two children, and European servant. To Hong Kong: Mr. T. A. Lane and Mr. D. Lapraik. To Singapore: Mr. Gimberg. To Calcutta: Messrs. C. P. Carmichael and Danby, Mrs. F. H. Smith and daughter, Mr. Apcar, Miss Agabeg, Messrs. D. Cunliffe and L. S. Jackson, Major General and Mrs. Flemyng, Miss Flemyng, Mrs. C. Johnson, Mr. J. B. Street, Mr. and Mrs. Blackett, Lieut. Holdsworth, Mr. H. Dear, the Rev. Mr. and Mrs. Stone, Major and Mrs. Thelwall, Messrs. Sconce and Grant, Mrs. General Mactier and European servant, Mr. and Mrs. Griffiths, Mr. and Mrs. Shakespear and child, Miss Mackintosh, Messrs. Peacock, T. H. Drake, Wilkinson, H. Dean, W. Terraneau, W. Newton, Dampier, W. Bradbury, and six second-class passengers. To Madras: Miss Lawrenson. To Alexandria: Miss Marten, the Rev. H. Marten, Messrs. Wightman and P. Francis, Mrs. Haselden and two infants, Miss Yearsley, and two female servants. From Suez.—To Shanghai: Mr. Halls. To Calcutta: Messrs. U. Gray and G. Steinthal.

Per P. and O. steamer Massilia, from Southampton, Oct. 27.—To Singapore via Bombay: Mr. and Mrs. J. E. Macdonald, Mr. and Mrs. F. D. Barnes, Mr. Watson. To Hong Kong via Bombay: Mr. J. B. Leslie, Mr. Bennett, Mr. Mackintosh.

Per P. and O. steamer, from Southampton, 4th Nov.—To Hong Kong; Mr. M. Murray, Assistant Surgeon J. Fraser, R.N. To Singapore: Mr. and Mrs. H. O. Robinson, Mr. and Mrs. Lipscombe. To Ceylon: Mrs. Brotherton. From Marseilles, 13th Nov.—To Singapore: Mr. W. Alten, Mr. W. Paterson. To Hong Kong: Mr. F. Jerdein. To Shanghai: Mr. W. G. Howell, Mr. A. Campbell.

Per P. O and steamer, from Southampton, Nov. 12.—To Shanghai via Bombay: Mrs. Bennett and child. From Suez.—To Penang via Bombay: Mr. and Hasche.

Per P. and O. steamer, from Southampton, Nov. 20.—To Penang: Mrs. and Miss Mackay. To Ceylon: Miss Staples, Mr. Cone.

Per P. and O. steamer, from Southampton, Dec. 4.—To Shanghai: Miss M. A. Russell. To Hong Kong: Mr. R. C. Lambert and friend.

CIVIL WAR IN JAPAN.

IN another column will be found a telegram, published on the 2nd instant, announcing that "the quarrel between the "TYCOON and the Prince of NAGATO has been settled." Like many former telegrams, this may perhaps be in anticipation of facts, and as unreliable as that which some time since reported the actual commencement of hostilities; but if true it will confirm the expectations suggested in our late article under this head, in which we pointed out the several causes which tended to render any fighting improbable, at all events for the present. The same telegram conveys a rumour that Sir HARRY PARKES's negotiations with the Japanese Government have been well received, but to this we attach little importance. In the absence of the TYCOON from Yedo, with some of his chief advisers, but little real progress can be made. Until the time of his return to the seat of Government a temporising policy will doubtless be adopted by the Gorogio, who will, as a matter of course endeavour, by procrastinations and apparent concessions, to keep matters virtually *in statu quo*, while the real "tug of war" will commence when the TYCOON himself again resumes the reins of government. Sir HARRY PARKES certainly deserves high praise for the decisive and energetic manner in which he has insisted on his right to reside in Yedo. This is a point which must be kept in view; by conceding it now we should sacrifice our *prestige* to an extent which would be difficult, perhaps impossible to recover. Sir RUTHERFORD ALCOCK, though compelled for a time to relinquish it, kept this object steadily in view, and we rejoice to find Sir HARRY PARKES is following in his footsteps in this and other matters in progress at the time of Sir RUTHERFORD'S departure.

CHINA.

SHANGHAI.

The French mail of July 17th arrived out on September 2nd. The dates are now down to the 16th, although we believe the steamer did not leave Woosung until the 18th.

We *(Recorder)* have been informed of an amusing instance of Chinese presumption and incompetence, which is too good to be kept to ourselves. Some days ago the Viceroy's uncle, who commands the steamer *Feiloong*, when coming down the Yangtsze, ran foul of an extraordinary craft, which looked like a canoe, but which a closer examination proved to be a steamer; that is to say, a steamer in the Chinese sense of the word—a vessel with a funnel and wheels, but no machinery. When picked up it was drifting at the mercy of the tide, the constructors having very naturally supposed that a steamer was of little use unless it could steer itself. There were some other peculiarities in the vessel's build which would at once strike the eye of a European. For example, her beam was hardly proportioned to her length, the latter being seventy feet, the former

Digitized by Google

four. The crew, who were very crestfallen at the result of their expedition, and at the ridiculous appearance their vessel presented when brought alongside the *Feiloong*, were with difficulty persuaded to explain the circumstances. At last it came out that a mandarin in Tseng-Kuo-fan's camp, having conceived the luminous idea of saving the Imperial exchequer from the constant drain produced by the exorbitant demands of foreigners, communicated his sentiments to his chief, by whom they were much applauded. He then invoked the assistance of a Ningpo man, whose claim to be considered an authority on foreign shipbuilding was based on his having twelve months ago been kicked out of one of the docks in Shanghai for some petty peculation, after a brief stay of four weeks. Workmen were employed, and after three months of constant labour the steamer was launched at Anking. The result we have already sketched. The discoverer of this fine mare's nest full of addled eggs will probably lose his button, and will certainly lose all the money he has expended on his project. Thus is talent rewarded in China.

MUNICIPAL COUNCIL.

Reports Submitted and Approved at a Monthly Meeting of the Council, held Sept. 5th, 1865.

FINANCE, RATE AND APPEAL COMMITTEE.

Referring to the Minute Paper read at the special meeting of the Council held on the 22nd ult., your committee have to report that, in accordance with the authority then given to prosecute defaulters, they have issued printed notices again requesting payment, and informing those who still refuse that legal action will be taken to enforce the claims made. This step has had a most beneficial effect, so much so that few defaulters of standing remain, and the financial position of the Council is in a better state than for some time past. It will now be your committee's duty, in conformity with the late resolution of the Council, to avail of the Supreme Court and enforce payment of taxes from those now remaining on the list of defaulters.

The revised assessment on land and houses has been completed, and the tax papers based on same have been sent out.

Wharfage Dues.—The collection of this tax has been impeded by the general objection to pay the double rate for the first quarter of the year. Your committee think that as the doubling of this tax acts retrospectively for the said quarter, there is much justice in the complaints of those who object to pay on the score that their accounts for constituents had been previously rendered.

It is therefore recommended that the double rate for the first quarter be abandoned, and the half of what has already been collected be returned to those who have already paid it. This step your committee believe will give general satisfaction, more especially as the double rate of wharfage for the quarter from April to June is being well and promptly paid.

Opium House Tax.—This is now working well on the new plan lately adopted, and no complaints have recently been made.

Pawn-shops.—Your committee have also, in the case of these establishments, drawn out a new scale on the basis of the amount of business done. As was the case with the preceding tax, there is some opposition at first, but good hopes are entertained that the measure will succeed.

Local Post Office.—A branch office has been established in the eastern suburb of the native city for the sale of postage stamps and collection of native correspondence. It is not yet sufficiently known to be much used by Chinese. A contract has been made with Paou Shun, by which, for the sum of $600 per annum, he is allowed to collect and forward a portion of the Chinese postal matter.

Chinese Taxes.—The substitution of dollars and cash for taels and candareens in the collection of these has answered well, and given much satisfaction to native householders.

In conclusion your committee would state that unless defaulters can be compelled so pay outstanding accounts, there is no chance of reducing the debt of 65,000 taels during the present year; in which case it will only be by the practice of rigorous economy that the Council can avoid incurring further debt.

PUBLIC WORKS COMMITTEE.

Lighting the Settlement.—Your committee have endeavoured to make arrangements to substitute Kerosine lamps for the present oil ones, using the lamp-posts as they are,—but the lowest tender they received would have rendered the substitution nearly three times as expensive as at present, and it had in consequence to be abandoned.

Drainage.—Various repairs to the drains are necessary, but your committee do not feel authorised to sanction an expenditure amounting to over tls. 2,000, without the consent of the Finance Committee. A drain has been constructed at small expense in Foochow-road, where it was urgently needed.

Dangerous Structures.—Dangerous structures in Hankow-road, belonging to Mr. Kennedy, have, with the sanction of H.B.M.'s Consul, been pulled down, the old material having been piled up on the ground, and the rubbish laid down on the public roads. The cost of removing these dangerous structures, which amounts to tls. 70, your committee have requested H.B.M.'s Consul to recover.

Mud-flat in front of H.B.M.'s Consulate.—Your committee have desired the Municipal Engineer to prepare tracings (of the ground proposed to be filled in) for H.B.M.'s Consul, who has most energetically taken the matter in hand, and it is to be hoped that he will arrange it with the Chinese authorities at an early date. This mud-flat spoils the appearance of the Bund, which has now been widened from Peking-road nearly up to Wills' Bridge; a great improvement to that part of it.

Night Soil Contract.—The contract having expired on the 31st August last, has been granted for one year by the committee to Dun Quen-wo, for the sum of $505 per month, payable to the municipal Council monthly. In consideration of this sum your committee have waived their right to the supply of scavenger coolies (who were formerly provided by the contractor), as they think the new arrangement more favourable to the Council, but the boats to carry the garbage at least two miles off from the settlement will still have to be found by the contractor.

Jetties.—The attention of your committee has again been drawn to the very bad state of many of the jetties, which are nearly useless at low tide in consequence of their length being insufficient. It is a question if the principle of mud jetties, which, as tried at the end of Nanking-road, has been found to answer, be not extended.

WATCH COMMITTEE.

Your committee report the strength of the force at 102; Europeans 68, Chinese 34.

Your committee report that the active measures taken on the question of the chair monopoly have resulted in the entire absence of any complaints during the past month.

Private Watchmen.—It having been found that at the present time many private watchmen are in league with bad characters for whom their houses become places of resort, your committee suggest for the public interest that any person requiring private watchmen be supplied from the police force, so that constant control be held over all such men. Several watchmen have already been supplied by the Council to public institutions, but in future your committee suggest that the Council charge for them if still required.

Securities of Chinese Constables.—Your committee suggest, that in cases of the misconduct of Chinese policemen the bondsman be sued before the mixed court on the guarantee given by him, and in cases where the security-money is forfeited, that the assistance of the consul be requested to obtain the sum specified in the guarantee. It is also suggested, that when any punishment is inflicted on the constables, the case should be reported in the Chinese newspaper, with a view, if possible, in the course of time, to secure reliable men in this branch of the force.

Your committee report that police constable Henry Whelan has been prosecuted for squeezing, and sentenced to six months' imprisonment. They beg to suggest that the strictest instructions be given to the superintendent to bring all such cases before the court.

Rowdies.—Your committee have the satisfaction to state that eleven men of this class have been apprehended and convicted during the past month, and amongst these were some of the very worst characters in the settlement.

Your committee have pleasure in reporting that the medical officer of the force has found reason to congratulate the Council on the health of the men during the hot weather. No serious case of sickness has arisen, the sick list frequently being entirely clear. They have also the additional satisfaction of stating that the health of the men probably speaks very highly for their steadiness.

Another meeting of the South China branch of the Royal Asiatic Society was held on Sept. 8. Present—G. F. Seward,

Digitized by Google

Esq., vice-president, in the chair ; C. Alabaster, Esq., secretary ; Messrs. Giquel, Kingsmill, Thorne, C. T. Jones, Noetzli, Hanbury, Robinson, Dr. Jones, and a number of others. Mr. Goodwin, recommended by the council as an honorary member, was elected unanimously. The minutes of the last meeting having been read and confirmed, the ballot was proceeded with, and the following gentlemen were elected members of the Society :—Resident—J. S Forsyth, Esq., H. Gribble, Esq., T. Bell, Esq., and Dr. Jones. Non-resident—F. Whitmore, Esq.

The following gentlemen were then proposed for election at the next meeting :—

Residents : A. Mantz, Esq. ; E. A. Reynolds, Esq. ; Captain Round, R.N.

Proposed by Mr. Seward, seconded by Mr. Alabaster :—

Resident : O. Brown, Esq.

Proposed by Mr. Jones, seconded by Mr. Giquel :—

Residents : William Kidner, Esq. ; H. Lang, Esq.

The Secretary then read a paper on the "Nomadic Mongols," by the Rev. Mr. Edkins.

Mr. Edkins' paper commenced with a description of the various Mongol races found at Peking, and the arrangements made for their comfort there. He gave a narrative of a trip taken by him into Mongolia in 1861. At one day's journey from Peking he passed bodies of troops and pilgrims on his way to Jehol, near which he visited the Lama temples of Teshu Shimbo ; thence he proceeded to Pakeu, a great centre of Lama influence, passing through extensive pastures, where he found a flourishing pastoral population ; and, stopping a day or so at a Mongol village in the neighbourhood, returned to Peking. The paper noted the resemblance between Mongolian and Chinese, and contained some interesting information relative to the private habits of the people.

At the conclusion of this paper some notes on the same subject were read by Mr. C. M. Grant, F.R.G.S. The title of the paper read by Mr. Grant was "Mongolia and the Northern Mongols."

In describing the physical geography of Northern Mongolia, or the Khanates of the Khalkas, Mr. Grant brought forward two subjects which have engrossed much of the attention of geographers for upwards of a century, namely, the sources of the Amoor, and the site of Kara Korum. In regard to the former he remarked :—"The Kerlun or Kerulun is generally supposed to be the parent stream of the Amoor ; this notion has probably oringinated in some old Chinese map whose construction has been based upon supposition and not on actual surveys, and it has been retained because until now no one has had just reason for refuting it. I conceive that I have excellent authority for supposing it to be erroneous. Dr. Kashin, the P. M. O. for the city of Irkutsk, a member of several scientific societies, and one of the committee of the Siberian branch of the Imperial Geographical Society, resided for seven years in the vicinity of the Dalai Nor, the lake through which the Kerulun is said to pass, when it assumes the name of the Argoon, which flows into the Amoor. Dr. Kashin has informed me that the formation of the surrounding country is quite opposed to the possibility of streams running northward out of the lake, and furthermore, that several rivulets, having their sources in the neighbouring hills, actually run into the Dalai Nor near the very spot where the Argoon is represented as flowing out, and I have it from the Prince Krapotkin, a gentleman who recently crossed over the northern part of Manjuria (a journey not hitherto travelled by a European), that his friend, Colonel Buxhaven, commander of brigade, made a tour of the Dalai Nor in the summer of 1862, which was a very dry year, and found that the lake only contained a small pool of water in its centre, and that the bed of the Kerulun could not be traced, its mouths having been lost in the sand.

"I think such testimony sufficient to set at rest the question as to whether the Kerulun is or is not the parent stream of the Amoor, and I may further mention that it is now generally admitted by Siberian geographers that the Argoon flows originally from a small river to the north-east of Dalai Nor, called the Khailar.

"I may mention that another geographical question, which has made itself conspicuous from the discussion it has created—viz., the site of Kara Korum, the ancient capital of Ghengis Khan, has occupied much of my attention, and from all that I have been able to glean, I am disposed to place it near the sources of the Onon, and not on the Orkhon, as d'Anville has determined. My information has been gained in the vicinity, and I hope some day to have an opportunity of visiting its ruins, which are still visible. I believe no foreigner has reached this spot since Rubriquis, about 600 years ago. This monk, ambassador of St. Louis, furnishes us with information of Prester John, of whom he speaks as a Nestorian Christian, who resided at Kara Korum, and reigned over the Mongol tribes of Merkit and Kerait."

Mr. Grant represented Northern Mongolian or Khalka as being divided into four Aimaks or Khanates, each Aimak into Hoshoons, that is, families, clans or banners. [There are eighty-six Hoshoons, each of which is governed by its own prince or chief, so far as regards the interior affairs.

The Imperial Government of Peking has divided Northern Mongolian into two Governments, the Eastern and the Western ; at the head of each it has appointed a Viceroy, who is responsible to it. Their chief duties are to maintain peace amongst the princes, to raise troops when called upon for the Imperial service, and to collect tribute.

Mr. Grant described the various ceremonies at births, deaths, and marriages, giving very detailed accounts of each ; he related several traditions which are still current in Mongolia, and went very fully into all that concerns the Kutuktoo and the Buddhist religion, as practised by the Lamas. He spoke of the Chinese postal or courier service, and mentioned that the arrangements, though very incomplete, were such as to enable the Government at Peking to communicate at any time with Kiachta in nine days. He represented the people as very dirty and immoral ; but he lauded very much their hospitality, and concluded by recommending this route as far preferable to the Red Sea one.

After a few remarks by the President and Mr. Goodwin, the thanks of the Society were voted to Messrs. Edkins and Grant for their interesting papers, and the meeting separated.

The following is the summary of the week of the *North China Herald* :—

After a few days of clear summer weather Shanghai is again flooded by rain, the streets are buried in mud, and the roads in the vicinity of the settlement rendered impassable. The temperature has steadily descended, the maximum being 80 deg. Fahrenheit in the shade.

The incidents of the week have been few and uninteresting. A correspondence has taken place in our daily issue with regard to the projected new church, the present unsightly edifice being universally disapproved of. What the result will be remains to be seen, but we trust that some energetic measures will at once be adopted.

On the 4th of September the Supreme Court of China and Japan was formally opened by Sir Edmund Hornby. The Royal warrants appointing the judge, assistant-judge, and law secretary were read, and Sir Edmund Hornby then proceeded to swear himself into office, after which the oath was administered to Messrs. Goodwin (assistant-judge) and Fraser (law secretary). Messrs. Myburgh, Eames, and Robinson signed the roll of practitioners in the Court, and the ceremony was at an end. From Peking we have advices to the 2nd Sept., but nothing of importance had transpired. The *Gazettes* are utterly destitute of anything of interest.

From Chinkeang we hear of a dastardly outrage committed by a party of native soldiers on three unarmed and perfectly unoffending foreigners. One of the victims died of the horrible wounds he received, and another lies in a very precarious state.

Up to the date of our latest advices the attempts made to identify the murderers had been unsuccessful.

The *Friend of China*, of the 15th Sept., on this subject says :—

We copy from the *North China Daily News* a statement regarding the motives influencing the desperadoes at Chinkeang who killed Mr. Pickernell, and have placed in such jeopardy the lives of Messrs. Lewis and Filleul. This statement reads to us very much like a made up thing, and it will not surprise us to learn, on inquiry of Mr. Lewis, whose state from dysentery, we regret to say, is very precarious, that it is all imaginary, the real story being as before given by us, and affixing the guilt of the crime on General Kuo. That General Kuo's friends would do all they could to pull him through his difficulty is no more than might be expected ; and while the tale of a man having been beaten by a foreigner bears an air of probability, it is singular that two such difficulties as that with the sun-struck man, and that with the dog-bitten, should have occurred the same afternoon, and that one should threaten to take life, while the other took it.

Digitized by Google

But there are even other hypotheses on the subject of cause for the horrid deeds. One runs that poor Filleul was the man whose life was really sought, and this, because he is in the way of the holders of some land to which he is entitled as representative of his deceased brother who bought it; said land being now worth nine or ten thousand taels. When Captain Filleul of the *Hellespont* died, a singular circumstance happened. Some foreigners (Americans?) here went on board the vessel, opened, under an allegation of authority, his iron chest and drawers, and took from them, it is surmised, everything of value, including, among other things, the title deeds of the land at Chinkeang spoken of; the result of the surreptitious business being that, whereas deceased Captain Filleul was supposed to be a man of half a lakh, his estate did not realise a couple of thousand dollars—a pretty good shearing of the dead man, all must admit. The shearers may be identified yet, however, and made to feel that it is a cold morning without ice.

[After the above was in type we received a note from a gentleman who was impressed, on reading this morning's papers, just as we are; and who, living near the hospital, had an opportunity of calling and inquiring. The gentleman in question says:—"Poor Lewis had no dog, nor had he been out of his bed for twenty-one days when he was cut in this way."]

A Chinkeang correspondent sends us further particulars with regard to the recent murder committed at this port. It appears that Mr. Consul Harvey, who had been unremitting in his endeavours to discover the offenders, has met with great success in his investigations, in which he was readily assisted by the native officials, both civil and military; the latter having evinced a laudable desire that the guilty parties should be arrested and punished.

The facts of the case are as follows:—On Friday, the st instant, a Chinaman who was passing the mat-house where the attack took place, was assaulted and bitten by a dog belonging to Lewis, one of the wounded men. The man, in self-defence, threw a brick at the dog. On seeing this Lewis pursued and beat him. Smarting under the sense of insulted dignity, and perhaps sore bones, the Chinaman, who had been an officer of braves, went at once to an opium-shop in the city, where he found some soldiers of the city garrison. The latter sympathised with him, and they agreed to make a night attack on the offending foreigner and obtain their revenge. Excited by opium and samshoo, and under the leadership of the man who had been flogged, they broke into the mat-house early on Saturday morning, expecting to find Lewis alone, but Pickernell and Filleul being unfortunately asleep in the house, they also fell victims. The leader was arrested a few days after the attack, having been traced by a sword that was dropped during the scuffle, and was executed on the 9th instant, but not before he fully confessed his share in the outrage, and the motive that led to it. Yesterday one of his accomplices also was executed on the spot where the murder took place. Three hundred of Kuo Sung-ling's disciplined troops, headed by a blue-button mandarin, were in attendance, and gave three cheers when the culprit's head was struck off. This man also made a full confession before he died. The others who are known to have been concerned have made their escape to the north bank of the river, but the native authorities having offered rewards for their apprehension, it is to be hoped that they will eventually be captured and punished. None of the soldiers under Generals Yang and Kuo have been proved to have had anything to do with the attack. It is a fact worthy of notice that the confession of the leader of the band was voluntarily made.

By last advices the men-of-war in harbour were as follows:—

Acorn, Speer, hospital ship; Hardy, H.M.'s gunboat; Hong Kong, French steamer; Laplace, Amet, French steam-ship; Perseus, Stevens H.M.'s ship; Starling, Lieutenant Stodherd, H.M.'s gunboat: Weazel, Hailes, H.M.'s gunboat.

At Ningpo: Cockchafer, H.M's gunboat, Dayrell; Le Brethon, French steamer, French Government, built at Ningpo, 1864.

A special meeting of the Racquet Club was held on the 2nd Sept., for the alteration of some of their rules, which now stand as follows:—

1. That the members of the club be divided according to their proficiency in the game into Classes A and B—such classification to consist as nearly as possible of an equal numerical division of its members, to be made by a committee consisting of the secretary (for the time being) and two members, which latter are to be elected by both classes, but the members so chosen must be from Class A.

2. That all new members joining the club be placed in Class B.

3. That Class A have the use of the court on Mondays Wednesdays, and Fridays; and Class B on Tuesdays, Thursdays, and Saturdays.

4. That any member of Class B wishing to move into Class A may challenge any member of that letter to play him a single match of the best of five games; and the member so challenged must play the one in Class B on a day fixed by the committee for that purpose, or forfeit his privilege of playing in Class A, unless very good and sufficient reason be given for his non-attendance on match day. The committee's decision on this point to be final.

5. The challenge so given must be sent in writing to the secretary, who will consult with the committee and fix the day, such, if possible, to be one week from date of challenge; and no two matches to occur in one week; and the days so chosen for these matches are to be taken alternately from those in which Classes A and B are entitled to the use of the court.

6. That the loser of the match shall forfeit $10, such moneys to go to the general funds of the club.

7. That, should any member in Class A be defeated, the same shall not be eligible to play with or challenge any member of that class until one month has elapsed from the date of his defeat; also that any member of Class B not winning his match cannot again challenge under the same period.

8. On the admission of a new member, who will enter Class B, according to Rule 2, he will have the privilege of challenging any member of Class A within two weeks of his election; but, should he not do so so, and the number of members in that class be found to be short of Class B, then the two best players of Class B shall have a single match to decide which of them is to enter Class A; but such match must be played on one of the days that Class B are entitled to the use of the court.

The following notice of the new court is from the *Friend*. Sir Edmund Hornby took his seat on the bench on the 4th, for the first time since the inauguration of the Supreme Court, and gave judgment in a case, striking right home at the abuse we have so long complained of, viz., that of masters of merchant vessels leaving their crews on shore; in other words, sowing seed in the field for a crop of Rowdies. The gentleman prosecuted by the Crown in this case, was Captain Coolie, of the steamship *Elgin*; the information appearing in the shape of a demand on him for twenty-three Mexican dollars, due to the Queen, as sworn to by Mr. Tapp, on a bill for sustenance provided at the Sailors' Home.

The decree ran that, besides paying the twenty-three dollars, means were to be taken to keep the discharged sailor off the public coffer—a decree resulting in payment of the man's passage to Hong Kong by an early despatch hence. Sticklers for correct forms, says Judge Hornby, had no power to go into a case of this kind; that it is clearly treatable under the Merchant Seaman's Act—an Act in which no mention whatever is made for adjudication by "Wig and Ermine."

We simply mention the demur—we do not concur in the opinion; and we hail the appearance of his Lordship in so small a matter as a bread-and-cheese bill as a certification that we have the right man in the right place. As a rule, when the master works well, and is not above his business, his assistants imitate him.

As was to be anticipated, we already hear "growls" about the difference in which judicial work is entered on at the Consulate under the new *regime*:—Almost as a matter of course, people having got so used to the old happy-go lucky informal style of doing things, that many wish the old order still continued. But suitors must not be impatient. Everything will shake down to its place in time, and then, as Americans say, "there will be a good time." But there is one thing which those who have recently had business at the Shanghai Consulate must bear in mind. They must not expect their business to progress unless they move it in the first place themselves. "Tell every one," we heard Mr. Law Secretary Fraser say to the office clerk, "that all the archives are now under my charge; but they must not expect me to look up this case or that to be gone on with. They must put their own shoulders to the wheel if they desire to start their particular waggon." This, we think, is perfectly correct.

For some time to come the Law Secretary will have his hands full enough with the work of the current day, without seeking among the records for cases in order of priority of entry. We shall be greatly mistaken, indeed, if in a short time the community are not proud of and pleased with their Supreme Court, and the way in which it is managed. Mr. A, say, has a dispute with Mr. B, and, as the matter cannot be settled without

Digitized by Google

an umpire, they resolve, or A resolves, to go to court. In the olden time of last week the course in the first place would be an entry of the plaint, an affidavit to the truth, and a variety of other performances, all calculated to run up a bill of fees for the Consular Treasury, with a setting down for trial at some period of time when the Court might be at leisure, from a quarter to half a year hence, perhaps. Now, all this is changed. Mr. A makes a complaint, Mr. B answers it, and then the clerk of the court fills in the following form :—

1. Issue for Decision of Questions of Fact without formal Suit.

In Her Britannic Majesty's Court at [Shanghai] [Saturday] the [ ] day of [ ] 18 , between A and B.

This court has ordered that the above-named A. of [gentleman] and the above-named B. of [merchant] may proceed to the trial of the questions of fact to be determined between them without any petition presented or other pleading.

This court therefore now further orders that the following questions be tried :—

1. Whether, &c.

2. Whether, &c., the said A. maintaining the affirmative and the said B. the negative thereof respectively (Seal).

This being followed by a summons running thus :—

2. Summons in Summary Procedure for Claim under 100 dollars.

In Her Britannic Majesty's Court at [Canton] [Saturday] the [ ] day of [ ] 18 , between A.B. plaintiff, and C.D. defendant. [or in the matter of E.F. an infant]

To C.D. of [gentleman], the above-named defendant.

You are hereby commanded, in Her Majesty's name, to attend this Court at [ ] on [ ] the [ ] day of [ ] at o'clock in the [ ] noon on the hearing of a claim [or an application] on the part of A.B. of [merchant], the above-named plaintiff [state the precise nature and particulars of the claim, and the amount sought to be recovered, or the precise object of the application, as the case may be].—(Seal.)

But those who want to know how to carry on a suit in either of the consulates without the intervention of a lawyer should send a dollar to Mr. Law-secretary Fraser, and ask him for a copy of the rules, a book of 111 pages, exceedingly cheap, as books are sold in China.

The following items are from the *Friend* :—

The advertisement for tenders for Kerosine lights in the streets has resulted in nothing, no one being willing to tender, at a reasonable rate, so long as he had no stock of the oil to rely upon. If the Municipal Council are really in earnest about Kerosine, they should give Messrs. H. Fogg and Co., or some other respectable American house, an order for a quantity equal to a year's consumption, and then employ their own lamp trimmers and lighters. We suppose, however, after all, we shall have the gas, and then—hey for coal!—by everyone deemed the incubus in the way of cheap light.

We hear that the Chinese authorities have notified the United States Consul-General that the bodies of Burgevine and the Englishman drowned with him have been recovered, and can be seen at some place sixty miles west of Ningpo.

The steamer *Viola* has been sold to Prince Satsuma for $95,000.

Vessels in the port of Nagasaki on the 9th Sept. were British ship Lammermuir ; barques Queen's Own, Kate Cleather, Chanticleer, Yokohama, Fisher, Tasso, Dolphin, Blanche, Edith, Stella, Rifleman ; brigs Wild Wave, Ben Nevis, Northern Crown, William Duncan ; schooner Kaffer Chief ; French barques Reconnaissance, St. Julien ; Dutch barque Munster Von Hall ; Brig Japan Packet ; American barques Mathew Luce (113 days from Boston), E. W. Seyburn ; Russian brig Atlantic Prussian brig Danzig ; steamers City of Nantes, Australian Armenian, Peking ; H.M.'s ships Barossa, Osprey, Bustard.

A prospectus has been issued at Yokohama of a new paper to be called the *Japan Times*. "On the 8th will be published the first number of the *Japan Times*, a commercial, political, and general weekly newspaper. In making such an announcement as the above, it is usual for the conductor of the new journal to lay before the public some exposition of the policy it will pursue and the objects it purposes to gain, prefaced by a demonstration of the urgent public want, to supply which would seem to be the chief object of its spirited proprietors. The present occasion, however, will be found to be an exception to this general rule, 'Reden ist silber, aber Schweigen ist gold.' Should the 'want' usually assumed be in this instance really felt by the public, it will doubtless be manifested immediately on the appearance of this advertisement in the usual way, and, as a facile method of satisfying their curiosity as to the principles and policy of the *Japan Times* will thus be open to its subscribers, it is unnecessary for the editor to turn his prospectus into a manifesto."

HANKOW.

A correspondent of the *Friend of China*, under date Sept. 2, says :—The weather has set in delightfully cool and pleasant ; thermometer 80 by day, 72 night ; average maximum throughout, 76.

The water has fallen considerably ; those parts that were inundated have collected a large amount of filth, which should be at once removed.

The market for imports during the past month has been limited, owing to the very unusual high rise of the river, which has prevented the conveyance of merchandise into the interior of the country and adjacent provinces. Prices, however, are satisfactory for most descriptions of goods, and deliveries have been taken of 23,800 pieces of Grey Shirtings, 3,000 White do., 10,250 of T-Cloths, 2,580 Long Ells, 20,500 bags of Brown Sugar, 6,800 bags of Black Pepper, and 85 chests of Malwa Opium ; many other articles having also changed hands.

Since my last, settlements of 71 chops of tea have been made, making total to date, 485 ; stock about 50 chops.

The first part of the new crop of yellow Szechuen silk has come in. Prices asked are 288 to 312 taels per picul. Of new hemp about 800 bales are on the market, at 10 to 12 per picul.

A fair demand has sprung up for Japan produce. Quotations, however, are not remunerative for speculators.

Mushrooms, say 30 to 31 tls. per picul ; seaweed, cut, 5.60 to 8.50 tls. ; long, 3.80 to 4.20 tls. ; isinglass, 40 to 41 tls.

Cuttle fish, 9.50 to 9.66 tls.

Exchange on Shanghai, 10 days' sight, 3½ per cent. ; bank bills, 3¼ per cent.

Gold bars, 145½ to 148 tls. per 10 taels weight ; ditto, leaf, 148 to 151 tls. per 10 taels weight.

Freight per steamer, 4 tls. per ton of 40 cubic feet measurement.

FOOCHOW.

We are glad to hear the Foochow dock is in working order, one ship is already on the blocks, and others waiting to fol

The export of tea, per *Agra*, to London, 16th Sept., is 1,123,300 lbs., and the *Mary Hamilton*, to Melbourne, 262,600 lbs.

AMOY.

The following is from the report of G. Hughes, Commissioner of Customs, on the trade of Amoy :—

In 1864, the total value of imports and exports amounted to $13,193,436, which, compared with the value in the year 1863, $12,523,565, shows an increase of $669,172.

Of foreign vessels, in 1864 there were 661, tonnage 210,539 entered ; and 655 vessels, tonnage 209,290 cleared ; while in 1863, 677 vessels, tonnage 207,437 were entered, and 681 vessels, tonnage 209,023 cleared ; showing in 1864 a decrease of 16 vessels, and an increase of tonnage 3,102 entered, and a decrease of 26 vessels, and an increase of tonnage 267 cleared.

In 1864 the total amount of duties received was 474,900 Haikwan taels, which, compared with the collection in 1863, 470,992 Haikwan taels, exhibits an increase of 3,937 Haikwan taels.

In 1864 there was an increase in the import of opium of 84,181 piculs, caused by the ports in Formosa now open to trade drawing much of their supply of the drug from Amoy instead of from Hong Kong.

The increase in cotton yarn, 109,651 piculs, is due to the prosperity apparent here in the early part of last year.

The export of tea for the seasons, *i.e.*, from 1st June, 1864, to 1st June, 1865, is 6,224,434.

The opening of foreign trade of Wan Chew and Chin Chew is greatly desired by natives and foreigners. The opening of the former, in addition to greatly increasing other coasting trade, would give employment to foreign shipping all the year round.

Mr. Hughes strongly urges the opening to foreign trade of these ports.

In conclusion Mr. Hughes remarks, that up to the capture of Chang-chow-Foo in October last the prosperity of Amoy was most marked ; should Chang-chow-Foo be recaptured, the insurrection quelled and tranquillity restored, there is sufficient energy and determination to speedily restore trade to its former standard.

The Customs returns, made up from 1st January to 31st Dec., show the export of tea in 1863 to be 8,552,667 pounds, and in 1864, 7,151,019 pounds, or a decrease in 1864 of

Digitized by Google

1,401,648 pounds. But neither the export nor the import trade can be expected to more than exist, so long as Chang-chow-Foo, a large manufacturing city, the richest and most important in this district, and which was, in fact, the market of Amoy, remains in rebel hands. At the present moment, with the exception of opium, all other staple articles of import are unsaleable.

It is rumoured now, that in consequence of the existing troubles the cultivation of the tea plant and sugar-cane are but little attended to.

Transit passes for the conveyance of produce from, or imports to the interior, are very little availed of here.

Amoy consumes and produces little herself, but she is the entrepot of Chang-chow-Foo—which possesses seven Hsiens, Chin-chow-Foo, Ankoi Hsien, Tung Wa (Ngan), Hsien Peh-chuey-ya, and several tea producing, sugar-growing, and manufacturing places; she is also the highway of commerce between China and the southern markets of the Indian Archipelago, viz:—Bangkok, Singapore, Malacca, Penang, the ports in Java, Sumatra, Borneo, and Macassar. Most of the Chinese in Java, Siam, and the Straits Settlements are Fohkien men, who naturally desire the productions and manufactures of their native produce, hence there existed a large trade in Straits produce and miscellaneous articles; vessels under the British, Dutch, and Siamese flags used to rendezvous at Amoy, trade and barter, then proceed northward; returning here they disposed of their cargoes obtained at Ningpo or Shanghai, and then laid in a stock of Chinese goods suitable to the southern markets of India.

Much of this trade has now passed to the free ports of Hong Kong and Macao.

Formerly a large carrying trade in foreign bottoms existed between Amoy and Wan Chow (I am informed that some years ago fourteen foreign vessels, all chartered by natives of Amoy, were lying at this port at one time), Chin Chew, Quemoy, Chimo Bay, Hock An, Nam Kwan, Meng Tek, &c., and the ports in Formosa, and those between Amoy and Hong Kong. The cargoes removed coastwise to these places consisted chiefly of sugar, hemp, cloth, tiles, bricks, common crockery earthenware, and small quantities of Straits produce, foreign woollens and manufactured goods, and opium. Those received, of rice, wheat, alum, charcoal, dried sweet potatoes, medicine, deers' horns, hides, and oil.

Salt from Amoy and Quemoy was also removed coastwise in enormous quantities, and even exported to Manila, Singapore, and Java.

HONG KONG.

The mails of the 26th July, which broke down in the *Ottawa*, arrived with those of the 10th August, per *Baroda*, on the 19th Sept. The following notice is from the *Evening Mail*:—

The P. and O. steamer *Baroda* arrived in harbour this morning at 9.30 (19th Sept.); her appearance was all the more welcome as she not only cleared up the mystery regarding the missing last mail, but she also brought on her mails passengers, and cargo.

The *Baroda*, Captain Haselbrook, left Galle with China mail, at noon, on Sept. 4, and arrived at Penang at 7.11 A.M., on September 9; found the steamer *Ottawa*, with previous China mail, lying there broken down. The steamer *Behar*, from China, arrived in Penang same day. The steamer *Baroda* left Penang with *Ottawa* in tow, on the 9th, and arrived in Singapore on the 12th. Ships in Singapore, H.B.M.'s *Coquette* and H.I.M.'s *Cosmao*. The steamer *Indore* was being towed in as the steamer *Baroda* left, with shaft broken. Sept. 13, at 8.15 A.M., the steamer *Baroda* sailed for Hong Kong, and passed the ship *Solent* for Singapore outside the harbour. The steamer *Baroda* experienced light monsoon, with occasional squalls throughout.

H.M.S. *Conqueror* arrived in harbour on the 16th September, having left Yokohama on the 24th August. On the 3rd, 4th, and 5th September she encountered a very severe typhoon, in which she lost two men overboard, and many of her sails, spars, and boats. She brings 450 of the Royal Marines.

The British steamer *Ta-pang-Nyo* reports having left Foochow on the 13th, Amoy on the 14th, and Swatow on the 15th September, having made the run from the latter port to Hong Kong in 17 hours. During her passage she had fresh N.E. breezes and fine weather. H.M.S. *Scylla* arrived in Amoy on the 14th. The steamers *Formosa* and *Feloong* arrived in Foochow on the 12th; the steamer *Stirling* was in Amoy discharging. The steamer *Undine* left Swatow on the 14th. The crews of the two vessels reported as having been wrecked, and all hands murdered, in Chin-chew Bay some six weeks ago, have been brought safely to Amoy by a brig, which was sent up to look after them. One of the vessels was a small schooner, called the *Sir William Wallace*, and the other a German vessel. Their crews had been robbed and ill-treated, but their lives had been spared.

The loss of the Hanovarian barque *Melchers*, bound to Chefoo, has been reported as on the 27th August, off Shantung. The crew arrived all safely at Chefoo. The building of a light-house in the Kung-Kung Taou Island, at the entrance to that port, has just been commenced.

The *Corrieumbze* put into Hong Kong on the — Sept. in distress. She was bound from Manila to San Francisco.

The present French mail steamer has on board about 1,800 bales silk, also 885 boxes silkworm' eggs.

The *Spray of the Ocean*, noticed in our last as having been taken up to convey coolies to Tahiti, sailed on Sept. 22.

H.M.'s ship *Pelorous* left Amoy for Japan on Sept. 20.

On the subject of the surrender of the Mo Wang, the *Daily Press*, of the 23rd Sept., has the following article:—

We are happy to learn from our own advices that the rendition of the Mo Wang is deemed calculated to create a feeling of unqualified indignation in England. Mr. Mercer we believe is likely to feel the weight of Earl Russell's displeasure for his reprehensible conduct in the matter. We cannot exactly make out what is going to become of him—that he is not to stop here is, we believe, a settled question.

Our contemporary of the *Mail*, after supporting the outrage with very plausible and special arguments, perpetrates a sad collapse in his last issue. He sets forth the following statement:—"It is imperative on our part to state distinctly that the man (Mo Wang) was surrendered on distinct proof of his being a party in a gross state of piracy." If this were true it would doubtless set the question at rest, but it is the very reverse of true. Where a man argues on wrong premises it is folly to attempt any analysis of his deductions, and it becomes necessary to impugn his facts. The charge against the Mo Wang for piracy was sustained by one witness only, and ran to the following tenor and effect. The witness was in a trading vessel on the Yangtsze some three or four years previously, when the Mo Wang, being at the head of a band of men, captured the boat witness was in, and made the crew thereof prisoners. Witness was for some time held to ransom, but as that was not forthcoming, he was allowed, or compelled, to join the band whereof the Mo Wang was chief. In that position he remained for about two years, during which time several towns and cities were attacked and taken. Being at last defeated by the Imperialists, the witness effected his escape.

Now, if this be taken for truth throughout, it simply goes exclusively to prove that the accused was a Taiping chief—nothing more nor less. But we should add, what is beside the question by the way, that the truth of the statement might well be doubted, inasmuch as it was proved that the witness had attempted to extort money from the Mo Wang, and had been forcibly ejected from his shop.

The *Mail*, however, lays down most positively that it matters not whether piracy or rebellion was the charge against the Mo Wang—in either case the British authorities were equally compelled by treaty to surrender him. That there may be no mistake about this startling *dictum* we shall quote our contemporary's words:—"Our opponents should recollect that the Taipings had never accorded to them any political status whatever, and that if the Tien Wang himself had taken refuge in Hong Kong, it would have been nothing more or less than the duty of our local authorities to have given him up."

And has our contemporary become reduced to this sad strait in this important argument? If this were his meaning from the first, why could he not at once say so? He sees that the charge of piracy was in reality one of rebellion, and instead of admitting it, he exclaims in effect, "It's all the same thing."

Why, then, was the man not demanded on a charge of rebellion? Our contemporary's dictum will not hold a drop of water. The clause in the treaty of Tientsin which bears on the point is Art. XXI., which runs thus:—"If criminals subjects of China, shall take refuge in Hong Kong, or on board the British ships there, they shall, upon due requisition by the Chinese authorities, be searched for, and on proof of their guilt, be delivered up."

Dismissing the point of the rendition of the Mo Wang having been demanded on a charge of piracy and made on a charge of rebellion; and giving our contemporary the full advantage of the irregularity, it simply remains for us to point out the fallacy of his dictum, that piracy and rebellion were equally criminal in the case, because, as he avers, no political status had ever been granted to the Taipings.

Our contemporary is entirely mistaken—the same political status was allowed the Taipings by the British Government as was allowed to the Confederate States of America—no more, no less—but precisely the same. A declaration of neutrality was issued in both cases, and that acted alike in each—the one acknowledged the belligerency of the Southern States, the other the belligerency of the Taipings. In neither case was belligerency admitted by any other means, and in both cases was the acknowledgment of a civil government rejected.

Can our contemporary have forgotten the case of the outrage committed on the *Trent*? Messrs. Mason and Slidell, who were taken from that vessel by the *San Jacinto*, were viewed by the British Government as belligerents, whose capture was deemed such a gross violation of the law of nations, that war would assuredly have been declared had they not been surrendered. Yet their belligerency was only based on the proclamation of neutrality—their political status was never admitted any more than was that of the Mo Wang!

Subjoined are the estimates for the year 1866, as published in the *Gazette*:—

PHILIPPINES.

MANILA.

To those interested in the trade of Manila the information contained in the paragraph given below, extracted from *El Porvenir Filipina*, of the 29th of August, cannot fail to be acceptable. We have more than once had occasion to comment on the very imperfect nature of the transit arrangements between this port and Manila; the irregularity and uncertainty that prevailed in the transmission of the mails; the utter absence of any provision for passengers; the difficulties and delays that were perpetually interfering with the plans of our merchants, whether for business or pleasure, which were in any way depending for their success on the possibility of crossing to the Philippines. Such a state of affairs could not but be detrimental to the best interests of Manila, and of Eastern commerce in general, and we hail with pleasure any prospect of an improved mode of steam communication.

We have been informed that a proposition is about to be submitted to the Government for carrying on the mail service by means of a line of merchant steamers running between this city and Hong Kong. If, as we hope, the conditions on which this proposition is founded are such as are to the advantage of the State, which is now incurring great expenses in conveying the correspondence, commercial men will have reason to rejoice when the plan comes into operation, and our brave seamen will be relieved from a very troublesome duty which now falls to them.

The article given below is the first of those we promised to reproduce from the columns of our contemporary, *El Porvenir Filipina*. It will be observed that it treats the subject of trade in a broad and enlightened spirit, speaking in favour of its freedom with "eloquent figures," which indeed demonstrate the writer's arguments very clearly:—

In our first number we promised to devote much of our space to the interests of commerce, the powerful influence of which on the progress of civilisation is generally and justly recognised. To-day, in accordance with that promise, we submit a few considerations on the trade of the ports of Iloilo and Sual, based on figures of the accuracy of which we have no doubt, and which, far better than the most cogent argument, demonstrate the impetus given to the public prosperity in these localities by the wise resolution to throw open to the commercial navies of the world the ports of Iloilo, Sual, Zamboango.

It is a difficult task, when the public Press, in fulfilment of its elevated mission, has in obedience to its convictions and in the best interests of the social body, to initiate reforms which because they are reforms are received with mistrust, and sometimes with that disdainful patronising air that does more than anything else to set mediocre minds against them. But when on the other hand the Press has to deal with accomplished facts, when its arguments are based on the inexpugnable logic of figures, when it has to point to results foretold by it in former time, when the public writer enjoys one of those brief moments of enjoyment the intensity of which compensates entirely for the many disappointments and disagreeables which constitute the life of a public journalist.

(To be continued).

MALACCA STRAITS.

SINGAPORE.

The French mail of the 17th August arrived out on the 21st Sept. The dates are now down to the 30th. The steamer *Reyna* arrived from Manila with dates to the 14th. The steamer *Lightning* left for Hong Kong on the 27th Sept., but put back, owing to a fire on board, produced, it is supposed, by the spontaneous ignition of the cotton. Several chests of opium and a quantity of tin was destroyed. The damage is estimated at $50,000. The vessel was discharged at the Borneo Company's wharf

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

BAUMGARTEN—On the 25th Sept., at Singapore, the wife of Alex. Baumgarten, Esq., of a daughter.

BURROWS—At Hong Kong, on the 8th Sept., the wife of O. H. Burrows, of a son.

LARKEN—At Foochow, on the 3rd Sept., the wife of Thomas Lancaster Larken, Esq. of a son, who survived his birth a few hours only.

OPPERT—At Shanghai, on the 17th Sept., Mrs. E. Oppert, of a daughter.

SMITH—At Fuhchau, on the 9th Sept., the wife of Thomas Smith, of a daughter.

DEATHS.

BIGGS—At the British Consular Gaol, on the 10th Sept., John Biggs, formerly proprietor of the Blackfriars Hotel.

BLACKMORE—On board H.M.S. Melville, on the 21st Sept., Samuel Blackmore, private, Royal Marines, H.M.'s gunboat Acorn.

BREADSMORE—At Hong Kong, on the 10th Sept., Margaret Breadsmore, aged 4 years and 1 month.

BUTTERFIELD—At the General Hospital, Shanghai, on the 6th Sept., of dysentery, Samuel Butterfield, a native of Carolina, U.S.A.

COLLS—On board H.M.S. Conqueror, on the 19th Sept., William Colls, seaman, aged 19 years (consumption).

CONROY—At the General Hospital, Hong Kong, on the 20th Sept., Thomas Conroy, private, 2nd Batt., 11th Regt., aged 23 years.

CONWAY—At Shanghai, on the 4th Sept., of cholera, after a short illness, James Conway, aged 21, of Boston.

CURRAN—At the General Hospital, Hong Kong, on the 21st Sept., John Curran, private, 2nd Batt., 11th Regt., aged 24 years.

DENSIL—At the General Hospital, Hong Kong, on the 19th Sept., Michael Densel, private, 2nd Batt., 11th Regt., aged 29 years.

FRAHILL—On board H.M.S. Melville, on the 21st Sept., Edward Frahill, ordinary seaman, H.M.S. Conqueror.

GROSVENOR—On the 13th Oct., at Clapton, Arthur Wellington Grosvenor, Esq., formerly of Cuba, deeply regretted.

HENDERSON—At Shanghai, on the 7th Sept., Margaret Isabel, only surviving child of the late James Henderson, M.D., F.R.C.S.E., aged 1 year.

HENRY—On the 16th Sept., at Shanghai, Alexander George Henry, Superintendent of the Shanghai Wharf, aged 28.

MACNAIR—On the 30th Oct., at Auchencck, Stirlingshire, James Alexander Macnair, late of Shanghai, second son of the late James Macnair, Esq., of Auchencck, aged 26.

MARTIN—At Shanghai, on the 9th Sept., Susan Martin, of Dumbarton, Scotland, aged 38 years.

MCKINNON—At Shanghai, on the 3rd Sept., of cholera, Mr. John McKinnon, a native of Ayrshire, Scotland, aged 36 years.

MEYER—At the Seamen's Hospital, Hong Kong, on the 21st Sept., Heuer Meyer, seaman, unemployed.

MORRIS—At the North Devon Barracks, Hong Kong, on the 10th Sept., Lieut. Morris, 2nd Batt., 11th Regt., aged 25 years.

NIXON—At the General Hospital, Hong Kong, on the 21st Sept., John Nixon, private, 2nd Batt., 11th Regt., aged 30 years.

ROACH—At the Civil Hospital, Hong Kong, on the 21st Sept., A. Roach, seaman, unemployed.

SATOW—On the 13th Sept., at Shanghai, Mr. Edward Mason Satow, aged 25.

SIMSON—On the 4th Sept., at Yokohama, H. P. Simson, Esq., of Messrs. Alt and Co., of Yokohama and Nagasaki, aged 33.

TOMS—On the 30th Oct., at Ilfracombe, Richard Toms, late of Messrs. Lane, Crawford, and Co., Hong Kong and Shanghai.

WILLIAMS—On the 27th Sept., at the United States Consulate, Yokohama, Japan, Franklin Delano Williams, Vice-Consul of the United States for Hong Kong, aged 44 years.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London: July 26, Thomas Blythe. From Liverpool: 27, Vinco. From Cardiff: 24, Louisa Barrington.

At SHANGHAI.—From London: Sept. 5, Assyrian. From Liverpool: 7, Sea Snake.

At HONG KONG.—From Hamburg: Sept. 14, Picoiola, Bertha.

DEPARTURES.

From SHANGHAI.—None.

From FOOCHOW.—For London: Fi-wan and Berwickshire.

FREIGHTS.

SHANGHAI.—To London, tea, 30s.; silk, £3.

FOOCHOW.—To London, 30s. to £2.

HONG KONG.—To London, tea, £1. 16s. to £2. 7s., per 50 cubic feet. To New York, tea, £2. 10s. specie, per 40 cubic feet, nominal.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months sight.	4s. 7¼d.	4s. 8d. to 4s. 8¼d.
At Shanghai (per Tael.)	6 ditto	6s. 1d.	6s. 2d. to 6s. 3d.
At Canton, At Hong Kong, At Macao	6 ditto	4s. 6d.	4s. 6d. to 4s. 7d.
At Singapore	6 ditto		
At Manila	6 ditto		

At Shanghai, Bills on India, Rs. 296 to 297 per 100 taels. At Hong Kong, Rs. 218 to 219 per $100. Bar Silver at Shanghai, 111 taels; at Hong Kong, 10 per cent. prem. Mexican dollars at Shanghai, taels 73 per 100, and Exchange on Hong Kong, 26 to 27 discount. Hong Kong and Shanghai Bank, 6 prem.; Gas Company, £3 to £4 prem.; Hong Kong and Whampoa Docks.

Subscription 54s. per annum. including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON, SATURDAY, NOV. 4, 1865.

THE SHANGHAI CHAMBER OF COMMERCE.

THE annual meeting of the Shanghai Chamber of Commerce, held on the 23rd of August, is deserving of special notice, the business transacted on that occasion not being of the mere routine character usually occurring. The proceedings commenced with a discussion on the revised rules and regulations lately framed with the view of increasing the usefulness and efficiency of the Chamber; and these were finally adopted in place of the somewhat crude and imperfect code which had, up to that time, but indifferently served its purpose. The members then elected a committee for the ensuing year, after which a resolution was passed by a large majority which is calculated materially to affect the future statistics of the trade, and, we think, in a very favourable manner, as it will undoubtedly ensure greater accuracy in the returns than has hitherto been attainable. The resolution is as follows:—

"That this Chamber is of opinion that it is desirable, for the sake of uniformity in mercantile statistics, that the Tables of Exports compiled in China and Japan should date from January 1st to December 31st of each year, instead of from June 1st to May 31st, as at present. That the Secretary be hereby instructed to alter the statements issued by this Chamber in accordance with this resolution, on January 1st, 1866, and to communicate with the merchants of Japan to ascertain their views as to the change now recommended by this Chamber, which is also considered desirable by the Hong Kong General Chamber of Commerce."

The absurdity of the old system is best shown by its effect on the apparent exports of tea last season, which, as Mr. BRYANS pointed out, were absolutely false, as ships had loaded new season's tea at Foochow before the end of May, while at Canton teas of very early growth were actually shipped to Europe overland in the middle of March. It being clearly impossible to draw a line arbitrarily divding the old from the new season's shipments, it is wise policy to abandon the attempt and date the annual returns from the 1st of January.

But the principal feature of interest in the proceedings was the discussion which arose regarding the interpretation to be put on Article IX. of the Treaty of Tientsin. It runs thus:—

British subjects are hereby authorised to travel, for their pleasure or for purposes of trade, to all parts of the interior, under passports which will be issued by their Consuls, and countersigned by the local authorities. These passports, if demanded, must be produced for examination in the localities passed through. If the passport be not irregular, the bearer will be allowed to proceed, and no opposition shall be offered to his hiring persons or hiring vessels for the carriage of his baggage or merchandise, &c.

On the one hand it is urged that this clause virtually becomes a dead letter, unless it includes the privilege of renting land, building houses, and opening business establishments in the interior; inasmuch as the mere permission to "travel," though doubtless available for purposes of pleasure, can be of comparatively little use for purposes of trade. Against this, however, it is argued that the acquisition of land, and building of houses at any place which such travellers might choose to select, would lead to the formation of embryo settlements, which would sooner or later necessitate the presence of Consuls and the establishment of some means of protection—a measure which was clearly never comtemplated when the Treaty was framed. A resolution was passed, authorising the committee to address a letter to Earl RUSSELL, with the view of ascertaining the interpretation put by Her MAJESTY'S Government on the article; and this must, of course, elicit a reply which will set at rest the doubts at present existing: we do not, however, believe it possible, nor do we think it desirable, that British subjects should, at present, be permitted to erect permanent establishments at places beyond Counsular jurisdiction; and we think that Earl RUSSELL'S decision, when made public, will be found to accord with this opinion.

RAILWAYS IN CHINA.

WE received from our Paris Correspondent, in time for our last impression, a notice of a somewhat curious document, issued by the Board of Arts and Sciences at Peking, to which assembly it would appear that the question of permitting the introduction of railways into the Celestial Empire had been referred. The result of their deliberations is highly satisfactory. The use of steam, they say, is quite devoid of danger to the population, and therefore railways may be introduced without fear of inconvenience; from which it is inferred that concessions for several lines of railway already contemplated will forthwith be granted to European companies. For our own part we are, however, by no means so sanguine, and anticipate much delay before the thin end of the wedge will be got in. The comparatively liberal and enlightened views of the Peking Board, although certainly encouraging, will be of little avail against the stubborn resistance that will be met with among local and provincial authorities. The ice once broken, however, the advantages of railway communication will doubtless so force themselves on the Chinese mind, as to lead by degrees to a proper appreciation of them; but the ice of Chinese apathy and dislike to innovation will, we fear be found very hard to break, and we only hope that the energies of the projectors will not be frozen up in the first attempt.

THE SHANGHAI NOTIFICATION AGAINST THE USE OF FOREIGN VESSELS.

THIS notification, which was inserted in our last issue, was one of those arbitrary and tyrannical measures so frequently put in force by Chinese rulers, and as frequently, when practicable, evaded by their subjects. "Vested interests" are as important and need as much protection in China as in our own country; and it seems that in China they are suffering by the increasing use of foreign vessels made by native merchants, to the exclusion of their own junks, of which, therefore, a less number than usual are available to convey the annual tribute to Peking. It will be observed that we speak in the past tense of this notification, and we are glad to be able to do so, later advices having brought news of its withdrawal. Even had this not occurred we fancy the concluding formula—"let all obey"—would in this case have met with but little regard; the native merchants being far too keenly alive to the advantages of shipping in foreign bottoms to submit tamely to such a prohibition. And as the notification itself has now become a dead letter, it is perhaps hardly worth while to inquire what connection might have existed between it and the step lately taken by the Shanghai Commissioners of Customs relative to the ownership of foreign built vessels by Chinese subjects, to which we took exception at the time.

THE TRANSFER OF THE STRAITS SETTLEMENTS.

SINGAPORE has of late been, metaphorically speaking, "between two stools," and has, for the time at least, "come to the ground." Neglected by the Indian Government, which has for some three years almost ceased to legislate for the Straits Settlements, and not yet formally transferred to the Crown, their interests have suffered more especially in a prospective view. Shortly before the departure of the last mail a special meeting of the Singapore Chamber of Commerce was held, with the view of agitating the question; but it was felt to be a public measure, and, as such, beyond the cognizance of a purely mercantile body, so nothing was attempted. We believe, however, that this anomalous condition of affairs will not be of long duration, as all preliminary arrangements are now completed and the passing of a Bill by which the transfer will be formally recognised, will be accomplished immediately on the meeting of the next session.

THE FRENCH IN SIAM.

IT has seldom been our lot to chronicle a more disgraceful outrage than that of which M. AUBARET, the French Consul at Bangkok, has been guilty. The already unenviable notoriety of that functionary has reached its climax in a series of such acts as can hardly be ascribed to any but a madman—embody-
